## *Notice on the Equipment Name*

The Equipment Name such as Chassis, Terminals described in this manual is for common name. Therefore, for the market, it is necessary to regards as the equipment name described in the table below;

**TableN-1: Equipment Name**

Category	Common Name		For Asia	For Australia
<b>Chassis</b>	CHS2U	→	CHS2U-OT	CHS2U-AU
	CHS2U GW	→	-	CHS2U GW-AU
<b>Blades</b>	CD-CP00	→	CD-CP00-OT	CD-CP00-AU
	PZ-ME50	→	PZ-ME50-OT	PZ-ME50-AU
<b>Terminals</b>	DTL-2E-1()(BK)TEL	→	DTL-2E-1P(BK)TEL	DTL-2E-1A(BK)TEL
	DTL-6DE-1()(BK)TEL	→	DTL-6DE-1P(BK)TEL	DTL-6DE-1A(BK)TEL
	DTL-12D-1()(BK)TEL	→	DTL-12D-1P(BK)TEL	DTL-12D-1A(BK)TEL
	DTL-12D-1()(WH)TEL	→	DTL-12D-1P(WH)TEL	-
	DTL-24D-1()(BK)TEL	→	DTL-24D-1P(BK)TEL	DTL-24D-1A(BK)TEL
	DTL-24D-1()(WH)TEL	→	DTL-24D-1P(WH)TEL	-
	DTL-32D-1()(BK)TEL	→	DTL-32D-1P(BK)TEL	DTL-32D-1A(BK)TEL
	DTL-8LD-1()(BK)TEL	→	DTL-8LD-1P(BK)TEL	DTL-8LD-1A(BK)TEL
	DTL-8LD-1()(WH)TEL	→	DTL-8LD-1P(WH)TEL	-
	DTL-12PA-1()(BK)TEL	→	DTL-12PA-1P(BK)TEL	DTL-12PA-1A(BK)TEL
	DTL-12BT-1()(BK)TEL	→	DTL-12BT-1P(BK)TEL	DTL-12BT-1A(BK)TEL
	ITL-2E-1()(BK)TEL	→	ITL-2E-1P(BK)TEL	ITL-2E-1A(BK)TEL
	ITL-6DE-1()(BK)TEL	→	ITL-6DE-1P(BK)TEL	ITL-6DE-1A(BK)TEL
	ITL-12D-1()(BK)TEL	→	ITL-12D-1P(BK)TEL	ITL-12D-1A(BK)TEL
	ITL-12D-1()(WH)TEL	→	ITL-12D-1P(WH)TEL	-
	ITL-24D-1()(BK)TEL	→	ITL-24D-1P(BK)TEL	ITL-24D-1A(BK)TEL
ITL-24D-1()(WH)TEL	→	ITL-24D-1P(WH)TEL	-	

TableN-1: Equipment Name

Category	Common Name		For Asia	For Australia
<b>Terminals</b>	ITL-32D-1()(BK)TEL	→	ITL-32D-1P(BK)TEL	ITL-32D-1A(BK)TEL
	ITL-8LD-1()(BK)TEL	→	ITL-8LD-1P(BK)TEL	ITL-8LD-1A(BK)TEL
	ITL-8LD-1()(WH)TEL	→	ITL-8LD-1P(WH)TEL	-
	ITL-12PA-1()(BK)TEL	→	ITL-12PA-1P(BK)TEL	ITL-12PA-1A(BK)TEL
	ITL-320C-()(BK)TEL	→	ITL-320C-1P(BK)TEL	ITL-320C-1A(BK)TEL
			ITL-320C-2P(BK)TEL	ITL-320C-2A(BK)TEL
<b>Terminal Options</b>	APR-L() UNIT	→	APR-LP UNIT	APR-LA UNIT
	ADA-L() UNIT	→	ADA-LP UNIT	ADA-LA UNIT
	ILPA-R() UNIT	→	ILPA-RP UNIT	ILPA-RA UNIT
	BCH-L() (BK) UNIT	→	BCH-LP(BK) UNIT	BCH-LA(BK) UNIT
	BHA-L() UNIT	→	BHA-LP UNIT	BHA-LA UNIT
	PSA-L()(BK) UNIT	→	PSA-LP(BK) UNIT	PSA-LA(BK) UNIT
	PSA-L()(WH) UNIT	→	PSA-LP(WH) UNIT	-

## *Chapter 1 Introduction*

Section 1	Before You Start Programming .....	1-1
Section 2	How to Use This Manual .....	1-1
Section 3	How to Enter Programming Mode .....	1-2
Section 4	How to Exit Programming Mode .....	1-3
Section 5	Using Keys to Move Around in the Programs .....	1-4
Section 6	Programming Names and Text Messages .....	1-5
Section 7	Using Softkeys For Programming .....	1-6
Section 8	What the Softkey Display Prompts Mean .....	1-7
Section 9	System Number Plan/Capacities .....	1-8

## *Chapter 2 Programming the UNIVERGE SV8100*

Section 1	Programming Your System .....	2-1
	<b>Program 10 : System Configuration Setup</b>	
	10-01 : Time and Date .....	2-3
	10-02 : Location Setup .....	2-4
	10-03 : ETU Setup .....	2-5
	10-04 : Music On Hold Setup .....	2-17
	10-05 : General Purpose Relay Setup .....	2-19
	10-06: ISDN BRI Setup .....	2-20
	10-07: Conversation Recording Resource (OT) .....	2-21
	10-08 : Pre-Ringing Setup .....	2-22
	10-09 : DTMF and Dial Tone Circuit Setup .....	2-23
	10-12: CD-CP00 Network Setup .....	2-25

---

10-13 : In-DHCP Server Setup .....	2-28
10-14 : Managed Network Setup .....	2-29
10-15 : Client Information Setup .....	2-30
10-16 : Option Information Setup .....	2-31
10-17 : H.323 Gatekeeper Setup .....	2-35
10-18 : H.323 Alias Address Setup .....	2-36
10-19 : VoIP DSP Resource Selection .....	2-37
10-20 : LAN Setup for External Equipment .....	2-38
10-21: CD-CP00 Hardware Setup .....	2-40
10-23 : SIP System Interconnection Setup .....	2-41
10-24 : Daylight Savings Setup .....	2-42
10-25 : H.323 Gateway Prefix Setup .....	2-44
10-26 : IP System Operation Setup .....	2-45
10-27: H.323 System Interconnection w/ Application Setup (OT) .....	2-46
10-28 : SIP System Information Setup .....	2-47
10-29 : SIP Server Information Setup .....	2-49
10-30 : SIP Authentication Information Setup .....	2-52
10-31: Networking Keep Alive Setup (OT) .....	2-53
10-32: Networking Maximum PRI Channel Setup (OT) .....	2-55
10-33 : SIP Registrar/Proxy Information Basic Setup .....	2-56
10-36 : SIP Trunk Registration Information Setup .....	2-57
10-37 : UPnP Setup .....	2-58
10-38 : BGM Resource Setup .....	2-59
10-39 : Fractional Setup .....	2-60
10-40 : IP Trunk Availability .....	2-61
10-41: General Purpose Contact Detector Setup (OT) .....	2-62
10-42 : Virtual Loop Back Port Setting .....	2-63
10-45 : IP Routing Table Setup .....	2-64
10-46 : DT700 Server Information Setup .....	2-66
10-47 : Terminal License Server Information Setup .....	2-69
10-48 : License Activation .....	2-70
10-49 : License File Activation .....	2-71

---

10-50 : License Information .....	2-72
10-51: PRI/T1/E1 Selection of CD-PRTA .....	2-73
10-52 : Free/Demo License Information .....	2-74
10-54 : License Configuration for Each Package .....	2-75
10-55 : Package Network Setup .....	2-76
10-56 : XML Portal IP Phone .....	2-78
10-58: DT700 Internet Local Network Area Setup .....	2-79
10-59: System Configuration Option Setup (OT) .....	2-80

### **Program 11 : System Numbering**

11-01 : System Numbering .....	2-81
11-02 : Extension Numbering .....	2-90
11-04 : Virtual Extension Numbering .....	2-92
11-06 : ACI Extension Numbering .....	2-94
11-07 : Department Group Pilot Numbers .....	2-95
11-08 : ACI Group Pilot Number .....	2-96
11-09 : Trunk Access Code .....	2-97
11-10 : Service Code Setup (for System Administrator) .....	2-99
11-11 : Service Code Setup (for Setup/Entry Operation) .....	2-102
11-12 : Service Code Setup (for Service Access) .....	2-106
11-13 : Service Code Setup (for ACD) .....	2-110
11-14 : Service Code Setup (for Hotel) .....	2-112
11-15 : Service Code Setup, Administrative (for Special Access) .....	2-114
11-16 : Single Digit Service Code Setup .....	2-116
11-17 : ACD Group Pilot Number .....	2-118
11-19: Remote Conference Pilot Number Setup .....	2-119
11-20: Dial Extension Analyse Table .....	2-120

### **Program 12 : Night Mode Setup**

12-01: Night Mode Function Setup .....	2-121
12-02: Automatic Night Service Patterns .....	2-122
12-03: Weekly Night Service Switching .....	2-124
12-04: Holiday Night Service Switching .....	2-125

---

12-05: Night Mode Group Assignment for Extensions .....	2-126
12-06: Night Mode Group Assignment for Trunks .....	2-127
12-07: Text Data for Night Mode .....	2-128
12-08: Night Mode Service Range .....	2-129
<b>Program 13 : Abbreviated Dialing</b>	
13-01: Speed Dialing Option Setup .....	2-131
13-02: Group Speed Dialing Bins .....	2-132
13-03: Speed Dialing Group Assignment for Extensions .....	2-133
13-04: Speed Dialing Number and Name .....	2-134
13-05: Speed Dial Trunk Group .....	2-136
13-07: Telephone Book Dial Number and Name .....	2-137
13-08: Telephone Book System Name .....	2-138
13-09: Telephone Book Group Name .....	2-139
13-10: Telephone Book Routing .....	2-140
<b>Program 14 : Trunk, Basic Setup</b>	
14-01: Basic Trunk Data Setup .....	2-141
14-02: Analog Trunk Data Setup .....	2-148
14-04: Behind PBX Setup .....	2-151
14-05: Trunk Group .....	2-152
14-06: Trunk Group Routing .....	2-153
14-07: Trunk Access Map Setup .....	2-155
14-08: Music on Hold Source for Trunks .....	2-157
14-09: Conversation Recording Destination for Trunks .....	2-158
14-11: ID Setup for IP Trunk .....	2-159
14-12: SIP Register ID Setup for IP Trunk .....	2-160
14-13: CCIS System Route ID .....	2-161
14-14: CCIS Trunk CIC Assignment .....	2-162
14-15: ISDN Call Forward Method .....	2-163
14-16: ISDN Call Transfer Method (OT) .....	2-164
<b>Program 15 : Extension, Basic Setup</b>	
15-01 : Basic Extension Data Setup .....	2-165

---

15-02 : Multiline Telephone Basic Data Setup .....	2-167
15-03 : Single Line Telephone Basic Data Setup .....	2-176
15-05 : IP Telephone Terminal Basic Data Setup .....	2-179
15-06 : Trunk Access Map for Extensions .....	2-186
15-07 : Programmable Function Keys .....	2-187
15-08 : Incoming Virtual Extension Ring Tone Setup .....	2-198
15-09 : Virtual Extension Ring Assignment .....	2-200
15-10 : Incoming Virtual Extension Ring Tone Order Setup .....	2-201
15-11 : Virtual Extension Delayed Ring Assignment .....	2-203
15-12 : Conversation Recording Destination for Extensions .....	2-204
15-13 : Loop Keys (OT) .....	2-205
15-14 : Programmable One-Touch Keys .....	2-206
15-16 : SIP Register ID Setup for Extension .....	2-207
15-17 : CO Message Waiting Indication .....	2-208
15-18 : Virtual Extension Key Enhanced Options .....	2-209
15-19 : System Telephone Book Setup for Extension .....	2-210
15-20 : LCD Line Key Name Assignment .....	2-211
15-22 : Mobile Extension Setup .....	2-212
15-23 : Incoming Virtual Extension Large LED Setup .....	2-214
15-24 : Registration of Standard SIP Terminal .....	2-215
15-25 : DESI-less Page Setup .....	2-216

### **Program 16 : Department Group Setup**

16-01: Department Group Basic Data Setup .....	2-217
16-02: Department Group Assignment for Extensions .....	2-220
16-03: Secondary Department Group .....	2-221
16-04: Call Restriction Between Department Groups .....	2-222

### **Program 20 : System Option Setup**

20-01 : System Options .....	2-223
20-02 : System Options for Multiline Telephones .....	2-225
20-03 : System Options for Single Line Telephones .....	2-229
20-04 : System Options for Virtual Extensions .....	2-231

20-06 : Class of Service for Extensions .....	2-232
20-07 : Class of Service Options (Administrator Level) .....	2-233
20-08 : Class of Service Options (Outgoing Call Service) .....	2-236
20-09 : Class of Service Options (Incoming Call Service) .....	2-239
20-10 : Class of Service Options (Answer Service) .....	2-241
20-11 : Class of Service Options (Hold/Transfer Service) .....	2-243
20-12 : Class of Service Options (Charging Cost Service) .....	2-246
20-13 : Class of Service Options (Supplementary Service) .....	2-247
20-14 : Class of Service Options for DISA/E&M .....	2-253
20-15 : Ring Cycle Setup .....	2-255
20-16 : Selectable Display Messages .....	2-257
20-17 : Operator Extension .....	2-260
20-18 : Service Tone Timers .....	2-261
20-19 : System Options for Caller ID .....	2-263
20-20 : Message Setup for Non-Caller ID Data .....	2-265
20-21 : System Options for Long Conversation .....	2-266
20-22 : System Options for Wireless – DECT Service .....	2-267
20-23 : System Options for CTI .....	2-268
20-25 : ISDN Options .....	2-269
20-26: Multiplier for Charging Cost .....	2-271
20-28 : Trunk to Trunk Conversation .....	2-272
20-29 : Timer Class for Extension .....	2-273
20-30 : Timer Class for Trunks .....	2-274
20-31 : Timer Class Timer Assignment .....	2-275
20-34: Remote Conference Group Setup .....	2-279
20-35 : Extension’s Operator Setting .....	2-281
20-36 : Trunk’s Operator Setting .....	2-282
20-37 : Operator Extension Group Setup .....	2-283
20-38 : Operator Group Setting .....	2-284

### **Program 21 : Outgoing Call Setup**

21-01 : System Options for Outgoing Calls .....	2-285
21-02 : Trunk Group Routing for Extensions .....	2-289

---

21-03 : Trunk Group Routing for Trunks .....	2-290
21-04 : Toll Restriction Class for Extensions .....	2-291
21-05 : Toll Restriction Class .....	2-292
21-06 : Toll Restriction Table Data Setup .....	2-297
21-07 : Toll Restriction Override Password Setup .....	2-299
21-08 : Repeat Dial Setup .....	2-300
21-09 : Dial Block Setup .....	2-301
21-10 : Dial Block Restriction Class Per Extension .....	2-302
21-11 : Extension Ringdown (Hotline) Assignment .....	2-303
21-12 : ISDN Calling Party Number Setup for Trunks .....	2-304
21-13 : ISDN Calling Party Number Setup for Extensions .....	2-305
21-14 : Walking Toll Restriction Password Setup .....	2-306
21-15 : Individual Trunk Group Routing for Extensions .....	2-307
21-16: Trunk Group Routing for Networks (OT) .....	2-308
21-17 : IP Trunk (SIP) Calling Party Number Setup for Trunk .....	2-309
21-18: IP Trunk (H.323) Calling Party Number Setup for Extension .	2-310
21-19 : IP Trunk (SIP) Calling Party Number Setup for Extension ....	2-311
21-21 : Toll Restriction for Trunks (Seized Trunk Basis Setting) .....	2-312
21-22 : CO Message Waiting Indication – Call Back Settings .....	2-313
21-24: Forced Access Dial Data .....	2-314

### **Program 22 : Incoming Call Setup**

22-01: System Options for Incoming Calls .....	2-315
22-02: Incoming Call Trunk Setup .....	2-317
22-03: Trunk Ring Tone Range .....	2-319
22-04: Incoming Extension Ring Group Assignment .....	2-321
22-05: Incoming Trunk Ring Group Assignment .....	2-322
22-06: Normal Incoming Ring Mode .....	2-323
22-07: DIL Assignment .....	2-324
22-08: DIL/IRG No Answer Destination .....	2-325
22-09: DID Basic Data Setup .....	2-326
22-10: DID Translation Table Setup .....	2-328
22-11: DID Translation Number Conversion .....	2-330

22-12: DID Intercept Ring Group .....	2-335
22-13: DID Trunk Group to Translation Table Assignment .....	2-337
22-14: VRS Delayed Message for IRG .....	2-338
22-15: VRS Delayed Message for Department Group .....	2-340
22-16: Private Call Refuse Target Area Setup .....	2-342
22-17: Dial-In Conversion Table Area Setup for Time Pattern .....	2-343
22-18: Private Call Assignment Setup .....	2-344
22-19: DID MFC Dialing Options (OT) .....	2-345
22-20: Flexible Ringing by Caller ID Setup .....	2-346
 <b>Program 23 : Answer Features Setup</b>	
23-02: Call Pickup Groups .....	2-347
23-03: Universal Answer/Auto Answer .....	2-348
23-04: Ringing Line Preference for Virtual Extensions .....	2-350
 <b>Program 24 : Hold/Transfer Setup</b>	
24-01 : System Options for Hold .....	2-351
24-02 : System Options for Transfer .....	2-353
24-03 : Park Group .....	2-355
24-04 : Automatic Trunk-to-Trunk Transfer Target Setup .....	2-356
24-05 : Department Group Transfer Target Setup .....	2-357
24-09 : Call Forward Split Settings .....	2-358
 <b>Program 25 : VRS/DISA Setup</b>	
25-01 : VRS/DISA Line Basic Data Setup .....	2-361
25-02 : DID/DISA VRS Message .....	2-362
25-03 : VRS/DISA Transfer Ring Group With Incorrect Dialing .....	2-363
25-04 : VRS/DISA Transfer Ring Group With No Answer/Busy .....	2-364
25-05 : VRS/DISA Error Message Assignment .....	2-365
25-06 : VRS/DISA One-Digit Code Attendant Setup .....	2-366
25-07 : System Timers for VRS/DISA .....	2-368
25-08 : DISA User ID Setup .....	2-370
25-09 : Class of Service for DISA Users .....	2-371
25-10 : Trunk Group Routing for DISA .....	2-372

---

25-11 : DISA Toll Restriction Class .....	2-373
25-12 : Alternate Trunk Group Routing for DISA .....	2-374
25-13 : System Option for DISA .....	2-375
25-15: DUD/DISA Transfer Target Setup .....	2-376
<b>Program 26 : ARS Service &amp; Least Cost Routing</b>	
26-01 : Automatic Route Selection Service .....	2-377
26-02 : Dial Analysis Table for ARS/LCR .....	2-379
26-03 : ARS Dial Treatments .....	2-381
26-04 : ARS Class of Service .....	2-383
26-05: LCR Carrier Table .....	2-384
26-06: LCR Authorisation Code Table .....	2-385
26-07: LCR Cost Centre Code Table .....	2-386
26-08: LCR Manual Override Access Code Table .....	2-387
26-09: LCR Manual Override Exemption Table .....	2-388
26-11 : Transit Network ID Table .....	2-389
26-12: Network Specific Parameter Table for ARS .....	2-390
<b>Program 30 : DSS/DLS Console Setup</b>	
30-01: DSS Console Operating Mode .....	2-391
30-02: DSS Console Extension Assignment .....	2-392
30-03: DSS Console Key Assignment .....	2-393
30-04: DSS Console Alternate Answer .....	2-401
30-05: DSS Console Lamp Table .....	2-402
30-10: DSS Console IP Terminal Setup .....	2-404
<b>Program 31 : Paging Setup</b>	
31-01 : System Options for Internal/External Paging .....	2-405
31-02 : Internal Paging Group Assignment .....	2-407
31-03 : Internal Paging Group Settings .....	2-408
31-04 : External Paging Zone Group .....	2-411
31-05 : Universal Night Answer/Ring Over Page .....	2-412
31-06 : External Speaker Control .....	2-413
31-07 : Combined Paging Assignments .....	2-415

31-08 : BGM on External Paging .....	2-416
<b>Program 32 : Door Box and Sensor Setup</b>	
32-01: Door Box Timers Setup .....	2-417
32-02: Door Box Ring Assignment .....	2-418
32-03: Door Box Basic Setup .....	2-419
32-04: Door Box Name Setup .....	2-420
<b>Program 33 : CTA and ACI Setup</b>	
33-01: ACI Port Type Setup .....	2-421
33-02: ACI Department Calling Group .....	2-422
<b>Program 34 : Tie Line Setup</b>	
34-01: E&M Tie Line Basic Setup .....	2-423
34-02: E&M Tie Line Class of Service .....	2-425
34-03: Trunk Group Routing for E&M Tie Lines .....	2-426
34-04: E&M Tie Line Toll Restriction Class .....	2-427
34-05: Tie Line Outgoing Call Restriction .....	2-428
34-06: Add/Delete Digit for E&M Tie Line .....	2-429
34-07: E&M Tie Line Timer .....	2-430
34-08: Toll Restriction Data for E&M Tie Lines .....	2-431
34-09: ANI/DNIS Service Options .....	2-432
34-11: E1 Trunk Basic Setup (OT) .....	2-435
<b>Program 35 : SMDR Account Code Setup</b>	
35-01: SMDR Options .....	2-437
35-02: SMDR Output Options .....	2-439
35-03: SMDR Port Assignment for Trunk Group .....	2-442
35-04: SMDR Port Assignment for Department Groups .....	2-443
35-05: Account Code Setup .....	2-444
35-06: Verified Account Code Table .....	2-446
<b>Program 40 : Voice Recording System</b>	
40-04: Live Recording Setup .....	2-447
40-07: Voice Prompt Language Assignment for VRS .....	2-448

---

40-10: Voice Announcement Service Option .....	2-450
40-11: Preamble Message Assignment .....	2-452

**Program 41 : ACD Setup**

41-01: System Options for ACD .....	2-453
41-02: ACD Group and Agent Assignments .....	2-454
41-03: Incoming Ring Group Assignment for ACD Group .....	2-455

# Introduction

## SECTION 1 BEFORE YOU START PROGRAMMING

Before customizing your system be sure to read this chapter first.

This chapter provides you with detailed information about the system programs. By changing a program, you change the way the feature associated with that program works. In this chapter, you find out about each program, the features that the program affects and how to enter the program data into system memory.

This Manual is created for Australia and General Overseas. Some of the features and programs apply only to certain regions. Features marked with **(AU)** apply only for Australia. Features marked with **(OT)** apply for General Overseas.

## SECTION 2 HOW TO USE THIS MANUAL

This section lists each program in numerical order. For example, Program 10-01 is at the beginning of the section and Program 92-01 is at the end. The information on each program is subdivided into the following headings:

**Description** describes what the program options control. The Default Settings for each program are also included. When you first install the system, it uses the Default Setting for all programs. Along with the Description are the **Conditions** which describe any limits or special considerations that may apply to the program.

The reverse type (white on black) just beneath the Description heading is the program access level. You can only use the program if your access level meets or exceeds the level the program requires. Refer to [Section 3 How to Enter Programming Mode on page 1-2](#) for a list of the system access levels and passwords.

**Feature Cross Reference** provides you with a table of all the features affected by the program. You will want to keep the referenced features in mind when you change a program. Customizing a feature may have an effect on another feature that you did not intend.

**Telephone Programming Instructions** shows how to enter the program data into system memory. For example:

1. Enter the programming mode.
2. 15-07-01

```

15-07-01 TEL
KY01 = *01
←           →

```

tells you to enter the programming mode, dial 150701 from the telephone dial pad. After you do, you will see the message “15-07-01 TEL” on the first line of the telephone display. This indicates the program number (15-07), item number (01), and that the options are being set for the extension. The second row of the display “KY01 = \*01” indicates that Key 01 is being programmed with the entry of \*01. The third row allows you to move the cursor to the left or right, depending on which arrow is pressed. To learn how to enter the programming mode, refer to [Section 3 How to Enter Programming Mode](#) below.

## SECTION 3 HOW TO ENTER PROGRAMMING MODE

**To enter programming mode:**

1. Go to any working display telephone.
  -  *In a newly installed system, use extension (port 1).*
2. *Do not* lift the handset.
3. Press **Speaker**.
4. **# \* # \* .**

**Password**

5. Dial the system password + **Transfer**. Refer to the following table for the default system passwords. To change the passwords, use [90-02: Programming Password Setup](#).

Password	User Name	Level	Programs at this Level
*****	nec-i	1(MF)	Manufacture Level (MF) 20-12(AU),40-04(AU), 40-07, 80-02(OT), 80-11(OT), 81-04, 81-05, 82-01(AU), 82-03(AU), 82-04(AU), 82-05, 82-08
12345678	tech	2 (IN)	Installation (IN): All programs in this section not listed for MF, SA, & SB
0000	ADMIN1	3 (SA)	System Administrator – Level 1 (SA): 10-01, 10-02, 10-12, 10-13, 10-14, 10-15, 10-16, 10-17, 10-18, 10-23, 10-24, 10-25, 10-27(OT), 10-28, 10-29, 12-02, 12-03, 12-04, 12-08, 15-01, 15-07, 15-09, 15-10, 15-11, 20-16, 20-34 21-07, 21-14, 22-04, 22-11, 22-17, 25-08, 30-03, 30-04, 32-02, 41-02, 41-03, 41-04, 41-05, 41-06, 41-07, 41-08, 41-09, 41-10, 41-11, 41-12, 41-13, 41-14, 41-15, 41-16, 41-17, 41-18, 41-19, 41-20, 45-02, 84-22, 90-03, 90-04, 90-06, 90-07, 90-19, 90-57, 90-58, 90-59, 90-65
9999	ADMIN2	4 (SB)	System Administrator – Level 2 (SB): 13-04, 13-05, 15-14

## SECTION 4 HOW TO EXIT PROGRAMMING MODE

### To-exit the programming mode:

When you are done programming, you must be out of a program option to exit (pressing the **Answer** key will exit the program option).

1. Press **Answer** key to exit the program options, if needed.

**Program Mode**  
**Base Service OP1 OP2**

2. Press **Speaker**. If changes were made to the system programming, "Saving System Data" is displayed.
3. The display shows "Complete Data Save" when completed and exits the telephone to an idle mode.

 *To save a customer's database, a blank USB Drive is required. Insert the USB Drive into the CD-CP00 and, using Program 90-03, save the software to the USB Drive. (Program 90-04 is used to reload the customer data if necessary.) Note that a USB Drive can only hold one customer database. Each database to be saved requires a separate drive.*

## SECTION 5 USING KEYS TO MOVE AROUND IN THE PROGRAMS

Once you enter the programming mode, use the keys in the following chart to enter data, edit data and move around in the menus.

**Table 1-1 Keys for Entering Data**

<b>Keys for Entering Data</b>	
<b>Use this key...</b>	<b>When you want to...</b>
<b>0~9 and *</b>	Enter data into a program.
<b>Transfer</b>	Complete the programming step you just made (e.g., pressing <b>Enter</b> on a PC keyboard). When a program entry displays, press <b>Transfer</b> to bypass the entry without changing it.
<b>Recall</b>	Delete the entry to the left (e.g., pressing <b>Backspace</b> on a PC keyboard).
<b>Hold</b>	Delete or clear all characters to the right of the cursor.
<b>Answer</b>	Exit one step at a time from the program window currently being viewed.  For example, if programming item 5 in 15-03, pressing <b>Answer</b> allows you to enter a new option in program 15-03. Pressing <b>Answer</b> again allows you to select a new program in the 15-XX series. Pressing <b>Answer</b> a third time allows you to enter a new program beginning with <b>1</b> . Pressing <b>Answer</b> one last time brings you to the beginning program display, allowing you to enter any program number.
<b>MIC</b>	Switch between the different input data fields by pressing <b>MIC</b> . The cursor moves up to the top row of the display. Pressing <b>MIC</b> again moves the cursor back to the middle row.
<b>LINE KEYS</b>	Use pre-programmed settings to help with the program entry. These settings vary between programs from LINE 1 = 0 (off) and LINE 2 = 1 (on) to preset values for timers where LINE 1 = 5, LINE 2 = 10, LINE 3 = 15, etc.  For programs with this option, the line key, which currently matches the programmed setting, lights steady.  The display can also indicate Softkey, which will allow you to select the values as well (-1 and +1 will step through these pre-programmed settings.)
<b>LINE KEY 1</b>	Program a pause into a Speed Dialing bin.
<b>LINE KEY 2</b>	Program a recall/flash into a Speed Dialing bin.
<b>LINE KEY 3</b>	Program an @ into a Speed Dialing bin.

**Table 1-1 Keys for Entering Data (Continued)**

Keys for Entering Data	
Use this key...	When you want to...
<b>VOL ▲</b>	Scroll backward through a list of entry numbers (e.g., from extension etc.) or through entries in a table (e.g., Common Permit Table). If you enter data and then press this key, the system accepts the data before scrolling forward.
<b>VOL ▼</b>	Scroll forward through a list of entry numbers (e.g., from extension etc.) or through entries in a table (e.g., Common Permit Table). If you enter data and then press this key, the system accepts the data before scrolling backward.

## SECTION 6 PROGRAMMING NAMES AND TEXT MESSAGES

Several programs (e.g., Program 20-16 : Selectable Display Messages) require you to enter text. Use the following chart when entering and editing text. When using the keypad digits, press the key once for the first character, twice for the second character, etc. For example, to enter a C, press the key **2** three times. Press the key six times to display the lower case letter. The name can be up to 12 digits long.

**Table 1-2 Keys for Entering Names**

Use this keypad digit . . .	When you want to . . .
<b>1</b>	Enter characters: 1 @ [ ¥ ] ^ _ ` {   } Æ " Á À Â Ã Ç É Ê ì ó
<b>2</b>	Enter characters: <b>A-C, a-c, 2.</b>
<b>3</b>	Enter characters: <b>D-F, d-f, 3.</b>
<b>4</b>	Enter characters: <b>G-I, g-i, 4.</b>
<b>5</b>	Enter characters: <b>J-L, j-l, 5.</b>
<b>6</b>	Enter characters: <b>M-O, m-o, 6.</b>
<b>7</b>	Enter characters: <b>P-S, p-s, 7.</b>
<b>8</b>	Enter characters: <b>T-V, t-v, 8.</b>
<b>9</b>	Enter characters: <b>W-Z, w-z, 9.</b>
<b>0</b>	Enter characters: 0 ! “ # \$ % & ’ ( ) ô Õ ú ä ö ü α ε θ

**Table 1-2 Keys for Entering Names**

Use this keypad digit . . .	When you want to . . .
<b>*</b>	Enter characters: <b>* + , - . / : ; &lt; = &gt; ? π Σ σ Ω ∞ ϕ £</b>
<b>#</b>	<b>#</b> = Accepts an entry (only required if two letters on the same key are needed – ex: TOM). Pressing <b>#</b> again = Space. (In system programming mode, use the right arrow Softkey instead to accept and/or add a space.)
<b>Recall</b>	Clear the character entry one character at a time.
<b>Hold</b>	Clear all the entries from the point of the flashing cursor and to the right.

## SECTION 7 USING SOFTKEYS FOR PROGRAMMING

Each UNIVERGE SV8100 display telephone provides interactive Softkeys for intuitive feature access. The options for these keys will automatically change depending on where you are in the system programming. Simply press the Softkey located below the option you wish and the display will change accordingly.

Pressing the VOLUME ▲ or VOLUME ▼ will scroll between the menus.

## SECTION 8 WHAT THE SOFTKEY DISPLAY PROMPTS MEAN

When using a display telephone in programming mode, various Softkey options are displayed. These keys will allow you to easily select, scan, or move through the programs.

**Table 1-3 Softkey Display Prompts**

Softkey Display Prompts	
If you press this Softkey . . .	The system will. . .
back	Go back one step in the program display. You can press VOLUME ▲ or VOLUME ▼ to scroll forward or backward through a list of programs.
↑	Scroll down through the available programs.
↓	Scroll up through the available programs.
select	Select the currently displayed program.
←	Move the cursor to the left.
→	Move the cursor to the right.
-1	Move back through the available program options.
+1	Move forward through the available program options.

## SECTION 9 SYSTEM NUMBER PLAN/CAPACITIES

 The following table provides the capacities for the UNIVERGE SV8100 system.

**Table 1-4 System Number Plan/Capacities**

System Number Plan/Capacities	
System Type	Number Plan/Capacities
<b>System</b>	
Analog Caller ID Detector (detected by DSP)	32/64 channels
Classes of Service	15
Day/Night Mode Numbers	8
Day/Night Service Patterns	32
Dial Tone Detector DTMF Receiver	64
Toll Restriction Classes	15
Verifiable Account Code Table	2000
<b>Trunk</b>	
Trunk Port Number	200
Trunk Ports (Total):	200
o Analog Trunks	184
o BRI Trunk Ports	184
o T1/E1/PRI Trunk Ports	200
o E&M Analog Trunk Ports	92
o DID Analog Trunk Ports	92
o VoIP Trunk Ports	200
DID Translation Tables	20
DID Translation Table Entries	2000
DISA:	
o Classes of Service	15
o Users	15
Ring Groups	100
Tie Line Classes of Service	15
Tie Line Toll Restriction Classes	15
Trunk Access Maps	200
Trunk Group Numbers	100
Trunk Routes	100

**Table 1-4 System Number Plan/Capacities (Continued)**

System Number Plan/Capacities	
System Type	Number Plan/Capacities
<b>Extension</b>	
Telephone Extension Ports	512
○ Multiline Terminals	368
○ Single Line Phones/Analog Devices	368
○ VoIP Extensions	512
○ SIP DECT Wireless	504
DLCA:	
○ Physical Ports	01~16
LCA:	
○ Physical Ports	01~16
Telephone Extension Number Range	1~89999999* (*Extension cannot start with 0 or 9)
Virtual Extension Ports	256
Virtual Extension Number Range	1~89999999* (*Extension cannot start with 0 or 9)
PGD Adapter	56
ADA (Recording Jack) Adapters	240
UNIVERGE SV8100 Wireless – SIP DECT Access Points	Unlimited
Door Boxes	8
Door Box Numbers	1~8
DSS Consoles Numbers:	
○ 60 Button DSS Console	32
Operator Access Number	0 (Default)
Operator Extension	15
Ringdown Assignments	512
SLT Adapters (OT)	16
HF-R Adapters	240

**Table 1-4 System Number Plan/Capacities (Continued)**

<b>System Number Plan/Capacities</b>	
<b>System Type</b>	<b>Number Plan/Capacities</b>
<b>Speed Dialing</b>	
Speed Dialing Groups	64
Speed Dialing Bins	0~1999
Speed Dialing Table-Common	1000
<b>ACD</b>	
ACD Groups	64
ACD Agent Extensions	512
<b>ACI</b>	
ACI Groups	16
ACI Ports	96
<b>Automated Attendant</b>	
VRS Message Numbers	1~100
<b>Conference</b>	
Conference Circuits	64 - maximum (32 Parties Per Conference)
<b>Data Communication Interfaces</b>	
APR Software Port Numbers	449~512
APA Adapters	240
APR Adapters	240
CTA or CTU Adapters	32 (Only works with Dterm Series i telephones)
<b>Department and Pickup Groups</b>	
Department (Extension) Group Numbers	1~64
Call Pickup Group Numbers	1~64
<b>Hotline</b>	
Internal Hotline	512
External Hotline	512

Programming Passwords:	
Level 1 (MF) PCPro/WebPro User Name:	***** <b>nec-i</b>
Level 2 (IN) PCPro/WebPro User Name:	12345678 <b>tech</b>

Note 1: The PZ-VM21 supports up to 16 ports and they are shared by the VM8000 InMail and VRS.

Note 2: The maximum number of VOIP DSP Resources depend on which PZ-IPLA is installed.

**Table 1-4 System Number Plan/Capacities (Continued)**

System Number Plan/Capacities	
System Type	Number Plan/Capacities
Level 3 (SA) PCPro/WebPro User Name:	0000 <b>ADMIN1</b>
Level 4 (SB) PCPro/WebPro User Name:	9999 <b>ADMIN2</b>
Programming Password Users	8
Extension numbers can be one to eight digits long. Refer to the Flexible System Numbering feature in the UNIVERGE SV8100 Features and Specifications Manual.	

 *SV8100 needs Power Calculation depending on the system configuration.*

# Programming the UNIVERGE SV8100

## SECTION 1 PROGRAMMING YOUR SYSTEM

This chapter provides information necessary to properly program your UNIVERGE SV8100 system.

The programming blocks are organized into the following programming modes.

**Table 2-1 Programming Modes**

<b>Program Number: Program Name</b>
Program 10 : System Configuration Setup
Program 11 : System Numbering
Program 12 : Night Mode Setup
Program 13 : Abbreviated Dialing
Program 14 : Trunk, Basic Setup
Program 15 : Extension, Basic Setup
Program 16 : Department Group Setup
Program 20 : System Option Setup
Program 21 : Outgoing Call Setup
Program 22 : Incoming Call Setup
Program 23 : Answer Features Setup
Program 24 : Hold/Transfer Setup
Program 25 : VRS/DISA Setup
Program 26 : ARS Service & Least Cost Routing
Program 30 : DSS/DLS Console Setup
Program 31 : Paging Setup

**Table 2-1 Programming Modes (Continued)**

<b>Program Number: Program Name</b>
Program 32 : Door Box and Sensor Setup
Program 33 : CTA and ACI Setup
Program 34 : Tie Line Setup
Program 35 : SMDR Account Code Setup
Program 40 : Voice Recording System
Program 41 : ACD Setup
Program 42 : Hotel Setup
Program 44 : ARS/F-Route Setup
Program 45 : Voice Mail Integration
Program 47 : InMail
Program 50 : Common Channel Interoffice Signaling Service (CCIS)
Program 51 : NetLink Service
Program 80 : Basic Hardware Setup for System
Program 81 : Basic Hardware Setup for Trunk
Program 82 : Basic Hardware Setup for Extension
Program 84 : Hardware Setup for VoIP
Program 85 : Hardware Setup for ETIA Switch (AU Only)
Program 90 : Maintenance Program
Program 92 : Copy Program

# Program 10 : System Configuration Setup

## 10-01 : Time and Date

Level:  
SA

Program

10

### Description

Use **Program 10-01: Time and Date** to change the system Time and Date through system programming. Extension users can also dial Service Code 828 (OT)/ 728 (AU) to change the time if allowed by an extension Class of Service.

### Input Data

Item No.	Item	Input Data	Default	Description
01	Year	07~96	No Setting	Enter 2 digits for year (07~96).
02	Month	01~12	No Setting	Enter 2 digits (01~12) for the month.
03	Day	01~31	No Setting	Enter 2 digits (01~31) for the day.
04	Week	1~7 (Sun~Sat)	No Setting	Enter digit for the day of the week (1=Sunday, 7=Saturday).
05	Hour	00~23	No Setting	Enter 2 digits for the hour (00~23).
06	Minute	00~59	No Setting	Enter 2 digits for the minute (00~59).
07	Second	00~59	No Setting	Enter 2 digits for the second (00~59).

### Conditions

None

### Feature Cross Reference

- Clock/Calendar Display

# Program 10 : System Configuration Setup

## 10-02 : Location Setup

**Level:**  
**SA**

### Description

Use **Program 10-02 : Location Setup** to define the location of the installed system.

### Input Data

Item No.	Item	Input Data	Default	Description
01	<b>Country Code</b>	Dial (up to four digits): 0~9, *, #	No setting (OT) 61 (AU)	Enter the country code.
02	<b>International Access Code</b>	Dial (up to four digits): 0~9, *, #	00	Enter the international access code.
03	<b>Other Area Access Code</b>	Dial (up to two digits): 0~9, *, #	0	Enter the other area access code
04	<b>Area Code</b>	Dial (up to six digits): 0~9, *, #	No setting	Enter the local area code.
05	<b>Trunk Access Code</b>	Dial (up to eight digits): 0~9, *, #	No setting	Enter the trunk access code digits required to place an outgoing call.

### Conditions

None

### Feature Cross Reference

None

# Program 10 : System Configuration Setup

## 10-03 : ETU Setup

Level:  
IN

### Description

Use **Program 10-03 : ETU Setup** to setup and confirm the Basic Configuration data for each blade. When changing a defined terminal type, first set the type to 0 and then plug the new device in to have the system automatically define it or you may have to reset the blade.

 The items highlighted in gray are read only and cannot be changed.

### Input Data

#### For CNF PKG Setup

Physical Port Number	01~16
----------------------	-------

Item No.	Item	Input Data	Default
01	Logical Port Number	0~256	0

#### For DLCA PKG Setup

Physical Port Number	01~16
----------------------	-------

Item No.	Item	Input Data	Default
01	Terminal Type (B1)	0 = Not set 1 = Multiline Terminal 2 = SLT Adapter (OT) 3 = Bluetooth Cordless Handset 6 = PGD Adapter (Paging) 7 = PGD Adapter (Tone Ringer) 8 = PGD Adapter (Door Box) 9 = PGD Adapter (ACI) 10 = DSS Console 11 = --- Not Used ---	0

Item No.	Item	Input Data	Default
02	<b>Logical Port Number (B1)</b>	0 = Not set 1 = Multiline Terminal (1~512) 2 = SLT Adapter (OT) (1~512) 3 = BCH (Bluetooth Cordless Handset) (1~512) 6 = PGD Adapter (Paging) (1~8) 7 = PGD Adapter (for Tone Ringer) (1~8) 8 = PGD Adapter (for Door Box) (1~8) 9 = PGD Adapter (for ACI) (1~96) 10 = DSS (1~32)	0
03	<b>Additional Data</b>	0 = None 3 = Bluetooth Cordless Handset: 01-16	0
04	<b>Optional Installed Unit 1 (Only applies to Aspire style telephones)</b>	0 = None 1 = APR Module 2 = APA Module 3 = ADA Module 4 = CTA/CTU Module	0
05	<b>Optional Installed Unit 2</b>	0 = None 1 = APR Module 2 = APA Module 3 = ADA Module 4 = CTA/CTU Module	0

<b>B-Channel 2</b>			
Item No.	Item	Input Data	Default
06	<b>Terminal Type (B2)</b>	0 = Not set 6 = PGD Adapter (Paging) 7 = PGD Adapter (Tone Ringer) 8 = PGD Adapter (Door Box) 9 = PGD Adapter (ACI) 12 = APR (B2 Mode)	0
07	<b>Logical Port Number (B2)</b>	0 = Not set 6 = PGD Adapter (Ext. Speaker) 7 = PGD Adapter (Paging/Tone Ringer) = (1~8) 8 = PGD Adapter (for Door Box) = (1~8) 9 = PGD Adapter (ACI) = (1~96) 12 = APR (for B2 mode) (193~512)	0

08	<b>Multiline Telephone Type</b>	0 = DT3** 1 = $D^{term} 8$ 2 = $D^{term} 7$	0
09	<b>Side Option Information</b>	0 = No option 1 = 8LK Unit 2 = 16LK Unit 3 = 24ADM	0
10	<b>Bottom Option Information (Only applies to DTL-style telephones)</b>	0 = No option 1 = APR 2 = ADA 3 = BHA	0
11	<b>Handset Option Information</b>	0 = No option 1 = PSA/PSD 2 = Bluetooth Cordless Handset	0

**For LCA PKG Setup**

Physical Port Number	01~16
----------------------	-------

Item No.	Item	Input Data	Default
01	<b>Logical Port Number</b>	0~512	0
03	<b>Transmit Gain Level (S-Level)</b>	1~63 (-15.5 +15.5dB)	32 (0dB)
04	<b>Receive Gain Level (R-Level)</b>	1~63 (-15.5 +15.5dB)	32 (0dB)

**For COTA Unit Setup**

Physical Port Number	1~8
----------------------	-----

Item No.	Item	Input Data	Default
01	<b>Logical Port Number</b>	0~200	0

**For ODTA PKG Setup**

Physical Port Number	01~04
----------------------	-------

Item No.	Item	Input Data	Default
01	Logical Port Number	0~200	0
02	2/4 Wire	0 = 2 Wire 1 = 4 Wire	1
03	E&M Line Control Method	0 = TYPE I 1 = TYPE V	1

**For DIOP PKG Setup**

Physical Port Number	01~04
----------------------	-------

Item No.	Item	Input Data	Default
01	LD/OPX Specification	0 = LD Trunk 1 = OPX	0 (OT) 1(AU)
02	Logical Port Number	0 = 1~200 (LD Trunk) 1 = 1~256 (OPX)	0

## For BRIA PKG Setup

Item No	Item	Input Data	Default
	ISDN Line Number	01~04	
01	<b>ISDN Line Mode</b>	0 = No setting 1 = T-Point 2 = S-Point (OT) 3 = NW Mode (Leased Line) (OT) 4 = NW Mode (Interconnected Line) (OT) 5 = NW Mode (Interconnected Line, Fixed Layer1=NT) (OT) 6 = S-Point (Leased Line) (OT)	1
02	<b>Logical Port Number</b>  <i>The starting port number of a BRI line is displayed. Two logic ports are automatically assigned to a BRI line.</i>	[0:No setting] = 0 [1:T-Point] = 1-200 [2:S-Point] = 1-512 (OT) [3:NW Mode (Leased Line)] = 0 (OT) [4:NW Mode (Interconnected Line)] = 0 (OT) [5:NW Mode (Interconnected Line, Fixed Layer1=NT)] = 0 (OT) [6:S-Point (Leased Line)] = 1-512 (OT)	0
03	<b>Connection Type</b>	0 = Point-to-Multipoint 1 = Point-to-Point	0
04	<b>Layer 3 Timer Type</b>  <i>Each timer value of Layer 3 is set up for every type using Program 81-06 (T-Bus).</i>	1~5	1
05	<b>CLIP Information Announcement</b> Based on this setting, the system includes a Presentation Allowed (1) or Presentation Restricted (0) in the Setup message to allow or deny the Calling Party Number. Program 15-01-04 must also be set to 1 if this option is enabled.	0 = No 1 = Yes	1
06	<b>Connection Bus Mode</b>	0 = Extended passive bus 1 = Short passive bus	0
07	<b>S-point DDI digits</b>	0 - 4	0
08	<b>Dial Sending Mode</b> ISDN Protocol definition	0 = Enblock Sending 1 = Overlap Sending	1
09	<b>Dial Information Element</b> ISDN Protocol definition [Only when Dialing Sending Mode (10-03-08) is set for 1 (Overlap Sending)]	0 = Keypad Facility 1 = Called Party Number	1

Item No	Item	Input Data	Default
10	<b>Master/Slave System (OT)</b> If set to 0, system is synchronized to network clock. If set to 1, system is not synchronized to the network clock.	0 = Slave System 1 = Master System	0
11	<b>Networking System No. (OT)</b>	0 - 50	0
14	<b>Service Protocol for S-point</b>	0 = Keypad facility 1 = Specified Protocol for Aspire system	0
15	<b>Call Busy Mode for S-point</b>	0 = Alerting 1 = Disconnect	0
17	<b>ISDN Line Ringback Tone</b> If Telco does not provide ringback tone, SV8100 can if set to 1:Enable.	0 = Disable 1 = Enable	0
18	<b>Type of Number</b> ISDN Protocol definition	0 = Unknown 1 = International number 2 = National number 3 = Network specific number 4 = Subscriber number 5 = Abbreviated number	0
19	<b>Numbering Plan Identification</b> ISDN Protocol definition	0 = Unknown 1 = ISDN numbering plan 2 = Data numbering plan 3 = Telex numbering plan 4 = National standard numbering plan 5 = Private numbering plan	0
22	<b>QSIG Operation Mode</b>	0 = Disable 1 = Enable	0
23	<b>Straight/Cross Wiring</b>	0 = Auto 1 = Manual (Cross) 2 = Manual (Straight)	0
24	<b>Power feeding for S-point</b>	0 = Disable 1 = Enable	0

## For PRTA PKG Setup

Item No.	Item	Input Data	Default
	ISDN Line Number	01~30	
01	<b>ISDN Line Mode</b>	0 = No setting 1 = T-Point 2 = S-Point (OT) 3 = NW Mode (Leased Line) (OT) 4 = NW Mode (Interconnected Line) (OT) 5 = NW Mode (Interconnected Line, Fixed Layer1=NT) (OT) 6 = S-Point (Leased Line) (OT)	1
02	<b>Logical Port Number</b>  <i>The start port number of a PRI line is displayed.</i>	0 =) No Set: 0 1 =) T-Point: 1-200 2 =) S-Point: 1-512 (OT) 3 =) NW Mode (Leased Line): 0 (OT) 4 =) NW Mode (Interconnected Line): 0 (OT) 5 =) NW Mode (Interconnected Line, Fixed Layer1=NT): 0 (OT) 6 =) S-Point (Leased Line): 1-512 (OT)	1
03	<b>CRC Multi-frame(CRC4) (Only for 2M[30B+D] Mode)</b>	0 = off 1 = on	1
04	<b>Layer 3 Timer Type</b>  <i>Each timer value of Layer 3 is set up for each type in Program 81-06 (T-Bus)</i>	1~5	1
05	<b>CLIP Information</b> Based on this setting, the system includes a Presentation Allowed (1) or Presentation Restricted (0) in the Setup message to allow or deny the Calling Party Number. Program 15-01-04 must also be set to 1 if this option is enabled.	0 = No 1 = Yes	1
06	<b>Length of Cable</b>	0 = Level 1 1 = Level 2 2 = Level 3 3 = Level 4 4 = Level 5	2
07	<b>S-point DDI digits</b>	0 - 4	0
08	<b>Dial Sending Mode</b> ISDN Protocol definition	0 = Enbloc Sending 1 = Overlap Sending	1

Item No.	Item	Input Data	Default
09	<b>Dial Information Element</b> ISDN Protocol definition Only when Dial Sending Mode (10-03-08) is set for 1 (Overlap Sending).	0 = Keypad Facility 1 = Called Party Number	1
10	<b>Master/Slave System (Network Mode only) (OT)</b>	0 = Slave System 1 = Master System	0
11	<b>Networking System Number (Network Mode only) (OT)</b>	0 - 50	0
12	--- Not Used ---		
13	<b>Loss-Of-Signal Detection Limit</b> If the transmit/receive voltage is less than the setting in 10-03-13, the system considers this as Loss-Of-Signal and the PRTA does not come up. Note that there are different values based on the setting in 10-03-12 for the PRI.	0 = Level 0 (lowest sensitivity) 1 = Level 1 2 = Level 2 3 = Level 3 4 = Level 4 5 = Level 5 6 = Level 6 7 = Level 7 (highest sensitivity)	2
14	<b>Service Protocol for S-point</b>	0 = Keypad facility 1 = Specified Protocol for Aspire system	0
15	<b>Call Busy Mode for S-point</b>	0 = Alerting 1 = Disconnect	0
16	<b>Two B-Channel Transfer for PRI Service</b>	0 = off 1 = on	0
17	<b>ISDN Ringback Tone</b> If Telco does not provide ringback tone, SV8100 can if 10-03-17 is set to 1:Enable.	0 = Disable 1 = Enable	0
18	<b>Type of Number</b> ISDN Protocol definition. Select the number type for the ISDN circuit.	0 = Unknown 1 = International number 2 = National number 3 = Network Specific number 4 = Subscriber number 5 = Abbreviated number	0
19	<b>Numbering Plan Identification</b> ISDN Protocol definition. Select the Numbering Plan used for the ISDN circuit.	0 = Unknown 1 = ISDN numbering plan 2 = Data numbering plan 3 = Telex numbering plan 4 = National standard numbering plan 5 = Private numbering plan	0

Item No.	Item	Input Data	Default
20	<b>Network Exchange Selection</b> Select the ISDN protocol for the ISDN circuit.	0 = Standard (same as NI-2) 1 = reserved 2 = reserved 3 = DMS (A211) 4 = 5ESS 5 = DMS (A233) 6 = 4ESS 7 = NI-2	0
21	<b>Number of Ports</b>	0 = Auto 1 = 4 Ports 2 = 8 Ports 3 = 12 Ports 4 = 16 Ports 5 = 20 Ports 6 = 24 Ports 7 = 28 Ports	0
22	<b>QSIG Operation Mode</b>	0 = Disable 1 = Enable	0
23	<b>Straight/Cross Wiring</b>	0 = Auto 1 = Manual (Cross) 2 = Manual (Straight)	0

**For DTI (T1) PKG Setup**

Physical Port Number	01~30
----------------------	-------

Item No.	Item	Input Data	Default
01	<b>Logical Port Number</b> The start port number of a T1 line is displayed, and 24 logic ports are automatically assigned to a DTI (T1) line.	0~200	0
02	<b>T1 Signal Format Selection</b>	0 = D4 (12 Multi Frame) 1 = ESF (24 Multi Frame)	0
03	<b>Zero Code Suppression</b>	0 = B8ZS 1 = AMI/ZCS	0
04	<b>Line Length Selection</b>	0 = 0 feet ~ 133 feet 1 = 133 feet ~ 266 feet 2 = 266 feet ~ 399 feet 3 = 399 feet ~ 533 feet 4 = 533 feet ~ 655 feet	0

05	<b>T1 Clock Source</b>	0 = Internal 1 = External	1
06	<b>Number of Ports</b>	0 = Auto 1 = 4 Ports 2 = 8 Ports 3 = 12 Ports 4 = 16 Ports 5 = 20 Ports	0
07	<b>Straight/Cross Wiring</b>	0 = Auto 1 = Manual (Cross) 2 = Manual (Straight)	0

**For E1 PKG Setup**

Physical Port Number	01~30
----------------------	-------

Item No.	Item	Input Data	Default
01	<b>Logical Port Number.</b>	0~200	0
02	<b>Number of channels</b>	0~30	0
03	--- Not Used ---		
04	<b>E1 Clock Source</b>	0 = Internal 1 = External	1
05	<b>Transmit Pulse Mask</b>	0 = 01 to 133 feet 1 = 133 to 266 feet 2 = 266 to 399 feet 3 = 399 to 533 feet 4 = 533 to 655 feet	0
06	<b>Frame Type</b>	0 = Double Frame (no CRC-4) 1 = Multiframe Structure (CRC-4)	1
07	<b>Line Coding</b>	0 = AMI 1 = HDB3	1
08	--- Not Used ---		
09	<b>Straight/Cross Wiring</b>	0 = Straight 1 = Cross	0

10	<b>Receive Input Threshold</b>	0 = 0.91/1.70V 1 = 0.74/0.84V 2 = 0.59/0.84V 3 = 0.42/0.45V 4 = 0.32/0.45V 5 = 0.21/0.20V 6 = 0.16/0.10V 7 = 0.10/not defined	2
----	--------------------------------	--	---

**For IPLA PKG Setup**

Physical Port Number	001-200
----------------------	---------

Item No.	Item	Input Data	Default
01	<b>Trunk Logical Port Number</b>	0~200	0
02	<b>Trunk Type</b>	0 = H.323 1 = SIP	1
03	<b>CCIS Trunk</b>	0 = Not CCIS 1 = CCIS	0

**For VM00 PKG Setup**

Physical Port Number	01~16
----------------------	-------

Item No.	Item	Input Data	Default
01	<b>Logical Port Number</b>	0~256	0

**For CCTA PKG Setup**

Physical Port Number	01~24
----------------------	-------

Item No.	Item	Input Data	Default
01	<b>Logical Port Number</b> The start port number of a T1 line is displayed, and 24 logic ports are automatically assigned to a DTI (T1) line.	0~200	0
02	<b>T1 Signal Format Selection</b>	0 = D4 (12 Multi Frame) 1 = ESF (24 Multi Frame)	0

03	<b>Zero Code Suppression</b>	0 = B8ZS 1 = AMI/ZCS	0
04	<b>Line Length Selection</b>	0 = 0 feet ~ 133 feet 1 = 133 feet ~ 266 feet 2 = 266 feet ~ 399 feet 3 = 399 feet ~ 533 feet 4 = 533 feet ~ 655 feet	0
05	<b>T1 Clock Source</b>	0 = Internal 1 = External	1
06	<b>Number of Ports</b>	0 = Auto 1 = 4 Ports 2 = 8 Ports 3 = 12 Ports 4 = 16 Ports 5 = 20 Ports	0
07	<b>Straight/Cross Wiring</b>	0 = Auto 1 = Manual (Cross) 2 = Manual (Straight)	0

### Conditions

- When changing a defined terminal type, first set the type to 0 and then plug the new device in to have the system automatically define it, or redefine the type manually.
- The system must have a blade installed to view/change the options for that type of blade.

## Feature Cross Reference

- Universal Slots

## Program 10 : System Configuration Setup

### 10-04 : Music On Hold Setup

Level:

IN

#### Description

Use **Program 10-04 : Music on Hold Setup** to set the Music on Hold (MOH) source. For internal Music on Hold, the system can provide a service tone callers on hold or one of eleven synthesized selections.

#### Input Data

Item No.	Item	Input Data	Default	Description
01	<b>Music on Hold Source Selection</b>	0 = Internal MOH 1 = External MOH 2 = Service Tone 3 = VMDB	0	The Music on Hold (MOH) source can be internal (synthesized) or from a customer-provided music source.  The customer-provided source can connect to a PGD Adapter or the connector on the side of the CPU.  Trunk MOH and Extension MOH music source use the same Music on Hold source.
02	<b>Music on Hold Tone Selection</b>	[In case Item 1 is 0] 1 = Download File1 2 = Download File2 3 = Download File3 [In case Item 1 is 1, 2, or 3] 1~100 = VRS Message Number	1	
03	<b>Audio Gain Setup</b>	1~63 (-15.5 ~ +15.5dB)	32 (0dB)	

**Conditions**

None

---

**Feature Cross Reference**

- Analog Communications Interface (ACI)
- Background Music
- Music on Hold

# Program 10 : System Configuration Setup

## 10-05 : General Purpose Relay Setup

Level:

IN

### Description

Use **Program 10-05: General Purpose Relay Setup** to define which Relay circuits (5~8) on PGD Adapter are used for General Purpose Relay.

### Input Data

General Purpose Relay No.	1~8
---------------------------	-----

Item No.	Item	Input Data	Default
01	Slot No. Physical Port of DLCA Sensor Circuit No.	Slot No: 0~24	0
		<i>After each entry, press the Transfer Key to advance to the next entry.</i>	
		Physical Port: 0~16	0
		Relay No: 0, 5~8	0

### Conditions

None

### Feature Cross Reference

- Analog Communications Interface (ACI)

# Program 10 : System Configuration Setup

## 10-06: ISDN BRI Setup

Level:

IN

### Description

Use **Program 10-06: ISDN BRI Setup** define the TE1 selection and DID mode for DID callers when the BRI feature is used.

#### Input Data

Slot No.	01 - 24
----------	---------

#### Input Data

ISDN Line No.	01 - 04
---------------	---------

Item No.	Item	Input Data	Default
01	<b>TE1 selection</b> Select the method the system uses when assigning Terminal Endpoint Identifier (TEI) values to BRI ports.	0 = Select by SPID number 1 = Select by Channel ID number	0
02	<b>DID mode</b>	0 = Route by Called Party Number 1 = Route by Redirecting Number	0
03	<b>SPID1</b>	Maximum 20 digits	0
04	<b>SPID2</b>		0

#### Conditions

None

### Feature Cross Reference

None

# Program 10 : System Configuration Setup

## 10-07: Conversation Recording Resource (OT)

Level:

IN

### Description

Use **Program 10-07: Conversation Record Circuits** to select the number of Conference circuits to be used for Conversation Recording.

 *Even if this program is set to '0', the telephone conversation recording function can be used.  
In this case, 64(32x2) circuits will be shared by conference recording and conversation recording. The number of the conference circuits occupied by a conversation recording is two.*

### Input Data

Item No.	The number of Conversation Recording	Default
01	0-16 (0: No setting, 1-16: 2-32 Conference Resource)	0

### Conditions

None

### Feature Cross Reference

Conference

# Program 10 : System Configuration Setup

## 10-08 : Pre-Ringing Setup

Level:

IN

### Description

Use **Program 10-08: Pre-Ringing Setup** to enable or disable pre-ringing for trunk calls. This sets how a trunk initially rings a telephone. With pre-ringing, a burst of ringing occurs as soon as the trunk LED flashes. The call then continues ringing with the normal ring cadence cycle. Without pre-ringing, the call starts ringing only when the normal ring cadence cycle occurs. This may cause a ring delay, depending on when call detection occurs in reference to the ring cycle.

### Input Data

Item No.	Description	Input Data	Default
01	Pre-Ringing	0 = No 1 = Yes	0

### Conditions

- Used with Analog Trunks only.

### Feature Cross Reference

- Central Office Calls, Answering
- Synchronous Ringing

# Program 10 : System Configuration Setup

## 10-09 : DTMF and Dial Tone Circuit Setup

Level:  
IN

### Description

Use **Program 10-09: DTMF and Dial Tone Circuit Setup** to allocate the circuits on the CD-CP00 for either DTMF receiving or dial tone detection. The CD-CP00 has 32 circuits initially, and an additional 64 circuits are added when a PZ-BS10 is installed. These are used as follows:

- Extension DTMF receiver for single line telephone
- Trunk DTMF receiver for analog trunks, dial tone & busy tone detection for analog trunks

### Input Data

Circuit/Resource Number	01~160
-------------------------	--------

Item No.	Input Data	Default Setting
01	0 = Common Use 1 = Extension Only 2 = Trunk Only	Circuit/Resource 01~08 = 1 (Extensions) Circuit/Resource 09~32 = 2 (Trunks) (Circuit/Resource 33~96 are not used.) Circuit/Resource 97~160 = 0 (Common) When PZ-BS10 is installed, 97~160 are available.

### Conditions

- CD-CP00 has 32 channel DSP resources (receivers) only for basic chassis. PZ-BS10 have 64 DSP resources (receivers) only for expand chassis.
- In case of 0 (= Common) is selected, and if 14-02-10 (Caller ID receive ability) is set to "Yes", DSP resources are always allocated to analog trunk only, not for analog extension. If 14-02-10 is set to "No", the DSP resources can be used for both analog trunk and analog extension commonly.

## **Feature Cross Reference**

- Caller ID
- Central Office Calls, Placing
- Direct Inward Dialing (DID)
- Direct Inward System Access (DISA)
- Tie Lines

# Program 10 : System Configuration Setup

## 10-12: CD-CP00 Network Setup

Level:  
SA

### Description

Use **Program 10-12: CD-CP00 Network Setup** to setup the IP Address, Subnet-Mask, and Default Gateway addresses.

**Caution! If any IP Address or NIC settings are changed, the system must be reset for the changes to take affect.**

### Input Data

Item No.	Item	Input Data	Default
01	<b>IP Address</b> Set for CD-CP00	0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.254.255.254 192.0.0.1 ~ 223.255.255.254	192.168.0.10
02	<b>Subnet Mask</b> The setting of Subnet Mask is invalid when all Host Addresses are 0. If the network section is: 0, 127, 128.0, 191.255, 192.0.0, 223.255.255 The setting of Subnet Mask is invalid.	128.0.0.0      192.0.0.0      224.0.0.0 240.0.0.0      248.0.0.0      252.0.0.0 254.0.0.0      255.0.0.0      255.128.0.0 255.192.0.0    255.224.0.0    255.240.0.0 255.248.0.0    255.252.0.0    255.254.0.0 255.255.0.0    255.255.128.0   255.255.192.0 255.255.224.0   255.255.240.0   255.255.248.0 255.255.252.0   255.255.254.0   255.255.255.0 255.255.255.128   255.255.255.192   255.255.255.224 255.255.255.240   255.255.255.248   255.255.255.252 255.255.255.254   255.255.255.255	255.255.255.0
03	<b>Default Gateway</b> IP Address for Router.	0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.254.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
04	<b>Time Zone</b> Determine the offset from Greenwich Mean Time (GMT) time. Then enter its respective value. For example, Eastern Time (US and Canada) has a GMT offset of -5. The program data would then be 7 (0= -12, 1= -11, 2= -10, 3= -9, 4= -8, 5= -7, 6= -6, 7= -5, .....24= +12)	0~24 (0 = -12 Hours and 24 = +12 Hours)	12
05	<b>NIC Interface</b> NIC Auto Negotiate (CD-CP00)	0 = Auto Detect 1 = 100Mbps, Full Duplex 2 = 100Mbps, Half Duplex 3 = 10Mbps, Full Duplex 4 = 10Mbps, Half Duplex	0
06	<b>Network Address Port Translation (NAPT) Router Setup</b> If using an external NAPT Router or not.	0 = No (Disable) 1 = Yes (Enable)	0
07	<b>NAPT Router IP Address (Default Gateway [WAN])</b> Set the IP address on the WAN side of router.	0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0

### 10-24 : Daylight Savings Setup

**Level:**  
**SA**

#### Description

Use **Program 10-24 : Daylight Savings Setup** to set the options for daylight savings. As the telephone system is used globally, these settings define when the system should automatically adjust for daylight savings as it applies to the region in which the system is installed.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Daylight Savings Mode</b> Enable (1) or disable (0) the system ability to adjust the time for daylight savings/standard time.	0 = Disable 1 = Enable	0 (OT) 1 (AU)
02	<b>Time for Daylight Savings</b> Enter the time of day when the system should adjust for daylight savings time.	00:00~23:59	02:00
03	<b>Start Month (Summer Time)</b> Enter the month when the system should adjust the time for daylight savings time (01~12).	1~12 (Jan = 1, 2 = Feb, etc.)	4 (OT) 10 (AU)
04	<b>Start of Week</b> Enter the week of the month when the system should adjust the time for daylight savings time. The week will start on the day listed in 10-24-05.	0 = Last Week of Month 0~5	1
05	<b>Start of Week Day</b> Enter the day of the week when the system should adjust the time for daylight savings time (01 = Sunday, 02 = Monday, etc.).	1~7 (Sun = 1, Mon = 2, etc.)	1
06	<b>End of Month</b> Enter the month when the system should adjust the time for standard time (01~12).	1~12 (Jan = 1, 2 = Feb, etc.)	10 (OT) 4 (AU)
07	<b>End of Week</b> Enter the week of the month when the system should adjust the time for standard time. The week will start on the Day listed in 10-24-08.	0 = Last Week of Month 0~5	0 (OT) 1 (AU)

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
08	<b>End of Week Day</b> Enter the day of the week when the system should adjust the time for daylight savings. (01 = Sunday, 02 = Monday, etc.).	1~7 (Sun = 1, Mon = 2, etc.)	1

# Program 10 : System Configuration Setup

## 10-26 : IP System Operation Setup

**Level:**  
**IN**

### Description

Use **Program 10-26 : IP System Operation Setup** to enable or disable the Peer to Peer feature for SIP MLT and SIP IP stations.

### Input Data

Item No.	Item	Input Data	Default
01	<b>Peer to Peer Mode</b>	0 = Off 1 = On	1
02	<b>RTP Forwarding Mode</b>	0 = Disable 1 = Enable	0
03	<b>SIP Peer to Peer Mode</b>	0 = Off 1 = On	1
04	<b>DT700 Peer to Peer Mode</b>	0 = Off 1 = On	1
05	<b>SIP CTI Mode (OT)</b> When SIP CTI Mode is set as 1 (Mode1) it will ignore the setting at 10-26-03	0 = Disable 1 = Mode1	0

### Conditions

- Disabling 10-26-04 results in SIP MLT Station-to-SIP MLT Station calls using a DSP resource.(V2.0 or higher)
- SIP-to-SIP MLT Station does not support Peer to Peer function and will result in using a DSP resource.(V1.0)
- Disabling 10-26-03 results in SIP IP Station-to-SIP IP Station calls using a DSP resource.

### Feature Cross Reference

## Program 10 : System Configuration Setup

### 10-27: H.323 System Interconnection w/ Application Setup (OT)

Level:

SA

#### Description

Use Program **10-27: H.323 Interconnection with Application Setup** to set the IP address of the network IP systems.

#### Input Data

System ID	01-50
-----------	-------

#### Input Data

Item No.	Item	Input Data	Default	Default
01	<b>IP Address</b> System ID is related with the System ID in the Numbering Plan (Program 11-01-03). When the digits are analyzed and the system ID is determined from the SV8100 data set in the Numbering Plan, the networking call will be sent to the IP Address set in this program. The IP Address should be the IP Address of the peer CPU (Program 10-12-01)	1.0.0.1_126.255.255.254 128.1.0.1_191.254.255.254 192.0.1.1_223.255.254.254	0.0.0.0	11-01-01 10-12-01
02	<b>Call Procedure Port</b> The Port Number should be set with the same value as the H.225 setup port in Program 84-02-33.	1-65535	1730	84-02-33

#### Conditions

None

#### Feature Cross Reference

None

# Program 10 : System Configuration Setup

## 10-28 : SIP System Information Setup

**Level:**  
**SA**

### Description

Use **Program 10-28 : SIP System Information Setup** to set up basic SIP trunking.

### Input Data

Item No.	Item	Input Data	Default
01	<b>Domain Name</b> Set the domain name of the SIP-URL.	Up to 64 Characters (ex.:UserID@HostName.DomainName)	None
02	<b>Host Name</b> Set the host name of the SIP-URL.	Up to 48 Characters (ex.:UserID@HostName.DomainName)	None
03	<b>Transport Protocol</b> Set the protocol for the connection.	0 = UDP 1 = TCP	0
04	<b>UserID</b> User ID in the SIP Invite Setup message. Use it for outbound caller ID information if no information is assigned in commands 21-17, 21-19, 15-16, 14-12, and 10-36. A call cannot be completed across the span if there is no outbound CID info. The reason for this is: the from and display portion of the invite message would be blank, and it would not know where the call originated from.	Up to 32 Characters When assigning the User ID, the ID may contain only alpha characters. (A space and/or special characters are not allowed in the User ID field). (ex.:UserID@HostName.DomainName)	None
05	<b>Domain Assignment</b> If the information from Telco was a domain name (siptrunk@sip.com) then set to domain. If the information for Telco was a IP address then set to IP Address.	0 = IP Address 1 = Domain Name	0

**Input Data**

06	<b>IP Trunk Port Binding</b> Trunk port binding is only used for SIP trunks to the provider in Non-Registration Mode only. When this is disabled, an inbound call comes in and follows your DID routing but it comes in on the first available trunk. When enabled, the inbound call comes in and follows your normal DID routing but maps to that specified trunk. If that trunk is busy, it sends back a busy unless you build a hunt group. To build the hunt group, it references command 14-12-02 (pilot register ID). This then points you to command 10-36-02. All the numbers with the same pilot are in the same hunt group.	0 = Disable 1 = Enable	0

**Conditions**

None

---

**Feature Cross Reference**

None

# Program 10 : System Configuration Setup

## 10-29 : SIP Server Information Setup

**Level:**  
**SA**

### Description

Use **Program 10-29 : SIP Server Information Setup** to define the SIP Proxy setup for outbound/inbound. The 10-29 commands are not used in non-registration mode.

 *If entries are made in Program 10-29-xx for a SIP Server and the SIP Server is then removed or not used, the entries in Program 10-29-xx must be set back to their default settings. Even if 10-29-01 is set to 0 (off), the SV8100 still checks the settings in the remaining 10-29 programs.*

### Input Data

Item No.	Item	Input Data	Default
01	<b>Default Proxy (Outbound)</b> This sets whether the SIP message is always sent through the Default Proxy.	0 = Off 1 = On	0
02	<b>Default Proxy (Inbound)</b> Need to be registered in registration mode. This sets whether the SIP message is always received through the Default Proxy.	0 = Off 1 = On	0
03	<b>Default Proxy IP Address</b> This is optional and used if the provider gives you a proxy address that is different than the registration address. If the provider is using domain names instead of IP addresses, leave this at default.	0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0
04	<b>Default Proxy Port Number</b> The port number of the Default Proxy is set.	0 ~ 65535	5060
05	<b>Registrar Mode</b> The mode registered in the registration server is set.	0 = None 1 = Manual	0
06	<b>Registrar IP Address</b> IP address of the SIP registration server is set.	0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0
07	<b>Registrar Port Number</b> The port number of the SIP registration server is set.	0 ~ 65535	5060

## Input Data

Item No.	Item	Input Data	Default
08	<b>DNS Server Mode</b> This setting determines if the DNS server is used.	0 = Off 1 = On	0
09	<b>DNS Server IP Address</b> If 10-29-08 is 1, this is effective. This sets the IP address of the DNS server.	0.0.0.0 ~ 126.255.255.254 128.0.0.1 ~ 191.255.255.254 192.0.0.1 ~ 223.255.255.254	0.0.0.0
10	<b>DNS Port Number</b> If 10-29-08 is 1, this is effective. This sets the port number of the DNS server.	0 ~ 65535	53
11	<b>Registrar Domain Name</b> This sets the domain name of the registration server.	Up to 128 Characters	None
12	<b>Domain Name</b> This specifies the domain name of the SIP server.	Up to 64 Characters	None
13	<b>Proxy Host Name</b> This specifies the host name of the SIP server.	Up to 48 Characters	None
14	<b>SIP Carrier Choice</b> This selects the carrier type of the SIP server.	0 ~ 7 0 = Standard 1 = Carrier A 2 = Carrier B 3 = Carrier C 4 = Carrier D 5 = Carrier E 6 = Carrier F 7 = Carrier G	0
15	<b>Registration Expiry (Expire) Time</b> This sets the expiration time when the SIP trunk registers to the Sip server. When half the time set here passes, the registration update is automatically done.	120 ~ 65535 seconds	3600
16	<b>Register Sub Mode</b>	0 = Off 1 = On	0
17	<b>DNS Source Port</b> (10-29-08 must be On) This sets the DNS source port number.	0~65535	53
18	<b>Registration Retry Interval (AU)</b> This sets interval time to re-send SIP Register once the SIP Register fails	30-65535 (sec)	60

## Program 10 : System Configuration Setup

### 10-30 : SIP Authentication Information Setup

**Level:**  
**IN**

#### Description

Use **Program 10-30 : SIP Authentication Information Setup** to set the authentication options for SIP trunks.

#### Input Data

Item No.	Item	Input Data	Default
02	<b>User Name</b> This sets the user name of the SIP trunk.	Up to 64 Characters	None
03	<b>Password</b> This sets the SIP trunk password.	Up to 32 Characters	None
04	<b>Authentication Trial</b> This is how many times it will try an authenticate before timing out and not registering.	0 ~ 9	1

#### Conditions

None

#### Feature Cross Reference

None

## Program 10 : System Configuration Setup

### 10-31: Networking Keep Alive Setup (OT)

**Level:**  
**IN**

#### Description

Use **Program 10-31: Networking Keep Alive Setup** to set the interval and retry count of the AspireNet networking keep alive message. The keep alive is used for ISDN and IP networking.

The keep alive message is automatically responded to by the destination SV8100, if the response is not received the retry count will start. If a response is not received within the number of retries the networking link will be taken out of service. When the link is taken out of service:

- Any calls that are in progress will be released.
- Park Hold orbits will be released.
- No further Park Hold information will be sent until the link is active. The link will automatically become active when the next keep alive response is received.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Keep Alive Interval</b> This program is used to set the interval of Keep Alive. The SV8100 does not send Keep alive when this item is set to "0". If this entry is greater than "0", network PRI spans which are using Kentrox DSUs will not re-sync when removed from service then returned to service.	0-65535	0
02	<b>Keep Alive Retry Timer</b> Set how many times the SV8100 resents Keep Alive.	1-255	5

**Conditions**

The keep alive message must be sent and a response not received for the retry count, for the link to be taken out of service and the calls in progress and Park Hold orbits to be released.

For example: If an ISDN Net Link connection is disconnected at Layer 1 then the keep alive message can not be sent, therefore the keep alive operation will not occur.

---

**Feature Cross Reference**

Networking - AspireNet (OT)

## Program 10 : System Configuration Setup

### 10-32: Networking Maximum PRI Channel Setup (OT)

**Level:**  
**IN**

#### Description

Use **Program 10-32: PRI Networking Maximum PRI Channel Setup** to assign the number of B-channels to be used for each ISDN blade. This allows for fractional PRIs when used with multiple site networking.

If this program is limited to less than “30” on one side of the network, then it also limits both inbound and outbound network calls. For example, when you select 10 channels then only channels 1 to 10 will be available. If a call is attempted on channels 11 to 30 the caller will receive busy tone. This also applies on the other side of the network as well.

The setting is for each slot within the SV8100; ensure that you select the correct slot before making any changes.

This program will not affect a PRI card set as Trunk or Station mode.

#### Input Data

Slot Number	1-24
-------------	------

Item No.	Item	Input Data	Default
01	<b>Maximum Channels</b> Set the maximum number of channels which can be used with PRI NetLink.	1 - 30	30

#### Conditions

None

#### Feature Cross Reference

Networking - AspireNet (OT)

## Program 10 : System Configuration Setup

### 10-33 : SIP Registrar/Proxy Information Basic Setup

**Level:**  
**IN**

#### Description

Use **Program 10-33 : SIP Registrar/Proxy Information Basic Setup** to set the registrar/proxy options for SIP extensions.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Registration Expire Time</b> After this time expires, the UA's are forced to reregister with the CPU. This allows the CPU to keep a current location of the entire end UA's.	60 ~ 65535	3600
02	<b>Authentication Mode</b> Check here if a password is desired for the IP SIP phones to register. When checked, 15-05-16 must have a password entered and also the SIP phone must have the same password. When using Authentication, the station number is the authorization name.	0 = Disable 1 = Enable	0
03	<b>Registrar/Proxy Domain Name</b> Set the domain name of the SIP proxy.	Up to 64 Characters	None
04	<b>Registrar/Proxy Host Name</b> Set the domain name of the SIP proxy.	Up to 48 Characters	None

#### Conditions

None

#### Feature Cross Reference

None

## 10-46 : DT700 Server Information Setup

**Level:**  
**IN**

### Description

Use **Program 10-46 : DT700 Server Information Setup** to setup the information of SIP Multiline (DT700 series) Server.

### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<p><b>Register Mode</b></p> <p>Normal: When the phone boots up, it reports the ext. assigned in the phone or chooses the next available extension in the system. Password is not required.</p> <p>Auto: If set to Auto, the SIP user name and password must be entered in the actual IP phone. These settings must match 84-22/15-05-27, or the phone does not come on-line.</p> <p>Manual: When the phone boots up, it prompts user to enter a user ID and password before logging in. It checks this user ID/password against 84-22/15-05-27. If there is no match, the phone does not come on-line.</p>	<p>0 = Normal 1 = Auto 2 = Manual</p>	0	
04	<p><b>Server Name</b></p> <p>Assign the Server name to be used in the SIP URL.</p>	Up to 32 characters	sipphd	

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>	<b>Related Program</b>
06	<p><b>Register Port</b> Assign the port number in which the SIP messages are sent to the IPLA. This same port number must be assigned in the SIP Multiline terminals. If this command is changed, it requires a CPU reset. When Net Link is used (PRG51-01-01 is other than 0), PRG51-17-01 of each local system will be used instead of this PRG.</p>	0~65535	5080	
07	<b>Encryption Mode</b>	0 = Off 1 = On	0	
08	<b>Encryption Type</b>	0 = Mode1	0	
09	<b>One Time Password</b>	Up to 10 characters (0~9, *, #)	None	10-46-07
10	<b>Start Port</b>	1~512	1	10-46-01
11	<p><b>Multicast IP Address</b> This sets the Multicast IP address so that two or more main devices don't overlap on the same network, or if Multicast is used by other IP services.</p>	224.0.0.0~ 239.255.255.255	224.0.0.10	
12	<b>Multicast Port</b>	0~65535	30000	
13	<p><b>Subscribe Session Port</b> When Net Link is used (PRG51-01-01 is other than 0), PRG51-17-02 of each local system will be used instead of this PRG.</p>	0-65535	5081	
14	<p><b>NAT Mode</b> When the system controls the SIP multiline terminal via the NAT router, this system data is set to On.</p>	0 = Off 1 = On	0

## 10-48 : License Activation

**Level:**  
**IN**

### Description

Use **Program 10-48 : License Activation** to turn on the license issued from the license server.

### Input Data

Item No.	Item	Input Data	Default
01	Software Key Code	20-digit character	None
02	Activation Code	8-digit hexadecimal number	None
03	Feature Code	7-digit number	None

### Conditions

The Key Operation for input item03 is as follows;

<b>Transfer Key</b>	Edit next feature code * Up to 10 feature code is possible to input at once. * Register the license when 10th feature code is edited.
<b>Soft Key2(Back)</b>	Edit previous feature code
<b>Soft Key3(Submit)</b>	Register the license

### Feature Cross Reference

None

# Program 10 : System Configuration Setup

## 10-59: System Configuration Option Setup (OT)

**Level:**  
**IN**

### Description

Use **Program 10-59: System Configuration Option Setup** to defines system options related with system configuration.

### Input Data

Item No.	Item	Input Data	Default
01	<b>ISDN Operation Mode</b> Chose whether the CD-BRIA, CD-PRTA works the mode as Hong Kong or Mexico	0 = Hong Kong 1 = Mexico	0

### Conditions

This Programming is activate when SW6-1 is set to 1(On) on CD-CP00 blade.

### Feature Cross Reference

None

# Program 11 : System Numbering

## 11-01 : System Numbering

Level:  
IN

Program

11

### Description

Use **Program 11-01: System Numbering** to set the system numbering plan. The numbering plan assigns the first and second digits dialed and affects the digits an extension user must dial to access other extensions and features, such as service codes and trunk codes. If the default numbering plan does not meet the site requirements, use this program to tailor the system numbering to the site.

#### CAUTION!

*Improperly programming this option can adversely affect system operation. Make sure you thoroughly understand the default numbering plan before proceeding. If you must change the standard numbering, use the chart for [Table 2-2 System Numbering Default Settings on page 2-83](#) to keep careful and accurate records of your changes.*

*Before changing your numbering plan, use PC Pro to make a backup copy of your system data.*

Changing the numbering plan consists of three steps:

#### Step 1: Enter the digit(s) you want to change

You can make either single or two digit entries. In the Dialed Number column in the [Table 2-2 System Numbering Default Settings on page 2-83](#) table, the nX rows (e.g., 1X) are for single digit codes. The remaining rows (e.g., 11, 12, etc.) are for two digit codes.

- Entering a single digit affects all the Dialed Number entries beginning with that digit. For example, entering 6 affects all number plan entries beginning with 6. The entries you make in step 2 and step 3 below affect the entire range of numbers beginning with 6. (For example, if you enter 3 in step 2 the entries affected are 600~699. If you enter 4 in step 2 below, the entries affected are 6000~6999.)

- ❑ Entering two digits lets you define codes based on the first two digits a user dials. For example, entering 60 allows you to define the function of all codes beginning with 60. In the default program, only \* and # use 2-digit codes. All the other codes are single digit. If you enter a two digit code between 0 and 9, be sure to make separate entries for all the other two digit codes within the range as well. This is because in the default program all the two digit codes between 0 and 9 are undefined.

 *Defining codes based on more than 2 digits require a secondary program (PRG 11-20) to define the codes.*

### Step 2: Specify the length of the code you want to change

After you specify a single or two digit code, you must tell the system how many digits comprise the code. This is the **Number of Digits Required** column in the [Table 2-2 System Numbering Default Settings on page 2-83](#) table.

### Step 3: Assign a function to the code selected

After entering a code and specifying its length, you must assign its function. This is the Dial Type column in the [Table 2-2 System Numbering Default Settings on page 2-83](#) table. The choices are:

Dial Types	Dial Type Description	Related Program
1	<b>Service Code</b>	<a href="#">11-10 : Service Code Setup (for System Administrator)</a> <a href="#">11-11 : Service Code Setup (for Setup/Entry Operation)</a> <a href="#">11-12 : Service Code Setup (for Service Access)</a> <a href="#">11-13 : Service Code Setup (for ACD)</a> <a href="#">11-14 : Service Code Setup (for Hotel)</a> <a href="#">11-15 : Service Code Setup, Administrative (for Special Access)</a> <a href="#">11-16 : Single Digit Service Code Setup</a>
2	<b>Extension Number</b>	<a href="#">11-02 : Extension Numbering</a> <a href="#">11-04 : Virtual Extension Numbering</a> <a href="#">11-06 : ACI Extension Numbering</a> <a href="#">11-07 : Department Group Pilot Numbers</a> <a href="#">11-08 : ACI Group Pilot Number</a> <a href="#">11-17 : ACD Group Pilot Number</a>
3	<b>Trunk Access Code</b>	<a href="#">11-09-01: Trunk Access Code</a>
4	<b>Special Trunk Access</b>	<a href="#">11-09-02: Trunk Access Code</a>
5	<b>Operator Access</b>	<a href="#">20-17 : Operator Extension</a>
6	<b>ARS/F-Route Access</b>	44-xx
8	<b>Networking System Access (OT)</b>	None

Dial Types	Dial Type Description	Related Program
9	Dial Extension Analyze	<a href="#">11-20: Dial Extension Analyze Table</a>

 Changing the Dial Type for a range of codes can have a dramatic affect on how your system operates. Assume, for example, the site is a hotel that has room numbers from 100-399. To make extension numbers correspond to room numbers, you should use Program 11-02 to reassign extension numbers on each floor from 100 to 399. (Other applications might also require you to change entries in Program 11-10 ~ 11-16.)

## Program 11 : System Numbering

### 11-02 : Extension Numbering

Level:  
IN

#### Description

Use **Program 11-02: Extension Numbering** to set the extension number. The extension number can have up to eight digits. The first/second digit(s) of the number should be assigned in Program 11-01 or Program 11-20. This allows an employee to move to a new location (port) and retain the same extension number.

#### Input Data

Extension Port Number	001 ~ 512
-----------------------	-----------

Item No.	Extension Number	Description
01	Dial (Up to 8 digits)	Set up extension numbers for multiline telephones, single line telephones (including SLT Adapter (OT), APR), and IP telephones. Extension number assignments cannot be duplicated in Programs 11-02, 11-06, 11-07, 11-08, and 11-17.

#### Default

(OT)	
Extension Port Number	Extension Number
001 - 300	200- 499
312 - 512	5000-5211

(AU)	
Extension Port Number	Extension Number
1 - 99	101- 199
100 - 199	3101 - 3200
200 - 512	3201 - 3513

**Conditions**

None

---

**Feature Cross Reference**

- Department Calling
- Flexible System Numbering
- Intercom

# Program 11 : System Numbering

## 11-04 : Virtual Extension Numbering

**Level:**  
**IN**

### Description

Use **Program 11-04: Virtual Extension Numbering** to define the virtual extension numbers. The extension number can have up to eight digits. The first/second digit(s) of the number should be assigned in Program 11-01 or Program 11-20.

### Input Data

Virtual Extension Numbers	001~256
---------------------------	---------

Item No.	Virtual Extension Number	Description
01	<b>Dial</b> (up to 8 digits)	Set up Virtual Extension numbers. The extension number cannot be duplicated in Programs 11-02, 11-06, 11-07, 11-08 and 11-17.

### Default

(OT)	
Virtual Port Number	Extension Number
1 - 256	No Setting

(AU)	
Virtual Port Number	Extension Number
1 - 99	201-299
100 - 199	3601 - 3700
200 - 256	3701 - 3757

**Conditions**

None

---

**Feature Cross Reference**

- Flexible System Numbering
- Multiple Directory Numbers / Call Coverage

# Program 11 : System Numbering

## 11-06 : ACI Extension Numbering

**Level:**  
**IN**

### Description

Use **Program 11-06: ACI Extension Numbering** to define the virtual extension number to be used for the ACI. The extension number can have up to eight digits. The first and second digits of the number should be assigned in Program 11-01 or Program 11-20.

### Input Data

ACI Port Number	01~96
-----------------	-------

Item No.	ACI Extension Number	Description	Related Program
01	Dial (Up to 8 digits)	The extension number cannot be duplicated in Programs 11-02, 11-04, 11-07, 11-08, and 11-17.	10-03: Basic Configuration for each blade.

### Default

- ACI Port Numbers have no extension number set.

### Conditions

None

### Feature Cross Reference

- Analog Communications Interface (ACI)
- Flexible System Numbering

## Program 11 : System Numbering

### 11-07 : Department Group Pilot Numbers

**Level:**  
**IN**

#### Description

Use **Program 11-07: Department Group Pilot Numbers** to assign a pilot number to each Department Group set up in Program 16-02. The pilot number is the number users dial for Department Calling and Department Step Calling. The pilot number can have up to eight digits. The first and second digits of the number should be assigned in Program 11-01 or Program 11-20 as type 2.

#### Input Data

Department (Extension) Group Number	01~64
-------------------------------------	-------

Item No.	Extension Group Pilot Number	Description	Related Program
01	<b>Dial</b> (Up to 8 digits)	Use this program to assign department group pilot numbers. The number set up by Program 11-02 (Extension Numbering) cannot be used. The extension number cannot be duplicated in Programs 11-02, 11-04, 11-06, 11-08., and 11-17	<ul style="list-style-type: none"> <li>○ 16-01 : Department (Extension) Group Basic Data Setup</li> <li>○ 16-02 : Department Group Assignment for Extensions</li> <li>○ 16-03 : Secondary Department Group</li> </ul>

#### Default

- No Setting

#### Conditions

None

#### Feature Cross Reference

- Department Calling
- Department Step Calling

# Program 11 : System Numbering

## 11-08 : ACI Group Pilot Number

Level:  
IN

### Description

Use **Program 11-08: ACI Group Pilot Number** to assign the pilot number to the ACI Groups set in Program 33-02. The pilot number can have up to four digits. The first and second digits of the number should be assigned in Program 11-01 or Program 11-20 as type 2.

### Input Data

ACI Group Number	01~16
------------------	-------

Item No.	ACI Group Pilot Number	Description	Related Program
01	Dial (Up to 8 digits)	The extension number cannot be duplicated in Programs 11-02, 11-04, 11-06, 11-07, and 11-17.	33-02

### Default

- No Setting

### Conditions

None

### Feature Cross Reference

- Analog Communications Interface (ACI)

# Program 11 : System Numbering

## 11-09 : Trunk Access Code

Level:  
IN

### Description

Use **Program 11-09: Trunk Access Code** to assign the trunk access code. The trunk access code can be set from 1~8 digits which is defined to type 3 and 4 in Program 11-01. This is the code extension users dial to access Automatic Route Selection. The Individual Trunk Access Code is used when Trunk Group Routing is desired for an outgoing line.

#### Caution!

*The digit 9 is defined in Program 11-01 as Dial Type() with the Number of Digits Required set to (). If you change the trunk access code in Program 11-09, you must make the corresponding changes in Program 11-01.*

### Input Data

Item No.	Trunk Access Code	Description	Default	Related Program
01	Dial (Up to four digits)	Use this program to assign the trunk access code (normally 9). This is the code extension users dial to access Automatic Route Selection.	9 (OT) 0 (AU)	<ul style="list-style-type: none"> <li>○ 11-01 : System Numbering</li> <li>○ 14-01 ~ 07: Basic Trunk Data Setup</li> <li>○ 14-05 : Trunk Group</li> <li>○ 14-06: Trunk Group Routing</li> <li>○ 21-02: Trunk Group Routing for Extensions</li> </ul>

**Input Data (Continued)**

Item No.	Trunk Access Code	Description	Default	Related Program
02	<b>2nd Trunk Route Access Code</b>	Use this program to define additional trunk access codes. When a user dials the Alternate Trunk Route Access Code, the system routes their call to the Alternate Trunk Route.	No Setting	<ul style="list-style-type: none"> <li>○ 11-01 : System Numbering</li> <li>○ 14-01 - 07: Basic Trunk Data Setup</li> <li>○ 14-05 : Trunk Group</li> <li>○ 14-06 : Trunk Group Routing</li> <li>○ 21-02: Trunk Group Routing for Extensions</li> <li>○ 21-15 Individual Trunk Group Routing for Extensions</li> </ul>

**Conditions**

None

**Feature Cross Reference**

- Automatic Route Selection
- Central Office Calls, Placing
- Trunk Group Routing

# Program 11 : System Numbering

## 11-10 : Service Code Setup (for System Administrator)

**Level:**  
**IN**

### Description

Use **Program 11-10: Service Code Setup (for System Administrator)** to customize the Service Codes for the System Administrator. You can customize additional Service Codes in Programs 11-11~11-16. The following chart shows:

- The number of each code (01~42).
- The function of the Service Code.
- The type of telephones that can use the Service Code.
- The default entry. For example, dialing item 26 allows users to force a trunk line to disconnect.

### Input Data

### 11-13 : Service Code Setup (for ACD)

**Level:**  
**IN**

#### Description

Use **Program 11-13: Service Code Setup (for ACD)** to customize the Service Codes which are used with the Automatic Call Distribution (ACD) feature. You can customize additional Service Codes in Programs 11-10 ~ 11-12 and 11-14 ~ 11-16. The following chart shows:

- The number of each code (01~13).
- The function of the Service Code.
- The type of telephones that can use the Service Code.
- The default entry.

#### Input Data

Item No.	Item	Terminals	Default (OT)	Default (AU)	Related Program
01	<b>ACD Log In/Log Out (for KTS)</b>	MLT, SLT	839	*5	
02	<b>ACD Log Out (for SLT)</b>	SLT	755	655	
03	<b>Set ACD Wrap-Up Time (for SLT)</b>	SLT	756	656	
04	<b>Cancel ACD Wrap-Up Time (for SLT)</b>	SLT	757	657	
05	<b>Set ACD Off Duty (for SLT)</b>	SLT	758	658	
06	<b>Cancel ACD Off Duty (for SLT)</b>	SLT	759	659	
07	--- Not Used ---				
08	<b>Agent ID Code Login</b> Allows an AIC Agent to log into a group.	MLT	No Setting	No Setting	
09	<b>Agent ID Code Logout</b> Allows an AIC Agent to log out of a group.	MLT	No Setting	No Setting	
10	<b>ACD Agent Login by Supervisor</b> Allows an ACD Supervisor to log into a group.	MLT	767	667	20-13-33
11	<b>ACD Agent Logout by Supervisor</b> Allows an ACD Supervisor to log out of a group.	MLT	768	668	20-13-33

**Input Data**

Item No.	Item	Terminals	Default (OT)	Default (AU)	Related Program
12	<b>Change Agent ACD Group by Supervisor</b> When using service code 669 to change an agent ACD group, the supervisor must enter a 2-digit number for the group. For example, to change to ACD group 4, the entry would be 669 04.	MLT	769	669	20-13-33
13	<b>ACD Agent Changing Own ACD Group</b> Using this service code, an ACD Agent can reassign themselves to another ACD Group.	MLT	775	670	20-13-33

 *MLT = Multiline Terminal*  
 *SLT = Single Line Telephone*

### 11-14 : Service Code Setup (for Hotel)

**Level:**  
**IN**

#### Description

Use **Program 11-14: Service Code Setup (for Hotel)** to customize the Service Codes which are used with the Hotel/Motel feature. You can customize additional Service Codes in Programs 11-10 ~ 11-13, 11-15 and 11-16. The Service Codes can be used only at telephones registered as hotel terminals in Program 42-02.

The following chart shows:

- The number of each code (01~18).
- The function of the Service Code.
- The type of telephones that can use the Service Code.
- The default entry.

#### Input Data

Item No.	Item	Terminals	Default (OT)	Default (AU)
01	Set DND for Own Extension	MLT, SLT	727	627
02	Cancel DND for Own Extension	MLT, SLT	728	628
03	Set DND for Other Extension	MLT, SLT	729	629
04	Cancel DND for Other Extension	MLT, SLT	730	630
05	Set Wake Up Call for Own Extension	MLT, SLT	731	631
06	Cancel Wake Up Call for Own Extension	MLT, SLT	732	632
07	Set Wake Up Call for Other Extension	MLT, SLT	733	633
08	Cancel Wake Up Call for Other Extension	MLT, SLT	734	634
09	Set Room to Room Call Restriction	MLT, SLT	735	635
10	Cancel Room to Room Call Restriction (Hotel)	MLT, SLT	736	636
11	Change Toll Restriction Class for Other Extension	MLT, SLT	737	637
12	Check-In	MLT, SLT	738	638

**Input Data**

Item No.	Item	Terminals	Default (OT)	Default (AU)
13	Check-Out	MLT, SLT	739	639
14	Room Status Change for Own Extension	MLT, SLT	740	640

### 11-15 : Service Code Setup, Administrative (for Special Access)

Level:

IN

#### Description

Use **Program 11-15: Service Code Setup, Administrative (for Special Access)** to customize the special access Service Codes which are used by the administrator in the Hotel/Motel feature. You can customize additional Service Codes in Programs 11-10 ~ 11-14 and 11-16.

The following chart shows:

- The number of each code (01~14).
- The function of the Service Code.
- What type of telephones can use the Service Code.
- The default entry.
- Programs that may be affected when changing the code.

#### Input Data

Item No.	Item	Terminals	Default (OT)	Default (AU)	Related Program
01	Remote Maintenance		830	730	
02	ACD Access in Dial-In Conversion Table		860	760	22-04 22-11
03	Backup Data Save This option saves the user's soft key settings (extension programmed Call Forwards, DND, etc.). This feature should be used before upgrading the system software.	MLT	## # 9	## # 9	
04	--- Not Used ---				
05	System Programming Mode, Log-On	MLT	## # *	## # *	11-01

### 11-16 : Single Digit Service Code Setup

**Level:**  
**IN**

#### Description

Use **Program 11-16: Single Digit Service Code Setup** to customize the one-digit Service Codes used when a busy or ring back signal is heard. You can customize additional Service Codes in Programs 11-10 ~ 11-15.

The following chart shows:

- The number of each code (01~11).
- The function of the Service Code.
- The default entry. For example, dialing 1 (Item 03) when calling an extension switches the call from either a voice or signal call (depending on how it is currently defined).
- Programs that may be affected by changing these codes.

#### Input Data

Item No.	Item	Default (OT)	Default (AU)	Related Program
01	Step Call	No Setting	2	11-12-07
02	Barge-In	No Setting	No Setting	11-12-08
03	Switching of Voice/Signal Call	1	1	11-12-06

## Program 11 : System Numbering

### 11-17 : ACD Group Pilot Number

**Level:**  
**IN**

#### Description

Use **Program 11-17: ACD Group Pilot Number** to assign the ACD Master Number for each ACD Group. This is the number a user dials to transfer calls to the ACD Group. Normally, you should use unassigned extension numbers for the master number. If you want to use an extension number which, by default, has a port number assigned (For example: in the 101~199, 3101~3257), first remove the default assignment. For example, to use extension number 125 as an ACD Master Number, first give extension port 025 a different assignment.

#### Input Data

ACD Group Number	01~64
------------------	-------

Item No.	ACD Group Pilot Number	Default
01	Dial (Up to eight digits)	ACD Group 1 ~ 64 = Not Assigned

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)
- Multiple Directory Numbers/Call Coverage Keys

## Program 11 : System Numbering

### 11-19: Remote Conference Pilot Number Setup

**Level:**

**IN**

#### Description

Use **Program 11-19: Remote Conference Pilot Number Setup** to assign the pilot number to be used for the Remote Conference. This is the number that outside parties will call in order to connect to a conference.

#### Input Data

Conference Group Number	1-4
-------------------------	-----

Item No.	Item	Remote Conference Group Pilot Number	Default	Related Program
01	Remote Conference Pilot Number	Dial (Up to 8 digits)	All Conference Group = No setting Note)	20-13-46 20-34

 *Note) Dont set the same setting with following programs: 11-02, 11-04, 11-06, 11-07, 11-08, 11-17.*

#### Conditions

None

#### Feature Cross Reference

Conference, Remote

## Program 11 : System Numbering

### 11-20: Dial Extension Analyze Table

**Level:**  
**IN**

#### Description

Use **Program 11-20: Dial Extension Analyze Table** to define the dial type based on three or more digits. This program is relevant only if digits in 11-01-01 are set to 9 (Dial Extension Analyze).

#### Input Data

Dial Extension Analyze Table	01~128
------------------------------	--------

Item No.	Dial Extension Analyze Table	Default	Related Program
01	Dial (Up to eight digits: 0, 1~9, #, Q, @)	No Setting	11-01
02	Type of Dials: 0 = Not used 1 = Service Code 2 = Extension Number 5 = Operator Access 6 = F-Route Access	0	11-01

#### Conditions

- When the system uses the Dial Extension Analyze Table to determine the dial type, the lower table has priority. For example, if Table 1 has 211 defined and Table 2 has 2113 defined, Table 1 is used to determine the dial type.

#### Feature Cross Reference

None

# Program 12 : Night Mode Setup

## 12-01: Night Mode Function Setup

Level:  
IN

Program

12

### Description

Use **Program 12-01: Night Mode Function Setup** to set up the Night Mode options. Refer to the following chart for a description of each option, its range and default setting.

#### Input Data

Item No.	Item	Input Data	Default	Description	Related Program
01	<b>Manual Night Mode Switching</b>	0 = Off 1 = On	1	Allow/Prevent as activating Night Service by dialing a service code.	11-10-01
02	<b>Automatic Night Mode Switching</b>	0 = Off 1 = On	1 (OT) 0 (AU)	According to a preset schedule, enable or disable Automatic Night Service for the system.	12-02 12-03 12-04
03	<b>Night mode switch operating mode</b>	0 = Not used 1 - 8 (Operation Mode1 - 8)	0	Use this option to set the operation mode of the CPU Night Service mode switch sensors (external Night Mode Selector Switch). The Night Service mode affects trunk inbound and outbound routing.	
04	<b>General Purpose Contact Detector</b> When 49-06 is set this set will ignore the 49-06 setting.	0 = Not used 1 - 1 = Detector Number	0	Set the detection circuit of the general purpose relay of the PGD Adapter when switching night mode (Program 10-41).	10-41

 Even if the operation mode is changed manually, the operation mode changes according to the schedule set up.

#### Conditions

None

### Feature Cross Reference

- Night Service

## Program 12 : Night Mode Setup

### 12-02: Automatic Night Service Patterns

**Level:**  
**SA**

#### Description

Use **Program 12-02: Automatic Night Service Patterns** to define the daily pattern of the Automatic Mode Switching. Each Mode Group has 10 patterns. These patterns are used in Programs 12-03 & 12-04. The daily pattern consists of 20 timer Settings.

#### Input Data

Night Mode Service Group Number	01~32
---------------------------------	-------

Time Pattern Number	01~10
---------------------	-------

Set Time Number	01~20
-----------------	-------

Item	Description	Input Data
01	Start Time	0000~2359
02	End Time	0000~2359
03	Operation Mode	1~8

Example:

#### Time Pattern 1

0:00	9:00	12:00	13:00	17:00	18:00	22:00	0:00
Mode 3 (midnight)	Mode 1 (day)	Mode 4 (rest)	Mode 1 (day)	Mode 4 (rest)	Mode 2 (night)	Mode 3 (midnight)	

To make the above schedule, it is necessary to set the data as follows:

Time setting 01:	00:00 to 09:00	Mode 3 (midnight)
Time setting 02:	09:00 to 12:00	Mode 1 (day)
Time setting 03:	12:00 to 13:00	Mode 4 (rest)
Time setting 04:	13:00 to 17:00	Mode 1 (day)
Time setting 05:	17:00 to 18:00	Mode 4 (rest)
Time setting 06:	18:00 to 22:00	Mode 2 (night)
Time setting 07:	22:00 to 00:00	Mode 3 (midnight)

**Time Pattern 2**

0:00 0:00

Mode 2  
(night)

Time setting 01: 00:00 to 00:00 Mode 2 (night)

**Default**

All groups, all patterns: 00:00 to 00:00 = Mode 1

**Time Pattern 1**

Set Time Number	Start Time	End Time	Mode
01	0000	0800	2
02	0800	1700	1
03	1700	0000	2
04	0000	0000	1
:	:	:	:
20	0000	0000	1

**Time Pattern 2**

Set Time Number	Start Time	End Time	Mode
01	0000	0000	2
02	0000	0000	1
:	:	:	:
20	0000	0000	1

**Time Pattern 3~10**

Set Time Number	Start Time	End Time	Mode
01	0000	0000	1
:	:	:	:
20	0000	0000	1

**Conditions**

None

## Program 12 : Night Mode Setup

### 12-04: Holiday Night Service Switching

**Level:**  
**SA**

#### Description

Use **Program 12-04: Holiday Night Service Switching** to define a yearly schedule of holiday night-switch settings. This schedule is used for the setting of special days when the company is expected to be closed, such as a national holiday.

#### Input Data

Night Mode Service Group Number	01~32
---------------------------------	-------

Item No.	Days and Months	Time Pattern Number	Default
01	0101~1231 (e.g. 0101 = Jan. 1; 1231 = Dec. 31)	0~10 (0 = No Setting)	No Setting

#### Conditions

None

#### Feature Cross Reference

- Night Service

## Program 12 : Night Mode Setup

### *12-05: Night Mode Group Assignment for Extensions*

**Level:**  
**IN**

#### Description

Use **Program 12-05: Night Mode Group Assignment for Extensions** to assign Day/Night Mode Group for each extension.

#### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Item No.	Night Mode Service Group Number	Default
01	01~32	1

#### Conditions

None

#### Feature Cross Reference

- Night Service

## Program 12 : Night Mode Setup

### 12-06: Night Mode Group Assignment for Trunks

**Level:**

**IN**

#### Description

Use **Program 12-06: Night Mode Group Assignment for Trunks** to assign a Day/ Night Mode Group for each trunk port.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Night Mode Service Group Number	Default
01	01~32	1

#### Conditions

None

#### Feature Cross Reference

- Night Service

## Program 12 : Night Mode Setup

### 12-07: Text Data for Night Mode

**Level:**  
**IN**

#### Description

Use **Program 12-07: Text Data for Night Mode** to make an original text message which is displayed on an LCD of Multiline telephone in each Mode.

#### Input Data

Night Mode Service Group Number	01~32
Day/Night Mode	1~8

Item No.	Text Message	Default
01	Maximum 12 Characters (alphabetic or numeric)	<input type="radio"/> Mode 1 = No setting <input type="radio"/> Mode 2 = <Night> <input type="radio"/> Mode 3 = <Mid-night> <input type="radio"/> Mode 4 = <Rest> <input type="radio"/> Mode 5 = <Day2> <input type="radio"/> Mode 6 = <Night2> <input type="radio"/> Mode 7 = <Midnight2> <input type="radio"/> Mode 8 = <Rest2>

#### Conditions

None

#### Feature Cross Reference

- Night Service

## Program 12 : Night Mode Setup

### 12-08: Night Mode Service Range

**Level:**  
**SA**

#### Description

Use **Program 12-08: Night Mode Service Range** to define the changing range of toggle key for each Day/Night Mode.

#### Input Data

Night Mode Service Group Number	01~32
---------------------------------	-------

Item No.	Range	Default
01	2~8	2

#### Example:

When Program 12-08 is set to 3 and the Mode Key is pressed, the following modes are switched:

- Press once = Night
- Press twice = Mid-night
- Press third = Day
- Default = 2

#### Conditions

None

#### Feature Cross Reference

- Night Service

# Program 14 : Trunk, Basic Setup

## 14-01: Basic Trunk Data Setup

Level:  
IN

Program

14

### Description

Use **Program 14-01: Basic Trunk Data Setup** to set the basic options for each trunk port. Refer to the chart below for a description of each option, its range and default setting.

### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default	Related Program
01	<b>Trunk Name</b> Set the names for trunks. The trunk name displays on a multiline terminal for incoming and outgoing calls.	Up to 12 Characters	Refer to below chart	
02	<b>Transmit Level</b> Use this option to select the CODEC gain for the trunk. The option sets the gain (signal amplification) for the trunk you are programming.	1~63 (-15.5dB~ +15.5dB in 0.5dB intervals)	32 (0dB)	
03	<b>Receive Level</b> Use this option to select the CODEC gain for the trunk. The option sets the gain (signal amplification) for the trunk you are programming.	1~63 (-15.5dB ~ +15.5dB in 0.5dB intervals)	32 (0dB)	

Item No.	Item	Input Data	Default	Related Program
04	<p><b>Transmit Gain Level for Conference and Transfer Calls</b></p> <p>Use this option to select the CODEC gain type used by the trunk when it is part of an Unsupervised Conference.</p>	1~63 (-15.5dB ~ +15.5dB in 0.5dB intervals)	32 (0dB)	
05	<p><b>Receive Gain Level for Conference and Transfer Calls</b></p> <p>Use this option to select the CODEC gain type used by the trunk when it is part of an Unsupervised Conference.</p>	1~63 (-15.5dB ~ +15.5dB in 0.5dB intervals)	16 (-8dB) (OT) 32 (0dB) (AU)	
06	<p><b>SMDR Printout</b></p> <p>Use this option to have the system include/exclude the trunk you are programming from the SMDR printout. Refer to Program 35-01 and 35-02 for SMDR printout options.</p>	0 = No Print Out 1 = Prints Out	0 (OT) 1 (AU)	35-01 35-02
07	<p><b>Outgoing Calls</b></p> <p>Use this option to allow/prevent outgoing calls on the trunk you are programming.</p>	0 = Deny (No) 1 = Allow (Yes)	1	
08	<p><b>Toll Restriction</b></p> <p>Use this option to enable/disable Toll Restriction for the trunk. If enabled, the trunk follows Toll Restriction programming (example: Programs 21-05, 21-06). If disabled, the trunk is a toll free line.</p>	0 = Restriction Disabled (No) 1 = Restriction Enabled (Yes)	1	21-04 21-05 21-06

Item No.	Item	Input Data	Default	Related Program
09	<b>Private Line</b>	0 = Disable Private Line (Normal) 1 = Enable Private Line (Private Line)	0	
10	<b>DTMF Tones for Outgoing Calls</b> Use this option to enable (1) or disable (0) DTMF tones for outgoing trunk calls.	0 = Disable (No) 1 = Enable (Yes)	0	
11	<b>Account Code Required</b>	0 = Disable (No) 1 = Enable (Yes)	1	
12	--- Not Used ---			
13	<b>Trunk-to-Trunk Transfer</b> Use this option to enable (1) or disable (0) loop supervision for the trunk. This option is required for Call Forwarding Off-Premise and Tandem Trunking only.	0 = Disable (No) 1 = Enable (Yes)	0 (OT) 1 (AU)	
14	<b>Long Conversation Cutoff</b> Use this option to enable or disable the Long Conversation Cutoff feature for each trunk.	0 = Disable (No) 1 = Enable (Yes)	0	20-21-03 20-21-04
15	<b>Long Conversation Alarm Before Cutoff</b> Use this option to enable or disable the Long Conversation Alarm for each trunk.	0 = Disable (No) 1 = Enable (Yes)	0	20-21-01 20-21-02

Item No.	Item	Input Data	Default	Related Program
16	<p><b>Forced Release of Held Call</b></p> <p>Use this option to enable/disable forced release for calls on Hold. If enabled, the system disconnects a call if it is on Hold longer than a programmed interval (Program 24-01-05). If disabled, forced disconnection does not occur. Program 24-01-01 also affects this option.</p>	<p>0 = Disable (No)</p> <p>1 = Enable (Yes)</p>	0	<p>24-01-01</p> <p>24-01-05</p>
17	<p><b>Trunk to Trunk Warning Tone for Long Conversation Alarm</b></p> <p>Use this option to enable or disable the Warning Tone for Long Conversation feature for DISA callers.</p>	<p>0 = Disable (No)</p> <p>1 = Enable (Yes)</p>	0	
18	<p><b>Warning Beep Tone Signaling</b></p>	<p>0 = Disable (No)</p> <p>1 = Enable (Yes)</p>	0	
19	<p><b>Privacy Mode Toggle Option</b></p> <p>Use this option to enable or disable a trunk ability to be switched from private to non-private mode by pressing the line key or Privacy Release function key.</p>	<p>0 = Disable (No)</p> <p>1 = Enable (Yes)</p>	0	

Item No.	Item	Input Data	Default	Related Program
20	<p><b>Block Outgoing Caller ID</b></p> <p>Allow (1) or prevent (0) the system from automatically blocking outgoing Caller ID information when a user places a call. If allowed (i.e. block, enabled), the system automatically inserts the Caller ID block code (defined in 14-01-21) before the user dialed digits.</p>	<p>0 = Prevent (No)</p> <p>1 = Allow (Yes)</p>	0	<p>14-01-21</p> <p>20-08-15</p>
21	<p><b>Caller ID Block Code</b></p> <p>Enter the code, up to 8 digits, that should be used as the Caller ID Block Code. This code is automatically inserted before dialed digits if Program 14-01-20 is set to 1.</p>	Dial (up to eight digits)	No Setting (OT) 1831 (AU)	<p>14-01-20</p> <p>20-08-15</p>
22	<p><b>Caller ID to Voice Mail</b></p> <p>Enable or disable the system ability to send the Caller ID digits (Remote Log-On Protocol) to voice mail.</p>	<p>0 = Disable (No)</p> <p>1 = Enable (Yes)</p>	0	
23	<b>Least Cost Routing</b>	<p>0 = LCR Off</p> <p>1 = LCR On</p> <p>2 = LCR On (Cost Center Code only)</p>	0	
24	<p><b>Trunk-to-Trunk Outgoing Caller ID through Mode</b></p> <p>Enable (1) or Disable (0) the ability to send the original Caller ID through when the call is Forward Off-Premise.</p>	<p>0 = Disable (No)</p> <p>1 = Enable (Yes)</p>	0	

Item No.	Item	Input Data	Default	Related Program
25	<b>Continued/ Discontinued Trunk-to-Trunk Conversation</b> Enable (1) or Disable (0) the ability to dial a service code to continue or disconnect the Trunk-to-Trunk conversation after the alert tone is heard.	0 = Disable (No) 1 = Enable (Yes)	0	20-28-01 20-28-02 20-28-03 24-02-07 24-02-10 25-07-07 25-07-08
26	<b>Automatic Trunk-to-Trunk Transfer Mode</b>	0 = Normal Transfer (Normal) 1 = Step Transfer (Step)	0	24-02-11 24-02-12
27	<b>Caller ID Refuse Setup</b>	0 = Disable (No) 1 = Enable (Yes)	0	
28	<b>Effectivity of "Conversation Recording Destination for Extension"</b>	0 = No Effect (No) 1 = Available (Yes)	1	15-12
30	<b>Flexible Ringing by Caller ID</b>	0 = Disable (No) 1 = Enable (Yes)	1	13-04
32	<b>Anti-trombone Function</b>	0 = No Effect (No) 1 = Available (Yes)	0	
33	<b>APSU(VM00) Trunk Receive Gain</b> Additional PAD when a trunk call connects to APSU Voice Mail.	1~63 (-15.5dB ~ +15.5dB in 0.5dB intervals)	32 (0dB)	
35	<b>DT700 Large LED Illumination Setup</b> Sets LED color for incoming trunk call. InDT700 local terminal setting menu, Illumination setting must be 'Automatic', otherwise the terminal will ignore PRG 14-01-35, PRG 15-05-37 and PRG 15-23 settings.	2 = Red 3 = Green 4 = Blue 5 = Yellow 6 = Purple 7 = Light Blue 8 = White 9 = Rotation	2	

**Default (PRG: 14-01-01)**

Trunk Port Number	Name
1	Line 001
2	Line 002

## Program 14 : Trunk, Basic Setup

### 14-02: Analog Trunk Data Setup

**Level:**  
**IN**

#### Description

Use **Program 14-02: Analog Trunk Data Setup** to set the basic options for each analog trunk port. Refer to the table below for a description of each option, its range and default setting.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default	Related Program
01	<b>Signaling Type (DP/DTMF)</b> This option sets the signaling type for the trunk.	0 = Dial Pulse (10 PPS) 1 = Dial Pulse (20 PPS) 2 = DTMF	2	
02	<b>Ring Detect Type</b> This option sets Extended Ring Detect or Immediate Ring Detect for the trunk. For T1 loop/ground start trunks, this option must be set to 1 for the trunks to ring and light correctly.	0 = Normal/delayed 1 = Immediate Ringing	0 (OT) 1 (AU)	
03	<b>Flash Type</b> This option selects the flash type (open loop flash or ground). Always set this option for open loop flash.	0 = Open Loop Flash 1 = Ground	0	
04	<b>Hooking Type</b> This option lets you use Flash for Timed Flash (Program 81-01-14) or Disconnect (Program 81-01-15). (A user implements Flash by pressing the FLASH key while on a trunk call.)	0 = Timed Flash (Hooking) 1 = Disconnect (Cut)	0	81-01-14 81-01-15
05	<b>Dial Tone Detection for Manually Accessed Trunks</b> Use this option enable/disable dial tone detection for directly accessed trunks. If disabled, the system outdials on the trunks without monitoring for dial tone.	0 = Dial Tone Detection Not Used 1 = Dial Tone Detection Used	1 (OT) 0 (AU)	21-01-04

Item No.	Item	Input Data	Default	Related Program
06	<b>Pause at 1st Digit after Line Seize in Manual Dial Mode</b>	0 = No Pause (No) 1 = Pause (Yes)	1	21-01-06
07	<b>DP to DTMF Conversion Options</b> Determine how a user can convert a Dial Pulse (DP) call to a DTMF call. For each trunk, set the type of DP to DTMF conversion required. There are three conversion options: Automatic (0), Automatic and Manual (1), or Manual (2). <i>Automatic:</i> DP to DTMF conversion occurs automatically if the extension user waits more than 10 seconds before dialing the next digit. <i>Automatic and Manual:</i> DP to DTMF conversion occurs automatically if the extension user waits more than 10 seconds before dialing the next digit. In addition, the user can dial # to switch a DP trunk to DTMF dialing. <i>Manual:</i> Users can dial # to switch a DP trunk to DTMF dialing.	0 = Automatic 1 = Automatic and Manual 2 = Manual	2	21-01-03
08	<b>Answering Condition</b>	0 = Polarity Reversing (Polarity) 1 = Polarity Reversing or Timer (Int Digit)	1	21-01-03
09	<b>Busy Tone Detection</b>	0 = Disable (No) 1 = Enable (Yes)	0 (OT) 1 (AU)	
10	<b>Caller ID</b> Enable or disable a trunk ability to receive Caller ID information.	0 = No 1 = Yes	0 (OT) 1 (AU)	
11	<b>Next Trunk in Rotary if No Dial Tone</b> Use this option to enable/disable the system ability to skip over a trunk if dial tone is not detected. This option pertains to calls placed using Speed Dial, ARS, Last Number Redial or Save Number dialed. It does not pertain to line key or Direct Trunk Access calls.	0 = Disable (No) 1 = Enable (Yes)	0	
12	<b>Detect Network Disconnect Signal</b>	0 = Disable (No) 1 = Enable (Yes)	0	

Item No.	Item	Input Data	Default	Related Program
13	<b>Trunk-to-Trunk Limitation</b>	0 = Disable (No) 1 = Enable (Yes)	0	
14	<b>Loop Start/Ground Start</b>	0 = Loop Start (Loop) 1 = Ground Start (Ground)	0	
16	<b>Caller ID Type</b>	0 = FSK 1 = DTMF	0	
17	<b>Sync. Ringing</b> Use this to specify whether or not CO/PBX calls follow Synchronous Ringing.   <i>Synchronous Ringing does not apply to incoming DID calls, off-hook ringing calls, or CO/PBX ring transfer calls.</i>	0 = Disable 1 = Enable	0 (OT) 1 (AU)	
18	<b>Busy Tone Detection on Talking</b>	0 = Disable 1 = Enable	0	
19	<b>Busy Tone Detection Frequency</b>	1~255	1	14-02-18
20	<b>Busy Tone Detection Interval</b>	0 = No 1 = Yes	0	14-10
21	<b>Fax Branch Connection</b>	0 = No 1 = Yes	0	14-10
22	<b>Deny Collect Call Receiving for CO Trunk (OT)</b>	0 = Disable 1 = Enable	0	
23	<b>Caller ID Receiving Method (AU)</b> Rings extension before receiving Caller ID (1) or after receiving Caller ID (0).	0: Wait Caller ID 1: Immediate Ring	1	

**Conditions**

None

**Feature Cross Reference**

None

## Program 14 : Trunk, Basic Setup

### 14-04: Behind PBX Setup

**Level:**

**IN**

#### Description

Use **Program 14-04: Behind PBX Setup** to indicate if the trunk is installed behind a PBX. There is a separate setting for each mode 1-8.

#### Input Data

Trunk Port Number	1~200
-------------------	-------

Item No.	Day/Night Mode	Type of Connection	Default	Related Program
01	1~8	0 = Stand Alone (Trunk) 1 = Behind PBX (PBX) 2 = Not Used 3 = CTX assume 9	0	22-02

#### Conditions

None

#### Feature Cross Reference

- Central Office Calls, Placing

## Program 14 : Trunk, Basic Setup

### 14-05: Trunk Group

**Level:**  
**IN**

#### Description

Use **Program 14-05: Trunk Group** to assign trunks to Trunk Groups. You can also assign the outbound priority for trunks within the group. When users dial up the trunk group, they seize the trunks in the order you specify in the outbound priority entry.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Trunk Group Number	Priority Number
01	0~100	1~200

#### Default

Trunk Port	Group	Priority
1	1	1
:	:	:
200	1	200

#### Conditions

None

#### Feature Cross Reference

- Trunk Groups

---

---

## Program 14 : Trunk, Basic Setup

### 14-06: Trunk Group Routing

Level:  
IN

---

#### Description

Use **Program 14-06: Trunk Group Routing** to set up an outbound routing table for the trunk groups you assigned in Program 14-05. When a user dial 9, the system routes their calls in the order (priority) specified. For example, if a user dials 9 and all calls in the first group are busy, the system may route the call to another group. Trunk Access Map programming (Programs 14-07) may limit this option. The system contains 100 routing tables for trunk access. Each table has four priority orders for trunk access. There are 100 available Trunk Group Numbers.

Example for setting:

With less than four trunk groups,

Route Number 1 : Order 1 – Trunk Group 1  
: Order 2 – Trunk Group 2

For the above setting, if all the lines in trunk group 1 are busy, the system searches for an idle line in trunk group 2.

With more than four trunk groups,

Route Number 1 : Order 1 – Trunk Group 1  
: Order 2 – Trunk Group 2  
: Order 3 – Trunk Group 3  
: Order 4 – 1002 (Jump To Route Number 2)  
Route Number 2 : Order 1 – Trunk Group 4  
: Order 2 – Trunk Group 5

For the above setting, if all the lines in the trunk groups 1, 2 and 3 are busy, the system searches for an idle line in trunk groups 4 and 5.

**Input Data**

Route Table Number	001~100
--------------------	---------

Item No.	Priority Order Number	Input Data	Default	Related Program
01	1~4	(OT) 0 = Not Set 001-100 = Trunk group No. 101-150 = 100+Networking System No. 1001-1100 = 1000+Route Table No.  (AU) 0 = Not Set 001 - 100: Trunk Group No. 1001-1100: 1000+Route Table No.	See Below	14-01-07 14-05 15-01-02 21-02

**Default**

- Route 1, Order Number 1 = 1 (Trunk Group 1).
- Order Numbers 2, 3, 4 = 0 (Not Specified).
- All Other Routes (2~100) and Order Numbers (1~4) = 0 (Not Specified).

**Conditions**

None

**Feature Cross Reference**

None

## Program 14 : Trunk, Basic Setup

### 14-07: Trunk Access Map Setup

**Level:**  
**IN**

#### Description

Use **Program 14-07: Trunk Access Map Setup** to set up the Trunk Access Maps. This sets an extension access options for trunks. For example, an extension can place only outgoing calls on trunks to which it has outgoing access. There are 200 Access Maps with all 200 trunk ports programmed in Map 1 with full access.

An extension can use one of the maps you set up in this program. Use Program 15-06 to assign Trunk Access Maps to extensions. Each trunk can have one of eight access options for each Access Map.

 **Emergency calls will override Program 14-07 settings.**

#### Input Data

Access Map Number	001~200
-------------------	---------

Item No.	Trunk Port Number	Input Data
01	001~200	0 = No access 1 = Outgoing access only 2 = Incoming access only 3 = Access only when trunk on Hold 4 = Outgoing access and access when trunk on Hold 5 = Incoming access and access when trunk on Hold 6 = Incoming and Outgoing access 7 = Incoming access, outgoing access and access when trunk on Hold

#### Default

- Access Map 1 = Trunk Ports 1-200 assigned with option '7' access (incoming and outgoing access and access when trunk is on Hold).
- Access Maps 2-200 - Trunk Ports 1-200 assigned with option '0' access (no access). (OT)
- Access Map 2-200 = Trunk Ports 1-200 assigned with option '7' access (incoming and outgoing access and access when trunk is on Hold). (AU)

**Conditions**

None

---

**Feature Cross Reference**

- Central Office Calls, Placing

## Program 14 : Trunk, Basic Setup

### 14-08: Music on Hold Source for Trunks

**Level:**  
**IN**

#### Description

Use **Program 14-08: Music on Hold Source for Trunks** to define a Music on Hold source for a trunk as either the ACI or COI port.

 *If ACI is selected as the source in Item 1, the port number for the source must be selected in Item 2.*

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default
01	<b>MOH Type</b> Select a Music on Hold source for the trunk.	0 = Internal synthesized/external MOH 1 = A customer-provided source connected to BGM port 2 = A customer-provided source connected to ACI port	0
02	<b>Source Port Number</b>	If the MOH Type is 2, the source port number is 0~96.	0

#### Conditions

None

#### Feature Cross Reference

Music on Hold

## Program 14 : Trunk, Basic Setup

### 14-09: Conversation Recording Destination for Trunks

**Level:**

**IN**

#### Description

Use **Program 14-09: Conversation Recording Destination for Trunks** to set the ACI Conversation Recording destination for each trunk.

 *If both Programs 14-09 and 15-12 define a destination, the destination in Program 15-12 is followed.*

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default
01	<b>ACI Recording Destination Extension Number</b> Enter the ACI extension number where the trunk calls should be recorded.	Maximum eight digits	No Setting
02	<b>ACI Automatic Recording for Incoming Calls</b> Determine if incoming trunk calls should be automatically recorded in the ACI.	0 = Off 1 = On	0
04	<b>Automatic Recording for Outgoing Call (OT)</b>	0 = Off 1 = On	0

#### Conditions

None

#### Feature Cross Reference

- Analog Communications Interface (ACI)

## Program 14 : Trunk, Basic Setup

### 14-11: ID Setup for IP Trunk

**Level:**  
**IN**

#### Description

Use **Program 14-11: ID Setup for IP Trunk** to set the ID of each IP Trunk. This program refers to incoming and outgoing IP Trunk calls. The ID is sent on an outgoing IP Trunk call. This program is used only for H.323.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default
01	IP Trunk ID	0~65535 (0 = No setting)	0

#### Conditions

- This Data is referred to at IP trunk outgoing call, or IP trunk incoming call.
- This ID is notified at IP trunk outgoing call.
- It is not notified when ID is 0.
- Incoming Call arrives to the trunk port of the same ID as ID notified from the partner system.

#### Feature Cross Reference

- IP Trunk – H.323 (OT)

## Program 14 : Trunk, Basic Setup

### 14-12: SIP Register ID Setup for IP Trunk

**Level:**  
**IN**

---

#### Description

Use **Program 14-12: SIP Register ID Setup for IP Trunk** to define the SIP Register ID for IP Trunks.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default
01	Register ID	0 ~ 31	0
02	Pilot Register ID	0 ~ 31	0

#### Conditions

None

---

#### Feature Cross Reference

None

## Program 14 : Trunk, Basic Setup

### 14-13: CCIS System Route ID

**Level:**  
**IN**

#### Description

Use **Program 14-13: CCIS System Route ID** to define the CCIS route ID to the trunk group used for K-CCIS.

#### Input Data

Trunk Group Number	001~100
--------------------	---------

Item No.	Trunk Group Number	Input Data	Default	Related Program
01	001~100	0 = Not Assigned 1 ~ 8 =CCIS Route IDs  CCIS Route IDs 5~ 8 are for future use and should not be used.	0	14-05-01 50-02-01 50-02-02 50-02-03 50-02-04 50-02-05 50-02-06

#### Conditions

- Not used for IP-CCIS

#### Feature Cross Reference

- Key-Common Channel Interoffice Signaling (K-CCIS)

## Program 14 : Trunk, Basic Setup

### 14-14: CCIS Trunk CIC Assignment

**Level:**  
**IN**

#### Description

Use **Program 14-14: CCIS Trunk CIC Assignment** to define the CIC (Circuit Identifier Code) to each voice channel (trunk port) used for K-CCIS.

#### Input Data

Trunk Number	001 ~ 200
--------------	-----------

Item No.	Trunk Number	Input Data	Default	Related PRG
01	001~200	0 = Not Assigned 1~127 = CIC Numbers	0	14-05-01

#### Conditions

- CIC Numbers must be assigned consecutively for K-CCIS to operate correctly.
- The D-Channel trunk port should not have a CIC assignment.
- This is not used for IP-CCIS.

#### Feature Cross Reference

- Key-Common Channel Interoffice Signaling (K-CCIS)

## Program 14 : Trunk, Basic Setup

### 14-15: ISDN Call Forward Method

**Level:**  
**IN**

#### Description

Use **Program 14-15: ISDN Call Forward Method** to assign the activation of Call Deflection/ Call Rerouting feature.

#### Input Data

Trunk Port Number	001 ~ 200
-------------------	-----------

Item No.	Trunk Group Number	Input Data	Default	Related Program
01	Set the activation of Call Deflection/ Call Rerouting feature.	0: Normal operation 1: Call Rerouting 2: Call Deflection	0	13-04-06

#### Conditions

None

#### Feature Cross Reference

None

## Program 14 : Trunk, Basic Setup

### 14-16: ISDN Call Transfer Method (OT)

**Level:**  
**IN**

#### Description

Use **Program 14-16: ISDN Call Transfer Method** to assign the method of ECT supplementary service. This mode will control behavior of FLASH operation at the station which is being grab ISDN trunk.

#### Input Data

Trunk Port Number	001 ~ 200
-------------------	-----------

Item No.	Trunk Group Number	Input Data	Default
01	Set the method of ECT supplementary service.	0: Original 1: Implicit 2: ECT 3: Explicit ECT	0

#### Conditions

None

None

# Program 15 : Extension, Basic Setup

## 15-01 : Basic Extension Data Setup

**Level:**  
**SA**

Program

15

### Description

Use **Program 15-01 : Basic Extension Data Setup** to define the basic settings for each extension.

### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Item	Input Data	Default	Related Program
01	<b>Extension Name</b> Define the extension/ virtual extension name.	Up to 12 Characters	Ext.200 = STA 200 (OT) Ext.101 = STA 101 (AU)	
02	<b>Outgoing Trunk Line Preference</b> Use this option to set the extension outgoing Trunk Line Preference. If enabled, the extension user receives trunk dial tone when they lift the handset. The user hears trunk dial tone only if allowed by Trunk Access Map programming (Programs 14-07 and 15-06). Refer to the Line Preference feature for more details.	0 = Off 1 = On	0	14-06 21-02
03	<b>SMDR Printout</b> Use this option to include or exclude the extension in the SMDR report.	0 = Do not print on SMDR report 1 = Include on SMDR report	1	

Item No.	Item	Input Data	Default	Related Program
04	<b>ISDN Caller ID</b> If both Program 15-01-04 and 10-03-05 are enabled, the system includes Caller ID in the Setup message as Presentation Allowed. If these options are disabled, it is Presentation Restricted.	0 = Disable 1 = Enable	1	10-03-05 20-08-13
05	<b>Restriction for Outgoing Disable on Incoming Line</b> Enable or disable supervised dial detection for an extension.	0 = Supervise dial detection 1 = Not supervise dial detection	0	21-01-15 21-01-16 21-01-17 80-03-01
07	<b>Do-Not-Call</b>	0 = Off 1 = On	0	21-01-19
08	<b>Call Attendant Busy Message</b>	0~100 (0 = No setting)	0	11-11-59 40-10-08
09	<b>Call Attendant Answer Message</b>	0~100 (0 = No setting)	0	11-11-60 40-10-09
10	<b>Extension Number</b> Sends caller name on outgoing ISDN calls.	0 = Disable 1 = Enable	0

## Program 15 : Extension, Basic Setup

### 15-02 : Multiline Telephone Basic Data Setup

Level:

IN

#### Description

Use **Program 15-02: Multiline Telephone Basic Data Setup** to set up various Multiline telephone options.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Item	Input Data	Default	Related Program
01	<b>Display Language Selection</b> (To select options 8~10, press either 8 or Recall, then press line keys 1~3. Key 1 is option 8, Key 2 is option 9, and Key 3 is option 10.)	0 = Not Used 1 = English 2 = German 3 = French 4 = Italian 5 = Spanish 6 = Dutch 7 = Portuguese 8 = Norwegian 9 = Danish 10 = Swedish 11 = Turkish 12 = Latin American Spanish 13 = Romanian 14 = Polish 15 = Latin American Portuguese (OT) 16 = Russian (OT)	1	11-11-13
02	<b>Trunk Ring Tone</b> Use this option to set the tone (pitch) of the incoming trunk ring for the extension port you are programming.  <i>DTU/DTP-style telephones only follow high, medium and low range ring tone settings. They do not follow Melodies.</i>	1 = High 2 = Medium 3 = Low 4 = Ring Tone 1 5 = Ring Tone 2 6 = Ring Tone 3 7 = Ring Tone 4 8 = Ring Tone 5	2	22-03

Item No.	Item	Input Data	Default	Related Program
03	<p><b>Extension Ring Tone</b></p> <p>Use this option to set the tone (pitch) of the incoming extension call ring for the extension port you are programming. Also refer to Program 15-08.</p> <p> <i>DTU/DTP style telephones only follow high, medium and low range ring tone settings. They do not follow Melodies.</i></p>	1 = High 2 = Medium 3 = Low 4 = Ring Tone 1 5 = Ring Tone 2 6 = Ring Tone 3 7 = Ring Tone 4 8 = Ring Tone 5	8	
04	<p><b>Redial (Speed Dial) Control</b></p> <p>Use this option to control the function of the extension Redial key when used with Speed Dialing. The Redial key can access either the Common/Individual or Group Speed Dialing numbers.</p>	0 = Common Speed Dialing 1 = Group Speed Dialing	0	
05	<p><b>Transfer Key Operation Mode</b></p> <p>Use this option to set the operating mode of the extension CONF key. The keys can be for Call Transfer, Serial Calling or Flash. When selecting the Flash option (selection 2), refer also to Program 81-01-14.</p>	0 = Transfer 1 = Call back 2 = Hook	0	
06	<p><b>Hold Key Operating Mode</b></p> <p>Use this option to set the function of the Multiline Hold key. The Hold key can activate normal Hold or Exclusive Hold.</p>	0 = Normal (Common) 1 = Exclusive Hold 2 = Park Hold (OT)	0	
07	<p><b>Automatic Hold for CO Lines</b></p> <p>When talking on a CO call and another CO line key is pressed, the original trunk is placed on Hold (0) or Disconnected (1).</p>	0 = Hold 1 = Disconnect (Cut)	1	
08	<p><b>Automatic Handsfree</b></p> <p>Use this option to set whether pressing a key accesses a One-Touch Key or if it preselects the key.</p>	0 = Preselect 1 = One-Touch (Automatic Handsfree)	1	
10	<p><b>Ringing Line Preference for Trunk Calls</b></p> <p>Use this option to select between Idle and Ringing Line Preference for trunk calls.</p>	0 = Idle (Off) 1 = Ringing (On)	1	

Item No.	Item	Input Data	Default	Related Program
11	<p><b>Callback Automatic Answer</b></p> <p>Use this option to enable or disable automatic answer of calls recalling to a station. For example, if a Transfer Recall or Hold Recall is ringing back to a station, the following happens:</p> <p>If PRG 15-02-11 is enabled, the station will automatically answers the recall when it goes off-hook.</p> <p>If PRG 15-02-11 is disabled, a station does not automatically answer the recall when it goes Off-Hook. The user must first press the line appearance of the recalling call or press the answer key.</p>	0 = Off 1 = On	1	
12	<p><b>Off-Hook Ringing</b></p> <p>Use this option to set the telephone Off-Hook signaling. Off-hook signaling occurs when a telephone user receives a second call while busy on a handset call. To enable/disable Off-Hook Signaling for an extension Class of Service, use Program 20-13-06.</p>	0 = Muted Off-Hook Ringing 1 = No Off-Hook Ringing 2 = Not Used 3 = Beep in Speaker (SP) 4 = Beep in Handset (HS) 5 = Speaker & Handset Beep	0 (OT) 5 (AU)	
13	<p><b>Redial List Mode</b></p> <p>Select whether the Redial List feature should store internal and external numbers (0), or only external numbers (1).</p>	0 = ICM/Trunk (Extension/Trunk Mode) 1 = Trunk Mode	1	
15	<p><b>Storage of Caller-ID for answered call</b></p>	0 = Disable (Off) 1 = Enable (On)	1	
16	<p><b>Handsfree Operation</b></p> <p>Enable or disable an extension ability to use the speakerphone on <b>outside</b> calls. When disabled, users can hear the conversation, but cannot respond handsfree.</p>	0 = Disable (Off) 1 = Enable (On)	1	
18	<p><b>Power-Saving Mode</b></p>	0 = Normal mode 1 = Power-Saving Mode (Eco-Mode)	1	20-02-10
19	<p><b>CTA Data Communication Mode</b></p> <p>Select 0 if the dip switch settings on the CTA Adapter are set to PC connection (1=on, 2~8=off) or select 1 if the DIP switches are set to printer connection (1~2=on, 3~8=off).</p>	0 = CTI Mode 1 = Non Procedural Mode (Non-SCS)	0	15-02-20

Item No.	Item	Input Data	Default	Related Program
20	<b>Baud Rate for CTA Port</b> Select the baud rate used by the CTA Adapter.	0 = 4800 1 = 9600 2 = 19200	2	15-02-19
21	<b>Virtual Extension Access Mode (when idle Virtual Extension key pressed)</b> Determine whether a Virtual Extension (VE) should function as a DSS key or a Virtual Extension. When DSS (0) is selected, the key functions as a DSS key to the extension and for incoming calls to that extension. When Outgoing (1) is selected, the key functions as a virtual extension and can be used for incoming and outgoing calls. When Ignore (2) is selected, the key functions can receive incoming calls only.	0 = DSS 1 = Outgoing (OTG) 2 = Ignore	2	
22	<b>Multiple Incoming From Intercom and Trunk</b> If enabled, this affects how a Hotline key lights, based on the setting in Program 22-01-01. If 22-01-01 is set to 1 for trunk priority, the Hotline key lights solid when a trunk call rings in. If 22-01-01 is set to 0 for intercom priority, the Hotline key does not light for incoming trunk calls, but lights solid for intercom calls. If 15-02-22 is disabled, Hotline keys light solid for any incoming calls regardless of the setting in Program 22-01-01.	0 = Disable 1 = Enable	1	22-01-01
23	<b>Speed Dial Preview Mode</b> This option defines how a speed dial key functions when pressed. If set to Preview (0), the speed dial number can be previewed before dialing. If set to Outgoing Immediate (1), the number is dialed immediately.	0 = Preview 1 = Outgoing Immediately	0	

Item No.	Item	Input Data	Default	Related Program
24	<p><b>Conference Key Mode</b></p> <p>This option allows an extension Conf key to be programmed for Conference or for Transfer. When set for Transfer (1), the user places a call on hold, dials the extension to which it should be transferred, then presses the Conf key. The call is then transferred. When set for Conference (0), with an active call, the user presses the Conf key, places a second call, then presses the Conf key twice. All the calls are then connected.</p>	<p>0 = Conference</p> <p>1 = Transfer</p>	0	
26	<p><b>MSG Key Operation Mode</b></p> <p>Determine whether an extension MSG key should function as a Message key or Voice Mail key. If set as a Message key, users can press the key to call the voice mail only when they have new messages.</p>	<p>0 = Message Key</p> <p>1 = Voice Mail Key</p>	<p>0 (OT)</p> <p>1 (AU)</p>	
27	<p><b>Handset Volume</b></p> <p>Determine how an extension handset volume is set after it is adjusted during a call.</p> <p> <i>When 1 is assigned in this program and a user sets the volume to maximum, the volume is reset to a level to meet FCC standards when the user hangs up.</i></p>	<p>0 = Back to Default (Back)</p> <p>1 = Stay at previous level (Stay)</p>	1	
28	<p><b>Message Waiting Lamp Color</b></p> <p>Determine whether an extension Message Waiting Lamp lights Green (0) or Red (1) when a message is received.</p>	<p>0 = Green</p> <p>1 = Red</p>	0	<p>15-02-35</p> <p>15-02-36</p> <p>15-02-37</p> <p>15-02-38</p>
29	<p><b>PB Back Tone Level</b></p> <p>This program allows adjustment of the PB Back Tone Level when you are calling an ISDN Line.</p>	1~63 (-15.5dB ~ +15.5dB)	32 (0dB)	
30	<p><b>Toll Restriction Class</b></p> <p>Select the Toll Restriction Class to use when placing a call from a virtual extension.</p>	<p>0 = Vir. Ext. (Virtual Extension Class)</p> <p>1 = Real Ext. (Real Extension Class)</p>	1	

Item No.	Item	Input Data	Default	Related Program
34	<b>Call Register Mode</b> The Caller ID Scroll stores Trunk calls only (0), or both Internal and Trunk calls (1).	0 = Trunk Mode 1 = Extension/Trunk Mode	0	
35	<b>Message Waiting Lamp Cycle for Calling Extension</b> Select the cycle method that the Large LED flashes when the extension has set Message Waiting.	1 = Cycle 1 2 = Cycle 2 3 = Cycle 3 4 = Cycle 4 5 = Cycle 5 6 = Cycle 6 7 = Cycle 7	7 (OT) 3 (AU)	15-02-28 15-02-36 15-02-37 15-02-38
36	<b>Message Waiting Lamp Cycle for Called Extension</b> Select the cycle method that the Large LED flashes when the extension has Message Waiting set to the extension.	1 = Cycle 1 2 = Cycle 2 3 = Cycle 3 4 = Cycle 4 5 = Cycle 5 6 = Cycle 6 7 = Cycle 7	3 (OT) 2 (AU)	15-02-28 15-02-35 15-02-37 15-02-38
37	<b>Voice Mail Message Wait Lamp Color</b> Select the color of the Large LED when a voice mail message is waiting at the extension.	0 = Green 1 = Red	1	15-02-28 15-02-35 15-02-36 15-02-38
38	<b>Voice Mail Message Wait Lamp Cycle</b> Select the cycle method that the Large LED flashes when the extension has a VM Message Waiting set to the extension.	1 = Cycle 1 2 = Cycle 2 3 = Cycle 3 4 = Cycle 4 5 = Cycle 5 6 = Cycle 6 7 = Cycle 7	3 (OT) 2 (AU)	15-02-28 15-02-35 15-02-36 15-02-37
40	<b>Additional Dial for Caller ID Call Return</b> Enter the digits to be dialed in front of the Caller ID when using the Caller ID Return function.	Up to four digits (0, 1~9, #, *)	No setting	10-02-04
41	<b>Incoming Ring Setup</b>	0 = Speaker Normal Ring 1 = Headset Ring	0	11-11-37 11-11-62 15-02-12 15-02-42 20-13-06
42	<b>Incoming Off-Hook Ring Setup</b>	0 = Speaker Off-Hook Ring 1 = Headset Off-Hook Ring	0	11-11-37 11-11-62 15-02-12 15-02-41

Item No.	Item	Input Data	Default	Related Program
43	<b>Headset Ring Duration</b>	0 = No Switch to Speaker Ring 1 = 10 seconds 2 = 20 seconds 3 = 30 seconds 4 = 40 seconds 5 = 50 seconds 6 = 1 minute	0	11-11-62 15-02-41 15-02-42
44	<b>Reversing Display Indication</b> The display on the DT300/DT700 style telephones can be set to Normal (0) or Reversed (1).	0 = Normal Indication 1 = Reversing Indication	0	11-11-64
45	<b>Double Height Character Indication</b> On the DT300/DT700 style phones Name and Number Line (2), Calender Line (1) or No Line (0) set to has double height characters.	0 = Normal Indication 1 = Double height character indication of calendar display line 2 = Double height character indication of name and number display line	0	11-11-63
46	<b>Backlight LCD duration</b> On the DT300/DT700 style phones set how long the Backlight LCD stays on.	0 = Continuous on 1 = 5 seconds 2 = 10 seconds 3 = 15 seconds 4 = 30 seconds 5 = 60 seconds	2	
47	<b>Icon display of DESI-less</b> On the DTL/ITL-8LD style phones will icons be displayed (1), or not displayed (0).	0 = OFF 1 = ON	0	11-11-17 15-07-01 15-20-01
48	<b>Short Ring Setup</b>	0 = Disable 1 = Enable	0	80-09-01 80-09-02 80-09-03
49	<b>Button Kit Information for Multiline Telephone</b>	0 = No setting 1 = Not Used 2 = Type-A with Cursor Key 3~9 = Not Used 10 = Type-A without Cursor Key (Retrofit)	0	90-48-01
51	<b>Alarm Notification to other Netlink System</b>	0 = Disable 1 = Enable	1	20-08-16

Item No.	Item	Input Data	Default	Related Program
53	<b>Aspire Model-C Phone Operation Mode (OT)</b> When this setting is assign "1", Aspire Model-C phone is working with Model-B (Type-A) as following key layout; CALL1--> Answer CALL2--> Feature DND--> Conf HOLD--> Hold DIAL--> Directory LND--> Redial MIC-->Mic SPK--> Speaker MSG--> Message FLASH--> Recall CONF--> Transfer	0 = Original Operation Mode 1 = CTI Special Operation Mode	0

## Program 15 : Extension, Basic Setup

### 15-03 : Single Line Telephone Basic Data Setup

**Level:**

**IN**

#### Description

Use **Program 15-03 : Single Line Telephone Basic Data Setup** to set up various single line telephone options.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No	Item	Input Data	Default	Related Program
01	<p><b>SLT Signaling Type</b></p> <p>Use this option to tell the system the type of dialing the connected telephone uses.</p> <p>For the UNIVERGE SV8100 Wireless telephones to function correctly, this must be set to 0 (dial pulse). If this option is set for DTMF, after an outside call is placed, the system cannot dial any additional digits.</p> <p>This program change is automatically performed when the UNIVERGE SV8100 Wireless telephone is registered. When upgrading software from prior versions, the previous default of 1 is saved from the prior database so this option must be changed manually.</p>	0 = DP 1 = DTMF	1	15-03-03 45-01-01
03	<p><b>Terminal Type</b></p> <p>Enter 1 for this option to allow a single line port to receive DTMF tones after the initial call setup. Enter 0 to have the port ignore DTMF tones after the initial call setup. For Voice Mail, always enter 1 (e.g., receive DTMF tones).</p>	0 = Normal 1 = Special	0	15-03-01 45-01-01
04	<p><b>Flashing</b></p> <p>Enables/disables Flash for single line telephones.</p>	0 = No 1 = Yes	1	
05	<p><b>Trunk Polarity Reverse</b></p> <p>Do Not Change Default Entry as DTMF issues may arise with voice mail.</p>	0 = Off 1 = On	0	

Item No	Item	Input Data	Default	Related Program
06	<b>Extension Polarity Reverse</b> Do Not Change Default Entry as DTMF issues may arise with voice mail.	0 = Disable (Off) 1 = Enable (On)	0	
07	<b>Enabled On-Hook When Holding (SLT)</b>	0 = No 1 = Yes	1	11-12-45
08	<b>Answer On-Hook when Holding (SLT)</b>	0 = Disable (No) 1 = Yes (Enable)	1	11-12-46
09	<b>Caller ID Function - For External Module</b> Enable (1) or disable (0) the Caller ID FSK signal for an external Caller ID module or a 3rd party vendor telephone with Caller ID display. <b>Important:</b> If voice mail is used, this setting must be disabled for the system integration codes to be correct.  <i>With a Single Line Telephone, this must be set to 0 for incoming callers to have a talk path.</i>	0 = Disable (Off) 1 = Enable (On)	0	
10	<b>Caller ID Name</b> Determine if an extension user telephone should display the Caller ID name.	0 = Disable 1 = Enable	1	15-03-09
11	<b>Caller ID Type</b> Determine whether the Caller ID type is FSK or DTMF.	0 = FSK 1 = DTMF	0	
14	<b>Forwarded Caller ID Display Mode</b> Determine what the display shows when a multiline terminal receives a forwarded outside call.	0 = Calling Extension Number (Calling) 1 = External Caller ID (Forward)	0	
15	<b>Disconnect without dial after hooking hold</b> Determine whether or not to disconnect a held call when on-hook without any dialing after hooking-hold.	0 = Normal 1 = Disc.	0	
16	<b>Special DTMF Protocol Send</b> Determine whether or not to send the extension number of the phone forwarded to the extension when PRG 15-03-04 is set to Special (1) and not in the VM group.	0 = No 1 = Yes	0	45-01-16

Item No	Item	Input Data	Default	Related Program
17	<b>Dial Tone Select (OT)</b> When the function of MW has been set from another extension or VM, the dial tone upon off hook is selected.	0 = Normal 1 = New DT	0	

**(1) = Off-Hook (2) = Calling/Ringing (3) = Answer (4) = Detect Hang Up (5) = On-Hook**

## Program 15 : Extension, Basic Setup

### 15-05 : IP Telephone Terminal Basic Data Setup

**Level:**

**IN**

#### Description

Use **Program 15-05: IP Telephone Terminal Basic Data Setup** to set up the basic settings for an IP telephone.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Item	Input Data	Default	Description	Related Program
01	<b>Terminal Type</b>	0 = NGT 1 = H.323 2 = SIP 3 = MEGACO 4 = SIP-MLT	-	Viewing Only – No changes permitted	
02	<b>IP Phone Fixed Port Assignment</b>	MAC address 00-00-00-00-00-00 to FF-FF-FF-FF-FF-FF	00-00-00-00-00-00	MAC Address of registered SIP MLT phone is stored and/or can input the MAC address of an SIP MLT phone so when it comes online it is provided with the extension in which the MAC address matches.	15-05-01
03	<b>Default URL address</b>	URL address - 192 Characters Max.	No setting	The default URL address for Smart Phone	15-05-01

Item No.	Item	Input Data	Default	Description	Related Program
04	<b>Nickname</b>	Up to 48 characters	No setting	Nickname section on Invite message. Example: Extension 100 has a Nickname set to PAUL. Extension 101 has command 15-05-17 set to Nickname. The inbound call to extension 101, from 100, shows PAUL.	15-05-17
05	<b>H.323 Terminal type (OT)</b>	1 = Standard H323 terminal 2 = Net Meeting	-		15-05-01
06	<b>NGT Terminal Type</b>	1 = IP70 2 = IP80 3 = Smart Phone	-		15-05-01
07	<b>Using IP Address</b>	0.0.0.0~255.255.255.255	-	Informational Only registered IP Phones	15-05-01
08	<b>H.323 RAS port</b>	0-65535	-		15-05-01
09	<b>Call procedure port</b>	0-65535	-		15-05-01
10	<b>NGT voice path port</b>	0-65535	-		15-05-01
11	<b>DtermIP Call Procedure port</b>	0-65535	-		15-05-01
15	<b>CODEC Type</b>	1-Type 1 2-Type 2 3-Type 3 4-Type 4 5-Type 5	1	Assign the CODEC Type of the MLT SIP.	84-24 84-11 15-05-01
16	<b>Authentication Password</b>	Up to 24 characters	None	Assign the authentication password for SIP single line telephones.	15-05-01

Item No.	Item	Input Data	Default	Description	Related Program
18	<b>IP Duplication Allowed Group</b>	0 = Not Used 1 = Group 1 2 = Group 2 3 = Group 3 4 = Group 4 5 = Group 5 6 = Group 6 7 = Group 7 8 = Group 8 9 = Group 9 10 = Group 10	0	If there is an adapter that has one IP address coming into it but has multiple extensions off of it. Assign all the extensions to a group so that way the CPU knows that the one IP address is assigned to multiple extensions.	15-05-01
19	<b>Side Option Information</b>	0 = No Option 1 = 8LK Unit 2 = 16LK Unit 3 = 24ADM	0	This is a read only program that shows what type of Line Key unit is installed on the ITH-style telephone.	10-03-09 15-05-22
20	<b>Bottom Option Information</b>	0 = No Option 1 = ADA 2 = BHA	0	This is a read only program that shows what type of adapter is installed on the ITH-style telephone.	10-03-10
21	<b>Handset Option Information</b>	0 = Normal Handset 1 = Handset for power failure (PSA/PSD) 2 = BCH	0	This is a read only program that shows what type of Handset is installed on the ITH-style telephone.	10-03-11 15-05-23
22	<b>Side Option Additional Data</b>	0 = No Setting 1~32 = DSS Console number	0	This is a read only program that shows the DSS console number when one is installed on a ITH-style telephone.	15-05-19 30-01 30-02 30-03 30-04 30-05 30-06
23	<b>Handset Option Additional Information</b> Determine to use TEN or not.	0 = No Setting 1~16 = Terminal equipment number (TEN) of Bluetooth Cordless Handset (BCH)	0		15-05-21 10-03-03

Item No.	Item	Input Data	Default	Description	Related Program
24	<b>Protection Service</b>	0 = Not Used 1 = Used	0	When this is enabled it allows the MLT SIP telephones to use the "security" key. If disabled, and the key is pressed, nothing happens.	90-49-01 90-49-02 90-40-01 90-40-02
26	<b>DT700 Terminal Type</b>	0 = Not Set 1 = ITL-()E-1D/IP-()E-1 2 = ITL-()D-1D/ITL-12BT-1D/ITL-12PA-1D (without 8LKI(LCD)-L) 3 = ITL-()D-1D/ITL-12BT-1D/ITL-12PA-1D(with 8LKI(LCD)-L) 4 = ITL-320C-1 5 = Softphone 6 = CTI 7 = AGW 8 = IP3()-8WV	0		
27	<b>Personal ID Index</b>	0~512	0	Used when the SIP Multiline telephone is using manual/auto registration. Assign each phone a unique personal index. Then go to command 84-22 to assign the user name and password.	84-22
28	<b>Addition Information Setup</b> Select whether to inform of additional information or not.	0 = Do not inform 1 = Inform	0		15-01-01 15-02-13 15-02-15 15-02-34
29	<b>Terminal WAN-side IP Address</b>	0.0.0.0~255.255.255.255	0.0.0.0		

Item No.	Item	Input Data	Default	Description	Related Program
30	<b>DTMF Play during Conversation at Receive Extension</b>	0 = Do Not Play 1 = Play	0		
31	<b>Alarm Tone during Conversation (RTP packet loss alarm)</b>	0 = Off 1 = On	1		
32	<b>Ten Key Pad Talkie</b>	0 = Off 1 = On	0		
33	<b>LAN Side IP Address of Terminal</b>	0.0.0.0~255.255.255.255	0.0.0.0.	Read-only	
34	<b>Terminal Touch Panel On/Off</b>	0 = Off 1 = On	1	Whether the touch screen used on ITL-320C- (BK) TEL can be used (1) or cannot be used (0).	
35	<b>Encryption Mode On/Off</b>	0 = Off 1 = On	0.0.0.0.	Read-only	
36	<b>DT700 Firmware Version</b>	00.00.00.00 - ff.ff.ff.ff	00.00.00.00	Indicate a current firmware Version. (Read-only)	
37	<b>DT700 Large LED Illumination Setup</b>	2 = Red 3 = Green 4 = Blue 5 = Yellow 6 = Purple 7 = Light Blue 8 = White 9 = Rotation	2	Sets LED color for internal Intercom call. In DT700 local terminal setting menu, illumination setting must be 'Automatic', otherwise the terminal will ignore PRG 14-01-35, PRG 15-05-37 and PRG 15-23 settings.	

Item No.	Item	Input Data	Default	Description	Related Program
38	<b>Paging Protocol Mode</b>	0 = Multicast 1 = Unicast 2 = Auto	0	Sets the protocol mode for the Paging function.	
39	<b>CTI Override Mode (AU)</b>	0 = Disable 1 = Enable	0	Sets the override function against the terminal that is controlled by the CTI.	
40	<b>Calling Name Display Info viaTrunk for Standard SIP</b>	0 = Both name and number 1 = Name only 2 = Number only 3 = None	0	Sets the incoming calling name display type on a standard SIP terminal. Trunk name is the first priority and abbreviated (SPD) name is second priority.	
41	<b>Time Zone (Hour)</b>	0~24 (-12~+12)	12	Sets the time difference from the system time set in Program 10-01. Input hour(s) based on this Program.	
42	<b>Time Zone (minute)</b>	0~120(-60 ~ +60 minute)	60	Sets the time difference from the system time set in Program 10-01. Input minute(s) based on this Program.	

---

---

Item No.	Item	Input Data	Default	Description	Related Program
43	Video Mode	0 = Disable 1 = Enable	0	This Program is used to select the video function with the standard SIP terminal. If the standard SIP terminal supports the video function, the SV8100 transfers the video CODEC in SDP information.	

**Conditions**

- 15-05-04 – Nickname must be unique in the system.

---

**Feature Cross Reference**

None

## Program 15 : Extension, Basic Setup

### 15-06 : Trunk Access Map for Extensions

**Level:**  
**IN**

#### Description

Use **Program 15-06: Trunk Access Map for Extensions** to define the trunk access map for each extension. An extension can place only outgoing calls on trunks to which it has outgoing access. Use Program 14-07 to define the available access maps.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Day/Night Mode	1~8
----------------	-----

Item No.	Trunk Access Map Number	Default	Related Program
01	1~200	1	14-07

#### Conditions

None

#### Feature Cross Reference

- Central Office Calls, Answering
- Central Office Calls, Placing

## Program 15 : Extension, Basic Setup

### 15-07 : Programmable Function Keys

**Level:**  
**SA**

#### Description

Use **Program 15-07 : Programmable Function Keys** to assign functions to a multiline terminal line keys.

For certain functions, you can append data to the key basic function. For example, the function 26 appended by data 1 makes a Group Call Pickup key for Pickup Group 1. You can also program Function Keys using Service Codes.

To clear any previously programmed key, press **000** to erase any displayed code.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

#### Default Settings

Line Key	Function Number	Additional Data
LK01	*01 (Trunk Line Key)	1
:	:	:
LK08	*01 (Trunk Line Key)	8
LK09	0 (No Setting)	0
:	:	:
LK48	0 (No Setting)	0

Item No.	Line Key Number	Function Number	Additional Data
01	1~48	0~99 (Normal Function Code) (Service Code 851 (OT) / 751 (AU) by default) * 00 ~ *99 (Appearance Function Code) (Service Code 852 (OT) / 752 (AU) by default)	Refer to <a href="#">Function Number List</a> .

### Default

Programmable keys 1~8 are Trunk Line keys (key 1 = Trunk Line 1, key 2 = Trunk Line 2, etc.). All other programmable keys are undefined.

### Function Number List

#### [1] Normal Function Code (00 ~ 99) (Service Code 851 (OT) / 751 (AU))

LED Pattern 0 : [OFF]

LED Pattern 1 : [FL: On(500ms)/Off(500ms)]

LED Pattern 2 : [WK: On(250ms)/Off(250ms)]

LED Pattern 3 : [RW: On(125ms)/Off(125ms)]

LED Pattern 4 : [IR: On(125ms)/Off(125ms)/On(125ms)/Off(625ms)]

LED Pattern 5 : [IL: On(875ms)/Off(125ms)]

LED Pattern 6 : [IW: On(625ms)/Off(125ms)/On(125ms)/Off(125ms)]

LED Pattern 7 : [ON]

#### LED Indication Reference:

ON = LED pattern 7 (On).

OFF = LED pattern 0 (Off).

Rapid Blink = LED pattern 3 (RW).

Slow Blink (General Function Level) = LED pattern 5 (IL).

Slow Blink (Appearance Function Level) = LED pattern 1 (FL).

Fast Blink = LED pattern 3 (RW).

Stutter Blink = LED pattern 4 (IR).

**Conditions**

- When a key is programmed using service code 852 (OT) / 752 (AU), it cannot be programmed with a function using the 851 (OT) / 751 (AU) code until the key is undefined (000). For example with a Park Key programmed by dialing 852 ( OT) / 752 (AU) + \*04 must be undefined by dialing 852(OT) / 752 (AU) + 000 before it can be programmed as a Voice Over key by dialing 851(OT)/ 751 (AU) + 48.

---

**Feature Cross Reference**

- Refer to [Function Number List](#).

## Program 15 : Extension, Basic Setup

### 15-08 : Incoming Virtual Extension Ring Tone Setup

**Level:**  
**IN**

#### Description

Use **Program 15-08 : Incoming Virtual Extension Ring Tone Setup** to assign a ring tone range (0~4) to incoming virtual extensions assigned to a Virtual Extension key (Program 15-07). If you enable ringing for the key in Program 15-09, the key rings with the tone you set in this program. Also see Program 22-03. The chart below shows the available tones. There are 256 available extension ports.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Incoming Ring Pattern	Default	Description
01	0 = Tone Pattern 1 1 = Tone Pattern 2 2 = Tone Pattern 3 3 = Tone Pattern 4 4 = Incoming Ring Tone Extension	0 = Tone Pattern 1	When an extension or a virtual extension is assigned to the function key on the key telephone, select the ring tone when receiving a call on that key.  For ACD VE keys, only tone pattern 1 (entry 0) can be used. The remaining patterns are not checked with this feature.

**Table 2-5 Program 15-08 – Incoming Signal Frequency Patterns**

<b>Incoming Signal Frequency Pattern</b>	<b>Type</b>	<b>Frequency 1</b>	<b>Frequency 2</b>	<b>Modulation</b>
Pattern 1	High Middle Low	1100 660 520	1400 760 660	16Hz 16Hz 16Hz
Pattern 2	High Middle Low	1100 660 520	1400 760 660	8Hz 8Hz 8Hz
Pattern 3	High Middle Low	2000 1400 1100	760 660 540	16Hz 16Hz 16Hz
Pattern 4	High Middle Low	2000 1400 1100	760 660 540	8Hz 8Hz 8Hz
Internal Incoming Signal Frequency	High Middle Low	1100 660 520	1400 760 660	8Hz 8Hz 8Hz

**Conditions**

None

**Feature Cross Reference**

None

## Program 15 : Extension, Basic Setup

### 15-09 : Virtual Extension Ring Assignment

**Level:**  
**SA**

#### Description

Use **Program 15-09 : Virtual Extension Ring Assignment** to assign the ringing options for an extension Virtual Extension Key or Virtual Extension Group Answer Key which is defined in Program 15-07. You make an assignment for each Night Service Mode.

Assign extension numbers and names to virtual extension ports in Program 15-01. Program Virtual Extension keys in Program 15-07 (code \*03). There are 256 Virtual Extension Ports.

#### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Key Number	01~48
------------	-------

Item No.	Day/Night Mode	Ringing	Default
01	1~8	0 = No Ringing 1 = Ring	0

#### Conditions

- Program the Multiple Directory Number function keys **NOT** to ring before removing the key from telephone programming.

#### Feature Cross Reference

None

## Program 15 : Extension, Basic Setup

### 15-10 : Incoming Virtual Extension Ring Tone Order Setup

**Level:**  
**SA**

#### Description

Use **Program 15-10 : Incoming Virtual Extension Ring Tone Order Setup** to set the priority (1~4) for the Virtual Extension Ring Tones set in Program 15-08. When Virtual Extension calls ring an extension simultaneously, the tone with the highest order number (e.g., 1) rings. The other keys only flash. There are 256 Virtual Extension ports.

#### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Item No.	Priority Order	Data	Description	Related Program
01	1~4	0 = Tone Pattern 1 1 = Tone Pattern 2 2 = Tone Pattern 3 3 = Tone Pattern 4 4 = Incoming Extension Ring Tone	When two or more virtual extensions are set on a function key on the telephone, and the tone pattern by which the sound of each extension differs, the priority of ring sound is set up.	15-08

#### Default

- By default, Virtual Extension ring tones have the following order:

Priority Order	Ring Tone (Set in Program 15-08)
1	0 (Tone Pattern 1)
2	1 (Tone Pattern 2)
3	2 (Tone Pattern 3)
4	3 (Tone Pattern 4)

**Conditions**

None

---

**Feature Cross Reference**

None

## Program 15 : Extension, Basic Setup

### 15-11 : Virtual Extension Delayed Ring Assignment

**Level:**  
**SA**

#### Description

Use **Program 15-11 : Virtual Extension Delayed Ring Assignment** to assign the delayed ringing options for an extension Virtual Extension or Virtual Extension Group Answer keys (defined in Program 15-09). You make an assignment for each Night Service Mode. There are 256 Virtual Extension Ports.

Assign extension numbers (Program 11-04) and names (Program 15-01) to virtual extension ports. Program Multiple Directory Number (virtual extension) keys in Program 15-07 (code \*03).

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Key Number	01~48
------------	-------

Item No.	Day/Night Mode	Ringing	Default	Related Program
01	1~8	0 = Immediate Ring 1 = Delayed Ring	0	20-04-03 15-09-01

#### Conditions

- Program the Virtual Extension keys **NOT** to ring before removing the key from telephone programming.
- PRG 15-09-01 has to be assigned to Ring Immediately before assigning the VE key to Delay Ring.

#### Feature Cross Reference

None

## Program 15 : Extension, Basic Setup

### 15-12 : Conversation Recording Destination for Extensions

**Level:**

**IN**

#### Description

Use **Program 15-12 : Conversation Recording Destination for Extensions** to set the ACI Conversation Recording destination for each extension.

 *If both Programs 14-09 and 15-12 define a destination, the destination in Program 15-12 is followed.*

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item Number	Item	Input Data	Default
01	<b>ACI Recording Destination Extension Number</b> Enter the ACI extension number to which the trunk calls should be recorded.	Maximum eight digits	No Setting
02	<b>ACI Automatic Recording for Incoming Calls</b> Determine if an extension incoming calls should be automatically recorded to the ACI.	0 = Off 1 = On	0
04	<b>ACI Automatic Recording for Outgoing Calls (OT)</b> Determine if an extension's outgoing calls should be automatically recorded to the ACI.	0 = Off 1 = On	0

#### Conditions

None

#### Feature Cross Reference

- Analog Communications Interface (ACI)

## Program 15 : Extension, Basic Setup

### 15-13 : Loop Keys (OT)

**Level:**  
**IN**

#### Description

Use **Program 15-13 : Loop Keys** to assign the Loop Key data for each keyset terminal. Loop Keys can be incoming, outgoing or both ways. Outgoing Loop Keys use the entry in item 1. Incoming Loop Keys use the entry in item 2. Both Way Loop Keys follow the entries in both item 1 and 2.

#### Input Data

Extension Number	Max.8 digits
------------------	--------------

Key Number	01-48
------------	-------

Item No.	Item	Input Data	Default
01	<b>Outgoing Option</b>	0-8 or 0-100 (0 = Assigns the Loop Key for ARS, 1-100 = Assigns the Loop Key to the trunk group specified)	0 (Programming Function Key No.- 01-32)
02	<b>Incoming Option</b>	0-8 or 0-100 (0 = Assigns the Loop Key to all trunk groups, 1-100 = Assigns the Loop key to the trunk group specified)	0 (Programming Function Key No.- 01-32)

#### Conditions

- Please set Loop Key at Program 15-07 before setting Program 15-13

#### Feature Cross Reference

- Analog Communications Interface (ACI)

## Program 15 : Extension, Basic Setup

### 15-14 : Programmable One-Touch Keys

**Level:**  
**SB**

#### Description

Use **Program 15-14 : Programmable One-Touch Keys** to define the One-Touch key data for each multiline terminal.

For each UNIVERGE SV8100 Wireless telephone to use the Transfer When Out of Range feature, enter the destination number (up to 24 digits) and name (up to 12 characters) into One-Touch bin 10. Make sure to add any required trunk access codes for outside numbers. If this bin information is changed either through 15-14-01 or through user programming, the destination for the transferred calls is also changed.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Key Number	01~10
------------	-------

Item No.	Dial Data	Name	Default
01	1~0, *, #, Pause, Hookflash, @ (Code for Answer-Wait) Up to 24 digits	Up to 24 Digits	No Setting
02	Name	Up to 12 Digits	No Setting

#### Conditions

None

#### Feature Cross Reference

- One-Touch Keys

## Program 15 : Extension, Basic Setup

### 15-16 : SIP Register ID Setup for Extension

**Level:**

**IN**

#### Description

Use **Program 15-16 : SIP Register Setup for Extension** to define the SIP Register ID for Extensions.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Item	Input Data	Default
01	Register ID	None, 0~31	None

#### Conditions

None

#### Feature Cross Reference

None

## Program 15 : Extension, Basic Setup

### 15-17 : CO Message Waiting Indication

**Level:**  
**IN**

#### Description

Use **Program 15-17 : CO Message Waiting Indication** to set the message waiting LED Flash assignment on each CO line.

#### Input Data

Extension Number including Virtual Extensions	Up to eight digits
---	--------------------

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default
01	LED Flash Assignment	0 = LED Off 1 = LED On	0

#### Conditions

None

#### Feature Cross Reference

None

## Program 15 : Extension, Basic Setup

### 15-18 : Virtual Extension Key Enhanced Options

**Level:**

**IN**

#### Description

Use **Program 15-18 : Virtual Extension Key Enhanced Options** to define the operation when a Virtual Extension Key is pressed.

#### Input Data

Extension Number including Virtual Extensions	Up to eight digits
---	--------------------

Item No.	Item	Input Data	Default	Related Program
01	<p><b>Virtual Extension Key Operation Mode</b></p> <p>Define if calls to a Virtual Extension Key land on the Virtual or on the extension/ CO appearance.</p> <p><i>This is assigned for the Virtual Extension Key, not the extension it resides on.</i></p>	<p>0 = Release</p> <p>1 = Land on the key</p>	0	20-04-01
02	<p><b>Display mode when placing a call on Virtual Extension Key</b></p> <p>Defines if calls to or from a Virtual Extension Key display the Virtual Extension Key name or the name of the extension it resides on.</p>	<p>0 = Secondary Extension Name</p> <p>1 = Actual Station Name</p>	<p>0 (OT)</p> <p>1 (AU)</p>	

#### Default

- If a DIL rings a Virtual Extension, the Virtual Extension Key Operation Mode must be set to **1**.

# Program 16 : Department Group Setup

## 16-01: Department Group Basic Data Setup

Level:

IN

Program

16

### Description

Use **Program 16-01: Department Group Basic Data Setup** to set the function mode for each department group. There are 64 available Department Groups.

### Input Data

Department Group Number	1~64
-------------------------	------

Item No.	Item	Input Data	Default	Related Program
01	<b>Department Name</b>	Maximum 12 characters	No setting	11-07
02	<b>Department Calling Cycle</b> Use this option to set the call routing for Department Calling. Routing can be either circular (cycles to all phones in group) or priority (cycles to highest priority extensions first).	0 = Normal Routing (Priority) 1 = Easy – UCD Routing (Circular)	0	16-02
03	<b>Department Routing when Busy (Auto Step Call)</b> Use this option to set how the system routes an Intercom call to a busy Department Group member. Intercom callers to the extension can either hear busy or route to the first available department number. This only occurs for calls to the extension directly, not the department number assigned in Program 11-07.	0 = Normal (Intercom caller to busy department member hears busy) 1 = Circular (Intercom callers to busy department member routes to idle member)	0	16-02

Item No.	Item	Input Data	Default	Related Program
04	<p><b>Hunting Mode</b></p> <p>Use this option to set the action taken when a call reaches the last extension in the Department Group (0 = hunting stopped, 1 = hunting repeats with circular routing through the Department Group).</p>	<p>0 = Last extension is called and hunting is stopped</p> <p>1 = Circular</p>	0	
05	<p><b>Extension Group All Ring Mode Operation</b></p> <p>Determine whether calls ringing a Department Group should ring all extensions in the group simultaneously automatically or manually when using the service code defined in Program 11-12-09.</p> <p> <i>When set to (1) Automatic, only ICM Calls and DID Calls will ring all the stations in the Department Group.</i></p>	<p>0 = Manual (Service Code)</p> <p>1 = Automatic</p>	0	11-16-10
06	<p><b>STG Withdraw Mode</b></p>	<p>0 = Disable (Camp On)</p> <p>1 = Enable (Overflow Mode)</p>	0	
07	<p><b>Call Recall Restriction for STG</b></p> <p>Determine whether or not an unanswered call transferred to a Department Group should recall the extension from which it was transferred.</p>	<p>0 = Disable (Recall)</p> <p>1 = Enable (No Recall)</p>	0	
08	<p><b>Maximum Queuing number for Department Group Call</b></p> <p>To have Department Group calls queue when busy, set this entry to maximum queuing number.</p>	0-32 (0 = No Queuing)	0	
09	<p><b>Department Hunting No Answer Time</b></p> <p>Set how long a call rings a Department group extension before hunting occurs.</p>	0~64800 seconds	15	

---

---

Item No.	Item	Input Data	Default	Related Program
10	<b>Enhanced Hunt Type</b> Set the type of hunting for each Extension (Department) Group.	0 = No hunting 1 = Hunting When Busy 2 = Hunting When Not Answered 3 = Hunting When Busy or No Answer	0	

**Conditions**

None

# Program 16 : Department Group Setup

## 16-02: Department Group Assignment for Extensions

**Level:**  
**IN**

### Description

Use **Program 16-02: Department Group Assignment for Extensions** to set the Department Groups. The system uses these groups (64 Department Groups) for Department Calling. Assign pilot numbers to Department Groups you set up in Program 11-07. This lets system users place calls to the departments. Use Program 16-01 to set the priority of each extension in each Department Group. When a call comes to the group, the extensions ring in order of their priority.

### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Group Number	Priority	Default	Description	Related Program
01	1~64	1~999	1 – xxx (See Note)	Set up the Department Group called by the pilot number and the extension priority when a group is called. Call Pickup Groups are set up in 23-02.	11-07 16-01

 *The initial value of a priority becomes the ports numerical order assigned in Program 11-02 and 11-04. (Extension ports are 1~512 Virtual extension ports are 513~769.)*

### Conditions

None

### Feature Cross Reference

- Department Calling

## Program 16 : Department Group Setup

### 16-03: Secondary Department Group

**Level:**

**IN**

#### Description

Use **Program 16-03: Secondary Department Group** to set a second Department Group for extensions. Up to 16 extensions can be assigned per a Department Group. There are 64 available Department Groups.

#### Input Data

Department (Extension) Group Number	01~64
-------------------------------------	-------

Item No.	Secondary Extension Number	Extension Number	Priority Order	Default	Description
01	1~16	Maximum 8 digits	0~999	All extension Groups = No Setting	This program is set up when placing telephones in two or more groups.

#### Conditions

None

#### Feature Cross Reference

- Department Calling

## Program 16 : Department Group Setup

### 16-04: Call Restriction Between Department Groups

**Level:**

**IN**

#### Description

Use **Program 16-04: Call Restriction Between Department Groups** to set internal calls between members of different Department (Station) groups that can be restricted on a per group basis. Each department group can restrict calls to up to eight department groups in Department Group - Departmental Call Restriction.

#### Input Data

Extension (Department) Group Number	1~64
-------------------------------------	------

Restricted Group Index	1~8
------------------------	-----

Restrict Department Group Number	Description	Default
0~64	Calls between members of different Department (Station) groups can be restricted on a per group basis.	0

#### Conditions

None

#### Feature Cross Reference

None

# Program 20 : System Option Setup

## 20-01 : System Options

Level:  
IN

### Description

Use **Program 20-01 : System Options** to set various system options.

### Input Data

Item No.	Item	Input Data	Default	Description	Related Program
01	<b>Operator Access Mode</b>	0 = Step Call 1 = Circular	0	Use this program to set up priority of a call when calling an operator telephone.	20-17
02	<b>Text Message Mode</b>	0 = Call mode 1 = No Answer/ Busy mode	0 (OT) 1 (AU)	Use this program to select the mode when calling the telephone which set up the text message.	11-11-14 15-07-08
04	<b>Network BLF Indication (OT)</b>	0-64800 in 100ms increments	0	Used to determine how often the SV8100 updates the DSS key BLF indications. For NetLink, the entry should be "30" in all SV8100s.	
05	<b>DTMF Receive Active Time</b>	0~64800s	10s	For OPXs, analog telephones and certain analog trunks (like DISA), the system attaches a DTMF receiver to the port for this time. The system releases the receiver after the time expires.	25-07-01
06	<b>Alarm Duration</b>	0~64800s	30s	This time sets the duration of the alarm signal.	11-11-12
07	<b>Callback Ring Duration Time</b>	0~64800s	15s	Callback rings an extension for this time.	11-12-05 15-07-35

Program

20

**Input Data**

Item No.	Item	Input Data	Default	Description	Related Program
08	<b>Trunk Queuing Callback Time</b>	0~64800s	15	Trunk Queuing callback rings an extension for this time.	11-12-05 15-07-35
09	<b>Callback/Trunk Queuing Cancel Time</b>	0~64800s	64800s	The system cancels an extension Callback or Trunk Queueing request after this time.	11-12-05 15-07-35
10	<b>Trunk Guard Timer</b>	0~64800s	1	The amount of time the system waits to seize the next outside line after the system releases an outside line.	
12	<b>Telephone/Web Pro Logout Time</b>	1~84600s (84600s =1 day)	900s (15min)	The system automatically logs out of a Telephone/Web Pro session after inactivity lasting this time.	
16	<b>Mobile Extension Callback Duration Time</b>	1~64800(sec)	15	Set up the system callback duration time when ringing the target Mobile Extension.	15-22-04

**Conditions**

None

**Feature Cross Reference**

- Refer to the Input Data table at the beginning of this section.

## Program 20 : System Option Setup

### 20-02 : System Options for Multiline Telephones

Level:

IN

#### Description

Use **Program 20-02 : System Options for Multiline Telephones** to set various system options for multiline telephones.

#### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<b>Trunk Loop Key Operation Mode (OT)</b>	0 = Keep Lamp 1 = Extinction  <i>Mode      0 = Keep      1 = LED Off</i> <i>                 Lamp</i>  <i>Incoming:      300 IPM Red blink</i>  <i>Talking:      Green Light-      LED Off</i> <i>                 ing (on Talk-      ing TEL)</i>  <i>Holding:      60 IPM Green      LED Off</i> <i>                 blink (on      holding TEL)</i>	0	
02	<b>Trunk Group Access Key Operating Mode</b> Use this option to set the operating mode of the extension trunk group keys. The keys are for incoming access, outgoing access, or both.	0 = Outgoing / Incoming 1 = Outgoing 2 = Incoming	0	
03	<b>BLF Control (OT)</b> Set the conditions under which a Hotline, Reverse Voice Over or DSS Console key indicates that an extension is busy. Refer to the Reverse Voice Over feature for more information.	0 = Idle / Busy (ON/OFF) 1 = Busy / Idle (ON/OFF)	1	

## Input Data (Continued)

Item No.	Item	Input Data	Default	Related Program
04	<b>Retrieve the Line After Transfer</b> Enable (1) or disable (0) an extension ability to answer a call after it has been transferred, but before it is answered.	0 = Not Holding (No Keep) 1 = Holding (Keep)	0 (OT) 1 (AU)	
05	<b>Headset Busy Mode</b> Set the conditions under which a headset extension is busy to incoming callers.	0 = No (Disable) 1 = Yes (Enable)	0	20-09-07
06	<b>Preselection Time</b> When a multiline terminal user preselects a line key, the system remembers the preselection for this time.	0~64800s	5	
07	<b>Time and Date Display Mode</b> Set how the Time and Date appear on display telephones. There are eight display modes.	1~8 Type 1 = (12 hour) 10 MAR TUE 3:15PM Type 2 = (12 hour) 3:15PM MAR 10 TUE Type 3 = (12 hour) 3-10 TUE 3:15 PM Type 4 = (12 hour) 3:15PM TUE 10 MAR Type 5 = (24 hour) 10 MAR TUE 15:15 Type 6 = (24 hour) 15:15 MAR 10 TUE Type 7 = (24 hour) 3-10 TUE 15:15 Type 8 = (24 hour) 15:15 TUE 10 MAR	3 (OT) 4 (AU)	
08	<b>LCD Display Holding Time</b>	0~64800 (sec)	5	
09	<b>Disconnect Supervision</b> Use this option to enable or disable disconnect supervision for the system trunks.	0 = Disable (Off) 1 = Enable (On)	0 (OT) 1 (AU)	
10	<b>Time Before Shifting to Power-Saving Mode</b>	0 = No Shift 1 = 1 minute 2 = 2 minutes 3 = 4 minutes 4 = 8 minutes 5 = 16 minutes 6 = 32 minutes 7 = 64 minutes	0	15-02-18

## Input Data (Continued)

Item No.	Item	Input Data	Default	Related Program
11	<b>Handsfree Microphone Control</b> Use this option to control the setting for Multiline Terminal Handsfree microphone after being disconnected and reconnected. If set to 0, the microphone is always off when the terminal is reconnected. If set to 1, the microphone remains in the same state it was in when the terminal is reconnected.	0 = Off 1 = On	1	
12	<b>Forced Intercom Ring (ICM Call Type)</b> Use this option to enable or disable Forced Intercom Ringing. If enabled, incoming Intercom calls normally ring. If disabled, Intercom calls voice-announce.	0 = Disable (Voice) 1 = Enable (Signal)	0 (OT) 1 (AU)	
15	<b>Caller ID Display Mode</b>	0 = Name and Number (Both) 1 = Name 2 = Number	0	
18	<b>Dialing Record Display Time</b>	0~64800 seconds	30s	
19	<b>DSS Key - Virtual Extension Mode</b> Sets the mode of a virtual extension key that appears on a DSS console.	0 = No 1 = Yes	0	
23	<b>CAP/Loop Key Operation Mode (OT)</b>	0...CAP Key Operation Mode 1...Loop Key Operation Mode	1

## Program 20 : System Option Setup

### 20-08 : Class of Service Options (Outgoing Call Service)

**Level:**  
**IN**

#### Description

Use **Program 20-08 : Class of Service Options (Outgoing Call Service)** to define the outgoing call feature availability for each extension Class of Service (COS).

#### Input Data

Class of Service Number	01~15
-------------------------	-------

Item No.	Item	Input Data	Default	Related PRG
			COS 01-15	
01	<b>Intercom Calls</b> Turns off or on Intercom calling for the extension.	0 = Off 1 = On	1	
02	<b>Trunk Outgoing Calls</b> Turns off or on outgoing trunk calling for the extension.	0 = Off 1 = On	1	
03	<b>System Speed Dialing</b> Turns off or on an extension ability to make outbound calls using system speed dial numbers.	0 = Off 1 = On	1	
04	<b>Group Speed Dialing</b> Turns off or on an extension ability to make outbound calls using group speed dial numbers.	0 = Off 1 = On	1	
05	<b>Dial Number Preview (Preset Dial)</b> Turns off or on an extension for using Dial Number Preview.	0 = Off 1 = On	1	
06	<b>Toll Restriction Override</b> Turns off or on Toll Restricting Override (Service Code 763 (OT) / 663 (AU)).	0 = Off 1 = On	1 (OT) 0 (AU)	11-11-36 21-01-07 21-07
07	<b>Repeat Redial</b> Turns off or on an extension to use Repeat Redial.	0 = Off 1 = On	1	

Item No.	Item	Input Data	Default	Related PRG
			COS 01-15	
08	<b>Toll Restriction Dial Block</b> Turns off or on an extension to use Dial Block.	0 = Off 1 = On	0	
09	<b>Hotline/Extension Ringdown</b> Turns off or on Ringdown Extension for extensions with this COS.	0 = Off 1 = On	0	
10	<b>Signal/Voice Call</b> Turns off or on an extension allowing it to force Handsfree Answerback or Forced Intercom Ringing for outgoing Intercom calls.	0 = Off 1 = On	1	
11	<b>Protect for the Call Mode Switching from Caller</b> (Internal Call)	0 = Off 1 = On	0	
12	<b>Department Group Step Calling</b> Turns off or on an extension to use Department Group Step Calling.	0 = Off 1 = On	1	
13	<b>ISDN CLIP</b> Determines if the ISDN calling line identity presentation and screening indicators are allowed.	0 = Off 1 = On	1	10-03-05 15-01-04
14	<b>Call Address Information</b>	0 = Off 1 = On	0	
15	<b>Block Outgoing Caller ID</b> Turns off or on the system ability to automatically block outgoing Caller ID information when a user places a call. If this option is on, the system automatically inserts the Caller ID block code (defined in Program 14-01-21) before the user-dialed digits.	0 = Off 1 = On	0	14-01-20 14-01-21
16	<b>Display E911 Dialed Extension Name and Number</b> Turns off or on an extension to display the name and number of the extension that dialed E911.	0 = Off 1 = On	0	
17	<b>ARS Override of Trunk Access Map</b> Turns off or on an extension ability to override the trunk access map programming for outgoing calls.	0 = Off 1 = On	0	

Item No.	Item	Input Data	Default	Related PRG
			COS 01-15	
19	<b>Hotline for SPK</b> The ability of an extension to have Hotline activated or deactivated when going off hook via the speaker key.	0 = Off 1 = On	0	20-08-09
20	<b>Hot Key Pad</b> The ability of an extension to make a call by just dialing the number without first going off hook.	0 = Off 1 = On	0	
21	<b>Automatic Trunk Seizing by Pressing SPK Key</b> The ability of an extension to automatically access Trunk Route when going off hook via the speaker key.	0 = Off 1 = On	0	
22	<b>Voice Over to Busy Virtual Extension</b> The ability of an extension to make Voice Over to Busy Virtual Extension.	0 = Off 1 = On	0	

**Conditions**

None

### 20-09 : Class of Service Options (Incoming Call Service)

Level:

IN

#### Description

Use **Program 20-09 : Class of Service Options (Incoming Call Service)** to define the incoming call feature availability for each extension Class of Service (COS).

#### Input Data

Class of Service Number	01~15
-------------------------	-------

Item No.	Item	Input Data	Default	Related Program
			COS 01~15	
01	<b>Second Call for DID/DISA/DIL/E&amp;M Override</b> Turns off or on the extension ability to receive a second call from a DID, DISA, DIL, or tie line caller.  <i>With this option set to 1, the destination extension must be busy for a second DNIS caller to ring through. If the destination extension does not have a trunk key available for the second call and a previous call is ringing the extension but has not yet been answered, the second caller hears busy regardless of this program setting.</i>	0 = Off 1 = On	0 (OT) 1 (AU)	
02	<b>Caller ID Display</b> Turns off or on the Caller ID display at an extension.	0 = Off 1 = On	1	15-02-08
03	<b>Sub Address Identification</b> Defines whether or not an extension displays the Caller Sub-Address.	0 = Off 1 = On	0	
04	<b>Notification for Incoming Call List Existence</b> Determines whether or not an extension display shows Check List when an incoming call is missed by a user.	0 = Off 1 = On	1	20-09-02
05	<b>Signal/Voice Call</b> Turn off or on an extension ability to enable Handsfree Answerback or Forced Intercom Ringing for their incoming Intercom calls.	0 = Off 1 = On	1	11-11-15, 11-11-16

Item No.	Item	Input Data	Default	Related Program
			COS 01~15	
06	<b>Incoming Time Display</b>	0 = Off 1 = On	0	
07	<b>Call Queuing</b> Turn off or on an extension ability to have calls queued if a call rings the extension when it is busy.	0 = Off 1 = On	0	20-13-06
08	<b>Calling Party Information</b> Turn off or on an extension ability to display calling party information on CCIS calls.	0 = Off 1 = On	1	50-02-05
09	<b>Deny Collect Call Receiving</b>	0 = Off 1 = On	0	
11	<b>ISDN malicious Call Trace (MCT) (AU)</b>	0 = Off 1 = On	0	11-15-15
12	<b>Deny Collect Call Receiving for CO Trunk (OT)</b>	0 = Off 1 = On	0

### 20-11 : Class of Service Options (Hold/Transfer Service)

**Level:**

**IN**

#### Description

Use **Program 20-11 : Class of Service Options (Hold/Transfer Service)** to define the Hold and Transfer feature availability for each extension Class of Service (COS).

#### Input Data

Class of Service Number	01~15
-------------------------	-------

Item No.	Item	Input Data	Default
			COS 01~15
01	<b>Call Forward All</b> Turns off or on an extension ability to initiate Call Forwarding All.	0 = Off 1 = On	1
02	<b>Call Forward When Busy</b> Turns off or on an extension ability to use Call Forward when Busy.	0 = Off 1 = On	1
03	<b>Call Forwarding When Unanswered</b> Turns off or on an extension ability to use Call Forward when Unanswered.	0 = Off 1 = On	1
04	<b>Call Forwarding (Both Ringing)</b> Turns off or on an extension ability to activate Call Forwarding with Both Ringing.	0 = Off 1 = On	1
05	<b>Call Forwarding with Follow Me</b> Turns off or on an extension ability to initiate Call Forwarding with Follow Me.	0 = Off 1 = On	1
06	<b>Unscreened Transfer (Ring Inward Transfer)</b> Turns off or on an extension ability to use Unscreened Transfer.	0 = Off 1 = On	1
07	<b>Transfer Without Holding</b> Turns off or on an extension ability to use Transfer Without Holding.	0 = Off 1 = On	0
08	<b>Transfer Information Display</b> Turns off or on an extension ability for incoming Transfer preanswer display.	0 = Off 1 = On	1

Item No.	Item	Input Data	Default
			COS 01~15
09	<b>Group Hold Initiate</b> Turns off or on an extension ability to initiate a Group Hold.	0 = Off 1 = On	1
10	<b>Group Hold Answer</b> Turns off or on an extension ability to pick up a call on Group Hold.	0 = Off 1 = On	1
11	<b>Automatic On-Hook Transfer</b> Turns off or on an extension ability to use Automatic On Hook Transfer.	0 = Off 1 = On	1 (OT) 0 (AU)
12	<b>Call Forwarding Off Premise (External Call Forwarding)</b> Turns off or on an extension ability to set up Call Forwarding Off-Premise for their telephone.	0 = Off 1 = On	0
13	<b>Operator Transfer After Hold Callback</b> Turns off or on an extension ability to have a call which recalls from hold transfer to the operator.	0 = Off 1 = On	0
14	<b>Trunk-to-Trunk Transfer Restriction</b> Turns off or on the Trunk-to-Trunk Transfer Restriction. If enabled, Trunk-to-Trunk Transfer is not possible.	0 = Off 1 = On	0
15	<b>VRS Personal Greeting (Message Greeting)</b> Turns off or on a Service Code to record, listen to, or erase the Personal Greeting Message.	0 = Off 1 = On	1
16	<b>Call Redirect</b> Turns off or on a multiline terminal user ability to transfer a call to a predefined destination (such as an operator, voice mail, or another extension) without answering the call.	0 = Off 1 = On	0 (OT) 1 (AU)
17	<b>Department Group Trunk-to-Trunk Transfer (Each Telephone Group Transfer)</b> Turns off or on an extension user ability to set Trunk-to-Trunk Forwarding for a Department Group.	0 = Off 1 = On	1
18	<b>No Recall</b> No Recall set to "Allow" (1) will not stop transferred calls from recalling from a virtual extension.	0 = Off 1 = On	0
19	<b>Hold/Extended Park</b> Determine if an extension Class of Service should allow either a normal or extended Park.	0 = Off 1 = On	0
20	<b>No Callback</b> Turns off or on an extension to receive callbacks.	0 = Off 1 = On	0

Item No.	Item	Input Data	Default
			COS 01~15
21	<b>Restriction for Tandem Trunking on Hang Up</b> Allow (0) or Deny (1) an extension user ability to set up a tandem/conference call automatically when they hang up.	0 = Allow 1 = Deny	0
22	<b>Restricted Unsupervised Conference</b> Allow (0) or Deny (1) an extension ability to initiate an unsupervised conference.	0 = Allow 1 = Deny	0
23	<b>VE Call Forward Set/Cancel</b> Turn on or off an extension ability to set or cancel call forwarding for a virtual extension.	0 = Off 1 = On	0 (OT) 1 (AU)
24	<b>Trunk Park Hold Mode</b> Set the hold type when a trunk call is put on hold by an extension.	0 = Non Exclusive Hold (Off) 1 = Exclusive Hold (On)	0 (OT) 1 (AU)
25	<b>Transfer Park Call</b> Turn off or on an extension ability to transfer a parked call.	0 = Off 1 = On	0 (OT) 1 (AU)
26	<b>Station Park Hold mode (OT)</b>	0 = Off 1 = On	0
27	<b>Call Park Automatically Search</b>	0 = Off 1 = On	1
28	<b>Both Ring Enhancement</b> 0 = Normal (default) rings on other extension when the other paired extension is busy (not idle). 1 = Enhanced does not ring other extension when the other paired extension is busy (not idle).	0 = Normal 1 = Enhanced	0

#### Description

Use **Program 20-13 : Class of Service Options (Supplementary Service)** to define the supplementary feature availability for each extension Class of Service (COS).

#### Input Data

Class of Service Number	01~15
-------------------------	-------

Item No.	Item	Input Data	Default	Related PRG
			COS 01~15	
01	<b>Long Conversation Alarm</b> Turns off or on the Warning Tone for Long Conversation (not for single line telephones).	0 = Off 1 = On	1 (OT) 0 (AU)	
02	<b>Long Conversation Cutoff (Incoming)</b> Turns off or on an extension ability to use Long Conversation Cutoff for incoming calls.	0 = Off 1 = On	0	
03	<b>Long Conversation Cutoff (Outgoing)</b> Turns off or on an extension ability to use Long Conversation Cutoff for outgoing calls.	0 = Off 1 = On	0	
04	<b>Call Forward/DND Override (Bypass Call)</b> Turns off or on an extension ability to use Call Forwarding/DND Override.	0 = Off 1 = On	1	
05	<b>Intercom Off-Hook Signaling</b> Turns off or on an extension ability to receive off-hook signals.	0 = Off 1 = On	1	
06	<b>Automatic Off-Hook Signaling (Automatic Override)</b> Allows a busy extension ability to manually (0) or automatically (1) receive off-hook signals.	0 = Off 1 = On	0 (OT) 1 (AU)	
07	<b>Message Waiting</b> Turns off or on an extension ability to leave Message Waiting.	0 = Off 1 = On	1	
08	<b>Conference</b> Turns off or on an extension user ability to initiate a conference or Meet-Me Conference.	0 = Off 1 = On	1	

Item No.	Item	Input Data	Default	Related PRG
			COS 01~15	
09	<b>Privacy Release</b> Turns off or on an extension user ability to initiate a Voice Call Conference.	0 = Off 1 = On	1	
10	<b>Barge-In Monitor</b> Enables the extension Barge-In Mode to be Speech mode (0) or Monitor mode (1).	0 = Speech 1 = Monitor	0	20-13-45
11	<b>Room Monitor, Initiating Extension</b> Turns off or on an extension user ability to Room Monitor other extensions.	0 = Off 1 = On	0	
12	<b>Room Monitor, Extension Being Monitored</b> Turn off or on an extension ability to be monitored by other extensions.	0 = Off 1 = On	0	
13	<b>Continued Dialing (DTMF) Signal on ICM Call</b> Turn off or on an extension user ability to use Continued Dialing, which allows DTMF signal sending while talking on extension.	0 = Off 1 = On	1	
14	<b>Department Calling (PLT No Called Extension)</b> Turns off or on an extension user ability to call a Department Group Pilot.	0 = Off 1 = On	1	
15	<b>Barge-In, Initiate</b> Turns off or on an extension user ability to barge-in on other's calls.	0 = Off 1 = On	1 (OT) 0 (AU)	
16	<b>Barge-In, Receive</b> Turns off or on an extension ability to have other extensions barge-in on calls.	0 = Off 1 = On	1 (OT) 0 (AU)	
17	<b>Barge-in Tone/Display (Intrusion Tone)</b> Turns off or on the Barge-In tone. If on, callers hear an alert tone and their display indicates the Barge-In when another extension barges into their conversation. If off, there is no alert tone or display indication.	0 = Off 1 = On	1	
18	<b>Programmable Function Key Programming (General Level)</b> Turns off or on an extension user ability to program General function keys using Service Code 851 (by default). (Refer to Program 20-07-10 for Service Code 852.)	0 = Off 1 = On	1	
19	<b>Selectable Display Messaging (Text Messaging)</b> Turns off or on an extension user ability to use Selectable Display Messaging.	0 = Off 1 = On	1	

Item No.	Item	Input Data	Default	Related PRG
			COS 01~15	
20	<b>Account Code/Toll Restriction Operator Alert (Restricted Operation Transfer)</b> Turns off or on operator alert when an extension user improperly enters an Account Code or violates Toll Restriction.	0 = Off 1 = On	1(OT) 0 (AU)	
21	<b>Extension Name</b> Turns off or on an extension user ability to program its name.	0 = Off 1 = On	1	
22	<b>Busy Status Display (Called Party Status)</b> Turns off or on the ability to display the detailed state of the called party.	0 = Off 1 = On	0	20-13-06
23	<b>Display the Reason for Transfer</b> Select whether an extension should display the reason a call is being transferred to their extension (Call Forward Busy, Call Forward No Answer, DND).	0 = Off 1 = On	0	
24	<b>Privacy Release by Pressing Line Key</b> Turns off or on a user ability to press a line key to barge into an outside call. The Barge-In feature must be enabled if this option is to be used.	0 = Off 1 = On	0	
26	<b>Group Listen</b> Turns off or on an extension user ability to use Group Listen.	0 = Off 1 = On	0 (OT) 1 (AU)	
27	<b>Busy on Seizing Virtual Extension</b> If set to 1, you can call a busy extension which is talking on a virtual extension key. Program 20-13-06 (Call Waiting) must be set to 0 for this option to work.	0 = Off 1 = On	1	
28	<b>Allow Class of Service to be Changed</b> Turns off or on the ability of an extension Class of Service to be changed via Service Code 777 (OT) / 677 (AU).	0 = Off 1 = On	0	
29	<b>Paging Display</b> Turns off or on an extension user ability to display paging information.	0 = Off 1 = On	1	
30	<b>Background Music</b> Allow or Deny an extension user to turn Background Music on and off.	0 = Deny 1 = Allow	1	
31	<b>Connected Line Identification (COLP)</b>	0 = Off 1 = On	0	

Item No.	Item	Input Data	Default	Related PRG
			COS 01~15	
32	<b>Deny Multiple Barge-Ins</b> Allows or Denies an extension from having multiple users Barge into their conversation.	0 = Off 1 = On	0	
33	<b>ACD Supervisor's Position Enhancement</b> This option must be set 1 for the operator to use service codes in Program 11-13-10 ~ 11-13-13.	0 = Off 1 = On	0	11-13-10 11-13-11 11-13-12 11-13-13
34	<b>Block Manual Off-Hook Signaling</b> Turns off or on an extension user ability to block off-hook signals manually sent from a co-worker.	0 = Off 1 = On	0	
35	<b>Block Camp On</b> Turns off or on an extension user ability to block callers from dialing to Camp On.	0 = Off 1 = On	0	
36	<b>Call Duration Timer Display</b> Turns off or on an extension display of the Call Duration Time. The system waits until the interdigit time (Program 21-01-01) expires before beginning this timer.	0 = Off 1 = On	1	
38	<b>Headset Ringing for SLT</b> Turn off or on an extension user ability to use the Headset ringing.	0 = Off 1 = On	0	
39	<b>ACD Queue Status Display</b> Turns off or on the ACD Queue Status Display for an extension Class of Service. Any extension which has this option enabled also hears the queue alarm.	0 = Off 1 = On	0	41-20
40	<b>Do Not Disturb</b> Turn off or on an extension user ability to set or cancel Do Not Disturb.	0 = Off 1 = On	1	11-11-08 15-07-03
41	<b>Voice Mail Message Indication on DSS</b> Turn off or on the Voice Mail Message Indication for an extension on a DSS console.	0 = Off 1 = On	0	
42	<b>Extension Data Swap Enabling</b> Turn off or on an extension user ability to use Extension Data Swap.	0 = Off 1 = On	1	11-15-12
44	<b>Live Monitor Enabling</b> Turn off or on an extension user ability to use Live Monitor.	0 = Off 1 = On	1	

Item No.	Item	Input Data	Default	Related PRG
			COS 01~15	
45	<b>MIC Key Mode while Call Monitoring</b> Set per class of service, when in Call Monitoring Mode determines if the monitored parties receive the barge in alert tone when Coaching Mode is enabled.	0 = Enable 1 = Disable	0 (OT) 1 (AU)	20-13-10
46	<b>Remote Conference</b>	0 = Off 1 = On	1	11-19 20-34

## Program 20 : System Option Setup

### 20-14 : Class of Service Options for DISA/E&M

**Level:**  
**IN**

#### Description

Use **Program 20-14: Class of Service Options for DISA/E&M** to enable/disable DISA and tie line Class of Service options. You assign a DISA Class of Service to DISA users in Program 25-09. Assign tie line Classes of Service in 34-02. Up to 15 DISA/E&M Classes of Service can be defined.

 **Analog trunk-to-analog trunk and ISDN trunk-to-ISDN trunk calls are supported by this program. However, analog trunk-to-ISDN trunk and ISDN trunk-to-analog trunk calls are NOT supported by this program.**

#### Input Data

Class of Service Number	01~15
-------------------------	-------

Item No.	Item	Input Data	Default
			COS 1~15
01	<b>First Digit Absorbtion (Delete First Digit Dialed)</b> For tie lines, enable or disable the ability to absorb (ignore) the first incoming digit. Use this to make the tie trunk compatible with 3- and 4-digit tie line service. This option does not apply to DISA.	0 = Off 1 = On	0
02	<b>Trunk Group Routing/ARS Access</b> This option enables or disables a DISA or tie trunk caller ability to dial 9 for Trunk Group Routing or Automatic Route Selection (ARS).	0 = Off 1 = On	0
03	<b>Trunk Group Access</b> This option enables or disables a DISA or tie trunk caller ability to access trunk groups for outside calls (Service Code 804 (OT) / 704 (AU)).	0 = Off 1 = On	0 (OT) 1 (AU)
04	<b>Outgoing System Speed Dial</b> This option enables or disables a DISA or tie trunk caller ability to use the System Speed Dialing.	0 = Off 1 = On	0
05	<b>Operator Calling</b> This option enables or disables a DISA or tie trunk caller ability to dial 0 for the telephone system operator.	0 = Off 1 = On	0 (OT) 1 (AU)

Item No.	Item	Input Data	Default
			COS 1~15
06	<b>Internal Paging</b> This option enables or disables a DISA or tie trunk caller ability to use the telephone system Internal Paging.	0 = Off 1 = On	0 (OT) 1 (AU)
07	<b>External Paging</b> This option enables or disables a DISA or tie trunk caller ability to use the telephone system External Paging.	0 = Off 1 = On	0 (OT) 1 (AU)
08	<b>Direct Trunk Access</b> This option enables or disables a DISA or tie trunk caller ability to use Direct Trunk Access (Service Code 805 (OT) / #0 (AU)).	0 = Off 1 = On	0
09	<b>Forced Trunk Disconnect &lt;Not for ISDN T-point&gt;</b> This option enables or disables a tie trunk caller ability to use Forced Trunk Disconnect (Service Code 724 (OT) / 11-10-26 (AU)). This option is not available to DISA callers.	0 = Off 1 = On	0
10	<b>Call Forward Setting by Remote via DISA</b> Enable or disable a DISA caller ability to use the Call Forward service codes (Programs 11-11-01 ~ 11-11-05).	0 = Off 1 = On	0
11	<b>DISA/Tie Trunk Barge-In</b> This option enables or disables a DISA or tie trunk caller ability to use the Barge-In.	0 = Off 1 = On	0
12	<b>Retrieve Park Hold</b> This option enables or disables a DISA or tie trunk caller ability to retrieve a Park Hold call.	0 = Off 1 = On	0 (OT) 1 (AU)

## Program 20 : System Option Setup

### 20-15 : Ring Cycle Setup

**Level:**  
**IN**

#### Description

Use **Program 20-15 : Ring Cycle Setup** to define the ringing cycles for each ring type.

#### Input Data

Item No.	Incoming Signal Type	Ringing Cycle	Default
01	Normal Incoming Call on Trunk	1~13	3
02	PBX, CES Incoming Call		8
03	Incoming Internal Call		8 (OT) 3 (AU)
04	DID/DISA/VRS		8
05	DID/DDI		8
06	Dial-In in the E&M Tie Line		8 (OT) 12 (AU)
07	Door Box Ringing for SLT		2 (OT) 8 (AU)
08	Virtual Extension Ring		8
09	Callback		4 (OT) 11 (AU)
10	Alarm for SLT		5
11	VRS Waiting Message Incoming Call		6 (OT) 8 (AU)

**Table 2-6 Ringing Cycles**

<b>Number</b>	<b>Ringing Cycle</b>
1	On
2	On:2.0 / Off:4.0
3	On:1.0 / Off:2.0
4	On:0.5 / Off:0.5
5	On:0.25 / Off:0.25
6	On:0.5 / Off:0.5 / On:0.5 / Off:1.5
7	On:0.25 / Off:0.25 / On:0.25 / Off:5.25
8	On:0.375 / Off:0.25 / On:0.375 / Off:2.0
9	On:0.25 / Off:0.125 / On:0.25 / Off:0.125 / On:0.25 / Off:2.0
10	On:1.0 / Off:4.0
11	On:0.25 / Off:0.25 / On:0.25 / Off:4.25
12	On:1.0 / Off:3.0
13	On:0.25 / Off:0.25 / On:0.25 / Off:2.25

None

**Feature Cross Reference**

None

## Program 20 : System Option Setup

### 20-16 : Selectable Display Messages

**Level:**  
**SA**

#### Description

Use **Program 20-16 : Selectable Display Messages** to enter the Selectable Display Messages. There are 20 alphanumeric messages, with up to 24 characters. Use the following chart when programming messages.

Use this keypad digit . . .	When you want to . . .
1	Enter characters: 1 @ [ ¥ ] ^ _ ` {   } → ← Á À Â Ã Ç É Ê ì ó
2	Enter characters: A-C, a-c, 2.
3	Enter characters: D-F, d-f, 3.
4	Enter characters: G-I, g-i, 4.
5	Enter characters: J-L, j-l, 5.
6	Enter characters: M-O, m-o, 6.
7	Enter characters: P-S, p-s, 7.
8	Enter characters: T-V, t-v, 8.
9	Enter characters: W-Z, w-z, 9.
0	Enter characters: 0 ! “ # \$ % & ’ ( ) ô õ ú ä ö ü α ε θ
*	Enter characters: * + , - . / : ; < = > ? π Σ σ Ω ∞ φ £
#	# = Accepts an entry (only required if two letters on the same key are needed – ex: TOM). Pressing # again = Space. (In system programming mode, use the right arrow soft key instead to accept and/or add a space.)
CONF	Clear the character entry one character at a time.
HOLD	Clear all the entries from the point of the flashing cursor and to the right.

When using DTP or DTU style telephones on the UNIVERGE SV8100 system, not all the same characters are available.

# Program 20 : System Option Setup

## 20-17 : Operator Extension

**Level:**  
**IN**

### Description

Use Program **20-17 : Operator Extension** to designate an operator. When an extension user dials 0 or 9 (defined by Program 11-01 Type 5), calls go to the operator selected in this program.

If you do not assign an extension in Program 90-11-01, system alarms appear on the extension assigned in this option.

### Input Data

Operator Number	1~8
-----------------	-----

Item No.	Item	Input Data	Default	Related Program
01	<b>Operator's Extension Number</b> Define the extension numbers which are to be used by operators.	Up to eight digits	No Setting (OT) 101 (AU)	11-01 20-01-01

### Conditions

None

### Feature Cross Reference

- Intercom

## Program 20 : System Option Setup

### 20-18 : Service Tone Timers

**Level:**  
**IN**

#### Description

Use **Program 20-18: Service Tone Timers** to set the values for the system service tone timers. Refer to the following chart for a description of each option, its range and default setting.

#### Input Data

Item No.	Item	Input Data	Default	Description	Related PRG
01	<b>Extension Dial Tone Time</b>	0~64800s	30	After getting Intercom dial tone, a telephone user has this time to dial the first digit of the Intercom call.	
02	<b>Busy Tone Timer</b>	0~64800s	15		
03	<b>Congestion Tone</b>	0~64800s	10	A Busy Tone when system resources run short. (such as DTMF receiver resources).	
04	<b>Call Waiting Tone Timer</b>	0~64800s	10	This option sets the time between Call Waiting tones. This timer also sets the time between Off-Hook Signaling alerts.	
05	<b>Multiline Confirmation Tone</b>	0~64800s	10		
06	<b>Interval of Call Waiting Tone</b>	0~64800s (OT) 3~64800s (AU)	10		
07	<b>Intrusion Tone Repeat Time</b>	0~64800s	0	After a call is interrupted (such as Barge-In, Voice Mail Conversation Recording, or Voice Over), the system repeats the Intrusion Tone after this time. Normally, you should enter 0 to disable this time.	
08	<b>Conference Tone Interval</b>	0~64800s	0		

**Input Data**

09	<b>Warning Beep Tone Signaling Interval</b>	0~64800s	60		14-01-18
----	---	----------	----	--	----------

**Conditions**

None

---

**Feature Cross Reference**

- Distinctive Ringing, Tones, and Flash Patterns

## Program 20 : System Option Setup

### 20-19 : System Options for Caller ID

**Level:**  
**IN**

#### Description

Use **Program 20-19 : System Options for Caller ID** to define the system options for the Caller ID feature.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Caller ID Displaying Format</b> (if displaying digits are more than 12 digits)	0 = First 10 digits (Upper) 1 = Last 10 digits (Lower)	0
02	<b>Caller ID Wait Timer</b> When an incoming CO call is received, the SV8100 starts the timer. It will wait the programmed time for Caller ID information from telco before connecting the CO call.	0-30 seconds	5 (OT) 2 (AU)
03	<b>Caller ID Edit Mode</b> If Caller ID Edit Mode is disabled (0), no trunk access code will be added to the Caller ID. If this option is enabled (1), the trunk access code entered in Program 10-02-05 will be added to the beginning of the Caller ID.	0 = off 1 = on	0 (OT) 1 (AU)
04	<b>Wait Facility IE Timer</b> This timer is used with ISDN trunks to determine how long the system waits for the Caller ID name from the Telco.	0~64800 seconds	10
05	<b>Caller ID Sender Queing Time (Sender Wait)</b>	0~64800 seconds	0
07	<b>Long Distance Code</b>	Up to two digits	No setting
08	<b>Area Code</b>	Up to six digits	No setting

**Conditions**

None

---

**Feature Cross Reference**

- Caller ID

## Program 20 : System Option Setup

### *20-20 : Message Setup for Non-Caller ID Data*

**Level:**

**IN**

#### Description

Use **Program 20-20 : Message Setup for Non-Caller ID Data** to define the messages which are displayed when no Caller ID information is received.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Private Call</b>	24 Alphanumeric Characters	UNAVAILABLE INFO (OT) PRIVATE (AU)
02	<b>Call from Out of Service Area</b>	24 Alphanumeric Characters	OUT-OF-STATE (OT) OUT OF AREA (AU)
03	<b>Call Information with Error</b>	24 Alphanumeric Characters	NO CALLER INFO

#### Conditions

None

#### Feature Cross Reference

- Caller ID

## Program 20 : System Option Setup

### 20-21 : System Options for Long Conversation

**Level:**  
**IN**

#### Description

Use **Program 20-21 : System Options for Long Conversation** to define the system options for the Long Conversation feature.

#### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<b>Long Conversation Alarm 1</b> The warning tone for long toll calls sounds after this time.	0~64800 (sec)	170	14-01-15
02	<b>Long Conversation Alarm 2</b> After the initial long toll call warning tone, additional warning tones sound after this time.	0~64800 (sec)	180	14-01-15
03	<b>Long Conversation Cutoff for Incoming Call</b> This timer determines how long the system waits before disconnecting an incoming call.	0~64800 (sec)	0	14-01-14
04	<b>Long Conversation Cutoff for Outgoing Call</b> This timer determines how long the system waits before disconnecting an outgoing call.	0~64800 (sec)	0	14-01-14

#### Conditions

None

#### Feature Cross Reference

- Long Conversation Cutoff

## Program 20 : System Option Setup

### 20-22 : System Options for Wireless – DECT Service

**Level:**

**IN**

#### Description

Use **Program 20-22 : System Options for Wireless – DECT Service** to define the time the system waits before determining the Wireless – DECT phone is out of range. For incoming calls, the timer begins when the call is received. If the time defined here expires before the Wireless – DECT phone starts to ring, the system determines the phone is out of range and provides the out-of-range services (indicates out-of range, transfers the call to voice mail or to another extension).

#### Input Data

Item No.	Item	Input Data	Default
05	Out of area judging time (AU)	0~64800s	8
06	Out of Area Talkie Number	0~100	0

#### Conditions

None

#### Feature Cross Reference

- Wireless – DECT

## Program 20 : System Option Setup

### 20-23 : System Options for CTI

**Level:**  
**IN**

#### Description

Use **Program 20-23 : System Options for CTI** to define the system options for the CTI feature.

#### Input Data

Item No.	Item	Input Data	Default
01	Delayed ring timer for CTI	0~64800 (sec)	30
02	ALERT replay time (CTI)	0~64800 (sec)	8
03	<b>Trunk Virtual Bridge – TSP Driver</b> Enable or disable the system to send trunk or virtual extension information to the TSP driver.	0 = Disable (No) 1 = Enable (Yes)	0 (OT) 1 (AU)
04	<b>The Timer that waits for an off-hook for Single Line Telephone</b>	0~64800 (sec)	30
06	<b>3rd Party CTI IP Address</b> Displays the IP address of 3rd Party CTI Server currently connected. (Read Only)	0.0.0.0~ 255.255.255.255	0.0.0.0

#### Conditions

None

#### Feature Cross Reference

- Computer Telephony Integration (CTI) Applications

## Program 20 : System Option Setup

### 20-25 : ISDN Options

**Level:**  
**IN**

### Description

Use **Program 20-25 : ISDN Options** to define the ISDN system options.

### Input Data

Item No.	Item	Input Data	Default
01	<b>Send the Release Message After Subscriber Hangs Up</b>	0 = Service Off 1 = Service On	1
02	<b>Progress Indicate Information Element Detect</b>	0 = Service Off 1 = Service On	1
03	<b>Bearer Capability Select from SLT Outgoing</b>	0 = 3.1KHz Audio 1 = Speech	0
04	<b>Send DT until user dials first digit (Local Dial Tone)</b> With Overlap Sending Mode, if the network side stops dial tone when CLI is included in the SETUP message, the system sends dial tone until the user dials the first digit instead of the network.	0 = Service Off 1 = Service On	0
05	<b>T305 Timer Start After Sending Disconnect Message</b>	0 = Service Off 1 = Service On	1
06	<b>Call Proceeding Send Mode</b>	0 = Service Off 1 = Service On	1
07	<b>Local Busy Tone Mode Set When Disconnect Message Received</b>	0 = Local Busy Tone Off 1 = Busy Tone from NT (network side)	0
08	<b>Use of Lower Layer Compatibility (LLC)</b> This Program must be set to (0 = Disable) for International Dialing when using Calling Number Presentation (CPN) from station.	0 = Disable (Off) 1 = Enable (On)	1 (OT) 0 (AU)
09	<b>High Layer Compatibility (HLC) Sending</b>	0 = Disable (Off) 1 = Enable (On)	1 (OT) 0 (AU)
10	<b>S-Point Terminal Seizes Analog Trunk</b>	0 = Disable (Off) 1 = Enable (On)	0 (OT) 1 (AU)

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
11	<b>Automatic Changing System Clock When Date/ Time Information Element Received</b>	0 = Disable (Off) 1 = Enable (On)	1 (OT) 0 (AU)
12	<b>Call Forward Options (Auto Connect Send)</b> Incoming Calls Forwarded Out Automatically Return Connect Message When Outgoing Call Receives Alerting Message.	0 = Normal – No Message (Off) 1 = Normal – No Message (On)	0
13	<b>Local Busy Tone (Release)</b> Busy tone send when T-point receiving a RELEASE message from Network.	0 = Off 1 = On	0 (OT) 1 (AU)
14	<b>No Response Release Send</b> Operation mode setting for when second T303 timer expires.	0 = Off 1 = On	0
15	<b>Call Reference Selection for PRI 2B-Channel Transfer</b> When transferring a call via 2B-Channel Transfer, select Call Reference information as “Negative Integer” (0), or as is “No Edit” (1).	0 = Negative Integer 1 = No Edit	0

**Conditions**

None

**Feature Cross Reference**

- ISDN Compatibility

## Program 20 : System Option Setup

### 20-26: Multiplier for Charging Cost

**Level:**

**IN**

#### Description

Use **Program 20-26: Multiplier for Charging Cost** to define the Multiplier for charging cost to each extension service class.

#### Input Data

Service Class	1~15
---------------	------

Item No.	Item	Input Data	Default
01	Value %	100~500	100

#### Conditions

None

#### Feature Cross Reference

None

## Program 20 : System Option Setup

### 20-29 : Timer Class for Extension

**Level:**  
**IN**

#### Description

Use **Program 20-29 : Timer Class for Extension** to assign the timer class to each extension. There are 16 Classes that can be assigned. You make eight entries for this Program, one for each Night Service Mode. This entry includes virtual extension numbers.

The details of classes are assigned by Program 20-31.

#### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Item No.	Item	Input Data	Default
01	Day/Night Mode 1~8, Class Number	0~15 0 = Not assigned	0

#### Conditions

None

#### Feature Cross Reference

None

## Program 20 : System Option Setup

### 20-30 : Timer Class for Trunks

**Level:**  
**IN**

#### Description

Use **Program 20-30 : Timer Class for Trunks** to assign the timer class to each trunk. There are 16 Classes that can be assigned. You make eight entries for this Program, one for each Night Service Mode. The details of classes are assigned by Program 20-31.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default
01	Day/Night Mode 1~8, Class Number	0~15, #, * 0 = Not assigned	0

#### Conditions

None

#### Feature Cross Reference

None

## Program 20 : System Option Setup

### 20-31 : Timer Class Timer Assignment

**Level:**  
**IN**

#### Description

Use **Program 20-31: Timer Class Timer Assignment** to assign values to the timers on a class of service basis.

#### Input Data

Timer Class Number	0~15
--------------------	------

Item No.	Item	Input Data (sec)	Default (sec)	Related PRG
01	<b>Trunk Queuing Callback Duration Time</b> Trunk Queuing Callback rings an extension for this amount of time	0~64800	15	20-01-08
02	<b>Callback / Trunk Queuing Cancel Time</b> The system cancels an extension Callback or Trunk Queuing request after this amount of time.	0~64800	64800	20-01-09
03	<b>Virtual Extension Delay Interval</b> Virtual Extensions set for Delayed Ringing (refer to <a href="#">15-11 : Virtual Extension Delayed Ring Assignment</a> ) ring the extension after this time.	0~64800	10	20-04-03
04	<b>Intercom Interdigits Time (Intercom I/D Timer)</b> When placing Intercom calls, extension users must dial each digit in this time.	0~64800	10	21-01-02
05	<b>Trunk Interdigits Time (Trunk I/D Timer)</b> The system waits for this time to expire before placing the call in a talk state (Call Timer starts after time expires, Voice Over and Barge-In are not allowed until after time expires).	0~64800	10	21-01-03
06	<b>Hotline Time Start Time (Hotline Start)</b> A Ringdown extension automatically calls the programmed destination after this time.	0~64800	5 (OT) 0 (AU)	21-01-09

Item No.	Item	Input Data (sec)	Default (sec)	Related PRG
07	<b>Ring No Answer Alarm Time</b> If a trunk rings a multiline telephone longer than this time, the system changes the ring cadence. This indicates to the user that the call has been ringing too long.	0~64800	60	22-01-03
08	<b>DIL/Incoming Ring Group No Answer Time</b> A DIL that rings its programmed destination longer than this time diverts to the DIL No Answer Ring Group (set in Program 22-08).	0~64800	0	22-01-04
09	<b>DID Ring-No-Answer Time</b> In systems with DID Ring-No-Answer Intercept, this time sets the Ring-No-Answer time. This time is how long a DID call rings the destination extension before rerouting to the intercept ring group.	0~64800	20	22-01-06
10	<b>Hold Recall Time (Non Exclusive Hold)</b> A call on Hold recalls the extension that placed it on Hold after this time. This time works with the Hold Recall Callback Time (Program 24-01-02).	0~64800	90	24-01-01
11	<b>Hold Recall CallBack Time (Non Exclusive Hold)</b> A trunk recalling from Hold or Park rings an extension for this time. This time works with Hold Recall Time or Park Hold Time. After this time, the system invokes the Hold Recall Time again. Cycling between time Program 24-01-01 and 24-01-02 and Program 24-01-06 and 24-01-07 continues until a user answers the call.	0~64800	30	24-01-02
12	<b>Exclusive Hold Recall Time</b> A call left on Exclusive Hold recalls the extension that placed it on Hold after this time.	0~64800	90	24-01-03
13	<b>Exclusive Hold Recall Callback Time</b> An Exclusive Hold Recall rings an extension for this time. If not picked up, the call goes back on System Hold.	0~64800	30	24-01-04
14	<b>Park Hold Time – Normal</b> A call left parked longer than this time interval recalls the extension that initially parked it.	0~64800	90	24-01-06

Item No.	Item	Input Data (sec)	Default (sec)	Related PRG
15	<b>Delayed Call Forwarding Time (Call Forward No Answer)</b> If activated at an extension, Delayed Call Forwarding occurs after this time. This also sets how long a Transferred call waits at an extension forwarded to Voice Mail before routing to the called extension mailbox.	0~64800	10	24-02-03
16	<b>Transfer Recall Time</b> An unanswered transferred call recalls after this time to the extension that initially transferred it.	0~64800	30	24-02-04
17	<b>DID/DISA No Answer Time (Disconnect or IRG or VM)</b> A VRS/DISA caller can ring an extension for this time before the system sets the call as a Ring No Answer. After this time expires, the call follows the programmed Ring No Answer routing (set in Program 25-03 and 25-04).	0~64800	10 (OT) 0 (AU)	25-07-02
18	<b>Disconnect after Re-transfer to IRG</b>	0~64800	60	25-07-03
19	<b>Long Conversation Warning Tone Time (Trunk to Trunk)</b> Determine the time a DISA caller or any trunk-to-trunk (such as Tandem Trunking) conversation can last before the Long Conversation tone is heard	0~64800	30 (OT) 1800 (AU)	25-07-07
20	<b>Long Conversation Disconnect (Trunk to Trunk)</b> This time determines how long the system waits before disconnecting a DISA caller or any trunk-to-trunk (such as Tandem Trunking) conversation call after the Long Conversation tone is heard.	0~64800	15 (OT) 30 (AU)	25-07-08
21	<b>DISA Internal Paging Time</b> This is the maximum length of an Internal Page placed by a DISA caller. If the Page continues longer than this time, the system terminates the DISA call.	0~64800	30	25-07-09
22	<b>DISA External Paging Time</b> This is the maximum length of an External Page placed by a DISA caller. If the Page continues longer than this time, the system terminates the DISA call.	0~64800	30	25-07-10
23	<b>Page Announcement Duration</b> This timer sets the maximum length of Page announcements. (Affects External Paging only)	0~64800	1200	31-01-02

---

---

Item No.	Item	Input Data (sec)	Default (sec)	Related PRG
24	Mobile Extension Answer Time	0 = Immediate Answer (1~64800(sec))	3	22-01-12
25	Mobile Extension Callback Duration Time	1~64800(sec)	15	22-01-16

**Conditions**

- These timers are used when an extension or trunk is assigned to a class from 1 to 16 in 20-29-01 or 20-30-01. When the timer class is set to 0, the system-wide timer is used.
- All defaults are the same as the system-wide timers.

# Program 21 : Outgoing Call Setup

## 21-01 : System Options for Outgoing Calls

Level:  
IN

### Description

Use **Program 21-01 : System Options for Outgoing Calls** to set the system options for Outgoing Call Service.

### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<b>Seizure Trunk Line Mode</b> Select the trunk based off the Trunk Route Priority (0) or based off the trunk that has not been used in the longest time (1).	0 = Priority Route 1 = Circular Route	0	14-05 14-06
02	<b>Intercom Interdigit Time</b> When placing Intercom calls, extension users must dial each digit in this time.	0~64800 (sec)	10	
03	<b>Trunk Interdigit Time (External)</b> The system waits for this time to expire before placing the call in a talk state (Call Timer starts after time expires, Voice Over and Barge-In are not allowed until after time expires).	0~64800 (sec)	10	14-02-08
04	<b>Dial Tone Detection Time</b> If dial tone detection is enabled, the system waits this time for the Telco to return dial tone. When the time expires, the system assumes dial tone is not present. To disable this time (and have the system wait continuously), enter 0.	0~64800 (sec)	5	14-02-05

Program

21

## Input Data

Item No.	Item	Input Data	Default	Related Program
05	<b>Disconnect Time when Dial Tone not Detected</b> If 14-02-11 is enabled, the system skips over a trunk if dial tone is not detected. This option pertains to calls placed using Speed Dial, ARS, Last Number Redial or Save Number dialed. It does not pertain to line key or Direct Trunk Access calls.	0~64800 (sec)	0 (OT) 3 (AU)	
06	<b>Dial Pause at First Digit</b>	0~64800 (sec)	3 (OT) 1 (AU)	
07	<b>Toll Restriction Override Time</b> After dialing the Toll Restriction Override codes, the system removes Toll Restriction from the extension for this time.	0~64800 (sec)	10	20-08-06 21-07
08	<b>Preset Dial Display Hold Time</b>	0~64800 (sec)	5 (OT) 10 (AU)	
09	<b>Ringdown Extension Timer (Hotline Start)</b> A Ringdown extension automatically calls its programmed destination after this time.	0~64800 (sec)	5 (OT) 0 (AU)	20-08-09 21-11
10	<b>Dial Digits for Toll Restriction Path</b> If this option is programmed with an entry other than 0, a call does not have a talk path unless the user dials at least the number of digits entered in this option when placing an outgoing call.  This means that an entry of 4 or higher in this program causes a problem when dialing 911(USA only). Since it is only a 3-digit number, the call does not have a talk path, preventing the emergency dispatcher from hearing the caller. This option should be kept at its default setting of 0 to prevent any problems with dialing 911 (USA only).	0~24	0	
11	<b>Inter-Digit Time for Toll Restriction Path Control</b>	0~60 (sec)	10 (OT) 0 (AU)	

## Input Data

Item No.	Item	Input Data	Default	Related Program
12	<b>Dial E911 Routing Without Trunk Access</b> If enabled (1), an extension user can dial 911 (USA only) without first dialing a trunk access code or pressing a line key. If disabled (0), an extension user must dial a trunk access code (e.g., 9) or press a line key before dialing 911 (USA only).	0 = Trunk Access Code Required 1 = Trunk Access Code Not Required	1 (OT) 0 (AU)	
13	<b>Alarm Ring Timer (E911)</b> Use this option to set the duration of the E911 Alarm Ring Time. If set for 0, the E911 Alarm does not ring.	0, 1~64800 (sec) (0 = Off)	0	11-12-56 20-08-16
14	<b>Forced Account Code Inter-digit Timer</b> The system waits this time for a user to enter a Forced Account code.	0~64800 (sec)	3	
15	<b>Outgoing Disable on Incoming Line (Toll Restriction)</b> Enable or disable the Outgoing Disable on Incoming Line feature.	0 = Disable (Off) 1 = Enable (On)	0 (OT) 1 (AU)	15-01-05 21-01-16 21-01-17 80-03-01
16	<b>Supervise Dial Detection Timer</b> With the Outgoing Disable on Incoming Line feature, if dial tone is not detected after the extension answers an incoming line, the system determines the call is unable to complete and releases the DTMF receiver.	0~64800 (sec)	20	15-01-05 21-01-16 21-01-17 80-03-01
17	<b>Restriction Digit in Outgoing Disable on Incoming Line</b> With the Outgoing Disable on Incoming Line feature, determine the number of digits to be dialed before the call should be disconnected.	Digits 1~9	4	15-01-05 21-01-15 21-01-16 80-03-01
18	<b>Reset Dial After Failure of Trunk Access</b> Enable (1) or Disable (0) the ability to continue to dial codes or extensions after receiving Trunk Busy. This needs to be set to Enabled (1) for the Forced Trunk Disconnect feature to work.	0 = Disable (Off) 1 = Enable (On)	0 (OT) 1 (AU)	
19	<b>Do-Not-Call-Setup</b>	0 = No service 1 = Extended common restriction	0	15-01-07

**Conditions**

None

# Program 21 : Outgoing Call Setup

## 21-03 : Trunk Group Routing for Trunks

**Level:**  
**IN**

### Description

Use **Program 21-03 : Trunk Group Routing for Trunks** to set the Trunk Route Table for Automatic External Call Forward. The Route Table is set in Program 14-06.

### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Route Table Number	Default	Related Program
01	1~8	0~100 (0 = No setting)	0 (OT) 1 (AU)	14-06 14-07-01

### Conditions

None

### Feature Cross Reference

- Trunk Group Routing

## Program 21 : Outgoing Call Setup

### 21-04 : Toll Restriction Class for Extensions

**Level:**  
**IN**

#### Description

Use **Program 21-04 : Toll Restriction Class for Extensions** to assign a Toll Restriction class to an extension. The details of Toll Restriction are defined in Program 21-05 and 21-06.

 **A telephone and a trunk will have a Restriction Class. The higher class applies for outgoing calls.**

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Day/Night Mode	Restriction Class	Default	Related Program
01	1~9 9 = (Power Failure Mode)	1~15	2	14-01-08 21-05

#### Conditions

None

#### Feature Cross Reference

None

## Program 21 : Outgoing Call Setup

### 21-05 : Toll Restriction Class

**Level:**
**IN**

#### Description

Use **Program 21-05: Toll Restriction Class** to set the system Toll Restriction classes (1~15).

#### Input Data

Toll Restriction Class Number	1~15
-------------------------------	------

Item No.	Item	Input Data	Default	Description	Related PRG
01	<b>International Call Restriction Table</b>	0 =Unassigned (No) 1 = Assigned (Yes)	1, 6~15 = 0 2~5 = 1	This option assigns/unassigns the International Call Restrict Table for the Toll Restriction Class you are programming. Enter International Call Restrict Table data in Program 21-06-01.	21-06-01
02	<b>International Call Permit Code Table</b>	0 =Unassigned (No) 1 = Assigned (Yes)	1, 3~15 = 0 2 = 1	This option assigns/unassigns the International Call Permit Table for the Toll Restriction Class you are programming. Enter International Call Permit Table data in Program 21-06-02.	21-06-02
04	<b>Maximum Number of Digits Table Assignment</b>	1~4 = Table 0 = Disable (None)	1, 2, 6~15 = 0 3 = 1 4 = 2 5 = 3	Select the table (defined in 21-06-03) to be used to determine the maximum number of digits allowed for outgoing calls.	21-06-03
05	<b>Common Permit Code Table</b>	0 =Unassigned (No) 1 = Assigned (Yes)	1, 8~15 = 0 2~7 = 1	It chooses whether the table set up by 21-06-04 is referred to, or not referred to.	21-06-04
06	<b>Common Restriction Table</b>	0 =Unassigned (No) 1 = Assigned (Yes)	1, 6~15 = 0 2~5 = 1	It chooses whether the table set up by 21-06-05 is referred to, or not referred to.	21-06-05

Item No.	Item	Input Data	Default	Description	Related PRG
07	<b>Permit Code Table</b>	1~4 = Table 0 = Disable (None)	1-6, 8-15 = 0 (OT)  7 = 1 (OT) 3 = 1 (AU) 4 = 2 (AU) 5 = 3 (AU) 7 = 0 (AU)	Set the tables 1~4 when referring to the table set up by 21-06-06.	21-06-06
08	<b>Restriction Table</b>	1~4 = Table 0 = Disable (None)	1, 2, 6~15 = 0 (OT)  3 = 1 (OT) 4 = 2 (OT) 5 = 3 (OT) 1 -15 = 0 (AU)	Set the tables 1~4 when referring to the table set up by 21-06-07.	21-06-07
09	<b>Restriction for Common Speed Dials</b>	0 = Does Not Restrict 1 = Following Restriction Check	0	Use this option to enable/disable Toll Restriction for Common Speed Dialing numbers. If enabled, System Speed Dialing numbers have the same restrictions as manually dialed numbers.	
10	<b>Restriction for Group Speed Dials</b>	0 = Does Not Restrict 1 = Following Restriction Check	0	Use this option to enable/disable Toll Restriction for Group Speed Dialing numbers. If enabled, Group Speed Dialing numbers have the same restrictions as manually dialed numbers.	
11	<b>Intercom Call Restriction</b>	0 = Disable (No) 1 = Enable (Yes)	0	Determines if incoming and outgoing intercom calls are allowed.	

Item No.	Item	Input Data	Default	Description	Related PRG
12	<b>PBX Call Restriction</b>	0 = Disable (No) 1 = Enable (Yes)	1~6, 8~15 = 0 7 = 1	Use this option to set how the system Toll Restricts calls over PBX trunks. If you enable PBX Toll Restriction, the system begins Toll Restriction after the PBX access code. The user cannot dial a PBX extension. If you disable PBX Toll Restriction, the system only restricts calls that contain the PBX access code. The system does not restrict calls to PBX extensions. Refer to the PBX compatibility feature. Make sure Program 21-05-04 (Maximum Number of Digits Table Assignment) allows for PBX Toll Call Dialing (normally 12 digits).	
13	<b>Restriction of Tie Line Calls</b>	0 = Disable (No) 1 = Enable (Yes)	0	It chooses whether the toll restriction of the dial set up by 34-08 is enabled or disabled.	34-08
14	<b>Trunk Transfer Restriction on Incomplete Dial</b>	0 = Not allow 1 = Allow	0	If this program is set to 1, you can transfer the outgoing trunk which you dialed incompletely.	
15	<b>Common Hold Restriction on Incomplete Dial</b>	0 = Not allow 1 = Allow	0	If this program is set to 1, you can hold the outgoing trunk which you dialed in restriction check.

## Program 21 : Outgoing Call Setup

### 21-06 : Toll Restriction Table Data Setup

**Level:**
**IN**

#### Description

Use **Program 21-06: Toll Restriction Table Data Setup** to set the system Toll Restriction data. Dial 1-9, 0, \*, # can be entered in each table.

#### Input Data

Item No.	Item	Table	Input Data	Default	Description
01	International Call Restriction Table	1~10	Dial (Up to four digits)	Tables 1~10 = No Setting	This option lets you program the Restrict Table for international calls. The system has 10 International Call Restrict Tables. Each entry can have up to four digits.
02	International Call Permit Code Table	1~20	Dial (Up to six digits)	Tables 1~20 = No Setting	This option lets you program the Permit Table for international calls. The system has 20 International Call Permit Tables. Each entry can have up to six digits.
03	Maximum Number Digits Table Assignment	1~4	4~30	Tables 1~ 4 = 30	This option selects the maximum number of digits allowed in outgoing calls for each table.
04	Common Permit Code Table	1~10	Dial (Up to four digits)	No Setting (OT) Table1 = 000 (AU) Table 2 ~ 10 = No Setting (AU)	This option lets you program the Common Permit Code Table. This table contains up to 10 codes you commonly allow users to dial.
05	Common Restriction Table	1~10	Dial (Up to 12 digits)	No Setting	This option lets you program the Common Restrict Code Table. This table contains up to 10 codes you commonly prevent users from dialing.
06	Permit Code Table	1~4 (table) 001~200 (Entry)	Dial (Up to 12 digits)	Table 1~4 = No Setting	This option lets you program the Permit Code Tables. If the system has Toll Restriction enabled, users can dial numbers only if permitted by these tables and the Common Permit Table (21-06-04). There are four Permit Code Tables, with up to 200 entries in each table. The system permits calls exactly as you enter the code.

**Input Data**

Item No.	Item	Table	Input Data	Default	Description
07	<b>Deny Restriction Table</b>	1~4 (table) 1~60 (Entry)	Dial (Up to 12 digits)	Table 1~4 = No Setting	This option lets you program the Restrict Code Tables. If the system has Toll Restriction enabled, users cannot dial numbers listed in these tables. There are four Restrict Code Tables, with up to 200 entries in each table. The system restricts calls exactly as you enter the code.
08	<b>PBX Access Code</b>	1~4	Dial (Up to two digits)	Table 1~4 = No Setting	Use this option to enter the PBX Access Code. When the system is behind a PBX, this is the code users dial to access a PBX trunk. Toll Restriction begins after the PBX access code. For PBX trunks (Program 14-04) the system only Toll Restricts calls that contain the access code. Always program this option when the system is behind a PBX, even if you don't want to use Toll Restriction. PBX Access Codes can have up to two digits, using 0-9, #, * and LINE KEY 1 (don't care). When using Account Codes, do not use an asterisk in a PBX access code. Otherwise, after the *, the trunk stops sending digits to the central office. Entries 1~4 correspond to the 4 PBX Access Codes. Each code can have up to two digits.
09	<b>Specific Dial Outgoing Code</b>	1~20	Dial (Up to eight digits)	No Setting	
10	<b>Outgoing Call Code Setup</b>	1~20	Dial (Up to four digits)	No Setting	

**Conditions**

None

**Feature Cross Reference**

None

## Program 21 : Outgoing Call Setup

### 21-07 : Toll Restriction Override Password Setup

**Level:**

**SA**

#### Description

Use **Program 21-07: Toll Restriction Override Password Setup** to assign Toll Restriction Override codes to extension ports. Each code must have four digits, using any combination of 0~9, # and \*. Each extension can have a separate code, or many extensions can share the same override code.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Password	Default	Related Program
01	Four Digits (Fixed)	No Setting	21-01-07 20-08-06

#### Conditions

None

#### Feature Cross Reference

None

# Program 21 : Outgoing Call Setup

## 21-08 : Repeat Dial Setup

**Level:**  
**IN**

### Description

Use **Program 21-08 : Repeat Dial Setup** to define the automatic Repeat Dial data.

### Input Data

Item No.	Item	Input Data	Default
01	<b>Repeat Redial Count</b> Sets how many times a Repeat Redial automatically repeats if the call does not go through.	0~255 (OT) 0-15 (AU)	3
02	<b>Repeat Redial Interval Time</b> Set the time between Repeat Redial attempts.	0~64800 (sec) (OT) 5~64800 (sec) (AU)	60
03	<b>Repeat Dial Calling Timer</b> After dialing the trunk call, Repeat Redial maintains the call after this time. After this time, the system terminates the call, waits the Repeat Redial Time (Timer 02) and tries again.	0~64800 (sec)	30
04	<b>Time for Send Busy Tone for ISDN Trunk</b> Sets the time (sec) to send out Busy Tone with an ISDN line, when called party is busy.	0~64800 (sec)	0

### Conditions

None

### Feature Cross Reference

None

# Program 21 : Outgoing Call Setup

## 21-09 : Dial Block Setup

**Level:**

**IN**

### Description

Use **Program 21-09 : Dial Block Setup** to define the Dial Blocking Toll Restriction Class and Dial Block Password to be used by the Supervisor extension.

### Input Data

Item No.	Item	Input Data	Default
01	<b>Toll Restriction Class With Dial Block</b> Assign a Toll Restriction Class of Service when the Dial Block feature is used.	1~15	1 (OT) 15 (AU)
02	<b>Supervisor Password</b> Assign a 4-digit password to be used by the supervisor to enable or disable Dial Block for other extensions.	0~9, *, # (4-digit fixed)	No Setting

### Conditions

- This function works by password and Class of Service control (the supervisor is not an assigned extension). If Dial Block is available for all Classes of Service, everyone may become a supervisor if they know the Dial Block password.

### Feature Cross Reference

None

## Program 21 : Outgoing Call Setup

### 21-10 : Dial Block Restriction Class Per Extension

**Level:**  
**IN**

#### Description

Use **Program 21-10 : Dial Block Restriction Class Per Extension** to define the Toll Restriction Class to each extension when the extension is set for Dial Block Restriction. If this data is 0, Toll Restriction Class follows Program 21-09-01.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Toll Restriction Class	Default
01	0, 1~15 (0 = No Setting)	0 (No Setting)

#### Conditions

None

#### Feature Cross Reference

None

## Program 21 : Outgoing Call Setup

### 21-11 : Extension Ringdown (Hotline) Assignment

**Level:**

**IN**

#### Description

Use **Program 21-11 : Extension Ringdown (Hotline) Assignment** to define the Hotline destination number for each extension number.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Hotline Destination Number	Default	Related Program
01	0, *, #, Pause, Hook Flash, @ (Code to wait for answer supervision) (maximum 24 digits)	No Setting	20-08-09 21-01-09

#### Conditions

- The @ code is used to make an outbound call automatically to a DISA Trunk or to VM Auto Attendant. This code can only be used on ISDN outbound calls. Internal calls and analog outbound calls are not supported.

#### Feature Cross Reference

- Ringdown Extension, Internal/External

# Program 21 : Outgoing Call Setup

## 21-12 : ISDN Calling Party Number Setup for Trunks

**Level:**  
**IN**

### Description

Use **Program 21-12 : ISDN Calling Party Number Setup for Trunks** to assign Calling Party Numbers for each trunk (maximum 16 digits per entry). When a call is made by an extension which does not have an Extension Calling Number assigned (Program 21-13), the system sends the calling number for the ISDN trunk defined in 21-12.

 *If the Calling Party Number is assigned in both Programs 21-12 and 21-13, the system sends the data in Program 21-13.*

### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Calling Party Number Data	Default
01	1~0, *, # (maximum 16 digits)	No Setting

### Conditions

None

### Feature Cross Reference

- ISDN Compatibility

# Program 21 : Outgoing Call Setup

## 21-13 : ISDN Calling Party Number Setup for Extensions

**Level:**

**IN**

### Description

Use **Program 21-13: ISDN Calling Party Number Setup for Extensions** to assign each extension a Calling Party Number (maximum 16 digits per entry). The calling number is the subscriber number of the dial-in number. When a call is made by an extension which does not have an Extension Calling Number assigned (Program 21-13), the system sends the calling number for the ISDN trunk defined in Program 21-12.

 *If a Calling Party Number is assigned in both Programs 21-12 and 21-13, the system sends the data in Program 21-13.*

### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Calling Party Number Data	Default
01	0~9, *, # (Max. 16 digits)	No setting

### Conditions

None

### Feature Cross Reference

- ISDN Compatibility

## Program 21 : Outgoing Call Setup

### 21-14 : Walking Toll Restriction Password Setup

**Level:**  
**SA**

#### Description

Use **Program 21-14: Walking Toll Restriction Password Setup** to assign the password and Toll Restriction Class for Walking Toll Restriction. Each code has six digits, using any combination of 0~9, # and \*.

#### Input Data

ID Table Number	1~500
-----------------	-------

Item No.	Item	Input Data	Default
01	<b>User ID</b>	Dial (Six digits)	No Setting
02	<b>Walking Toll Restriction Class Number</b>	1~15	15 (OT) 1 (AU)

#### Conditions

None

#### Feature Cross Reference

- Toll Restriction

## Program 21 : Outgoing Call Setup

### 21-15 : Individual Trunk Group Routing for Extensions

**Level:**

**IN**

#### Description

Use **Program 21-15: Individual Trunk Group Routing for Extensions** to designate the alternate trunk access route accessed when a user dials the Alternate Trunk Route Access Code. Refer to Program [11-09 : Trunk Access Code](#) when setting up alternate trunk codes. Refer to [14-06: Trunk Group Routing](#) to set up the trunk routes. When entering data for this option, enter the route number or 0 to prevent routing.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Day/Night Mode	Route Table Number	Default
01	1~8	0~100 (0 = No Setting)	0

#### Conditions

None

#### Feature Cross Reference

- Central Office Calls, Placing

## Program 21 : Outgoing Call Setup

### 21-16: Trunk Group Routing for Networks (OT)

**Level:**  
**IN**

#### Description

Use **Program 21-16: Trunk Group Routing for Networks** to assign Program 14-06 routes for a network system. This is required to seize the trunk in a network system (Extension in System A tries to make an external call using a trunk in System B). The route number is specified for each system ID (01-50).

#### Input Data

System ID	01-50
-----------	-------

Item No.	Day/Night Mode	Route Table Number	Default	Related Program
01	1~8	0-100 (0=No setting)	1	14-06

#### Conditions

None

#### Feature Cross Reference

Central Office Calls, Placing

Networking - NetLink

Networking - AspireNet (OT)

## Program 21 : Outgoing Call Setup

### 21-17 : IP Trunk (SIP) Calling Party Number Setup for Trunk

**Level:**

**IN**

#### Description

Use **Program 21-17 : IP Trunk (SIP) Calling Party Number Setup for Trunk** set the SIP calling party number for individual trunks.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Description	Input Data	Default	Related PRG
01	<b>IP Trunk (SIP) Calling Party Number Setup for Trunk</b>	Up to 16 digits (1~0, *, #)	None	15-01-04 20-08-13

#### Conditions

None

#### Feature Cross Reference

None

## Program 21 : Outgoing Call Setup

### 21-18: IP Trunk (H.323) Calling Party Number Setup for Extension

**Level:**

**IN**

#### Description

Use **Program 21-18: IP Trunk (H.323) Calling Party Number Setup for Extension** to assign the Calling Party Number for each extension. The assigned number is sent to the exchange when the caller places an outgoing call.

 *When the Calling Party Number is assigned by PRG 21-17, 21-18 and 21-19, the system uses the data in PRG 21-18 and PRG 21-19.*

#### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Item No.	Description	Input Data	Default
01	IP Trunk (H.323) Calling Party Number Setup for Extension	Up to 16 digits (1~0, *, #)	None

#### Conditions

None

#### Feature Cross Reference

None

## Program 21 : Outgoing Call Setup

### 21-19 : IP Trunk (SIP) Calling Party Number Setup for Extension

**Level:**

**IN**

#### Description

Use **Program 21-19 : IP Trunk (SIP) Calling Party Number Setup for Extension** to set the SIP calling party number for an individual extension.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Description	Input Data	Default	Related Program
01	<b>IP Trunk (SIP) Calling Party Number Setup for Extension</b>	Up to 16 Digits (1~0, *, #)	None	15-01-04 20-08-13

#### Conditions

None

#### Feature Cross Reference

None

## Program 21 : Outgoing Call Setup

### 21-21 : Toll Restriction for Trunks (Seized Trunk Basis Setting)

**Level:**

**IN**

#### Description

Use **Program 21-21 : Toll Restriction for Trunks (Seized Trunk Basis Setting)** to define the toll restriction class to each trunk. The details of toll restriction are defined by PRG 21-05 and 21-06.

This program is compared to Station Restriction Class. The higher class is applied.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

#### Input Data

Day/Night Mode	1~9 (9 = Power Failure mode)
----------------	------------------------------

Item No.	Description	Input Data	Default	Related Program
01	<b>Restriction Class</b> Enter the Toll Restriction Class for the selected trunk.	1~15	1	14-01-08 21-05

#### Conditions

None

#### Feature Cross Reference

None

## Program 21 : Outgoing Call Setup

### 21-22 : CO Message Waiting Indication – Call Back Settings

**Level:**

**IN**

#### Description

Use **Program 21-22 : CO Message Waiting Indication – Call Back Settings** to define the settings of CO Message Waiting Indication.

#### Input Data

Trunk	001~200
-------	---------

Item No.	Description	Input Data	Default
01	<b>CO MWI Call Back Enabling</b> Enable or Disable CO MWI Call Back.	0 = No VMWI Service 1 = Enable VMWI Service	0
02	<b>CO MWI Call Back Number Area Setting</b> Define the Speed Dial Bin number for MWI Call Back.	0~1999	1999

#### Conditions

None

#### Feature Cross Reference

None

# Program 21 : Outgoing Call Setup

## 21-24: Forced Access Dial Data

**Level:**  
**IN**

### Description

Use **Program 21-24: Forced Access Dial Data** to set for Emergency number data. First digit of dialing data should be same as trunk access code.

### Input Data

Item No.	Item	Input Data	Default
01	Define the Emergency Number Data	1-0, *, # (Maximum 16digits)	No Setting (OT) 000 (AU)

### Conditions

None

### Feature Cross Reference

None

# Program 22 : Incoming Call Setup

## 22-01: System Options for Incoming Calls

**Level:**  
**IN**

### Description

Use **Program 22-01: System Options for Incoming Calls** to define the system options for incoming calls.

### Input Data

Item No.	Item	Input Data	Default	Description	Related Program
01	<b>Incoming Call Priority</b>	0 = Intercom Call Priority 1 = Trunk Call Priority	1	Use this option to determine if Intercom calls or trunk calls have answer priority when both are ringing simultaneously.	15-02-22
02	<b>Incoming Call Ring No Answer Alarm</b>	0 = Disable (Off) 1 = Enable (On)	0	If enabled, an incoming call that rings longer than the Ring No Answer Alarm interval (22-01-03), changes to a unique ring cadence to indicate that the call has been ringing too long. If disabled, this does not occur.	22-01-03 22-01-04
03	<b>Ring No Answer Alarm Time</b>	0~64800 (sec)	60	If a trunk rings a multiline telephone longer than this interval, the system changes the ring cadence. This indicates to the user that the call has been ringing too long.	22-01-02
04	<b>DIL No Answer Recall Time</b>	0~64800 (sec)	0	A DIL that rings its programmed destination longer than this interval diverts to the DIL No Answer Ring Group (set in Program 22-08).	
06	<b>DID Ring-No-Answer Time</b>	0~64800 (sec)	20	In systems with DID Ring-No-Answer Intercept, this sets the Ring-No-Answer time. This time is how long a DID call rings the destination extension before rerouting to the intercept ring group.	22-12
07	<b>DID Incoming Ring Group No Answer Time</b>	0~64800 (sec)	20		
08	<b>DID Pilot Call No Answer Time</b>	0~64800 (sec)	60		

Program

**22**

**Input Data**

Item No.	Item	Input Data	Default	Description	Related Program
09	<b>DID to Trunk to Trunk no answer timer</b>	0~64800 (sec)	20		
10	<b>VRS Waiting Message Operation</b>	0 = Enable Always 1 = Change by Manual Operation	0	Set up the operation mode for Auto Attendant and Queuing Message.	22-14 22-15 22-08 22-04 22-01-04 20-15-11 15-07
11	<b>VRS Waiting Message Interval Time</b>	0~64800 (sec)	20	Setup the sending duration time of the Auto – Attendant & Queuing. The message is repeatedly sent out during the specified time.	22-14-06 22-15-06 41-11-06
12	<b>Mobile Extension Answer Time</b>	0 = Immediate Answer [1~64800(sec)]	3	Set up the system answering time when receiving an incoming call from target Mobile Extension.	15-22-04

**Conditions**

None

**Feature Cross Reference**

- Central Office Calls, Answering

## Program 22 : Incoming Call Setup

### 22-02: Incoming Call Trunk Setup

**Level:**  
**IN**

#### Description

Use **Program 22-02: Incoming Call Trunk Setup** to assign the incoming trunk type for each trunk. There is one item for each Night Service Mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Incoming Type	Default	Description	Related Program
01	1~8	0 = Normal 1 = VRS (second dial tone if no VRS installed) 2 = DISA 3 = DID 4 = DIL 5 = E&M Tie line 6 = Delayed VRS 7 = ANI/DNIS 8 = DID(DDI) Mode Switching	0	Use this option to set the feature type for the trunk you are programming.	14-04

#### Conditions

- When connecting to T1 trunks, after changing Program 22-02-01 to match the Telco connected T1 service type, the T1 cable or the T1 blade must be unplugged and then reconnected for the T1 blade to sync.
- When the trunk type is set to 3 (DID), the DID Transfer to Destination in 22-11-04 for each DID feature is not supported. This feature is supported only for DID trunks when assigned as VRS.
- When the trunk type is set to 3 (DID), the DID Intercept Destination feature for each DID is not supported. This feature is supported only for DID trunks assigned as VRS.

## **Feature Cross Reference**

- Central Office Calls, Answering

## Program 22 : Incoming Call Setup

### 22-03: Trunk Ring Tone Range

**Level:**  
**IN**

#### Description

Use **Program 22-03: Trunk Ring Tone Range** to select the ring tone range for the trunk. The trunk uses a ring tone in the range selected when it rings an extension. Eight ring tones are available. Customize the Trunk Ring Tones in Program 82-01.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Ring Tone Pattern	Default	Description	Related Program
01	0~8 (Ring Tone Pattern 1~4) (Melody 1~ Melody 5)	0	Use this program to select the ring tone range for the trunk. The trunk uses a ring tone in the range selected when it rings an extension. Eight ring tones are available.	15-02

**Table 2-7 Program 22-03 – Incoming Signal Frequency Patterns**

Incoming Signal Frequency Pattern	Type	Frequency 1	Frequency 2	Modulation
Pattern 1	High Middle Low	1100Hz 660Hz 520Hz	1400Hz 760Hz 660Hz	16Hz 16Hz 16Hz
Pattern 2	High Middle Low	1100Hz 660Hz 520Hz	1400Hz 760Hz 660Hz	8Hz 8Hz 8Hz
Pattern 3	High Middle Low	2000 1400 1100	760 660 540	16Hz 16Hz 16Hz
Pattern 4	High Middle Low	2000 1400 1100	760 660 540	8Hz 8Hz 8Hz

**Conditions**

None

---

**Feature Cross Reference**

- Selectable Ring Tones

## Program 22 : Incoming Call Setup

### 22-04: Incoming Extension Ring Group Assignment

**Level:**  
**SA**

#### Description

Use **Program 22-04: Incoming Extension Ring Group Assignment** to assign extensions to Ring Groups. Calls ring extensions according to Ring Group programming. Use Program 22-05 to assign trunks to Ring Groups and use Program 22-06 to set the ringing for the phones. An Incoming Ring Group (IRG) can have up to 32 extension numbers assigned.

 *There are 100 available Ring Groups.*

#### Input Data

Incoming Ring Group Number	1~100
----------------------------	-------

Item No.	Extension Number	Description	Default	Related Program
01	Maximum eight Digits	Use this program to assign extensions (up to 32) to Ring Groups. Calls ring extensions according to Ring Group programming.	See Below	22-02 22-05 22-06

#### Default

- Only Group01 has 200. (OT)
- Group01 has 101, 102, 103, 104, 105, 106, 107, and 108 (First 8 ports ringing) (AU)

#### Conditions

None

#### Feature Cross Reference

- Ring Groups

## Program 22 : Incoming Call Setup

### 22-05: Incoming Trunk Ring Group Assignment

**Level:**

**IN**

#### Description

Use **Program 22-05: Incoming Trunk Ring Group Assignment** to assign trunks to incoming Ring Groups. There are 100 available Ring Groups.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Incoming Group Number	Default	Description	Related Program
01	1~8	0 = No Setting 001~100 (Incoming Group) 102 (In-Skin/ External Voice Mail or InMail) 103 Centralized VM	1	Use this program to assign Normal Ring Trunks (22-02) to Incoming Ring Groups (22-04).	22-04 22-06

#### Conditions

None

#### Feature Cross Reference

- Ring Groups

## Program 22 : Incoming Call Setup

### 22-06: Normal Incoming Ring Mode

**Level:**  
**IN**

#### Description

Use **Program 22-06: Normal Incoming Ring Mode** to define whether or not an extension should ring for the Normal Incoming Ring Mode.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Day/Night Mode	Incoming Group Number	Default	Related Program
01	1~8	0 = No Ring 1 = Ring	1	22-04 22-05

#### Conditions

None

#### Feature Cross Reference

- Central Office Calls, Answering

## Program 22 : Incoming Call Setup

### 22-07: DIL Assignment

**Level:**  
**IN**

#### Description

Use **Program 22-07: DIL Assignment** to assign the destination extension or Department Calling Group for each DIL Incoming trunk. A DIL rings an extension directly, without any other Access Map or Ring Group programming. If an extension has a line key, the DIL rings the line key. Use Program 22-02 to designate a trunk as a DIL. You can make eight DIL assignments, one for each Night Service mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Number of Transferring Destination	Default
01	1~8	Extension Number (maximum eight digits) Pilot Number	No Setting

#### Conditions

- Program 22-02 must be set to four for the trunk.

#### Feature Cross Reference

- Direct Inward Line (DIL)

## Program 22 : Incoming Call Setup

### 22-08: DIL/IRG No Answer Destination

**Level:**  
**IN**

#### Description

For DIL Delayed Ringing, use **Program 22-08: DIL/IRG No Answer Destination** to assign the DIL No Answer Ring Group. An unanswered DIL rings this group after the DIL No Answer Time expires (Program 22-01-04). DIL Delayed Ringing can also reroute outside calls ringing a Ring Group.

Make eight assignments, one for each Night Service mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Incoming Group Number	Default
01	1~8	0 (No Setting) 001~100 (Incoming Ring Group) 102 (In-Skin/External Voice Mail or InMail)	0 (OT) 1 (AU)

#### Conditions

None

#### Feature Cross Reference

- Direct Inward Line (DIL)
- Ring Group

## Program 22 : Incoming Call Setup

### 22-09: DID Basic Data Setup

**Level:**  
**IN**

#### Description

Use **Program 22-09: DID Basic Data Setup** to define the basic setting of Dial-In incoming calls for each trunk group.

#### Input Data

Trunk Group Number	001~100
--------------------	---------

Item No.	Item	Input Data	Default
01	<p><b>Expected Number of Digits</b></p> <p>Enter the number of digits the table expects to receive from the telco. Use this program to make the system compatible with 3- and 4-digit DID service.</p> <p>If ISDN trunks, we analyze the last digits that are set here. If it is T-1 or analog DID, it analyzes the first digits that are assigned here.</p>	1~8	4 (OT) 2 (AU)
02	<p><b>Received Vacant Number Operation</b></p> <p>Use this option to enable or disable Vacant Number Intercept.</p>	0 = Disconnect (Cut) 1 = Transfer (Refer to <a href="#">Program 22-12: DID Intercept Ring Group on page 2-335.</a> )	0
03	<p><b>Sub-Addressing Mode</b></p>	0 = Extension # Specify (Intercom) 1 = DID Conversion Table	0
04	<p><b>DID Receiving Mode for ISDN</b></p>	0 = Enbloc Receiving 1 = Overlap Receiving	0
05	<p><b>Local Code Digits</b> (Only Overlap Receiving Mode)</p>	0~15 (0 = No Local Code)	0
06	<p><b>Local Code</b> (Only Overlap Receiving Mode)</p>	Dial (maximum 16 digits)	No Setting
07	<p><b>Pilot Code</b> (Only Overlap Receiving Mode)</p>	Dial (1 digit: 0~9)	No Setting

---

# Program 22 : Incoming Call Setup

## 22-11: DID Translation Number Conversion

**Level:**  
**SA**

### Description

Use **Program 22-11: DID Translation Table Number Conversion** to specify for each Translation Table entry (2000).

- The digits received by the system (eight maximum)
- The extension the system dials after translation (24 digits maximum)
- The name that should show on the dialed extension display when it rings (12 characters maximum)
- The Transfer Target – 1 and 2
  -  *If the Transfer Targets are busy or receive no answer, those calls are transferred to the final transfer destination (Program 22-10).*
- Operation Mode

Use the following chart when entering and editing text for names. Press the key once for the first character, twice for the second character, etc. For example, to enter a C, press 2 three times.

Key for Entering Names	
When entering names in the procedures below, refer to this chart. Names can have up to 12 digits.	
Use this keypad digit. . .	When you want to. . .
1	Enter characters: 1 @ [ ¥ ] ^ _ ` {   } → ← Á À Â Ã Ç É Ê ì ó
2	Enter characters: <b>A-C, a-c, 2.</b>
3	Enter characters: <b>D-F, d-f, 3.</b>
4	Enter characters: <b>G-I, g-i, 4.</b>
5	Enter characters: <b>J-L, j-l, 5.</b>
6	Enter characters: <b>M-O, m-o, 6.</b>
7	Enter characters: <b>P-S, p-s, 7.</b>
8	Enter characters: <b>T-V, t-v, 8.</b>
9	Enter characters: <b>W-Z, w-z, 9.</b>

<b>Key for Entering Names</b>	
<b>When entering names in the procedures below, refer to this chart. Names can have up to 12 digits.</b>	
Use this keypad digit. . .	When you want to. . .
0	Enter characters: 0 ! " # \$ % & ' ( ) ô õ ú ä ö ü α ε θ
*	Enter characters: * + , - . / : ; < = > ? π Σ σ Ω ∞ ç £
#	# = Accepts an entry (only required if two letters on the same key are needed - ex: TOM). Pressing # again = Space. (In system programming mode, use the right arrow soft key instead to accept and/or add a space.)
CONF	Clear the character entry one character at a time.
HOLD	Clear all the entries from the point of the flashing cursor and to the right.

### Input Data

Conversion Table Number	1~2000
-------------------------	--------

Item No.	Item	Input Data	Default
01	<b>Received Number</b> This is the received DID digits.	Maximum eight digits	See Default Value
02	<b>Target Number</b> Enter the destination number to which the DID number is sent.	Maximum 24 digits	See Default Value
03	<b>DID Name</b> This is the name that is assigned to the DID digits when it rings the extension.	Maximum 12 characters	No Setting
04	<b>Transfer Operation Mode</b>	0 = No Transfer 1 = Busy 2 = No Answer 3 = Busy/No Answer	0

Item No.	Item	Input Data	Default
05	<b>Transfer Destination Number 1</b>	0 = No Setting	0
06	<p><b>Transfer Destination Number 2</b></p> <p>400 - Allow the outside party to dial a different extension number in the translation table (for example, ring no answer to a dialed number, the caller then hears a dial tone, allowing them to enter another Valid Extension Number).</p> <p>401 - Provide the caller with DISA dialing options (requires using the DISA password).</p> <p> <i>This applies to 22-11-05 and 22-11-06.</i></p>	<p>1~100 = Incoming Group</p> <p>102 = In-Skin/External Voice Mail or InMail</p> <p>103 = Centralized VM</p> <p>201~264 = Extension Group</p> <p>400 = Valid Extension Number</p> <p>401 = DISA</p> <p>501~599 = DISA/VRS Message</p> <p>1000~1999 = Speed Dial Number (000~999)</p>	0
07	<p><b>Call Waiting</b></p> <p>PRG 20-09-07 overrides this setting.</p>	<p>0 = Disable (No)</p> <p>1 = Enable (Yes)</p>	0
08	<b>Maximum Number of DID Calls</b>	0~200 (0 = No Limit)	0
09	<b>Music on Hold Source</b>	<p>0 = IC/MOH Port</p> <p>1 = BGM Port</p> <p>2 = ACI Port</p>	0
10	<b>ACI Music Source Port</b>	When a sound source type is 2 in above: (0~96)	0
11	<p><b>Ring Group Transfer</b></p> <p>Enable (1) or disable (0) each conversation tables ability to follow the Ring Group programming defined in Program 22-12-01: DID Intercept Ring Group.</p> <p>If Program 22-11-05: DID Translation Number Conversion, Transfer Destination Number 1 and Program 22-11-06: DID Translation Number Conversion, Transfer Destination Number 2 are set, the priority of transferring is in this order: Program 22-11-05 then Program 22-11-06 then if Program 22-11-11 is enabled, Program 22-12-01.</p>	<p>0 = Disable (Caller will hear Ringback)</p> <p>1 = Enabled (Go to normal ring)</p>	<p>1 (OT)</p> <p>0 (AU)</p>

**Default (OT)**

The default value of PRG22-11-01/PRG22-11-02 is shown as below.

Conversion Table	Received number	Target number
1	00	200
2	01	201
:	:	:
100	99	299
:	:	:
2000	No Setting	No Setting

**Default (AU)**

The default value of PRG22-11-01/PRG22-11-02 is shown as below.

Conversion Table	Received number	Target number
1	01	101
:	:	:
99	99	199
100	00	100
101	No Setting	No Setting
:	:	:
200	No Setting	No Setting
201	01	101
:	:	:
299	99	199
300	00	100
301	No Setting	No Setting
:	:	:
400	No Setting	No Setting
401	01	101
:	:	:
499	99	199
500	00	100
501	No Setting	No Setting
:	:	:
600	No Setting	No Setting
601	01	101

:	:	:
699	99	199
700	00	100

**Conditions**

- When the trunk type is set to 3 (DID) in 22-02-01, the DID Transfer Destination for each DID feature is not supported. This feature is supported only for DID trunks when assigned as VRS.

---

**Feature Cross Reference**

- Direct Inward Dialing (DID)

## Program 22 : Incoming Call Setup

### 22-12: DID Intercept Ring Group

**Level:**  
**IN**

#### Description

For each DID Translation Table, use **Program 22-12: DID Intercept Ring Group** to define the first destination group for DID calls.

Depending on the entry in Program 22-09-02 and 22-11-04, the incoming calls route to the first destination group by the following:

- Vacant number intercept (vacant number means that no phone is connected, no station blade is installed, or the extension number is not defined in Program 11-02)
- Busy intercept
- Ring-no-answer intercept

If the destination is 0, the calls are forwarded to the trunk ring group defined in Program 22-11 based on the table assigned to the DID trunk.

 **If Programs 22-11-05 and 22-11-06 are set, the priority of transferring is in this order:  
Program 22-11-05 + Program 22-11-06 + Program 22-12.**

**For busy and no-answer calls, if the first and third destinations are programmed, but the second destination is not, the incoming call goes to the third destination after the first destination. If the first and second destinations are not defined, but the third destination is, the call goes directly to the third destination.**

#### Input Data

Conversion Table Area Number	01~20
------------------------------	-------

Item No.	Day/Night Mode	Incoming Group Number	Default
01	1~8	0 (No Setting) 1~100 (Incoming Ring Group) 102 (In-Skin/External Voice Mail or InMail) 103 = Centralized VM	0 (OT) 1 (AU)

**Conditions**

None

---

**Feature Cross Reference**

- Direct Inward Dialing (DID)

## Program 22 : Incoming Call Setup

### 22-13: DID Trunk Group to Translation Table Assignment

**Level:**

**IN**

#### Description

Use **Program 22-13: DID Trunk Group to Translation Table Assignment** to assign the DID Trunk Groups to DID Translation Tables. DID trunks should be in their own group. If you have more than one type of DID trunk, put each type in a separate Trunk Group. For each Trunk Group, you make a Translation Table entry for each Night Service mode.

#### Input Data

Trunk Group Number	1~100
--------------------	-------

## Program 22 : Incoming Call Setup

### 22-14: VRS Delayed Message for IRG

**Level:**  
**IN**

#### Description

Use **Program 22-14: VRS Delayed Message for IRG** (Incoming Group Ring) to define for each incoming ring group the timers, VRS message number and type of tone for VRS Waiting Message.

#### Input Data

Incoming Ring Group Number	1~100
----------------------------	-------

Item No.	Item	Input Data	Default
01	<b>1<sup>st</sup> Delayed Message Start Time</b> Time before the VRS Delay Message is played for IRG.	0~64800 (sec)	0
02	<b>1<sup>st</sup> Delayed Message Number</b> VRS message that is used for the 1st Delayed Message.	0~101 0 = No Message 101 = Fixed Message	0
03	<b>1<sup>st</sup> Delayed Message Sending Count</b> This is the number of times the 1st Delay Message is played. If set to 0, the 1st Delay Message is not played.	0~255 (time)	0
04	<b>2<sup>nd</sup> Delayed Message Number</b> VRS message that is used for the 2nd Delayed Message.	0~101 0 = No Message 101 = Fixed Message	0
05	<b>2<sup>nd</sup> Delayed Message Sending Count</b> This is the number of times the 2nd Delay Message is played. If set to 0, the 2nd Delay Message is not played.	0~255 (time)	0
06	<b>Tone Kind at Message Interval</b> What is heard between the Delay Message.	0 = Ring Back Tone 1 = MOH Tone 2 = BGM Source	0
07	<b>Disconnect Time After the End of VRS Delayed Message</b> Time, after all 2nd Delay Messages are played, before the caller is disconnected.	0 = No Disconnect 0~64800 Seconds	60

**Conditions**

## Program 22 : Incoming Call Setup

### 22-15: VRS Delayed Message for Department Group

**Level:**  
**IN**

#### Description

Use **Program 22-15: VRS Delayed Message for Department Group** to define for each Department (Extension) Group the timers, VRS message number and tone kind for VRS Delayed Message. There are 64 available Department Groups.

#### Input Data

Extension Group Number	01~64
------------------------	-------

Item No.	Item	Input Data	Default
01	<b>1<sup>st</sup> Delayed Message Start Time</b> Time before the VRS Delay Message is played for Department Group.	0~64800 (sec)	0
02	<b>1<sup>st</sup> Delayed Message Number</b> VRS message that is used for the 1st Delayed Message.	0~101 0 = No Message 101 = Fixed Message	101
03	<b>1<sup>st</sup> Delayed Message Sending Count</b> This is the number of times the 1st Delay Message is played. If set to 0, the 1st Delay Message is not played.	0~255 (time)	0
04	<b>2<sup>nd</sup> Delayed Message Number</b> VRS message that is used for the 2nd Delayed Message.	0~101 0 = No Message 101 = Fixed Message	101
05	<b>2<sup>nd</sup> Delayed Message Sending Count</b> This is the number of times the 2nd Delay Message is played. If set to 0, the 2nd Delay Message is not played.	0~255 (time)	0
06	<b>Tone Kind at Message Interval</b> What is heard between the Delay Message.	0 = Ring Back Tone 1 = MOH Tone 2 = BGM Source	0
07	<b>Disconnect Time After the End of VRS Delayed Message</b> Time, after all 2nd Delay Messages are played, before the caller is disconnected.	0 = No Disconnect 0~64800 (sec)	60

# Program 23 : Answer Features Setup

## 23-02: Call Pickup Groups

**Level:**  
**IN**

**Program**  
**23**

### Description

Use **Program 23-02: Call Pickup Groups** to assign extensions to Call Pickup Groups. This program also lets you assign an extension Call Pickup Group priority. If two extensions in a group are ringing at the same time, Group Call Pickup intercepts the highest priority extension first.

 *There are 64 available Call Pickup Groups.*

### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Group Number	Priority	Default	Description	Related Program
01	1~64	1~999	1 – xxx	Use this program to assign extensions to Call Pickup Groups other than the extension group set up by a Program 16-02.	11-12-26 11-12-27 11-12-28 15-07-24 15-07-25 15-07-26

### Conditions

None

### Feature Cross Reference

- Group Call Pickup

## Program 23 : Answer Features Setup

### 23-03: Universal Answer/Auto Answer

**Level:**  
**IN**

#### Description

Use **Program 23-03: Universal Answer/Auto Answer** to assign trunk routes (set in Program 14-06) to extensions for Universal Answer. If the call ringing the paging system is in an extension assigned route, the user can dial the Universal Answer code (#0) to pick up the call.

You can also use this program to let an extension user automatically answer trunk calls that ring other extensions (not their own). When the user lifts the handset, they automatically answer the ringing calls based on Trunk Group Routing programming (defined in Program 14-06). The extension user ringing calls, however, always have priority over calls ringing other co-worker extensions. Refer to the Line Preference feature in the UNIVERGE SV8100 Features and Specifications Manual for more information.

Make one entry for each Night Service mode.

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Day/Night Mode	Route Table Number	Default	Description	Related Program
01	1~8	0~100	0	Use this program to let an extension user automatically answer trunk calls that ring other extensions. When the user lifts the handset, they automatically answer the ringing calls based on Trunk Group Routing programming (defined in Program 14-06).	14-06

## Program 23 : Answer Features Setup

### 23-04: Ringing Line Preference for Virtual Extensions

**Level:**  
**IN**

#### Description

Use **Program 23-04: Ringing Line Preference for Virtual Extensions** to set the off-hook automatic response priority for calls ringing virtual extension keys on a telephone.

 *There are 256 available Virtual Extension Ports.*

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Priority Order	Extension Group Number	Default	Description	Related Program
01	1~4	0~64 (0 = No Setting)	00	When an extension has a virtual extension assigned to a Programmable Function Key, this program determines the priority for automatically answering the ringing calls when the handset is lifted. If 0 or 00 is selected, when the user lifts the handset, the user answers a ringing call from any group.	16-02

#### Conditions

None

#### Feature Cross Reference

# Program 24 : Hold/Transfer Setup

## 24-01 : System Options for Hold

Level:  
IN

Program

24

### Description

Use **Program 24-01 : System Options for Hold** to define the system options for the Hold feature.

### Input Data

Item No.	Item	Input Data	Default	Related PRG
01	<b>Hold Recall Time</b> A call on Hold recalls the extension that placed it on Hold after this time. This time works with the Hold Recall Callback Time (Item 2).	0~64800s	90	
02	<b>Hold Recall Callback Time</b> A trunk recalling from Hold or Park rings an extension for this time. This time works with Hold Recall Time or Park Hold Time. After this time, the system invokes the Hold recall time again. Cycling between time 01 and 02 and 06 and 07 continues until a user answers the call.	0~64800s	30 (OT) 0 (AU)	
03	<b>Exclusive Hold Recall Time</b> A call left on Exclusive Hold recalls the extension that placed it on Hold after this time.	0~64800s	90	
04	<b>Exclusive Hold Recall Callback Time</b> An Exclusive Hold Recall rings an extension for this time. If not picked up, the call goes back on System Hold.	0~64800s	30 (OT) 0 (AU)	
05	<b>Forced Release of Held Call</b> Depending on the setting of Program 14-01-16, the system disconnects calls on Hold longer than this time.	0~64800s	64800 (OT) 1800 (AU)	14-01-16

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>	<b>Related PRG</b>
06	<b>Park Hold Time – Normal</b> A call left parked longer than this time recalls the extension that initially parked it.	0~64800s	90	20-31-14
07	<b>Park Hold Time – Extended (Recall)</b> A call left parked longer than this time recalls the extension that initially parked it.	0~64800s	300

## Program 24 : Hold/Transfer Setup

### 24-02 : System Options for Transfer

**Level:**  
**IN**

#### Description

Use **Program 24-02 : System Options for Transfer** to define the system options for the Transfer feature.

#### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<b>Busy Transfer</b> Use this option to prevent or allow extensions to Transfer calls to busy extensions. If disabled, calls transferred to busy extensions recall immediately.	0 = Disable (No) 1 = Enable (Yes)	0 (OT) 1 (AU)	
02	<b>MOH or Ringback on Transferred Calls</b> Use this option to enable or disable MOH on Transfer. If enabled (0), a transferred caller hears MOH while their call rings the destination extension. If disabled (1), a transferred caller hears ringback while their call rings the destination extension.	0 = Hold Tone 1 = Ring Back Tone	0	20-03-02
03	<b>Delayed Call Forwarding Time</b> If activated at an extension, Delayed Call Forwarding occurs after this time. This also sets how long a Transferred call waits at an extension forwarded to Voice Mail before routing to the called extension mailbox.	0~64800s	10	20-31-15
04	<b>Transfer Recall Time</b> An unanswered transferred call recalls to the extension that initially transferred it after this time.	0~64800s	30	20-31-16
05	<b>Message Wait Ring Interval Time</b> For Single Line Telephones (SLTs) without message waiting lamps, this is the time between intermittent ringing. If this value is set to 0, the system rings once.	0~64800s	30	

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>	<b>Related Program</b>
07	<p><b>Trunk-to-Trunk Transfer Release Warning Tone</b></p> <p>Time starts when a trunk begins talking with another trunk (for example: trunk-to-trunk transfer, outgoing from trunk, Tandem Trunking).</p> <p>When this time expires, a warning tone is heard. If Program 24-02-10 is set, the conversation disconnects after time expires. This time is set again when the external digit timer expires. One of the trunks used must be an analog trunk (or leased line).</p>	0~64800s	1800	14-01-25 20-28-01 20-28-02 20-28-03 24-02-10

#### Feature Cross Reference

Transfer

## Program 24 : Hold/Transfer Setup

### 24-09 : Call Forward Split Settings

**Level:**  
**IN**

#### Description

Use **Program 24-09: Call Forward Split Settings** to assign Call Forwarding Type and the destination number for each extension/virtual extension. The destination can have up to 24 digits, using 0~9, \*, #, and @. Be sure to include the trunk access code (e.g., 9) in the number if the destination is off-premise.

 **Only ISDN uses the @ symbol.**

 **Pause can be set by LK 1.**

#### Input Data

Extension Number	Maximum eight digits
------------------	----------------------

Item No.	Input Data	Default
01	<b>Call Forwarding Type:</b> 0 = Call Forwarding Off 1 = Call Forwarding with both ring 2 = Call Forwarding when no answer 3 = Call Forwarding all calls 4 = Call Forwarding busy or no answer 5 = Call Forwarding when busy	0
02	<b>CO Call Forwarding Destination for Both Ring, All Call, No Answer:</b> 1~9, 0, #, *, R, @ (Up to 24 digits)   <i>Only ISDN uses the @ symbol</i>	No Setting
03	<b>Intercom Call Forwarding Destination for Both ring, All Call, No Answer:</b> 1~9, 0, #, *, R, @ (Up to 24 digits)	No Setting
04	<b>CO Call Forwarding Busy Destination:</b> 1~9, 0, #, *, R, @ (Up to 24 digits)	No Setting
05	<b>Intercom Call Forwarding Busy Destination:</b> 1~9, 0, #, *, R, @ (Up to 24 digits)	No Setting

---

---

Item No.	Input Data	Default
06	<b>Call Forwarding Destination for CTX/PBX for All Call, No Answer:</b> 0~9, #, *, R, @ (Up to 24 digits)	None
07	<b>Call Forwarding Destination for CTX/PBX for Busy:</b> 0~9, #, *, R, @ (Up to 24 digits)	None

# Program 25 : VRS/DISA Setup

## 25-01 : VRS/DISA Line Basic Data Setup

Level:  
IN

Program

25

### Description

Use **Program 25-01 : VRS/DISA Line Basic Data Setup** to define the basic setting of each VRS/DISA line.

### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default	Related Program
01	<b>VRS/DISA Dial-In Mode</b>	0 = Extension Number Service Code Specify (Intercom) 1 = Use Dial Conversion Table	0	22-11
02	<b>DISA User ID</b>	0 = Off 1 = On	1 (OT) 0 (AU)	25-08
03	<b>VRS/DISA Transfer Alarm</b>	0 = Normal (Off) 1 = Alarm (On)	0	

### Conditions

None

### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-02 : DID/DISA VRS Message

**Level:**  
**IN**

#### Description

Use **Program 25-02 : DID/DISA VRS Message** to assign the VRS message number to be used as the Automated Attendant Message for each trunk which is assigned as a VRS/DISA.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Message (Talkie) Source	Additional Data	Default
01	1~8	0 = No Message 1 = VRS 2 = ACI 3 = Department Group	1 = 01~100 (VRS Message Number) 2 = 01~04 (ACI Group Number) 3 = 01~64 (Extension Group Number)	0

#### Conditions

None

#### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-03 : VRS/DISA Transfer Ring Group With Incorrect Dialing

**Level:**

**IN**

#### Description

Use **Program 25-03 : VRS/DISA Transfer Ring Group With Incorrect Dialing** to set what happens to a call when the DISA or Automated Attendant caller dials incorrectly or waits too long to dial. The call can either disconnect (0) or Transfer to an alternate destination (a ring group or voice mail). When setting the DISA and DID Operating Mode, make an entry for each Night Service mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Incoming Group Number	Default	Related Program
01	1~8	0 (Disconnect) 1~100 (Incoming Ring Group) 102 (In-Skin/External Voice Mail or InMail) 103 = Centralized VM 104 (Speed Dial Bin)	0 (OT) 1 (AU)	22-04

#### Conditions

None

#### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-04 : VRS/DISA Transfer Ring Group With No Answer/Busy

**Level:**  
**IN**

---

#### Description

Use **Program 25-04 : VRS/DISA Transfer Ring Group With No Answer/Busy** to set the operating mode of each DISA trunk. This sets what happens to the call when the DISA or Automated Attendant caller calls a busy or unanswered extension. The call can either disconnect (0) or Transfer to an alternate destination (a ring group or voice mail). When setting the DISA and DID Operating Mode, make an entry for each Night Service mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Incoming Group Number	Default	Related Program
01	1~8	0 (Disconnect) 1~100 (Incoming Ring Group) 102 (In-Skin/External Voice Mail or InMail) 103 = Centralized VM 104 (Speed Dial Bin)	0	22-04

#### Conditions

None

---

#### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-05 : VRS/DISA Error Message Assignment

**Level:**

**IN**

#### Description

Use **Program 25-05: VRS/DISA Error Message Assignment** to assign the VRS message number to be used as the Automated Attendant error message. For each VRS/DISA trunk that the VRS answers, enter the VRS message (1~100) the outside caller hears if they dial incorrectly. If you enter 0 (i.e., no error message), the call reroutes according to Program 25-03 and 25-04.

For each trunk, make a separate entry for each Night Service mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	VRS Message Number	Default
01	1~8	0~100 (0 = No Setting)	0

#### Conditions

None

#### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-06 : VRS/DISA One-Digit Code Attendant Setup

**Level:**  
**IN**

#### Description

Use **Program 25-06 : VRS/DISA One-Digit Code Attendant Setup** to set up single digit dialing through the VRS. This gives VRS callers single key access to extensions, the company operator, Department Calling Groups and Voice Mail. For each VRS message set to answer outside calls (refer to Program 25-04 and 25-05), you specify:

- The digit the VRS caller dials (0~9, \*, #). Keep in mind that if you assign destinations to digits, outside callers cannot dial system extensions.
- The destination reached (eight digits max.) when the caller dials the specified digit.

The destination can be an extension, a Department Calling pilot number or the Voice Mail master number. A one-digit code can be assigned for each Automated Attendant message.

Example:

Message Number=01, Destination=2, Next Message Number=0, Dial=399

In this example, when 2 is dialed by an outside caller, the system transfers the call to 399. This means that extension 200~299 cannot receive calls from VRS/DISA users during/after VRS Message 01.

#### Input Data

Attendant Message Number	01~100
--------------------------	--------

Received Dial	1~9, 0, *, #
---------------	--------------

Item No.	Item	Input Data	Default
01	<b>Next Attendant Message Number</b>	0~100 (0 = No Setting) 101 = Voice Mail answers 104 = Refer to <a href="#">25-04 : VRS/DISA Transfer Ring Group With No Answer/Busy</a> 105 = Dial the other extension 106 = Record VRS	0
02	<b>Destination Number</b>	Up to eight digits	No Setting

**Conditions**

- Outside caller may not be able to dial individual extensions or lines if the same first digit is defined here.

---

**Feature Cross Reference**

- Direct Inward System Access (DISA)
- Voice Response System (VRS)

## Program 25 : VRS/DISA Setup

### 25-07 : System Timers for VRS/DISA

**Level:**  
**IN**

#### Description

Use **Program 25-07: System Timers for VRS/DISA** to set the value for the system timers which affect DID and DISA. Refer to the following chart for a description of each option, its range and default setting.

#### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<b>VRS/DISA Dial Tone Time</b> After answering a DISA trunk, the system waits this time for the caller to dial the first digit of the DISA password. If the caller fails to dial during this time, the system drops the call.	0~64800 (sec)	10	25-04
02	<b>VRS/DISA No Answer Time</b> A VRS/DISA caller can ring an extension for this time before the system sets the call as a Ring No Answer. After this time expires, the call follows the programmed Ring No Answer routing (set in Program 25-03 and 25-04).	0~64800 (sec)	10 (OT) 0 (AU)	25-04 20-31-17
03	<b>Disconnect after VRS/DISA retransfer to IRG</b> From DISA trunk, when the call may go to Incoming Ring Group of PRG25-03/25-04. This setting determines how long the call is ringing in the IRG.	0~64800 (sec)	60	20-31-18
04	<b>Calling Time to Automatic Answering Telephone Set</b> Set the answering waiting time of the automatic answering extension when an incoming DID trunk call is received.	0~64800 (sec)	10	
05	<b>Duration Time for Guidance Message by Automatic Answering Telephone Set</b> Set the announcement time of the automatic answering extension after which an incoming DID trunk caller is disconnected.	0~64800 (sec)	10	
06	<b>Duration Time for Guidance Message by ACI</b> Set the announcement time by the ACI after which an incoming DID trunk caller is disconnected.	0~64800 (sec)	10	

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>	<b>Related Program</b>
07	<b>Long Conversation Warning Tone Time</b> Determine the time a DISA caller or any trunk-to-trunk (such as Tandem Trunking) conversation can talk before the Long Conversation tone is heard.	0~64800 (sec)	30 (OT) 1800 (AU)	14-01-25 20-28-01 20-28-02 20-28-03 20-31-19
08	<b>Long Conversation Disconnect Time</b> This time determines how long the system waits before disconnecting a DISA caller or any trunk-to-trunk (such as Tandem Trunking) conversation call after the Long Conversation tone is heard.	0~64800 (sec)	15 (OT) 30 (AU)	14-01-25 20-28-01 20-28-02 20-28-03
09	<b>DISA Internal Paging Time</b> This is the maximum length of an Internal Page placed by a DISA caller. If the Page continues longer than this time, the system terminates the DISA call.	0~64800 (sec)	30	20-31-21
10	<b>DISA External Paging Time</b> This is the maximum length of an External Page placed by a DISA caller. If the Page continues longer than this time, the system terminates the DISA call.	0~64800 (sec)	30	20-31-22
11	<b>VRS/DISA Answer Delay Time</b> Sets up the time the system waits after receiving an incoming VRS/DISA call before the system automatically answers the call.	0~64800 (sec)	0	
13	<b>VRS/DISA Busy Tone Interval</b> If a DISA caller dials a busy extension (and Program 25-04 = 0), the system plays busy tone for this time before disconnecting.	0~64800 (sec)	5	
14	<b>Delayed VRS Answer Time</b> Assign the delay time from switching from a normal incoming status to DID mode. If this time is set to 0, the call switches to DID mode immediately.	0~64800 (sec)	10	

**Conditions**

None

**Feature Cross Reference**

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-08 : DISA User ID Setup

**Level:**  
**SA**

#### Description

Use **Program 25-08 : DISA User ID Setup** to set the 6-digit DISA password for each user. There are 15 users each with one 6-digit password.

#### Input Data

DISA User Number	1~15
------------------	------

Item No.	Password	Default		Related PRG
01	Dial (Fixed – six digits) 0~9, *, #	No Setting (OT)		49-10-11
		(AU)		
		DISA User No.	DISA User ID	
		1	000001	
		2	000002	
		:	:	
15	000015			

#### Conditions

None

#### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-09 : Class of Service for DISA Users

**Level:**  
**IN**

#### Description

Use **Program 25-09 : Class of Service for DISA Users** to set the DISA Class of Service for each user. When a DISA caller enters a password (defined in Program 25-08), the system identifies the user and associates the appropriate DISA Class of Service with the call. Assign the DISA Class of Service options in Program 20-14. When programming DISA Class of Service, make one entry for each Night Service mode.

#### Input Data

DISA User Number	1~15
------------------	------

Item No.	Day/Night Mode	Function Class	Default
01	1~8	1~15	1

#### Conditions

- DISA Class of Service cannot be 0.
- Program 20-06 cannot be used to assign Class of Service to DISA trunks.

#### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-10 : Trunk Group Routing for DISA

**Level:**  
**IN**

#### Description

Use **Program 25-10: Trunk Group Routing for DISA** to assign the Trunk Group route chosen when a user places a DISA call to the system and dials 9. Set Trunk Group Routing in Program 14-06. Enable or disable the DISA caller ability to dial 9 in Program 20-14-02. Assign a route to each DISA Class of Service (1~15). The system assigns a DISA Class of Service to a call based on the password the DISA caller dials.

When programming, make a separate entry for each Night Service Mode.

#### Input Data

DISA User Number	1~15
------------------	------

Item No.	Day/Night Mode	Route Table Number	Default
01	1~8	0~100 (0 = No Setting)	1

#### Conditions

None

#### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-11 : DISA Toll Restriction Class

**Level:**

**IN**

#### Description

For systems that use Toll Restriction, use **Program 25-11: DISA Toll Restriction Class** to assign a Toll Restriction Class (1-15) to each DISA user (1~15). The system uses the Toll Restriction Class you enter in Program 21-05 and 21-06. The Toll Restriction Class assigned to a DISA call is based on the DISA Class of Service and user, which is determined by the password the caller dials.

When programming, make a separate entry for each Night Service mode.

#### Input Data

DISA User Number	1~15
------------------	------

Item No.	Day/Night Mode	Toll Restriction Class	Default
01	1~8	1~15	2

#### Conditions

- Program 21-05 cannot be used to assign Toll Restriction to DISA trunks.

#### Feature Cross Reference

- Direct Inward System Access (DISA)

## Program 25 : VRS/DISA Setup

### 25-12 : Alternate Trunk Group Routing for DISA

**Level:**  
**IN**

#### Description

Use **Program 25-12: Alternate Trunk Group Routing for DISA** to define the trunk route selected when a DISA caller dials the Alternate Trunk Access Code. The route selected is based on the DISA caller Class of Service, which in turn is determined by the password the caller dials. When programming, make a separate entry for each Night Service Mode.

Use Program 11-09-02 to set the Alternate Trunk Access Code. Use Program 14-06 to set trunk routes.

#### Input Data

DISA User Number	1~15
------------------	------

Item No.	Day/Night Mode	Route Table Number	Default
01	1~8	0~100 (0 = No Setting)	0 (OT) 1 (AU)

#### Conditions

- You cannot use Program 21-15 to assign alternate trunk routing to DISA trunks.

#### Feature Cross Reference

- Direct Inward System Access (DISA)
- Trunk Group Routing

## Program 25 : VRS/DISA Setup

### 25-13 : System Option for DISA

**Level:**  
**IN**

#### Description

Use **Program 25-13: System Option for DISA** to enter the password DISA callers must dial before the system allows them to record, listen to and or erase the VRS messages. This program also is used to define additional DISA call options.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>VRS Message Access Password</b> Enter the password DISA callers must dial before the system allows them to record, listen to and/or erase the VRS messages.	1~ 9, 0, *, # (Fixed six digits)	000000 (OT) No Setting (AU)

#### Conditions

None

#### Feature Cross Reference

- Direct Inward System Access (DISA)
- Voice Response System (VRS)

## Program 25 : VRS/DISA Setup

### 25-15: DUD/DISA Transfer Target Setup

**Level:**  
**IN**

#### Description

Use **Program 25-15: DUD/DISA Transfer Target Setup** to assign a Speed Dial number when a dial tone times-out, or when the wrong number is received and the target extension does not answer or is busy.

#### Input Data

Trunk Port No.	001~200
----------------	---------

#### Input Data

Day/Night Mode	1~8
----------------	-----

#### Input Data

Item No.	Item	Input Data	Default	Related PRG
01	<b>DISA Transfer Target Area At Wrong Dial</b>	Speed Dial bin number 0~1999	1999	25-03-01
02	<b>DISA Transfer Target Area At No Answer or Busy</b>	Speed Dial bin number 0~1999	1999	25-04-01

#### Conditions

- Related to Program 25-03-01 and Program 25-04-01.

#### Feature Cross Reference

- Direct Inward System Access (DISA)
- Voice Response System (VRS)

# Program 26 : ARS Service & Least Cost Routing

## 26-01 : Automatic Route Selection Service

Level:  
IN

Program

26

### Description

Use **Program 26-01: Automatic Route Selection Service** to define the system options for Automatic Route Selection (ARS).

### Input Data

Item No.	Trunk Access Code	Description	Default	Related PRG
01	<b>ARS Service</b> Enable or disable ARS.	0 = Disable (Off) 1 = Enable (On)	0	26-02 26-03 26-04
02	<b>Network Outgoing InterDigit ARS Time</b> With Networking, this time replaces 20-03-04 when determining if all network protocol digits have been received. If ARS is enabled at Site B, this time can be programmed for 5 (500ms) at Site A. If ARS is disabled and Site B is using F-Route for outbound dialing, this time should be programmed for 30 (three seconds) at Site A.	0~64800 (sec)	30	20-03-04
03	<b>ARS Misdialed Number Handling</b> If a user dials a number not programmed in ARS, this option determines if the system should route over Trunk Group 1 or play error tone.	0 = Route to Trunk Group 1 1 = Play Warning Tone to Dialer	0	21-02
04	<b>LCR Mode Option (OT)</b>	0 = UK style 1 = Not UK style	0	26-02 26-05 26-06 26-07 26-08 26-09

**Input Data (Continued)**

<b>Item No.</b>	<b>Trunk Access Code</b>	<b>Description</b>	<b>Default</b>	<b>Related PRG</b>
06	<b>Class of Service Match Access</b>	0 = Disable (Off) 1 = Enable (On)	0	26-02
07	<b>F-Route Access COS Reference</b>	0 = F-Route 1 = ARS	0	26-02 44-05

# Program 26 : ARS Service & Least Cost Routing

## 26-03 : ARS Dial Treatments

Level:  
IN

---

### Description

Use **Program 26-03: ARS Dial Treatments** to assign the 15 Dial Treatments for automatic ARS dialing translation. Assign Dial Treatments to Service Numbers (Trunk Groups) in Program 26-02. The ARS Dial Treatment options are:

- 3** – Delete the NPA if dialed as part of the initial call.  
 *Requires at least 11 digits in the ARS table (Program 26-02-01).*
- 2** – Delete the leading digit if dialed as part of the initial call.  
 *Requires at least eight digits in the ARS table (Program 26-02-01).*
- 1** – Add a leading 1 if not dialed as part of the initial call.  
 *Requires at least eight digits in the ARS table (Program 26-02-01).*
- INPA** – Insert the NPA specified by NPA.
- An** – For Alternate Carrier Access (n = 1~4). The numeric digit instructs the system to insert a Transit Network Selection information element in the SETUP message and also identifies which code in Program 26-11 will be included in the information element. This function is valid only for outbound calls by ISDN trunks.
- DNN** – Outdial the NN number of digits or execute the code that follows. For example, D041234 outdials 1234. Valid entries are 0~9, #, \*, Wnn (wait nn seconds) and P (pause). Each digit's code counts as a digit. So, for example, if a P was added for a pause, the entry would look like: **D05P1234**.
- Wnn** – Wait nn seconds.
- P** – Pause in analog trunk.
- R** – Redial the initially dialed number, including any modifications.
- E** – End of Dial Treatment. All Dial Treatments must end with the E code.
- X** – When ARS is enabled, X must be entered in the Dial Treatment for the system to output the extension number of the call originator to the black box for the E911 feature.

**Input Data**

Dial Treatment Table Number	1~15
-----------------------------	------

Item No.	Item	Input Data	Default
01	Treatment Code	24 characters maximum	No Setting

**Conditions**

None

---

**Feature Cross Reference**

- Automatic Route Selection

# Program 26 : ARS Service & Least Cost Routing

## 26-04 : ARS Class of Service

**Level:**  
**IN**

### Description

Use **Program 26-04 : ARS Class of Service** to set the ARS Class of Service for an extension. Automatic Route Selection uses ARS Class of Service when determining how to route extension calls.

### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Item No.	Day/Night Mode	Class	Default
01	1~8	0~16	0

### Conditions

None

### Feature Cross Reference

- Automatic Route Selection

## Program 26 : ARS Service & Least Cost Routing

### 26-05: LCR Carrier Table

**Level:**  
**IN**

#### Description

Use **Program 26-05: LCR Carrier Table** to define the LCR Access Codes and routing options.

These options include Authorisation codes and Cost Centre

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Delete Digits</b> Enter the quantity of leading digits that need to be deleted	0-16	0
02	<b>Access Code</b> Enter the Access Code and Option to route to the Indirect Carrier	Max 16 digits (0-9, *, #, P, @) P = Pause @ = Change to DTMF or wait for Connect	No setting
03	<b>Authorisation Code Table</b> Enter the table number that contains the correct Authorisation code.	0-10 (0= No Authorisation code)	0
04	<b>Cost Centre Code</b> Optionally enter a cost centre code.	0- Not Used 1- Used	0

#### Conditions

The settings must comply with the requirements of the Indirect Carrier.

The operation of the @ symbol within the Access Code depend on the type of trunk. For analogue trunk set as Dial Pulse the @ symbol defines change to DTMF dialling. For ISDN trunks the @ symbol defines that a Connect Message is received and then DTMF digits are sent in the B-Channel.

#### Feature Cross Reference

Least Cost Routing

# Program 26 : ARS Service & Least Cost Routing

## 26-06: LCR Authorisation Code Table

**Level:**

**IN**

### Description

Use **Program 26-06: LCR Authorisation Code Table** to define the optional Authorisation code (or PIN code) required by the Indirect Carrier. The Authorisation code is inserted if set in Program 26-05-03.

### Input Data

Authorization Table Number	1-10
----------------------------	------

Item	Input Data	Default
Authorisation Code	Authorisation Code Up to 10 digits	No setting

### Conditions

The settings must comply with the requirements of the Indirect Carrier.  
The Authorisation Code is used by the Indirect Carrier to identify the customer for billing purposes.

### Feature Cross Reference

Least Cost Routing

## Program 26 : ARS Service & Least Cost Routing

### 26-07: LCR Cost Centre Code Table

**Level:**  
**IN**

#### Description

Use **Program 26-07: LCR Cost Centre Code Table** to define the optional cost centre code required by the Indirect Carrier. The cost centre code is set for each extension. The cost centre code is inserted if set in Program 26-05-04.

#### Input Data

Extension Number	Up to 8 digits
------------------	----------------

Input Data	Default
<b>Cost Centre Code</b> Up to 8 digits	Extension Number

#### Conditions

The settings must comply with the requirements of the Indirect Carrier.  
The cost Centre code is used by the Indirect Carrier to identify the individual user for billing purposes.

#### Feature Cross Reference

Least Cost Routing

# Program 26 : ARS Service & Least Cost Routing

## 26-08: LCR Manual Override Access Code Table

**Level:**

**IN**

### Description

Use **Program 26-08: LCR Manual Override Access Code Table** to define the access codes that the users can dial to select an indirect carrier i.e. bypass the automatic selection of Program 26-02.

### Input Data

Manual Override Access Code Table Number	1-10
--	------

Item No.	Item	Input Data	Default
01	<b>Manual Override Code</b> This code is dialed by the user to bypass the automatic selection.	Max 4 digits (0-9, *, #)	No setting
02	<b>Carrier Table No</b> The carrier table number of Program 26-05.	Carrier Table number 1-25	0

### Conditions

The override code must begin with a digit 1 or it will not be checked against this table. There can be also exemptions to this table in Program 26-09.

### Feature Cross Reference

Least Cost Routing

# Program 26 : ARS Service & Least Cost Routing

## 26-09: LCR Manual Override Exemption Table

**Level:**  
**IN**

### Description

Use **Program 26-09: LCR Manual Override Exemption Table** to define the numbers that must not be sent via an indirect carrier when the user dials a Manual Override Access Code. The exemptions are normally Emergency Services that may not be supported by the indirect carrier.

### Input Data

Manual Override Exemption Table Number	1-25
--	------

Item No.	Item	Input Data	Default
01	Exemption Number	Max 4 digits (0-9, *, #) Do not include the Access Code.	Table 1:999 (OT) Table 1:000 (AU) Table 2:112 (OT) Table 2:No Setting (AU) Table3-25: No setting

### Conditions

If the number dialled by the user corresponds to an entry in Program 26-09 the Aspire will delete the Manual Access code (Program 26-08) and route the call to the direct carrier. If the number specifies an Emergency Service you must ensure that the direct carrier will accept the call

### Feature Cross Reference

Least Cost Routing

# Program 30 : DSS/DLS Console Setup

## 30-01: DSS Console Operating Mode

Level:  
IN

Program

30

### Description

Use **Program 30-01: DSS Console Operating Mode** to set the mode of the system DSS Consoles. The entry for this option applies to all the system DSS Consoles. The available options are:

- Regular (Business) Mode (0)
- Hotel Mode (1)
- ACD Monitor Mode (2)
- Business/ACD Mode (3)

### Input Data

DSS Console Number	01~32
--------------------	-------

Item No.	DSS Operation Mode	Default
01	0 = Business Mode 1 = Hotel Mode 2 = ACD Monitor Mode 3 = Business/ACD Mode	0

### Conditions

None

### Feature Cross Reference

- Direct Station Selection (DSS) Console
- Hotel/Motel

# Program 30 : DSS/DLS Console Setup

## 30-02: DSS Console Extension Assignment

**Level:**  
**IN**

### Description

Use **Program 30-02: DSS Console Extension Assignment** to identify which extensions have DSS Consoles connected.

- Up to 32 different extensions with DSS Consoles can be set up. A single extension can have up to four 60-button DSS Consoles (32 is the maximum allowed per system).

When programming, each extension/DSS Console(s) combination is called a Console Number. There are 32 Console Numbers (1~32). Console Numbers can be assigned to extensions. When entering data, the assignment for Console Number 1 is normally made first.

### Input Data

60-button DSS Console Number	01~32
------------------------------	-------

Item No.	Item	Default
01	<b>Extension Number</b> The extension number for the multiline terminal connected with the DSS console (up to eight digits).	No Setting

### Conditions

None

### Feature Cross Reference

- Direct Station Selection (DSS) Console

# Program 30 : DSS/DLS Console Setup

## 30-03: DSS Console Key Assignment

**Level:**  
**SA**

### Description

Use **Program 30-03: DSS Console Key Assignments** to customize the key assignments for 60-button DSS Consoles. A DSS Console key can have any function with up to four digits (e.g., extension number or Service Code).

To prevent lamp problems when reassigning DSS Console keys, clearing an extension programmed key before reassigning it is recommended [Enter key to be cleared + 00 or \*00 (If using WebPro or PC Programming, delete the key assignments and upload the change to the system before proceeding.)] Without clearing an extension key first, the DSS Console may not show the correct lamp display, although the DSS function works correctly.

If you are programming the system from the extension to which the DSS Console is connected, either by phone or using the WebPro or PC Program, you may need to unplug the DSS and plug it back in to reset the console lamping.

### Input Data

# Program 31 : Paging Setup

## 31-01 : System Options for Internal/External Paging

Level:  
IN

Program

31

### Description

Use **Program 31-01 : System Options for Internal/External Paging** to define the system options for Internal/External Paging.

The system shows the name you program on the telephone display. Use the following chart when entering and editing text. When using the keypad digits, press the key once for the first character, twice for the second character, etc. For example, to enter C, press 2 three times. Press 2 six times to display the lower case letter.

Key for Entering Names	
When entering names in the procedures below, refer to this chart. Names can have up to 12 digits.	
Use this keypad digit . . .	When you want to . . .
1	Enter characters: 1 @ [ ¥ ] ^ _ ` {   } → ← Á À Â Ã Ç É Ê Ì Ó
2	Enter characters: <b>A-C, a-c, 2.</b>
3	Enter characters: <b>D-F, d-f, 3.</b>
4	Enter characters: <b>G-I, g-i, 4.</b>
5	Enter characters: <b>J-L, j-l, 5.</b>
6	Enter characters: <b>M-O, m-o, 6.</b>
7	Enter characters: <b>P-S, p-s, 7.</b>
8	Enter characters: <b>T-V, t-v, 8.</b>
9	Enter characters: <b>W-Z, w-z, 9.</b>
0	Enter characters: 0 ! " # \$ % & ' ( ) ð ò ó ü ä ö ù α ε θ
*	Enter characters: * + , - . / : ; < = > ? π Σ σ Ω ∞ φ £

Key for Entering Names (Continued)	
When entering names in the procedures below, refer to this chart. Names can have up to 12 digits.	
Use this keypad digit . . .	When you want to. . .
#	# = Accepts an entry (only required if two letters on the same key are needed - ex: TOM). Pressing # again = Space. (In system programming mode, use the right arrow soft key instead to accept and/or add a space.)
Conf	Clear the character entry one character at a time.
Hold	Clear all the entries from the point of the flashing cursor and to the right.

### Input Data

Item No.	Item	Input Data	Default	Related Program
01	<b>All Call Paging Zone Name</b> Assign a name to each All Call Internal Paging zone. The name shows on the display of the telephone making the announcement.	Up to 12 Characters	Group All	11-12-19 31-02-02
02	<b>Page Announcement Duration</b> This timer sets the maximum length of Page announcements. (Affects External Paging only)	0~64800 (sec)	1200	
04	<b>Privacy Release Time</b> Once the user initiates a Meet-Me Conference or Voice Call Conference, the system waits this time for the Paged party to join the call.	0~64800 (sec)	90	

### Conditions

None

## Feature Cross Reference

- Paging, External

## Program 31 : Paging Setup

### 31-02 : Internal Paging Group Assignment

**Level:**

**IN**

#### Description

Use **Program 31-02 : Internal Paging Group Assignment** to assign extensions to Internal Paging Groups (i.e., Page Zones). The setting in this program also determines if the Internal Page Group can receive Internal All Call Paging. The system can have up to 64 paging groups. An extension can be in only one Internal Paging Group.

#### Input Data

Extension Number	Maximum 8 digits
------------------	------------------

Item No.	Item	Input Data	Default
01	<b>Internal Paging Group Number</b> Assign extensions to Internal Paging Groups (i.e., Page Zones). The system allows up to 64 Internal Paging Groups. An extension can be in only one Internal Paging Group.	0~64 (0 = No Setting)	All stations: 0 (OT) All stations: 1 (AU)
02	<b>Internal All Call Paging Receiving</b> Allow or prevent All Call Internal Paging for each extension. If allowed, extension can place and receive All Call Internal Paging announcements. If prevented, extensions can only make (not receive) All Call Internal Paging announcements. If combined, Paging zones should be restricted as well, change the internal page zone group in Program 31-07-01 to 0.	0 = Off 1 = On	0 (OT) 1 (AU)

#### Conditions

None

#### Feature Cross Reference

- Paging, Internal

# Program 31 : Paging Setup

## 31-03 : Internal Paging Group Settings

**Level:**  
**IN**

### Description

Use **Program 31-03 : Internal Paging Group Settings** to assign names to Internal Paging Groups (i.e., Page Zones) and to define the splash tone for Internal Paging.

The system shows the names you program on the telephone display. Use the following chart when entering and editing text. When using the keypad digits, press the key once for the first character, twice for the second character, etc. For example, to enter a C, press 2 three times. Press 2 six times to display the lower case letter.

Key for Entering Names	
When entering names in the procedures below, refer to this chart. Names can have up to 12 digits.	
Use this keypad digit . . .	When you want to . . .
1	Enter characters: 1 @ [ ¥ ] ^ _ ` {   } → ← Á À Â Ã Ç É Ê Ì Ó
2	Enter characters: <b>A-C, a-c, 2.</b>
3	Enter characters: <b>D-F, d-f, 3.</b>
4	Enter characters: <b>G-I, g-i, 4.</b>
5	Enter characters: <b>J-L, j-l, 5.</b>
6	Enter characters: <b>M-O, m-o, 6.</b>
7	Enter characters: <b>P-S, p-s, 7.</b>
8	Enter characters: <b>T-V, t-v, 8.</b>
9	Enter characters: <b>W-Z, w-z, 9.</b>
0	Enter characters: 0 ! “ # \$ % & ' ( ) ô õ ú ä ö ü α ε θ
*	Enter characters: * + , - . / : ; < = > ? π Σ σ Ω ∞ ç £

<b>Key for Entering Names</b>	
<b>When entering names in the procedures below, refer to this chart. Names can have up to 12 digits.</b>	
Use this keypad digit . . .	When you want to . . .
<b>#</b>	<b>#</b> = Accepts an entry (only required if two letters on the same key are needed - ex: TOM). Pressing <b>#</b> again = Space. (In system programming mode, use the right arrow soft key instead to accept and/or add a space.)
Conf	Clear the character entry one character at a time.
Hold	Clear all the entries from the point of the flashing cursor and to the right.

**Input Data**

Internal Paging Group Number	01~64
------------------------------	-------

Item No.	Item	Input Data	Default
01	<b>Internal Paging Group Name</b> Assign name to Internal Paging Groups (i.e., Page Zones). The system shows the name you program on the telephone display.	Up to 12 Characters	Refer to default table.
02	<b>Internal Paging Splash tone type</b> Allow an extension to have normal (0), muted (1) or no (2) Internal Paging alert beeps before a Paging announcement.	0 = Ordinary volume 1 = Mute 2 = No tone	0

**Default**

Item 01 : Internal Paging Group Name

Extension Paging Group	Name
01	Group 1
02	Group 2
:	:
64	Group 64

**Conditions**

None

---

**Feature Cross Reference**

- Paging, Internal

## Program 31 : Paging Setup

### 31-04 : External Paging Zone Group

**Level:**

**IN**

#### Description

Use **Program 31-04 : External Paging Zone Group** to assign each External Paging zone to an External Paging group. Users call the External Paging group when broadcasting announcements to the external zone. When programming, the zones on the PGD Adapter are numbers 1~8. On the UNIVERGE SV8100 system, the CD-CP00 zone is number 9.

To simplify programming and troubleshooting, always make the External Paging Zone Group the same number as the External Paging zone (i.e., 1 = 1, 2 = 2, etc.).

#### Input Data

External Speaker Number	1~9
-------------------------	-----

Item No.	Paging Group Number	Default
01	0~8 (0 = No Setting)	Speaker 1 [PGD Adapter] = 1 (Group 1) Speaker 2 [PGD Adapter] = 2 (Group 2) Speaker 3 [PGD Adapter] = 3 (Group 3) Speaker 4 [PGD Adapter] = 4 (Group 4) Speaker 5 [PGD Adapter] = 5 (Group 5) Speaker 6 [PGD Adapter] = 6 (Group 6) Speaker 7 [PGD Adapter] = 7 (Group 7) Speaker 8 [PGD Adapter] = 8 (Group 8) Speaker 9 (CD-CP00) = 1 (Group 1)

#### Conditions

None

#### Feature Cross Reference

- Paging, External

## Program 31 : Paging Setup

### 31-05 : Universal Night Answer/Ring Over Page

**Level:**  
**IN**

#### Description

Use **Program 31-05 : Universal Night Answer/Ring Over Page** to assign Universal Night Answer ringing to each External Paging zone. For each trunk port, make a separate entry for each External Paging zone. When programming, the zones on the PGD Adapter are numbers 1~8. The CD-CP00 zone is number 9. For UNA ringing, make a separate entry for each Night Service mode.

#### Input Data

Trunk Port Number	1~200
-------------------	-------

External Speaker Number	1~9 (9 : CD-CP00)
-------------------------	-------------------

Item No.	Day/Night Mode	Input Data	Default
01	1~8	0 = No Ringing (No) 1 = Ringing (Yes)	0

#### Conditions

None

#### Feature Cross Reference

- Night Service
- Paging, External

## Program 31 : Paging Setup

### 31-06 : External Speaker Control

**Level:**  
**IN**

#### Description

Use **Program 31-06 : External Speaker Control** to define the settings for the external speaker using an amplifier.

#### Input Data

External Speaker Number	1~9 (9 = CD-CP00)
-------------------------	-------------------

Item No.	Item	Input Data	Default
01	<b>Broadcast Splash Tone Before Paging (Paging Start Tone)</b> Use this option to enable or disable splash tone before Paging over an external zone. If enabled, the system broadcasts a splash tone before the External Paging announcement.	0 = No Tone (None) 1 = Splash Tone 2 = Chime Tone	2
02	<b>Broadcast Splash Tone After Paging (Paging End Time)</b> Use this option to enable or disable splash tone after Paging over an external zone. If enabled, the system broadcasts a splash tone at the end of an External Paging announcement.	0 = No Tone (None) 1 = Splash Tone 2 = Chime Tone	2
03	<b>Speech Path</b> Determine if the external speaker will be used for talkback (As this option is not available with the CD-CP00 external page zone, speaker 9 should be left at 1).	0 = Both Way (Duplex) 1 = One Way (PGD Adapter → SPK) (Simplex)	1
04	<b>CODEC Transmit Gain Setup</b>	1~63 (-15.5 ~ +15.5dB)	32 (0dB)
05	<b>CODEC Receive Gain Setup</b>	1~63 (-15.5 ~ +15.5dB)	32 (0dB)

**Conditions**

None

---

**Feature Cross Reference**

- Paging, External

## Program 31 : Paging Setup

### 31-07 : Combined Paging Assignments

**Level:**

**IN**

#### Description

Use **Program 31-07 : Combined Paging Assignments** to assign an External Paging Group (0~8) to an Internal Paging Zone (0~64) for Combined Paging. When an extension user makes a Combined Page, they simultaneously broadcast into both the External and Internal Zone.

Use Program 31-04-01 to assign an External Paging Zone (1~9) to an External Page Group (1~8).

#### Input Data

External Paging Group Number	0~8 (0 = All External Paging)
------------------------------	-------------------------------

Item No.	Internal Paging Group Number	Default
01	0~64 (0 = All Internal Paging)	1

#### Conditions

None

#### Feature Cross Reference

- Paging, External
- Paging, Internal

## Program 31 : Paging Setup

### 31-08 : BGM on External Paging

**Level:**  
**IN**

#### Description

Use **Program 31-08 : BGM on External Paging** to set the Background Music option for each External Paging zone. If enabled, the system plays Background Music over the zone when it is idle.

When programming, the zones on the PGD Adapter are numbers 1~8. The CD-CP00 zone is number 9.

#### Input Data

External Speaker Number	1~9 (9 = CD-CP00)
-------------------------	-------------------

Item No.	Item	Item	Input Data	Default
01	<b>BGM</b>	Use this option to allow or prevent the External Paging zone you select from broadcasting Background Music when it is idle.	0 = BGM Prevented (No) 1 = BGM allowed (Yes)	0

#### Conditions

None

#### Feature Cross Reference

- Background Music
- Paging, External

# Program 32 : Door Box and Sensor Setup

## 32-01: Door Box Timers Setup

Level:  
IN

Program

32

### Description

Use **Program 32-01: Door Box Timers Setup** to assign the timers used for the Door Box.

 *The Door Box feature is called Door Phone when programming via WebPro and using a multiline terminal.*

### Input Data

Item No.	Item	Input Data	Default
01	<b>Door Box Answer Time</b> A multiline terminal user must answer Door Box chimes during this time.	0~64800 (sec)	30
02	<b>Door Lock Cancel Time</b> When a single line telephone user hook flashes or a multiline user presses the Recall key while talking to a Door Box, the strike stays open for this time.	0~64800 (sec)	10
03	<b>Off-Premise Call Forward by Door Box Disconnect Timer</b> Define the conversation period for an Off-Premise Call Forward by Door Box call. When this timer expires, the caller hears busy tone for three seconds (fixed time), and the call is then disconnected.	0~64800 (sec)	60

### Conditions

None

# Program 33 : CTA and ACI Setup

## 33-01: ACI Port Type Setup

Level:  
IN

Program

33

### Description

Use **Program 33-01: ACI Port Type Setup** to set the function of each software port on an Analog Communications Interface. Each ACI software port can have only one function (input, output or none).

### Input Data

ACI Port Number	01~96
-----------------	-------

Item No.	ACI Type	Default
01	0 = None 1 = MOH/BGM (Input) 2 = External Audio Port (Input/Output)	0

### Conditions

None

### Feature Cross Reference

- Analog Communications Interface (ACI)

## Program 33 : CTA and ACI Setup

### 33-02: ACI Department Calling Group

**Level:**  
**IN**

#### Description

Use **Program 33-02: ACI Department Calling Group** to assign ACI ports to Department Groups. An ACI port can be in only one group.

Also use this program to set the ACI port priority. When a call comes into the ACI Department Group, it connects to the ACI port in order of its priority. A higher priority port (e.g., 1) receives calls before a lower priority port (e.g., 6). There are 96 ACI ports and 16 ACI Department Groups available.

#### Input Data

ACI Port Number	01~96
-----------------	-------

Item No.	Group Number	Priority	Default
01	01~16	1~96	See Below

#### Default

ACI Port	Group	Priority
01	1	1
02	1	2
:	:	:
96	1	96

#### Conditions

None

#### Feature Cross Reference

# Program 34 : Tie Line Setup

## 34-01: E&M Tie Line Basic Setup

Level:  
IN

Program

34

### Description

Use **Program 34-01: E&M Tie Line Basic Setup** to define the basic settings for each E&M Tie line.

### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Item	Input Data	Default	Description	Related PRG
01	<b>DID/E&amp;M Start Signaling</b>	0 = 2 <sup>nd</sup> Dial Tone 1 = Wink 2 = Immediate 3 = Delay	0 (OT) 2 (AU)	Set the start signaling mode for DID and Tie trunks. DID and Tie trunks can use either immediate start or wink start signaling.	22-02
02	<b>Receive Dial Type for E&amp;M Tie Line</b>	0 = DP 1 = DTMF	1		10-09
03	<b>E&amp;M Dial-In Mode</b>	0 = Specify Extension Number (Intercom) 1 = Use Conversion Table (NTT)	0	Determine if the incoming Tie Line call should be directed as an intercom call or if it should follow the DID Translation Table in Program 22-11.	22-11
04	<b>E&amp;M Line Dial Tone</b>	0 = Disable (No) 1 = Enable (Yes)	1	Enter 1 if the Tie Line should send dial tone to the calling system after the call is set up. Enter 0 if the Tie Line should not send dial tone.	

---

---

05	<b>System Toll Restriction</b>	0 = System 1 = Each Extension	0	Determine if an incoming Tie Line call should be subject to Toll Restriction. If it is set to 0 then it will use the PRG21-05-13, if it is set to 1 then it will use PRG21-05-01 ~ 21-05-13.	21-05

## Program 34 : Tie Line Setup

### 34-02: E&M Tie Line Class of Service

**Level:**

**IN**

#### Description

Use **Program 34-02: E&M Tie Line Class of Service** to assign a Class of Service to a Tie line (there are 15 Tie line Classes of Service). The Class of Service options are defined in Program 20-14. For each Tie line, make a separate entry for each Night Service mode.

#### Input Data

Trunk Port Number	1~200
-------------------	-------

Item No.	Day/Night Mode	Class	Default	Related Program
01	1~8	1~15	1	20-14

#### Conditions

- Program 20-06 cannot be used to assign Class of Service to Tie lines.

#### Feature Cross Reference

- Tie Lines

## Program 34 : Tie Line Setup

### 34-03: Trunk Group Routing for E&M Tie Lines

**Level:**  
**IN**

#### Description

Use **Program 34-03: Trunk Group Routing for E&M Tie Lines** to assign the trunk group route (1~8 or 1~100) chosen when a user seizes a Tie Line and dials 9. (Set Trunk Group Routing in Program 14-07.) If the system has Automatic Route Selection, dialing 9 accesses ARS. Make a separate entry for each Tie Line – for each Night Service Mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Route Table Number	Default
01	1~8	0~100 (0 = No Setting)	1

#### Conditions

None

#### Feature Cross Reference

- Tie Lines

## Program 34 : Tie Line Setup

### 34-04: E&M Tie Line Toll Restriction Class

**Level:**

**IN**

#### Description

Use **Program 34-04: E&M Tie Line Toll Restriction Class** to enter a Toll Restriction Class for each Tie Line. There are 15 Toll Restriction Classes which are defined in Programs 21-05 and 21-06. For each Tie Line, you make a separate Toll Restriction Class entry for each Night Service mode.

#### Input Data

Trunk Port Number	001~200
-------------------	---------

Item No.	Day/Night Mode	Toll Restriction Class	Default	Related Program
01	1~8	1~15	1 (OT) 2 (AU)	21-05 14-01-08

#### Conditions

- Program 20-06 cannot be used to assign Toll Restriction to Tie Lines.

#### Feature Cross Reference

- Tie Lines

## Program 34 : Tie Line Setup

### 34-05: Tie Line Outgoing Call Restriction

**Level:**  
**IN**

#### Description

Use **Program 34-05: Tie Line Outgoing Call Restriction** to build a restriction matrix for outgoing trunk calls placed from an inbound trunk (e.g., dialed from a Tie Line). For each inbound trunk group, enable or disable access to each CO trunk group.

#### Input Data

Incoming Trunk Group Number	001~100
-----------------------------	---------

Item No.	Outgoing Trunk Group Number	Input Data	Default
01	1~100	0 = Enable (Y-Tandem) 1 = Restricted (N-Tandem)	0

#### Conditions

None

#### Feature Cross Reference

- Tie Lines

## Program 34 : Tie Line Setup

### 34-06: Add/Delete Digit for E&M Tie Line

**Level:**  
**IN**

#### Description

Use **Program 34-06: Add/Delete Digit for E&M Tie Line** to set digits that the system should add or delete for Tie Lines.

- Delete Digit**  
Some Tie Line networks pass the location number and extension number to the remote side. This program allows the system to ignore such numbers for a call.  
  
If individual extension users do not want to receive an incoming call, they could delete all digits including the extension number.
- Add Digit**  
If a Tie Line network requires additional digits to reroute the call to a location, the digits for the location can be added to the received digits.

#### Input Data

Incoming Trunk Group Number	001~100
-----------------------------	---------

Item No.	Item	Input Data	Default
01	<b>Delete Digit</b>	0~255 (255 = delete all digits)	0
02	<b>Additional Dial Digits</b>	Up to four digits (0~9, *, #)	No Setting

#### Conditions

None

#### Feature Cross Reference

- Tie Lines

## Program 34 : Tie Line Setup

### 34-07: E&M Tie Line Timer

**Level:**  
**IN**

#### Description

Use **Program 34-07: E&M Tie Line Timer** to define the system service tone timers.

#### Input Data

Item No.	Item	Input Data	Default
01	First Digit Pause (E&M Immediate Start)	0~64800	3
02	First Digit Pause (E&M Wink Start)	0~64800	0
03	First Digit Pause (LD Trunk)	0~64800	3
04	LD Trunk Guard Time	0~64800	0
05	Trunk Answer Detect Timer for E&M	0~64800	30

#### Conditions

- If PRG 34-07-05 is left at default (30) the transferred call recalls to the station that performed the transfer when not answered.

#### Feature Cross Reference

- Tie Lines

## Program 34 : Tie Line Setup

### 34-08: Toll Restriction Data for E&M Tie Lines

**Level:**  
**IN**

#### Description

Use **Program 34-08: Toll Restriction Data for E&M Tie Lines** to define the toll restriction data for E&M Tie Lines. This data should be defined if Tie Line Toll Restriction is enabled in Program 21-05-13.

#### Input Data

Class of Service	01~15
------------------	-------

Item No.	Table No.	Dial Data	Default	Related Program
01	01~20	Up to 10 Digits (0~9, *, #)	No Setting	21-05-13

#### Conditions

None

#### Feature Cross Reference

- Tie Lines

## Program 34 : Tie Line Setup

### 34-09: ANI/DNIS Service Options

**Level:**  
**IN**

#### Description

Use **Program 34-09: ANI/DNIS Service Options** to define the ANI//DNIS service option setup for E&M Class of Service.

#### Input Data

Class of Service	01~15
------------------	-------

Item No.	Name	Input Data	Default	Default	Related Program
			COS 1	COS 2~15	
01	<p><b>Receive Format</b></p> <p>Use this option to specify the format of the ANI/DNIS data received from the telco. Make sure your entry is compatible with the service the telco provides. The character * indicates a delimiter.</p> <p><i>If PRG34-01-02 is selected to 2 (MF), this PRG works only as 4 = *ANI*DNIS*.</i></p>	0 = Address 1 = *ANI* 2 = *DNIS* 3 = *ANI*Address* 4 = *ANI*DNIS* 5 = *DNIS*ANI* (* = Delimiter Code)	0	0	34-01-02 34-09-02
02	<p><b>Delimiter Dial Code</b></p> <p>This option defines the character Telco uses as a delimiter (see entries 1~5 in Item 1 above). Valid entries are 0~9, #, and *.</p>	1~9, 0, #, *	*	*	34-09-01
03	<p><b>Route Setup of Receive Dial</b></p> <p>This option specifies the source of the data the system uses to route incoming ANI/DNIS calls. If option 2 is selected, refer to Program 34-09-04.</p>	0 = Fixed Route (Item 08) (No Routing) 1 = Routes on Received DNIS or Address Data 2 = Routes on Received ANI Data	0	0	22-09-01 22-11-01 34-09-04 34-09-08

Item No.	Name	Input Data	Default	Default	Related Program
			COS 1	COS 2~15	
04	<p><b>Route Table Setup of Target Dial</b></p> <p>The option sets how the system uses the route data (gathered in Item 3) to route incoming ANI/DNIS calls.</p> <p>If option 2 is selected, and the call is to be routed using the DID table (1), up to eight digits can be matched. The number of expected digits set in Program 22-09-01 must match the ANI digits defined in Program 22-11-01. For example, if an ANI/DNIS number received was *2035551234*3001* and Program 22-09-01=4, the entry in 22-11-01 must be 1234 with the defined target extension.</p> <p>If the call is to be routed using the ABB table (0), up to 24 digits can be matched. Define the range of the ABB table to be used in Program 34-09-06. The data is compared to the entries in Program 13-04-01 and then routed according to Program 13-04-03.</p>	<p>0 = SPD Table (Program 13-03)</p> <p>1 = DID Table (Program 22-11)</p>	0	0	13-04 22-11-03 34-09-05
05	<p><b>ANI/DNIS Display as Target Dial Name</b></p> <p>Use this option to set whether or not ANI data should appear on telephone displays as part of Caller ID display.</p>	<p>0 = Display Off</p> <p>1 = Display On</p>	1	0	13-04 20-09-02 22-11-03 23-09-04
06	<p><b>Routing SPD Table Setup</b></p> <p>Use this option to define which part of the ABB Table set up in Program 13-04 the system uses for ANI/DNIS Caller ID look-ups and ANI/DNIS routing.</p> <p>This is required if Items 4 and 5 above are 1 (Caller ID on). When you specify a starting and end address, the system uses the part of the table for look-ups.</p> <p>When you specify a starting address and length, the system uses that part of the table for routing. If the incoming ANI/DNIS number data matches the Number entry in the table, the system routes according to the associated Name data. That data can be an extension, Department Group pilot number, the voice mail master number or a trunk ring group.</p>	<p>Start = 0, 100~1900</p> <p>End = 0, 99~1999</p>	<p>Start = 1000</p> <p>End = 1199</p>	<p>Start = 0</p> <p>End = 0</p>	13-04

Item No.	Name	Input Data	Default	Default	Related Program
			COS 1	COS 2~15	
07	<b>Routing on ANI/DNIS Error</b> This option lets you determine how the system handles an ANI/DNIS call if a data error is detected in the incoming data string.	0 = Play Busy Tone to Caller 1 = Route Caller to Ring Group Specified in Program 25-03 (Transfer)	1	0	25-03
08	<b>Routing When Destination Busy or No Answer</b> This option lets you determine how the system handles an ANI/DNIS call if destination is busy or does not answer.	0 = Play Busy or Ringback Tone to Caller (Busy/NoAns) 1 = Route Caller to Ring Group Specified in Program 25-04 (Transfer)	0	0	25-04
09	<b>Calling Number Address Length</b> When Item 01=0 (ANI/DNIS receive format is the address), use this option to specify the address length. The choices are from 1~ 8 digits.	1~8	7	7	34-09-01

**Conditions**

None

---

## Feature Cross Reference

- Tie Lines

## Program 34 : Tie Line Setup

### 34-11: E1 Trunk Basic Setup (OT)

**Level:**  
**IN**

#### Description

Use **Program 34-11: E1 Trunk Basic Setup** to define the basic setting of each E1 Trunk.

#### Input Data

Trunk Port Number	1~200
-------------------	-------

Item No.	Name	Input Data	Default
01	<b>E1 Trunk Type</b> Use this option to specify the E1Signal type(0-8). Set this option for compatibility with the connected telco.	0 = Standard Trunk 1 = Argentine Pulsed Clear Back Trunk 2 = Argentine Pulsed Answer Trunk 3 = Brazil With seizure acknowledge Trunk 4 = Brazil Without seizure acknowledge Trunk 5 = Brazil E&M Signal A(Idle=0) Trunk 6 = Brazil E&M Signal A(Idle=1) Trunk 7 = Brazil E&M Signal B(Idle=0) Trunk 8 = Brazil Code for collect call blocking Trunk	0
02	<b>MFC Dialing Type</b> Use this option to specify the MFC Dialing Type. The following table shows the available MFC Dialing Type choices. By default, this option is 0 (MFC Dialing not used).	0 = MFC Dialing not used 1 = NEC Standard 2 = Argentina 3 = Brazil 4 = Chile 5 = Colombia 6 = Mexico 7 = Venezuela	0
03	<b>MFC Group B</b> Use this option to enable(1) or disable(0) the MFC Dialing Group B supervisory signaling. Since not all central offices provide Group B signaling, set this option for compatibility with the connected telco. By default, this option is Disable(0).	0 = Disable 1 = Enable	0

---

---

Item No.	Name	Input Data	Default
04	<b>Expected Number of MFC Digits</b> Use this option to specify the number of digits in the ANI number. This is required for ANI since delimiters do not mark the beginning and end of the data string. The system must know how many digits of incoming ANI Caller ID data to interpret.	0~20	7

**Conditions**

After set PRG34-11-01, the E1 card needs resets.

# Program 35 : SMDR Account Code Setup

## 35-01: SMDR Options

Level:  
IN

Program

35

### Description

Use **Program 35-01: SMDR Options** to set the SMDR (Station Message Detail Recording) options for each of the eight SMDR ports. Refer to the following chart for a description of each option, its range and default setting.

### Input Data

SMDR Port Number	1~8
------------------	-----

Item No.	Item	Input Data	Default
01	<b>Output Port Type</b> This option specifies the type of connection used for SMDR. The baud rate for the COM port should be set in Program 10-21-02 or 15-02-19.	0 = None 3 = LAN 4 = CTA/CTU	0
02	<b>Output Destination Number</b> This option specifies the SMDR printer output extension (CTA/CTU extension number).	Up to eight digits	No Setting
03	<b>Header Language</b> Specify the language in which the SMDR header should be printed.	0 = English 1 = German 2 = French 3 = Italian 4 = Spanish	0
04	<b>Omit Digits</b> The number of digits entered in this option do not print on the SMDR report. For example, if the entry is 10, the first 10 digits a user dials do not appear on the SMDR report.	0~24 (0 = Not applied)	1 (OT) 0 (AU)
05	<b>Minimum Digits</b> Outgoing calls must be at least this number of digits for inclusion in the SMDR report.	0~24 (0 = Not applied)	0

Item No.	Item	Input Data	Default
06	<b>Minimum Call Duration</b> The duration of the call must be at least this time to be included on the SMDR report.	0~65535 (sec) (0 = All)	0
07	<b>Minimum Ring Time (For Incoming Calls)</b> A call must ring for at least this time to be included on the SMDR report.	0~65535 (sec) (0 = All)	0
08	<b>Format Selection</b>	0 = NA Type (North America) 1 = G/J Type (Overseas)	1 (OT) 0 (AU)

**Conditions**

None

---

**Feature Cross Reference**

## Program 35 : SMDR Account Code Setup

### 35-02: SMDR Output Options

**Level:**  
**IN**

#### Description

Use **Program 35-02: SMDR Output Options** to set the SMDR (Station Message Detail Recording) output options for each of the eight SMDR ports. Refer to the following chart for a description of each option, its range and default setting.

#### Input Data

SMDR Port Number	1~8
------------------	-----

Item No.	Item	Input Data	Default
01	<b>Toll Restricted Call</b> SMDR can include or exclude calls blocked by Toll Restriction.	0 = Not Displayed 1 = Displayed	1
02	<b>PBX Calls</b> When the system is behind a PBX, SMDR can include all calls (1) or just calls dialed using the PBX trunk access code (0).	0 = Not Displayed 1 = Displayed	1
03	<b>Trunk Number or Name</b> Select whether the system should display the trunk name (0) or the number (1) on SMDR reports.   <i>If this option is set to 1, Program 35-02-14 must be set to 0.</i>	0 = Name 1 = Number	1
04	<b>Summary (Daily)</b> Set this option to (1) to have the SMDR report provide a daily summary (at midnight every night).	0 = Not Displayed 1 = Displayed	1
05	<b>Summary (Weekly)</b> Set this option to (1) to have the SMDR report provide a weekly summary (every Saturday at midnight).	0 = Not Displayed 1 = Displayed	1
06	<b>Summary (Monthly)</b> Set this option to (1) to have the SMDR report provide a monthly summary (at midnight on the last day of the month).	0 = Not Displayed 1 = Displayed	1

Item No.	Item	Input Data	Default
07	<b>Toll Charge Cost</b> Set this option to (1) have the SMDR report include toll charges.	0 = Not Displayed 1 = Displayed	1
08	<b>Incoming Call</b> Enable this option (1) to have the SMDR report include incoming calls. If you disable this option (0), incoming calls do not print.	0 = Not Displayed 1 = Displayed	1
09	<b>Extension Number or Name</b> Set this option (1) to have the SMDR report include extension numbers. Set this option (0) to have the SMDR report include extension names.	0 = Name 1 = Number	0 (OT) 1 (AU)
10	<b>All Lines Busy (ALB) Output</b> Determine if the All Lines Busy (ALB) indication should be displayed.	0 = Not Displayed 1 = Displayed	0
11	<b>Walking Toll Restriction Table Number</b>	0 = Not Output 1 = Output	1
12	<b>DID Table Name Output</b> Determine if the DID table name should be displayed.	0 = Not Displayed 1 = Displayed	0
13	<b>CLI Output When DID to Trunk</b> Determine if the CLI output should be displayed for DID.	0 = Not Displayed 1 = Displayed	0
14	<b>Date</b> Determine whether or not the date should be displayed on SMDR reports.   <i>This option must be set to 0 if the trunk name is set to be displayed in Program 35-02-03.</i>	0 = Not Displayed 1 = Displayed	0
15	<b>CLI/DID Number Switching</b> Determine whether or not the CLI/DID Number Switching should be displayed.	0 = CLI (CLIP) 1 = DID Calling Number	0
16	<b>Trunk Name or Received Dialed Number</b> Determine how the SMDR should print incoming calls on ANI/DNIS or DID trunks. If set to (1), ANI/DNIS trunks can print DNIS digits. If set to (0) trunk names are printed instead.	0 = Trunk Port Name 1 = Received Dialed Number 2 = Both (OT)	0
17	<b>Print Account Code or Caller Name of Incoming Call</b> Determine if SMDR should print Account Code or Caller Name of Incoming Call.	0 = ACC 1 = CNAME	0
18	<b>Print Mode for Caller Name of Incoming Call</b> Determine how SMDR should print Caller Name of Incoming Call.	0 = Normal 1 = Line Feed	0

Item No.	Item	Input Data	Default
19	<p><b>Dialed Number Output Format (OT)</b></p> <p>Determine if the dialed number should display the first 20 digits or the last 20 digits. This option is only available for outgoing calls.</p>	<p>0 = First 20 Digits</p> <p>1 = Last 20 Digits</p>	0
20	<p><b>External Information CFW Mode (OT)</b></p> <p>Determine which information is displayed in the "STATION" area for a transferred call when the extension has Call Forward set with an Abbreviated Dial number as the destination. Selecting "0" (Transfer Info) will display the extension number which <b>called</b> the extension with external Call Forward set. Selecting "1" (Incoming Info) will display the extension number which <b>has the external Call Forward set</b>.</p> <p>This option only applies when Call Forward is set using a service code (Program 11-11-01~11-11-07) and the destination uses an Abbreviated Dial bin. It does not include Off-Premise or Centrex transfers.</p>	<p>0 = Transfer Information</p> <p>1 = Incoming Information</p>	0
21	<p><b>S-Point Terminal Number</b></p>	<p>0 = MSN Number</p> <p>1 = Extension Number</p>	0

# Program 35 : SMDR Account Code Setup

## 35-05: Account Code Setup

**Level:**  
**IN**

### Description

Use **Program 35-05: Account Code Setup** to set various Account Code options for an extension Class of Service. Assign a Class of Service to extensions in Program 20-06.

### Input Data

Class of Service Number	01~15
-------------------------	-------

Item No.	Item	Input Data	Default
01	<b>Account Code Mode</b> Use this option to select the Account Code Mode (0~3).	0 = Account Codes Disabled (None) 1 = Account Codes optional 2 = Account Codes Required but not verified (No verify) 3 = Account Codes Required and Verified (Verify)	0
02	<b>Forced Account Code Toll Call Setup</b> Use this option enable Account Codes for all calls or just toll calls (for mode 2 or 3 in Item 01 above).	0 = Account Codes for toll and local calls (All) 1 = Account Codes just for toll calls (STD)	0
03	<b>Account Codes for Incoming Calls</b> Use this option to allow users to enter Account Codes for incoming calls. If disabled, any codes entered dial out on the connected trunk.	0 = Account Codes for incoming calls disabled (No) 1 = Account Codes for incoming calls enabled (Yes)	0
04	<b>Hiding Account Codes</b> Use this option to either hide or show the Account codes on a telephone display.	0 = Account Codes displayed 1 = Account Codes not displayed	0

**Conditions**

None

## Program 40 : Voice Recording System

### 40-10: Voice Announcement Service Option

**Level:**  
**IN**

#### Description

In **Program 40-10: Voice Announcement Service Option** define the system options for the Voice Announcement feature.

#### Input Data

Item No.	Item	Input Data	Default	Related PRG
01	<b>VRS Fixed Message</b> Enable (1) or disable (0) the system ability to play the fixed VRS messages (such as You have a message).	0 = Not Used 1 = Used	1 (OT) 0 ((AU))	
02	<b>General Message Number</b> This item assigns the VRS message number to use for the General Message.	0~100 (0 = No General Message Service)	0	
03	<b>VRS No Answer Destination</b> This item assigns the transferred Ring Group when the VRS is unanswered after Call Forwarding with Personal Greeting Message.	0~100 (Incoming Ring Group Number)	0 (No Setting)	
04	<b>VRS No Answer Time</b> If an extension has Personal Greeting enabled and all VRS ports are busy, a DIL or DISA call to the extension waits this time for a VRS port to become free.	0~64800 (sec)	0	
05	<b>Park and Page Repeat Timer (VRS Msg Resend)</b> If a Park and Page is not picked up during this time, the Paging announcement repeats.	0~64800 (sec)	0	

**Input Data**

Item No.	Item	Input Data	Default	Related PRG
06	<b>Set VRS Message for Private Call Refuse</b> <b>(VRS Msg Private Call)</b> This item assigns the VRS Message number to be used as Private Call Refuse. When Fixed message is set, VRS message guidance is: "Your call cannot go through."	0~101 (0 = No message) (101 = Fixed message)	0	14-01-27
07	<b>Set VRS Message for Caller ID Refuse</b> <b>(VRS Msg CID)</b> This item assigns the VRS Message number to be used as Caller ID Refuse. When Fixed Message is set, VRS message guidance is: "Your call cannot go through."	0~101 (0 = No message) (101 = Fixed message)	0	14-01-27
08	<b>Call Attendant Busy Message</b>	0~100 (0 = No message)	0	15-01-08
09	<b>Call Attendant No Answer Message</b>	0~100 (0 = No message)	0	15-01-09

## Program 40 : Voice Recording System

### 40-11: Preamble Message Assignment

**Level:**  
**IN**

#### Description

In **Program 40-11: Preamble Message Assignment** to assign the VRS message number to be used as the Preamble Message for each trunk. When the extension user answers the incoming call, the assigned VRS message is sent to the outside caller.

#### Input Data

Trunk Port Number	1~200
-------------------	-------

Item No.	Day/Night Mode	VRS Message Number	Default
01	1~8	0~100 (0 = No Service)	0

#### Conditions

None

#### Feature Cross Reference

- Voice Response System (VRS)

# Program 41 : ACD Setup

## 41-01: System Options for ACD

Level:  
IN

Program

41

### Description

In **Program 41-01: System Options for ACD** define the system options for the ACD feature.

### Input Data

Item No.	Item	Input Data	Default
01	System Supervisory Extension	Up to eight digits (0~9, *, #)	No Setting
02	Login ID Code Digit	0~20 (0 = No Login ID)	0
03	ACD MIS Connection Ports	0 = None 3 = LAN (CD-CP00)	0
04	ACD-MIS Command Notification when a BT Message is returned	0 = Notifies 1 = No notification	0

### Conditions

None

### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-02: ACD Group and Agent Assignments

**Level:**  
**SA**

#### Description

In **Program 41-02: ACD Group and Agent Assignments**, for each ACD extension number, assign an ACD Group (1~64). An ACD Group number is assigned to each Work Period number (1~8).

The assigned extension works as an ACD agent extension in the following cases:

- The trunk belonging to an ACD group receives an incoming call while an ACD agent is logged in.
- An extension transfers a call to an ACD group using the ACD group pilot number.
- An incoming call is received with a DID/DISA number which is assigned as an ACD pilot number.

#### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Item No.	ACD Work Period Mode Number	ACD Group No.	Default
01	1~8	0~64 (0 = No setting)	0

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-03: Incoming Ring Group Assignment for ACD Group

**Level:**  
**SA**

#### Description

In **Program 41-03: Incoming Ring Group Assignment for ACD Group**, for each incoming trunk group set up in Program 22-05, designate which ACD Group (1~64) the trunks should ring for each of the eight Work Periods. Also use this program to assign an Incoming Trunk Ring Group as priority or normal. Use Program 41-06 to set up the Work Schedules and Work Periods for trunks. Use Program 41-07 to assign the Work Schedules to the days of the week.

#### Input Data

Incoming Ring Group Number	1~100
----------------------------	-------

ACD Work Period Mode Number	1~8
-----------------------------	-----

Item No.	Item	Input Data	Default
01	<b>ACD Group Number</b>	0~64 (0 = No setting)	0
02	<b>Night Announcement Service</b>	0 = No 1 = Yes	0
03	<b>Priority Data</b> Determine whether an incoming call to a trunk ring group should follow a priority assignment. 0 = No Priority 1~7: 1 = Highest Priority 7 = Lowest Priority	0, 1~7 (0 = No Priority) (1 = Highest Priority) (7 = Lowest Priority)	0

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)
- Ring Groups

# Program 41 : ACD Setup

## 41-04: ACD Group Supervisor

**Level:**  
**SA**

### Description

For each ACD Group (1~64), use **Program 41-04: ACD Group Supervisor** to assign the group supervisor extension and operating mode. Operating modes are:

- 0 = Supervisor extension does not receive ACD Group calls.
- 1 = Supervisor extension receives ACD Group overflow calls only.
- 2 = Supervisor extension receives ACD Group calls just like all other agents.

An ACD Group can have only one supervisor. In addition, an extension can be a supervisor for only one ACD Group.

### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Group Supervisor Extension</b>	Extension Number (Up to eight digits)	No Setting
02	<b>Operation Type</b>	0 = Do not receive any ACD incoming calls (No) 1 = Receive ACD incoming calls in case of overflow (Busy) 2 = Receive ACD incoming calls all the time (Yes)	0

### Conditions

- If you assign an extension as a ACD Group Supervisor in this program, you cannot program the same extension as a System Supervisor in Program 41-01-01.

### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-05: ACD Agent Work Schedules

**Level:**  
**SA**

#### Description

Use **Program 41-05: ACD Agent Work Schedules** to set up the Work Schedules for ACD Agents and Groups. For each ACD Work Schedule (1~4), designate the start and stop times for each of the eight Work Periods. After you set up the schedules in this program, assign them to days of the week in Program 41-07. (This is the same program used by the Trunk Work Schedules.)

ACD extensions can log in only during their work period. ACD extensions receive the following calls when they are logged in.

- ACD Call on a Trunk  
When the incoming ring group is assigned in the operating time (Program 41-03 and 41-06).
- ACD Pilot Number Call  
Any time – if ACD extensions are available.

#### Input Data

ACD Work Schedule Time Pattern	1~4
--------------------------------	-----

Item No.	Work Period Mode Number	Start Time	End Time	Default
01	1~8	0000~2359	0000~2359	(Start) 0000 (End) 0000

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-06: Trunk Work Schedules

**Level:**  
**SA**

#### Description

Use **Program 41-06: Trunk Work Schedules** to set up the Work Schedules for trunks. For each Work Schedule (1~4), designate the start and stop times for each of the eight Work Periods. After you set up the schedules, assign them to days of the week in Program 41-07. (This is the same program used by the ACD Agent Work Schedules.)

#### Input Data

ACD Work Schedule Time Pattern Number	1~4
---------------------------------------	-----

Item No.	Work Period Mode Number	Start Time	End Time	Default
01	1~8	0000~2359	0000~2359	(Start) 0000 (End) 0000

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-07: ACD Weekly Schedule Setup

**Level:**

**SA**

#### Description

Use **Program 41-07: ACD Weekly Schedule Setup** to assign the four Work Schedules (1~4) to days of the week. The assignments you make in this program apply to both the ACD Agent Work Schedules (Program 41-05) and the Trunk Work Schedules (Program 41-06).

#### Input Data

Item No.	Day Number	Time Pattern	Default
01	1 = Sunday	0~4 (0 = No ACD)	0
	2 = Monday	0~4 (0 = No ACD)	0
	3 = Tuesday	0~4 (0 = No ACD)	0
	4 = Wednesday	0~4 (0 = No ACD)	0
	5 = Thursday	0~4 (0 = No ACD)	0
	6 = Friday	0~4 (0 = No ACD)	0
	7 = Saturday	0~4 (0 = No ACD)	0

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

# Program 41 : ACD Setup

## 41-08: ACD Overflow Options

**Level:**  
**SA**

### Description

For each ACD Group (1~64), use **Program 41-08: ACD Overflow Options** to assign the overflow mode (0~9), destination and announcement message types. Delay Announcement functions are not available for ACD pilot number calls. Each ACD Group can have unique overflow options. The table below outlines the entry options.

### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Overflow Operation Mode</b>	0 = No Overflow (None) 1 = Overflow with No Announcement 2 = No Overflow with First Announcement Only 3 = No Overflow with First & Second Announcements 4 = Overflow with First Announcement Only 5 = Overflow with First & Second Announcement 6 = --- Not Used --- 7 = --- Not Used --- 8 = No Overflow with Second Announcement Only 9 = Overflow with Second Announcement Only	0
02	<b>ACD Overflow Destination</b>	0 = No Setting 1~64 = ACD Group 65 = Overflow Table (Program 41-09) 66 = Voice Mail Integration 67 = System Speed (Program 41-08-05) 68 = Incoming Ring Group (Program 41-08-06)	0
03	<b>Delay Announcement Source Type</b>	0 = ACI 1 = VRS 2 = Voice Mail Integration (In-skin VM) 3 = CVM 4 = Flexible (PRG41-08-08, 09)	0
04	<b>ACD Overflow Transfer Time</b>	0~64800 (sec)	0 (OT) 30 (AU)

---

---

Item No.	Item	Input Data	Default
05	System Speed Dial Bin	0~1999 (Used when 41-08-02 is set to 67)	1999
06	Incoming Ring Group when Overflow	1~100 (Used when 41-08-02 is set to 68)	1
07	--- Not Used ---		

**Conditions**

None

---

**Feature Cross Reference**

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-09: ACD Overflow Table Setting

**Level:**  
**SA**

#### Description

Use **Program 41-09: ACD Overflow Table Setting** to define the ACD group to which a call is transferred when overflow occurs.

#### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Priority Order Number	Transfer ACD Group Number With Overflow	Default
01	1~7	0~65 (0 = No Setting) 65 = In-Skin Voice Mail Integration	0

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-10: ACI Delay Announcement

**Level:**  
**SA**

#### Description

Use Program **41-10: ACI Delay Announcement** to define the ACI port number to be used for the delay announcement.

This program is activated when the delay announcement source and options are assigned as ACI in Program 41-08-03.

#### Input Data

ACD Group No	01~64
--------------	-------

Item No.	Item	Input Data	Default
01	<b>1st Delay Announcement ACI Port Number</b>	0~96 0 = No Setting	0
02	<b>2nd Delay Announcement ACI Port Number</b>	0~96 0 = No Setting	0
03	<b>1st Delay Announcement Connection Timer</b> Set the time before the 1st Delay Announcement is played.	0~64800 (sec)	30 (OT) 4 (AU)
04	<b>2nd Delay Announcement Connection Timer</b> Set the time the 1st Delay Announcement plays before the 2nd Delay Announcement starts to play.	0~64800 (sec)	30 (OT) 60 (AU)
05	<b>2nd Delay Announcement Sending Duration</b> Set the timer for how long the 2nd Delay Announcement plays. After this timer expires, the call disconnects. To keep the call in queue, set this timer to 0.	0~64800 (sec)	30 (OT) 0 (AU)

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-11: VRS Delay Announcement

**Level:**  
**SA**

#### Description

Use **Program 41-11: VRS Delay Announcement** to assign the VRS message number to be used as the message source for the 1st and 2nd Delay Announcement Messages. Refer to Program 41-08 for more on setting up the ACD overflow options.

This program is activated when the delay announcement source and options are assigned as VRS in Program 41-08-03.

#### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Delay Message Start Timer</b> Input the time before the 1st Delay Message Starts.	0~64800 (sec)	0
02	<b>1st Delay Message Number</b> Input the VRS Message to be played as the 1st Delay Message.	0~101 0 = No Message 101 = Fixed Message	101 (OT) 0 (AU)
03	<b>1st Delay Message Sending Count</b> Input the number of times the 1st Delay Message is sent. If set to 0, the message is not played.	0~255	0
04	<b>2nd Delay Message Number</b> Input the VRS Message to be played as the 2nd Delay Message.	0~101 0 = No Message 101 = Fixed Message	101 (OT) 0 (AU)
05	<b>2nd Waiting Message Sending Count</b> Input the number of times the 2nd Delay Message is sent. If set to 0, the message is not played.	0~255	0
06	<b>Tone Kind at Message Interval</b> Input what is heard between the Delay messages.	0 = Ring Back Tone 1 = MOH Tone 2 = BGM Source	0
07	<b>ACD Forced Disconnect Time after the 2nd Delay Message</b> Set the time, after the last 2nd Delay Message is played, before the call is disconnected.	0~64800 (sec) (0 = No Disconnect)	60

---

---

Item No.	Item	Input Data	Default
08	<b>Queue Depth Announcement</b> Input when the Queue Depth Announcement is played.	0 = Disable 1 = After 1st (1st) 2 = After 2nd (2nd) 3 = After 1st and 2nd (1st and 2nd)	0

**Conditions**

None

---

**Feature Cross Reference**

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-12: Night Announcement Setup

**Level:**  
**SA**

#### Description

Use **Program 41-12: Night Announcement Setup** to define the night announce voice resource and sending time for each ACD group. Night announcement availability depends on the setting in Program 41-03-02. The night announcement function is not available for ACD pilot number calls.

#### Input Data

ACD Group Number	01~64
------------------	-------

Item No.	Item	Input Data	Default
01	<b>Night Announcement Source Type</b>	0 = ACI 1 = VRS	0
02	<b>Night Announcement ACI Port Number</b> Only used when PRG 41-12-01 is set to 0.	0~96 0 = No Setting	0
03	<b>ACD Night Announce Sending Time</b> Only used when PRG 41-12-01 is set to 0.	0~64800 (sec)	0 (OT) 30 (AU)

#### Conditions

- The Night Announcement function is not available for ACD pilot number call.

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-13: VRS Message Number for Night Announcement

**Level:**

**SA**

#### Description

Use **Program 41-13: VRS Message Number for Night Announcement** to define the VRS message number to use as the night announcement. This program is activated when the night announcement source is assigned as VRS in Program 41-12-01.

#### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>VRS Message Number</b> Input the VRS Message to use for the Night Announcement.	0~100 0 = No Message	0
02	<b>Tone Kind at Message Interval</b> Input what is heard between the Night Announcements.	0 = Ring Back Tone 1 = MOH Tone 2 = BGM Source	0

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

# Program 41 : ACD Setup

## 41-14: ACD Options Setup

**Level:**  
**SA**

### Description

Use **Program 41-14: ACD Options Setup** to set various options for ACD Groups. When you set an option for an ACD Group, the setting is in force (if applicable) for all agents in the group. The chart below shows each of the ACD options, the entries available, and the default entry.

### Input Data

ACD Group No	01~64
--------------	-------

Item No.	Item	Input Data	Default
01	<b>Emergency Call Operation Mode</b> The supervisor must be logged in and have an Emergency Key programmed for this feature. By pressing the key once, the supervisor monitors the call – pressing twice barges in on the call.	0 = Call to system supervisory extension when group supervisory extension is busy. 1 = No calls to system supervisory extension when group supervisory extension is busy.	0
02	<b>Automatic Wrap Up Mode</b> Enable/disable Automatic Wrap Up mode.	0 = After wrap up the mode key is pressed. (Manual) 1 = After call is finished automatically. (Auto)	0
03	<b>ACD Priority for Overflow Calls</b> Determine whether the ACD group should use its own priority assignment or if it should follow the priority assigned in Program 41-03-03.	0 = Own group priority 1 = Priority order by Program 41-03-03	0
04	<b>Automatic Answer at Headset</b> Enable/disable Automatic Answer for agents using headsets.	0 = Off 1 = On	0
06	<b>Call Queuing after 2nd Announcement</b> Use this option to determine whether the caller should hear the 2nd Delay Announcement and then taken out of queue (1), or place back into queue (0).	0 = Enable (Yes) 1 = Disable (No)	0

Item No.	Item	Input Data	Default
07	<b>Automatic Off Duty for SLT</b> Enable/disable Automatic Off Duty (rest) mode for agents with SLT.	0 = No change to Off Duty mode 1 = Change to Off Duty mode automatically (Skip)	0
08	<b>ACD Off Duty Mode</b> Enable (1) or Disable (0) the ability to receive internal calls when in Off Duty Mode.	0 = Cannot receive internal call 1 = Can receive internal call	0
09	<b>Automatic Wrap Up End Time</b> Input the time the agent will be in Wrap mode when Wrap key is pressed, or automatically put into Wrap mode.	0~64800 (sec)	0
10	<b>ACD No Answer Skip Time</b> Set how long a call to the ACD Group rings an idle extension before routing to the next agent.	0~64800 (sec)	0 (OT) 10 (AU)
12	<b>Start Headset Ear Piece Ringing (for SLT)</b>	0~64800 (sec)	0
13	<b>1st Data – ACD Queue 1-Digit Assignment</b>  <b>2nd Data – Destination Number Type</b>  <b>3rd Data – Destination Number</b>	1st Data – Up to one Digit (0, 1~9, #, *)  2nd Data – 0 = None 1 = Extension or Voice Mail 2 = Incoming Ring Group 3 = Speed Dial Areas 4 = ACD Group  3rd Data – Up to eight digits (0, 1~9, #, *)	No Setting  0  No Setting
14	<b>DTMF Detection Assignment during Delay Announcement</b> Is the DTMF Detection for Dial Out during (1) or after (0) the message is played.	0 = Does not detect during message 1 = Detect during message	1
15	<b>DTMF Detect Time after Delay Announcement Message</b> How long is the DTMF Detection after the Delay Announcement Message.	0~64800 (sec)	0

**Conditions**

None

---

**Feature Cross Reference**

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-15: ACD Queue Alarm Information

**Level:**  
**SA**

#### Description

Use **Program 41-15: ACD Queue Alarm Information** to assign the options for Audible Indication for Log Out/Off Duty mode for each ACD group.

These program settings provide an alarm to the agents, but no Queue Status Display is indicated. **Do not use these programs** if the alarm options are defined in Program 41-20-01 through 41-20-05.

Feature	Available in Program 41-15	Available in Program 41-20
Queue Status Display	---	Yes
Queue Status Display Time	---	Yes
Alarm	Yes	Yes
Alarm Send Time	Program 41-15-02 determines the length/interval of the alarm.	Yes
Interval Time of Queue Status Display		Yes
Class of Service	---	Yes
Timing of Alarm and Display Queue Status	Alarm triggered after the number of calls in Program 41-15-01 is exceeded.	Alarm triggered after the number of calls in Program 41-20-01 is exceeded. Then follows Program 41-20-03 time for displaying status.

#### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Number of Calls in ACD Queue to Activate Alarm Information</b>	0~200 (0 = No Alarm)	0
02	<b>Interval Time of Alarm Information</b> Input the alarm sound time.	0~64800 (sec)	0

**Conditions**

None

---

**Feature Cross Reference**

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-16: ACD Threshold Overflow

**Level:**  
**SA**

#### Description

Use **Program 41-16: ACD Threshold Overflow** to define the value of the ACD threshold call overflow and the mode for each ACD group.

#### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Number of Calls in Queue</b> Define the maximum number of calls allowed in the ACD queue before overflow occurs.	0~200 (0 = No Limitation)	0
02	<b>Operation Mode for ACD Queue</b> Define how the system should handle calls when the number of calls in queue exceeds the threshold.	0 = The last waiting call is transferred 1 = The longest waiting call is transferred 2 = Send Busy Tone	0

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-17: ACD Login Mode Setup

**Level:**  
**SA**

#### Description

Use **Program 41-17: ACD Login Mode Setup** to define the ACD login mode for each extension. If the AIC Login Mode is enabled, set the AIC Login and AIC Logout service codes for the AIC members in Program 11-13-08 and 11-13-09.

#### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Item No.	Login Mode	Default
01	0 = Normal Login Mode 1 = AIC Login Mode	0

#### Conditions

- If set to **1**, note that a supervisor cannot log in/out an AIC member as they are not normal ACD agents.

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-18: ACD Agent Identity Code Setup

**Level:**  
**SA**

#### Description

Use **Program 41-18: ACD Agent Identity Code Setup** to define the ACD Agent Identity Code Table.

#### Input Data

AIC Table No.	001~512
---------------	---------

Item No.	Item	Input Data	Default
01	ACD Agent Identity Code	Up to four digits	No Setting
02	Default ACD Group Number	0~64 0 = No Setting	0
03	ACD Group Number in Mode 1	0~64 0 = No Setting	0
04	ACD Group Number in Mode 2	0~64 0 = No Setting	0
05	ACD Group Number in Mode 3	0~64 0 = No Setting	0
06	ACD Group Number in Mode 4	0~64 0 = No Setting	0
07	ACD Group Number in Mode 5	0~64 0 = No Setting	0
08	ACD Group Number in Mode 6	0~64 0 = No Setting	0
09	ACD Group Number in Mode 7	0~64 0 = No Setting	0
10	ACD Group Number in Mode 8	0~64 0 = No Setting	0

**Conditions**

None

---

**Feature Cross Reference**

None

## Program 41 : ACD Setup

### 41-19: ACD Voice Mail Delay Announcement

**Level:**  
**SA**

#### Description

Use **Program 41-19: ACD Voice Mail Delay Announcement** to assign IPK II In-Mail Master Mailboxes (PRG 47-03) as ACD Delay “Announcement” Mailboxes.

#### Input Data

ACD Group Number	1 ~ 64
------------------	--------

Item No.	Item	Input Data	Default
01	<b>Delay Message Start Timer</b> Determines how long the system waits before playing the Delay Message.	0 ~ 64800 (sec)	0
02	<b>Mailbox Number for 1st Announcement Message</b> Assigns the Voice Mail ACD Announcement Mailbox as the message source for the 1st Announcement Message.	Dial (up to eight digits)	No Setting
03	<b>1st Delay Message Sending Count</b> Determines the 1st Delay Message Sending Count. This entry must be set to <b>1</b> or higher for the message to play.	0 = No message is played. 0 ~ 255	0
04	<b>Mailbox Number for 2nd Announcement Message</b> Assigns the Voice Mail ACD Announcement Mailboxes as the message source for the 2nd Announcement Message.	Dial (up to eight digits)	No Setting
05	<b>2nd Delay Message Sending Count</b> Determines the 2nd Delay Message Sending Count. This entry must be set to <b>1</b> or higher for the message to play.	0 = No message is played. 0~ 255	0
06	<b>Wait Tone Type at Message Interval</b> Determines what the caller hears between the messages.	0 = Ring Back Tone 1 = Music On Hold Tone 2 = Background Music Source	0
07	<b>ACD Forced Disconnect Time after 2nd Announcement</b> Assigns how long the system should wait after the end of the ACD Delay Message before disconnecting.	0 ~ 64800 (sec)	0

Item No.	Item	Input Data	Default
08	<b>Delay Message Interval Time</b> Sets the timer for the interval between the Delay Messages.	0 ~ 64800 (sec)	20

**Conditions**

None

---

**Feature Cross Reference**

None

## Program 41 : ACD Setup

### 41-20: ACD Queue Display Settings

**Level:**  
**SA**

#### Description

Use **Program 41-20: ACD Queue Display Settings** to assign the options for the ACD Queue Status Display feature. This program allows the Queue Status Display, and causes an alarm to sound, when the parameters in this program are met.

Program 41-15 can also provide a queue alarm to the agents. The options in Program 41-20 should not be used if 41-15 is set.

Feature	Available in Program 41-15	Available in Program 41-20
Queue Status Display	---	Yes
Queue Status Display Time	---	Yes
Alarm	Yes	Yes
Alarm Send Time	Program 41-15-02 determines the length/interval of the alarm.	Yes
Interval Time of Queue Status Display		Yes
Class of Service	---	Yes
Timing of Alarm and Display Queue Status	Alarm triggered after the number of calls in Program 41-15-01 is exceeded.	Alarm triggered after the number of calls in Program 41-20-01 is exceeded. Then follows Program 41-20-03 time for displaying status.

**Input Data**

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Number of Calls in Queue</b> Set the number of calls that can accumulate in the ACD queue before the Queue Status Display (and optional queue alarm) occurs.	0 = No Display, 0~200	0
02	<b>Queue Status Display Time</b> Set how long the Queue Status display remains on the telephone display.	0~64800 (sec)	5 (sec)
03	<b>Queue Status Display Interval</b> Set the interval that refreshes the Queue Status Alarm time in queue display and causes the optional queue alarm to occur on phones active on a call, logged out, or in wrap-up.	0~64800 (sec)	60 (sec)
04	<b>ACD Call Waiting Alarm</b> Enable or disable the queue alarm.	0 = Disable (Off) 1 = Enable (On)	0
05	<b>ACD Call Waiting Alarm Hold Time</b> Set how long the Call Waiting Alarm should sound.	0~64800 (sec)	0

**Conditions**

None

**Feature Cross Reference**

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-21: ACD Login ID Setup

**Level:**  
**SA**

#### Description

Use **Program 41-21: ACD Login ID Setup** to assign the Login ID code to Skill Table used for ACD Skill Based Routing.

#### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Login ID Code</b> Input the Login ID (s) to be used.	Up to 20 digits	No Setting
02	<b>Skill Table Number</b> Input the Skill Table number to be used for each Login ID.	0, 1~512	0

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-22: ACD Skill Based Routing Setup

**Level:**  
**SA**

#### Description

Use **Program 41-22: ACD Skill Based Routing Setup** to assign if the ACD Group can use or not use Skill Based Routing.

#### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Skill Base Routing</b> This option determines if the Skill Based Routing is Used (1), or Not Used (0).	0 = Off 1 = On	0

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

## Program 41 : ACD Setup

### 41-23: ACD Skill Table Setup

**Level:**  
**SA**

#### Description

Use **Program 41-23: ACD Skill Table Setup** to assign the Skill level per table for each ACD Group.

#### Input Data

ACD Group No.	01~64
---------------	-------

Item No.	Item	Input Data	Default
01	<b>Skill Level</b> Input the Skill Level for each Queue for each Skill Table number.	1~7 (Level 1 is the highest level)	1

#### Conditions

None

#### Feature Cross Reference

- Automatic Call Distribution (ACD)

# Program 42 : Hotel Setup

## 42-01 : System Options for Hotel/Motel

**Level:**  
**IN**

Program

# 42

### Description

Use **Program 42-01 : System Options for Hotel/Motel** to assign the system options for Hotel/Motel Service.

### Input Data

Item No.	Item	Input Data	Default
01	<b>Answering Message Mode for Wake Up Call (Hotel Mode)</b>	0 = MOH (Hold Time) 1 = VRS Message 2 = VRS Message + Time	0
02	<b>Wake Up Call Message Assignment</b> VRS Message for Wake Up Calls. You must make an entry for this program if you have selected 1 or 2 in Item 01 above.	0~100 (0 = No Setting)	0
03	<b>Wake Up Call No Answer</b>	0 = No Transfer 1 = Transfer to the Operator	0
04	<b>Setup Message Mode for Wake Up Call (Hotel Mode)</b>	0 = Confirmation Tone 1 = VRS Message 2 = Time Stamp + VRS Message	0
05	<b>Wake Up Call Message Assignment</b>	0~100 (0 = No Setting)	0

### Conditions

None

### Feature Cross Reference

- Hotel/Motel

## Program 42 : Hotel Setup

### 42-02 : Hotel/Motel Telephone Setup

**Level:**  
**IN**

#### Description

Use **Program 42-02 : Hotel/Motel Telephone Setup** to define the basic operation of the Hotel/Motel extensions.

#### Input Data

Extension Number	Up to eight digits
------------------	--------------------

Item No.	Item	Input Data	Default
01	<b>Hotel Mode</b> If you want an extension to operate in the Hotel/Motel mode, enter 1. If you want the telephone to operate in the business mode, enter 0.	0 = Normal 1 = Hotel	0
02	<b>Toll Restriction Class When Check In</b> Assign an extension Toll Restriction Class when it is checked in. The system has 15 Toll Restriction Classes (1~15). The entry you make in this option affects the telephone in all Night Service modes. (Refer to Programs 21-05 and 21-06 to set up the Toll Restriction dialing options.) When the extension is checked out, it uses the Toll Restriction Class set in Program 21-04.	1~15	1

#### Conditions

None

#### Feature Cross Reference

- Hotel/Motel

## Program 42 : Hotel Setup

### 42-03 : Class of Service Options (Hotel/Motel)

**Level:**  
**IN**

#### Description

Use **Program 42-03 : Class of Service Options (Hotel/Motel)** to set the Hotel/Motel Class of Service (COS) options. Assign Class of Service to extensions in Program 42-02 : Hotel/Motel Telephone Setup. There are 15 Classes of Service. Refer to the following chart for a description of each COS option, its range and default setting. For additional Class of Service options, refer to Programs 20-06 ~ 20-14.

#### Input Data

Class of Service Number	01~15
-------------------------	-------

Item No.	Item	Input Data	Default	
			Class 01	Class 02~15
01	Check-In Operation	0 = Off 1 = On	0	0
02	Check-Out Operation	0 = Off 1 = On	0	0
03	Room Status Output	0 = Off 1 = On	0	0
04	DND Setting for Other Extension	0 = Off 1 = On	0	0
05	Wake up Call Setting for Other Extension	0 = Off 1 = On	0	0
06	Room Status Change for Other Extension	0 = Off 1 = On	0	0
07	Restriction Class Changing for Other Extension	0 = Off 1 = On	0	0
08	Room to Room Call Restriction	0 = Off 1 = On	0	0
09	DND Setting for Own Extension	0 = Off 1 = On	0	0

Item No.	Item	Input Data	Default	
			Class 01	Class 02~15
10	<b>Wake Up Call Setting for Own Extension</b>	0 = Off 1 = On	0	0
11	<b>Change Room Status for Own Extension</b>	0 = Off 1 = On	0	0
12	<b>SLT Room Monitor</b> Enable (1) or disable (0) a single line telephone ability to use Room Monitor.	0 = Off 1 = On	0	0
13	<b>PMS Restriction Level</b>	0 = Off 1 = On	0	0

**Conditions**

None

---

**Feature Cross Reference**

- Class of Service

## Program 42 : Hotel Setup

### 42-04 : Hotel Mode One-Digit Service Codes

**Level:**

**IN**

#### Description

Use **Program 42-04: Hotel Mode One-Digit Service Codes** to set up the Hotel Mode one-digit service codes which are assigned in 42-02-01. For each Department Calling Group (1~64), you enter the destination for each single digit code (1~9, 0, \*, #). The destination can be any code with up to four digits, such as an extension number or access code.

#### Input Data

Department (Extension) Group Number	01~64
-------------------------------------	-------

Item No.	Received Dial	Destination Number	Default
01	1~9,0,*,#	Up to eight digits	No Setting

#### Conditions

- The one-digit service codes you assign in this program wait until the interdigit time expires before executing.

#### Feature Cross Reference

- Hotel/Motel

## Program 42 : Hotel Setup

### 42-05 : Hotel Room Status Printer

**Level:**  
**IN**

#### Description

Use **Program 42-05: Hotel Room Status Printer** to set the CTA port to output the Hotel Data (Check-Out sheet, Room Status, etc.) and the output options for the Hotel/Motel feature.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Output Port Type</b>	0 = No Setting 1 = CTA 3 = LAN	0
02	<b>Output Destination Number</b>	Up to eight digits (Extension number which CTA/CTU is equipped)	No Setting
03	<b>Wake Up Call No Answer Data</b>	0 = Not Output 1 = Output	0
04	<b>Check-Out Sheet</b>	0 = Not Output 1 = Output	0
05	<b>PMS Protocol type</b>	0 = Normal 1 = Fidelio	0

#### Conditions

- Room Status Reports output via a CTA or CTU adapter require a DTH terminal and a compatible external device.
- Room Status Reports can be output via LAN port, or when using DTH terminals, a CTA or CTU adapter and a compatible external device.

#### Feature Cross Reference

- Hotel/Motel

## Program 42 : Hotel Setup

### 42-06 : PMS Service Setting

**Level:**

**IN**

#### Description

Use **Program 42-06: PMS Service Setting** to set the PMS integration settings when using PMS-U13 and PMS feature.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>PMS Port Number</b>	0~65535	5129
02	<b>3:00 AM Auto Room Scan</b> At 3:00 AM sets 'maid required' status for all checked-in rooms.	0 = Off 1 = On	0
03	<b>CheckIn Message Type</b>	0 = Off 1 = On	0
04	<b>CheckOut Auto Status Change</b>	0 = Off 1 = On	0
05	<b>AREYOUTHERE/LINETEST Send Timing</b>	1~128 (sec)	10
06	<b>AREYOUTHERE/LINETEST Send Count</b>	0~20 (times)	3

#### Conditions

None

#### Feature Cross Reference

- Hotel/Motel

## Program 42 : Hotel Setup

### 42-07 : PMS Restriction Level Conversion Table

**Level:**  
**IN**

#### Description

Use **Program 42-07 : PMS Restriction Level Conversion Table** to change the default Toll Restriction class on check in for a room (PRG 42-02-02).

#### Input Data

Restriction Level	0~3
-------------------	-----

Item No.	Item	Input Data	Default
01	PMS Restriction Level Conversion Table	1~15	Level 0 = 10 Level 1 = 11 Level 2 = 12 Level 3 = 13

#### Conditions

None

#### Feature Cross Reference

- Hotel/Motel

## Program 42 : Hotel Setup

### 42-08: Text Message Setup for Hotel Room Status

**Level:**

**IN**

#### Description

Use **Program 42-08: Text Message Setup for Hotel Room Status** to define the text message for Hotel Room Status.

#### Input Data

Room Status Number	1,2,3,4,5,6,7,8,9,0,#,*
--------------------	-------------------------

Room Status	0: Check In 1: Check Out
-------------	-----------------------------

# Program 44 : ARS/F-Route Setup

## 44-01: System Options for ARS/F-Route

Level:  
IN

Program

44

### Description

Use **Program 44-01: System Options for ARS/F-Route** to define the system options for the ARS/F-Route feature.

### Input Data

Item No.	Item	Input Data	Default
01	<b>ARS/F-Route Time Schedule</b> If this option is set to <b>0</b> , the F-Route table selected is determined only by the digits dialed without any relation to the day or time of the call.  If this option is set to <b>1</b> , the system first refers to Program 44-10. If there is a match, the pattern defined in that program is used. If not, the F-Route pattern in Program 44-09 and time setting in 44-08 are used.	0 = Not Used 1 = Used	0

### Conditions

None

### Feature Cross Reference

- Automatic Route Selection (ARS)
- Uniform Numbering Network

## Program 44 : ARS/F-Route Setup

### 44-02: Dial Analysis Table for ARS/F-Route Access

**Level:**  
**IN**

#### Description

Use **Program 44-02: Dial Analysis Table for ARS/F-Route Access** to set the Pre-Transaction Table for selecting ARS/F-Route.

#### Input Data

Dial Analysis Table Number	1~120
----------------------------	-------

Item No.	Item	Input Data	Default
01	<b>Dial</b> Set the number of digits to be analyzed by the system for ARS routing.	Up to eight digits (Use line key 1 for a Don't Care digit, @)	No Setting
02	<b>Service Type</b> <ul style="list-style-type: none"> <li>○ Service Type 1 (Extension Number) The number goes to an extension after deleting the front digit(s). <i>Additional Data</i> Assign the digit(s) to be deleted on top of the number for extension number usage. At least one digit must be deleted.</li> <li>○ Service Type 2 (ARS/F-Route) The number is controlled by ARS/F-Route table. <i>Additional Data:</i> If the ARS/F-Route Time Schedule is not used, assign the ARS/F-Route table number for Program 44-05.  If the ARS/F-Route Time Schedule is used, assign the ARS/F-Route selection number for Program 44-04.</li> <li>○ Service Type 3 (Dial Extension Analyze Table) The total length of the number exceeds more than 8 digits. <i>Additional Data:</i> Assign the Dial Extension Analysis Table number to be used in Program 44-03.</li> </ul>	0 = No setting (None) 1 = Extension Call (Own) 2 = ARS/F-Route Table (F-Route) 3 = Dial Extension Analyze Table (Option)	0

Item No.	Item	Input Data	Default
03	<p><b>Additional Data</b></p> <p>For the Service Type selected in 44-02-02, enter the additional data required.</p> <ul style="list-style-type: none"> <li>○ 1: Delete Digit = 0~255 (255 = Delete All Digits)</li> <li>○ 2: [Program 44-01: 0] ARS/F-Route Table Number = 0~500 (0 = No Setting) Refer to Program 44-05. [Program 44-01: 1] ARS/F-Route Select Table Number = 0~500 (0 = No Setting) Refer to Program 44-04.</li> <li>○ 3: Dial Extension Analyze Table Number = 0~4 (0 = No Setting) Refer to Program 44-03.</li> </ul>	<p>1 = Delete Digit = 0~255 (255: Delete All Digits)</p> <p>2 = 0~500 (0 = No Setting)</p> <p>3 = Dial Extension Analyze Table Number = 0~4 (0 = No Setting)</p>	0
04	<p><b>Dial Tone Simulation</b></p> <p>If enabled, this option sends dial tone to the calling party after the routing is determined. This may be required if the central office at the destination does not send dial tone.</p>	<p>0 = Off</p> <p>1 = On</p>	0

## Program 44 : ARS/F-Route Setup

### 44-03: Dial Analysis Extension Table

**Level:**  
**IN**

#### Description

When Program 44-02-02 is set to type 3, use **Program 44-03: Dial Analysis Extension Table** to set the dial extension analysis table. These tables are used when the analyzed digits must be more than eight digits. If the received digits do not match the digits set in tables 1~250, table number 252 is used to refer to the next Extension Table Area (1~4) to be searched. If the received digits are not identified in tables 1~250, the F-Route selection table number defined in table 251 is used.

#### Input Data

Extension Table Area Number	1~4
Dial Analysis Table Number	1~252

#### Dial Analysis Table Number: 1~250

Item No.	Item	Input Data	Default
01	Dial	Up to 24 digits Digits = 1~9, 0, *, #, @ (Press Line Key 1 for wild character @)	No Setting
02	ARS/F-Route Select Table Number	0~500 (ARS/F-Route Table Number) With Program 44-01 set to 0, Program 44-05 is checked. With Program 44-01 set to 1, Program 44-04 is checked.	0

**Dial Analysis Table Number: 251**

Item No.	Item	Input Data	Default
03	<b>ARS/F-Route Select Table Number</b>	0~500 (ARS/F-Route Table Number) With Program 44-01 set to 0, Program 44-05 is checked. With Program 44-01 set to 1, Program 44-04 is checked.	0

**Dial Analysis Table Number: 252**

Item No.	Item	Input Data	Default
04	<b>Next Table Area Number</b>	0~4	0

**Conditions**

None

---

## Feature Cross Reference

## Program 44 : ARS/F-Route Setup

### 44-04: ARS/F-Route Selection for Time Schedule

**Level:**  
**IN**

#### Description

Use **Program 44-04: ARS/F-Route Selection for Time Schedule** to assign each ARS/F-Route Selection number to an ARS/F-Route table number for each ARS/F-Route time mode. There are eight time modes for ARS/F-Route Access.

#### Input Data

ARS/F-Route Selection Number	1~500
------------------------------	-------

Item No.	ARS/F-Route Time Mode	ARS/F-Route Table Number	Default
01	1~8	0~500 (0 = No Service)	0

#### Conditions

None

#### Feature Cross Reference

- Automatic Route Selection (ARS)

## Program 44 : ARS/F-Route Setup

### 44-05: ARS/F-Route Table

**Level:**  
**IN**

#### Description

Use **Program 44-05: ARS/F-Route Table** to set the ARS/F-Route table. There are four kinds of order. If the higher priority trunk groups are busy, the next order group is used. If a lower priority route is selected, the caller may be notified with a beep tone.

#### Input Data

ARS/F-Route Table Number	1~500
--------------------------	-------

Priority Number	1~4
-----------------	-----

Item No.	Item	Input Data	Default
01	<b>Trunk Group Number</b> Select the trunk group number to use for the outgoing ARS call.	0 = No Setting 1~100 = Trunk Group 101-150 = Networking (OT) 255 = Extension Call	0
02	<b>Delete Digits</b> Enter the number of digits to be deleted from the dialed number.	0~255 (255 = Delete All)	0
03	<b>Additional Dial Number Table</b> Enter the table number (defined in Program 44-06) for additional digits to be dialed.	0~1000	0
04	<b>Beep Tone</b> Select whether or not a beep is heard if a lower priority trunk group is used to dial out.	0 = Off 1 = On	0
05	<b>Gain Table Number for Internal Calls</b> Select the gain table number to use for the internal call (defined in Program 44-07).	0~500 0 = No Setting	0
06	<b>Gain Table Number for Tandem Connections</b> Select the gain table number to use for the tandem call (defined in Program 44-07).	0~500 0 = No Setting	0

Item No.	Item	Input Data	Default
07	<b>ARS Class of Service</b> Select the ARS Class of Service to use for the table. An extension ARS COS is determined in Program 26-04-01.	0~16	0
08	<b>Dial Treatment</b> Select the Dial Treatment to use for the table. If a Dial Treatment is selected, Programs 44-05-02 and 44-05-03 are ignored and the Dial Treatment defined in Program 26-03-01 is used instead.	0~15	0
09	<b>Maximum Digit</b> Input the maximum number of digits to send when using the F-Route.	0~24	0
10	<b>CCIS over IP Destination Point Code</b> Input the Destination Point Code to send when using this F-Route.	0~16367	0
11	<b>Network Specified Parameter Table</b> Enter a table number from Program 26-12.	0~16	0

**Conditions**

None

## Feature Cross Reference

- Automatic Route Selection (ARS)

## Program 44 : ARS/F-Route Setup

### 44-06: Additional Dial Table

**Level:**  
**IN**

#### Description

Use **Program 44-06: Additional Dial Table** to set the additional dial table to add prior to the dialed ARS/F-Route number. The Additional Dial Table used is determined in Program 44-05-03.

#### Input Data

Additional Dial Table Number	1~1000
------------------------------	--------

Item No.	Additional Dial	Default
01	Up to 24 digits Enter: 1~9, 0, *, #, Pause (press LK 1 to enter a pause)	No Setting

#### Conditions

None

#### Feature Cross Reference

- Automatic Route Selection (ARS)

## Program 44 : ARS/F-Route Setup

### 44-07: Gain Table for ARS/F-Route Access

**Level:**  
**IN**

#### Description

Use **Program 44-07: Gain Table for ARS/F-Route Access** to set the gain/PAD table. If an extension dials ARS/F-Route number:

- The Extension Dial Gain Table, assigned in Program 44-05, is activated.
- The Extension Dial Gain Table follows Outgoing transmit and Outgoing receive settings.

If the incoming call is transferred to another line using ARS/F-Route:

- The Tandem Gain Table, assigned in Program 44-05, is activated.
- The Tandem Gain Table follows the Incoming transmit and Incoming receive settings for incoming line, and Outgoing transmit and Outgoing receive settings for the outgoing line.

 **For ARS/F-Route calls, the CODEC gains defined in Program 14-01-02 and 14-01-03 are not activated.**

#### Input Data

Gain Table Number	1~500
-------------------	-------

Item No.	Item	Input Data	Default
01	Incoming Transmit	1~63 (-15.5 ~ +15.5dB)	32 (0dB)
02	Incoming Receive	1~63 (-15.5 ~ +15.5dB)	32 (0dB)
03	Outgoing Transmit	1~63 (-15.5 ~ +15.5dB)	32 (0dB)
04	Outgoing Receive	1~63 (-15.5 ~ +15.5dB)	32 (0dB)

**Conditions**

None

## Program 44 : ARS/F-Route Setup

### 44-08: Time Schedule for ARS/F-Route

**Level:**  
**IN**

#### Description

Use **Program 44-08: Time Schedule for ARS/F-Route** to define the daily pattern of the ARS/F-Route feature. ARS/F-Route has 10 time patterns. These patterns are used in Program 44-09 and 44-10. The daily pattern consists of 20 time settings.

#### Input Data

Schedule Pattern Number	01~10
-------------------------	-------

Item No.	Time Number	Start Time	End Time	Mode
01	01~20	0000~2359	0000~2359	1~8

#### Default

All Schedule Patterns: 0:00 – 0:00, Mode 1

Example:

#### *Pattern 1*

0:00	8:00	18:00	22:00	0:00
Mode 3	Mode 1	Mode 2	Mode 3	

Time Number 01: 00:00 – 08:00 Mode 3

Time Number 02: 08:00 – 18:00 Mode 1

Time Number 03: 18:00 – 22:00 Mode 2

Time Number 04: 22:00 – 00:00 Mode 3

#### *Pattern 2*

0:00	0:00
Mode 2	

Time Number 01: 0:00 – 0:00 Mode 2

**Conditions**

None

---

**Feature Cross Reference**

- Automatic Route Selection (ARS)

## Program 44 : ARS/F-Route Setup

### 44-09: Weekly Schedule for ARS/F-Route

**Level:**  
**IN**

#### Description

Use **Program 44-09: Weekly Schedule for ARS/F-Route** to define a weekly schedule for using ARS/F-Route. The pattern number is defined in Program 44-08-01.

#### Input Data

Item No.	Day Number	Schedule Pattern Number	Default
01	1 = Sunday	0~10 (0 = No setting)	Pattern 1
	2 = Monday		Pattern 1
	3 = Tuesday		Pattern 1
	4 = Wednesday		Pattern 1
	5 = Thursday		Pattern 1
	6 = Friday		Pattern 1
	7 = Saturday		Pattern 1

#### Conditions

None

#### Feature Cross Reference

# Program 45 : Voice Mail Integration

## 45-01 : Voice Mail Integration Options

Level:  
IN

Program

45

### Description

Use **Program 45-01: Voice Mail Integration Options** to customize certain voice mail integration options.

### Input Data

Item No.	Item	Input Data	Default	Related PRG
01	<b>Voice Mail Department Group Number</b> Assign which Extension (Department) Group number is to be assigned as the voice mail group.	0~64 0 = No Voice Mail	0	
02	<b>Voice Mail Master Name</b> Enter the Voice Mail Master Name.	Up to 12 Characters	VOICE MAIL	
03	<b>Voice Mail Call Screening</b> Enable/disable the ability to process the Call Screening commands (1+ extension number) sent from the Voice Mail. you should normally enable this option to allow for Voice Mail Call Screening. Disable this option if your system has been modified so that extensions begin with the digit 1 (e.g., 101, 102, etc.). Also see the "Flexible System Numbering" feature.	0 = Off 1 = On	1 (OT) 0 (AU)	45-01-11
04	<b>Park and Page</b> Enable/disable the system ability to process the Voice Mail Park and Page (*) commands. You should normally <b>enable</b> this option.	0 = Off 1 = On	1	45-01-12
05	<b>Message Wait</b> Enable/disable the system ability to process the Voice Mail Message Wait (#) commands. You should normally <b>enable</b> this option. If enabled, be sure that the programmed Message Notification strings don't contain the code for trunk access.	0 = Off 1 = On	1	45-01-13

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>	<b>Related PRG</b>
06	<b>Record Alert Tone Interval Time</b> This time sets the interval between Voice Mail Conversation Record alerts	0~64800 (sec)	30 (OT) 0 (AU)	
07	<b>Centralized Voice Mail Pilot Number</b> This number is the same as the extension number or pilot number.	Dial (up to eight digits)	No Setting	
08	<b>Centralized Voice Mail Department Group Number</b> Assigns which Extension (Department) Group Number is used as the Centralized Voice Mail group.	0~64	0	
09	<b>Centralized Voice Mail Master Name</b> Assigns the Centralized Voice Mail Master Name.	Up to 12 characters	"C.V.M."	
10	<b>New NSL Protocol support</b>	0 = Off 1 = On	0	
11	<b>Prefix for Call Screening</b>	Dial (One digit)	1	45-01-03
12	<b>Prefix for Park and Page</b>	Dial (One digit)	*	45-01-04
13	<b>Prefix for Message Wait</b>	Dial (One digit)	#	45-01-05
14	<b>CCIS Centralized Voice Mail Number</b> Assign the pilot number to Centralized Voice Mail over CCIS Link. This is assigned only in the remote switches.	Dial (up to eight digits)	No Setting	
15	<b>Analog Voice Mail Protocol Selection</b> Assigns whether fixed codes are used or the codes used in PRG 45-04 are used for analog voice mail protocol.	0: Fixed 1: Program	0	45-04 11-11- 50/51
16	<b>Voice Mail Fax Digit Add Assignment</b> Assign up to four digits in front of the station number sent to the SLT port when a call is forwarded.	Up to four digits	None	15-03-16
17	<b>Reply Mailbox Number</b> Whether or not to include the mailbox number in the analog voice mail protocol.	0: No 1: Yes	1	45-04
18	<b>Trunk Number Mapping</b> Assign the digits of trunk number mapping.	2~3	2

# Program 47 : InMail

## 47-01: VM8000 InMail System Options

Level:  
IN

### Description

Use **Program 47-01: VM8000 InMail System Options** to set up the VM8000 InMail system-wide options.

### Input Data

Item No.	Item	Input Data	Default
02	<p><b>VM8000 InMail Master Name</b> (MasterName)</p> <p>The CD-CP00 must be reset for a change to this program to take effect.</p> <p>Use this option to modify the name for all UNIVERGE SV8100 VM8000 InMail ports. The system briefly displays this name when a display multiline terminal user calls a Voice Mail port (either by pressing <b>Message</b>, their voice mail key, or by dialing the master number). You should always end the name with the <b>##</b> characters. The system substitutes the port number for the last #. Using the default name <b>InMail ##</b>, for example, the telephone display shows <b>VM8000 InMail #1</b> when calling port 1.</p>	Up to 12 characters	<b>InMail ##</b> (The system substitutes the port number for the # when calling the port).

Program

47

## Input Data

Item No.	Item	Input Data	Default
03	<p><b>Subscriber Message Length</b> (Subs Msg Length)</p> <p>Use this option to set the maximum length of recorded messages for:</p> <ul style="list-style-type: none"> <li><input type="radio"/> Subscriber Mailbox users dialing <b>RS</b> to record and send a message.</li> <li><input type="radio"/> Extension users leaving a message in a Subscriber Mailbox.</li> <li><input type="radio"/> Outside Automated Attendant callers accessing a mailbox via a GOTO command and then dialing <b>RS</b> to record and send a message.</li> <li><input type="radio"/> Subscriber Mailbox Greetings.</li> <li><input type="radio"/> Announcement Messages.</li> <li><input type="radio"/> Call Routing Mailbox Instruction Menus.</li> </ul> <p> <i>The length of a Conversation Record is 10 times the Subscriber Message Length. Since the Conversation Record time cannot exceed 4095 seconds, any setting in Subscriber Message Length larger than 409 has no effect on the length of recorded conversations.</i></p>	1~4095 (sec)	120
04	<p><b>Non-Subscriber Message Length</b> (Mbox Msg Length)</p> <p>Use this option to set the maximum length of recorded messages for:</p> <ul style="list-style-type: none"> <li><input type="radio"/> Automated Attendant callers leaving a message or Quick Message in a Subscriber Mailbox.</li> <li><input type="radio"/> Outside callers transferred by an extension user to a Subscriber Mailbox.</li> </ul>	1~4095 (sec)	120

## Input Data

Item No.	Item	Input Data	Default
05	<p><b>Message Backup/Go Ahead Time</b> (Msg Bkup/Adv Time)</p> <p>Use this option to set the backup/go ahead time. This time sets how far VM8000 InMail backs up when a user dials <b>B</b> while listening to a message. This interval also sets how far VM8000 InMail jumps ahead when a user dials <b>G</b> while listening to a message.</p>	1~60 (sec)	5
07	<p><b>Digital Pager Callback Number</b> (Pager CBack)</p> <p>Use this option to set the <i>Digital Pager Callback Number</i> portion of the Message Notification callout number for a digital pager. This is the portion of the callout number that is appended to the pager service telephone number. Normally, this option should be <b>X*M#</b>, where:</p> <ul style="list-style-type: none"> <li>○ <b>X</b> is the number of the extension that generated the notification.</li> <li>○ <b>*</b> is a visual delimiter (to make the pager display easier to read).</li> <li>○ <b>M</b> is the number of new messages in the extension mailbox.</li> <li>○ <b>#</b> is the digit normally used by the pager service for positive disconnect.</li> </ul>	<p><b>Digits</b> (12 maximum, using 0~9, # and *)</p> <p><b>M</b> (Number of messages – entered by pressing <b>LK1</b>)</p> <p><b>X</b> (Extension number – entered by pressing <b>LK2</b>)</p> <p>VM8000 InMail automatically replaces the X command with the number of the extension that initially received the message.</p>	X*M#

## Input Data

Item No.	Item	Input Data	Default
08	<p><b>Delay in Dialing Digital Pager Callback Number</b> (Pager Dial Delay)</p> <p>Use this option to set the delay (0~99 seconds) that occurs just before VM8000 InMail dials the Digital Pager Callback Number portion of the Message Notification callout number for a digital pager. Set this delay so the pager service has enough time to connect to the digital pager before sending the callback number. Your pager service may be able to help you determine the best value for this option (0~99 seconds). By default, this option is 9 seconds. When placing a digital pager notification, the system:</p> <p>Seizes the trunk specified.</p> <p>Dials the user-entered notification number (in <b>Message + OP + N</b>).</p> <p>Waits the <b>47-01-08: Delay in Dialing Digital Pager Callback Number</b> interval.</p> <p>Dials the number entered in <b>47-01-07: Digital Pager Callback Number</b>.</p> <p>The system assumes that the notification number completes dialing approximately 4 seconds after trunk seizure. This means that, by default, the Digital Pager Callback Number is dialed into the pager service about 13 seconds after trunk seizure.</p>	0~99 (sec)	30

## Input Data

Item No.	Item	Input Data	Default
09	<p><b>Wait Between Digital Pager Callout Attempts</b> (Notify Pager Intvl)</p> <p>Use this option to set the minimum time (1~255 minutes) between unacknowledged or unanswered digital pager Message Notification callouts. (A subscriber acknowledges a digital pager notification by logging onto their mailbox.) After this time expires, VM8000 InMail tries the callout again (for up to the number of times set in <b>47-01-14: Number of Callout Attempts</b>).</p> <p>If the system dials the callout number and the pager service is busy, it retries the number in one minute.</p>	1~255 (min)	15
10	<p><b>Wait Between Non-Pager Callout Attempts</b> (Notify N-Pgr Intvl)</p> <p>Use this option to set the minimum time (1~255 minutes) between non-pager Message Notification callouts in which the destination answers, says Hello, dials 1 to acknowledge and then enters the wrong security code.</p>	1~255 (min)	20
11	<p><b>Wait Between Busy Non-Pager Callout Attempts</b> (Notify Busy Intvl)</p> <p>Use this option to set how long VM8000 InMail waits (1~255 minutes) after it dials a busy non-pager callout destination, before retrying the callout number.</p>	1~255 (min)	15

## Input Data

Item No.	Item	Input Data	Default
12	<p><b>Wait Between RNA Non-Pager Callout Attempts</b> (Notify RNA Intvl)</p> <p>Use this option to set how long VM8000 InMail waits (1~255 minutes), after it dials an unanswered non-pager callout destination, before retrying the callout number.</p> <p>There are 3 types of unanswered non-pager callouts:</p> <ul style="list-style-type: none"> <li>○ If the callout rings the destination longer than the 47-01-13: Wait for Answer Non-Pager Callout Attempts option.</li> <li>○ If the destination answers, says Hello (or the system detects answer supervision) and then hangs up without dialing 1 to log onto their mailbox. This typically happens if someone unfamiliar with notification answers the callout, or if the callout is picked up by an answering machine.</li> <li>○ If the destination answers and then hangs up without saying Hello. This typically happens if someone unfamiliar with the notification answers the callout (like the above example), or if the call is picked up by an answering machine with insufficient outgoing message volume.</li> </ul>	1~255 (min)	30
13	<p><b>Number of RNA Rings</b> (Notify RNA Rings)</p> <p>If a non-pager callout rings the destination longer than this interval (1~99 rings), VM8000 InMail marks the call as unanswered (Ring No Answer) and hangs up.</p>	1~99 (rings)	5

## Input Data

Item No.	Item	Input Data	Default
14	<p><b>Maximum Attempts</b> (Notify Call Atmpt)</p> <p>Use this option to set how many times (1~99 attempts) VM8000 InMail retries an incomplete Message Notification callout. This total includes unacknowledged callouts, callouts to a busy destination, and callouts to an unanswered destination. This option applies to pager and non-pager callouts.</p>	1~99 (attempts)	99
15	<p><b>Send Pager Callout Until Acknowledged</b> (Retry Until Ack)</p> <p>When this option is enabled (1), VM8000 InMail continues to retry a digital pager Message Notification callout until the notification is acknowledged. If this option is disabled (0), VM8000 InMail retries a digital pager Message Notification the number of times specified in <b>47-01-14 Number of Callout Attempts</b>. This option does not apply to Message Notification callouts to telephone numbers. A digital pager notification is considered acknowledged when the recipient logs onto the mailbox.</p>	0 = No (Disabled) 1 = Yes (Enabled)	0
16	<p><b>Name Format</b></p> <p>Specify if names are displayed in First Last format or Last First.</p>	0 = 1st Last 1 = Last 1st	0
17	<p><b>InMail Port</b></p> <p>Specify the port number of the first InMail Port.</p>	0~497 The first port of InMail must start with one of the following ports: 1, 5, 9, 12, 16, .....237, 241, 245, 249 and uses the first port assigned + next three consecutive ports.	0
18	<p><b>Play PAD Control</b></p>	1~63 (-15dBm~ +15dBm)	32

**Input Data**

Item No.	Item	Input Data	Default
19	Record PAD Control (for Networking)	1~63 (-15dBm~ +15dBm)	32

**Conditions**

- When changing 47-01-01 or 47-01-02, a system reset is required for the new setting to take effect.

---

**Feature Cross Reference**

None

## Program 47 : InMail

### 47-02: VM8000 InMail Station Mailbox Options

Level:

IN

#### Description

Use **47-02: VM8000 InMail Station Mailbox Options** to set up a station/extension mailbox. Station mailboxes are automatically assigned as Subscriber Mailboxes. Normally, VM8000 InMail Station Mailbox numbers 1~26 should correspond to extensions 200~225 (OT) / 101-126 (AU).

 **Station Mailboxes are one of three mailbox categories: Station, Routing, or Master. You can also set up Master Mailboxes as Subscriber Mailboxes.**

#### Input Data

Station Mailbox Number	1~512
------------------------	-------

#### Input Data

Item No.	Item	Input Data	Default
01	<p><b>Mailbox Type</b></p> <p>Use this option to enable or disable the mailbox. An extension mailbox is not accessible when it is disabled (even though its stored messages and configuration are retained in memory.) If disabled, a user pressing <b>Message</b> initiates a remote logon and is asked to enter their mailbox number. A voice prompt then announces: <i>"That mailbox does not exist."</i></p> <p>To make programming easier, consider associating a mailbox number with a station port. For example, mailbox 1 could correspond to port 1, which in turn corresponds to extension 200 (OT) / 101 (AU).</p>	0 = None 1 = Personal 2 = Group	1
02	<p><b>Mailbox Number</b></p> <p>Use this option to select the extension number associated with the mailbox you are programming. Normally, mailbox 1 should use Mailbox Number 200 (OT) / 101 (AU), mailbox 2 should use Mailbox Number 201,101 etc.</p> <p>To make programming easier, consider associating a mailbox number with a station port. For example, mailbox 1 could correspond to port 1, which in turn corresponds to extension 200 (OT) / 101 (AU).</p>	Digits (eight maximum, using 0~9)	(OT) Mailbox 1 = 200 Mailbox 2~64 = 201-263 (AU) Mailbox 1 = 101 Mailbox 2~64 = 102-164 (OT/AT) Mailboxes 65~512 = No entry

## Input Data

Item No.	Item	Input Data	Default
03	<p><b>Number of Messages</b></p> <p>Use this option to set the maximum number of messages that can be left in the Subscriber Mailbox. If a caller tries to leave a message after this limit is reached, they hear: "That mailbox is full." VM8000 InMail then hangs up.</p>	<p>0~99 messages</p> <p>To conserve storage space, enter 0 for all unused mailboxes.</p>	<p>99 for mailbox 1</p> <p>20 for all other mailboxes</p>
04	<p><b>Message Playback Order</b></p> <p>Use this option to set the Subscriber Mailbox message playback order. When a subscriber listens to their messages, VM8000 InMail can play the oldest messages first (first-in/first-out, or FIFO), or the newest messages first (last-in/first-out, or LIFO).</p>	<p>0 (FIFO = first-in/first-out, or oldest messages first).</p> <p>1 (LIFO = last-in/first-out, or newest messages first)</p>	0
05	<p><b>Auto Erase/Save of Messages</b></p> <p>Use this option to determine what happens when a Subscriber Mailbox user completely listens to a new message and then exits the mailbox without either saving (SA) or erasing (E) the message. Depending on the setting of this option, VM8000 InMail either automatically saves or erases the message. If the mailbox user hangs up before listening to the <i>entire</i> new message, VM8000 InMail retains the message as a new message.</p>	<p>0 = Erase</p> <p>After the subscriber listens to the entire new message and hangs up, VM8000 InMail erases the message.</p> <p>1 = Save</p> <p>After the subscriber listens to the entire new message and hangs up, VM8000 InMail saves the message.</p>	1
06	<p><b>Message Retention</b></p> <p>Use this option to determine how long a Subscriber Mailbox retains held and saved messages. If a message is left in a Subscriber Mailbox longer than this interval, VM8000 InMail deletes it.</p>	<p>0~99 Days</p> <p>0 (Indefinite)</p>	0

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
07	<p><b>Recording Conversation Beep</b> (Rec Conv Beep)</p> <p>Use this option to enable or disable the Conversation Record beep. If enabled, all parties on a call hear the voice prompt "Recording", followed by a single beep when the extension user initiates Conversation Record. If disabled, the voice prompt and beep do not occur. When you disable the Conversation Record beep, the following voice prompts do not occur while VM8000 InMail records the conversation:</p> <p><i>Recording</i> (followed by a beep)</p> <p><i>That mailbox is full</i> (if the mailbox message storage capacity is reached)</p> <p><i>You have reached the recording limit</i> (if the recorded message is too long)</p> <p>The UNIVERGE SV8100 telephone system software provides an additional Conversation Record beep. This beep repeats according to the setting of <b>Program 45-01-06: Voice Mail Integration Options: Record Alert Tone Interval Time</b> (0~64800 seconds). To disable the UNIVERGE SV8100 telephone system Conversation Record beep, enter 0 for this option.</p>	<p>0 = No (Disabled) 1 = Yes (Enabled)</p>	1
08	<p><b>Message Waiting Lamp</b> (Update MW Lamp)</p> <p>Use this option to enable or disable Message Waiting lamping at the extension associated with the Subscriber mailbox. For Subscriber Mailboxes, you should leave this option enabled. For Guest Mailboxes, you should leave this option disabled.</p>	<p>0 = No (Disabled) 1 = Yes (Enabled)</p>	1
09	<p><b>Auto Attendant Direct to Voice Mail</b> (Auto-ATT DND)</p> <p>Use this option to enable or disable Auto Attendant Do Not Disturb. When a subscriber enables Auto Attendant Do Not Disturb, an Automated Attendant caller routes directly to the mailbox, hears the greeting, and is asked to leave a message. A subscriber can also enable Auto Attendant Do Not Disturb while recording their mailbox greeting.</p>	<p>0 = No (Disabled) 1 = Yes (Enabled)</p>	0

## Input Data

Item No.	Item	Input Data	Default
10	<p><b>Forced Unscreened Transfer</b> (Forced UTRF)</p> <p>Use this option to enable or disable Automated Attendant Forced Unscreened Transfer for the Subscriber Mailbox. If enabled, each Screened Transfer (TRF) to the extension is converted to an Unscreened Transfer (UTRF). If disabled, Screened Transfers from the Automated Attendant occur normally.</p>	0 = No (Disabled) 1 = Yes (Enabled)	0
11	<p><b>Auto Time Stamp</b></p> <p>Use this option to enable or disable Auto Time Stamp for the Subscriber Mailbox. If enabled, after the subscriber listens to a message VM8000 InMail announces the time and date the message was left. Auto Time Stamp also announces the message sender (if known).</p> <p>A subscriber can also enable Auto Time Stamp from their mailbox.</p>	0 = No (Disabled) 1 = Yes (Enabled)	0
12	<p><b>System Administrator</b></p> <p>Use this option to designate the Subscriber Mailbox as a System Administrator. This allows the subscriber to use the <b>SA</b> options after logging onto their mailbox.</p>	0 = No (Disabled) 1 = Yes (Enabled)	Mailbox 1 (101)=1 Other mailboxes=0
13	<p><b>Dialing Option</b></p> <p>Dialing Option provides additional dialing options for Next Call Routing Mailbox calls (see <i>Next Call Routing Mailbox</i> below). If enabled, a caller who accesses the Subscriber Mailbox to leave a message can dial any of the options in the Next Call Routing Mailbox Dial Action Table. If disabled, the caller can dial only 0 (to use the Next Call Routing Mailbox 0 action).</p>	0 = No (Disabled) 1 = Yes (Enabled)	0
14	<p><b>Next Call Routing Mailbox</b> (Next CR Mbox)</p> <p>Use this option to assign a Next Call Routing Mailbox to the Subscriber Mailbox. This provides callers with additional dialing options while listening to a Subscriber Mailbox recorded or default greeting. The digits the caller can dial depends on the setting of the Next Call Routing Mailbox and Alternate Next Call Routing Mailbox options.</p>	Call Routing Mailbox Number (1~3 digits, 01~032) No entry (Entered by pressing CLEAR)	<b>1</b> (Call Routing Mailbox 01) By default, Call Routing Mailbox numbers are 01~08.
15	<p><b>Directory List Number</b></p>	0 = None 1~8 = List Number * = All	0
16	<p><b>Voice Prompt Language</b></p>	Refer to <a href="#">Table 2-9 47-02-16 Default Table</a>	MailBox1-512 2 (OT) 3 (AU)

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
17	<b>Enable Paging</b>	0 = No (Disabled) 1 = Yes (Enabled)	0
18	<b>Paging Option</b>	0 = RNA 1 = Immediately	0
19	<b>Telephone User Interface Type</b>	0 = Numeric 1 = Mnemonic	0
20	<b>Enable E-mail Notification</b> (Not supported in V1.0)	0 = No 1 = Yes	0
21	<b>E-mail Address</b> (Not supported in V1.0)	Up to 48 characters	No Setting
22	<b>Include Message as Attachment</b> (Not supported in V1.0)	0 = No 1 = Yes	1
23	<b>All Message Notification Enabled</b>	0 = No 1 = Yes	1

## Program 47 : InMail

### 47-03: VM8000 InMail Group Mailbox Options

**Level:**

**IN**

#### Description

Use **47-03: VM8000 InMail Group Mailbox Options** to set up the 32 Group Mailboxes (01~32). A Group Mailbox is used for Department Group overflow and can be a Subscriber or Call Routing.

#### Input Data

Group Mailbox Number	1~32
----------------------	------

Item No.	Item	Input Data	Default
02	<b>Mailbox Number</b> (Mailbox Number) The Group Mailbox Number is the same as the Department Group master (pilot) number. Use this option to select the Department Group master (pilot) number associated with the Group Mailbox you are programming.	Digits (eight maximum, using 0~9) No Setting (entered by pressing <b>Hold</b> )	No Setting
03	<b>Mailbox Type</b> (Mailbox Type) Use this option to set the Group Mailbox type. There are three types of VM8000 InMail mailboxes: None (0), Subscriber (1) and Routing (2).	0 = None 1 = Subscriber 2 = Routing	1
	<b>Routing Mailbox Number</b>	1~32	1

#### Conditions

## Program 47 : InMail

### 47-06 : Group Mailbox Subscriber Options

Level:

IN

#### Description

Use **47-06: Group Mailbox Subscriber Options** to set up a Master Mailbox assigned as a Subscriber Mailbox in 47-03-03: Master Mailbox Type.

#### Input Data

Group Mailbox Number	1~32
----------------------	------

#### Input Data

Item No.	Item	Input Data	Default
01	<p><b>Number of Messages</b></p> <p>Use this option to set the maximum number of messages that can be left in the Subscriber Mailbox. If a caller tries to leave a message after this limit is reached, they hear, "That mailbox is full." VM8000 InMail then hangs up.</p>	<p>0~99 messages</p> <p>To conserve storage space, enter 0 for all unused mailboxes.</p>	20
02	<p><b>Message Playback Order</b></p> <p>Use this option to set the Subscriber Mailbox message playback order. When a subscriber listens to their messages, VM8000 InMail can play the oldest messages first (first-in/first-out, or FIFO), or the newest messages first (last-in/first-out, or LIFO).</p>	<p>0 (FIFO = first-in/first-out, or oldest messages first).</p> <p>1 (LIFO = last-in/first-out, or newest messages first).</p>	0
03	<p><b>Auto Erase/Save of Messages</b></p> <p>Use this option to determine what happens when a Subscriber Mailbox user completely listens to a new message and then exits the mailbox without either saving (SA) or erasing (E) the message. Depending on the setting of this option, VM8000 InMail either automatically saves or erases the message. If the mailbox user hangs up before listening to the <i>entire</i> new message, VM8000 InMail retains the message as a new message.</p>	<p>0 (Erase)</p> <p>After the subscriber listens to the entire new message and hangs up, VM8000 InMail erases the message.</p> <p>1 (Save)</p> <p>After the subscriber listens to the entire new message and hangs up, VM8000 InMail saves the message.</p>	1

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
04	<p><b>Message Retention</b></p> <p>Use this option to determine how long a Subscriber Mailbox retains held and saved messages. If a message is left in a Subscriber Mailbox longer than this interval, VM8000 InMail deletes it.</p>	0~90 days 0 (Indefinite)	0
05	<p><b>Recording Conversation Beep</b> (Rec Conv Beep)</p> <p>Use this option to enable or disable the Conversation Record beep. If enabled, all parties on a call hear the voice prompt "<i>Recording</i>", followed by a single beep when the extension user initiates Conversation Record. If disabled, the voice prompt and beep do not occur. When you disable the Conversation Record beep, the following voice prompts do not occur while VM8000 InMail records the conversation:</p> <p><i>Recording</i> (followed by a beep)</p> <p><i>That mailbox is full</i> (if the mailbox message storage capacity is reached)</p> <p><i>You have reached the recording limit</i> (if the recorded message is too long)</p> <p>The UNIVERGE SV8100 telephone system software provides an additional Conversation Record beep. This beep repeats according to the setting of Program 45-01-06: Voice Mail Integration Options: Record Alert Tone Interval Time (0~64800 seconds). To disable the UNIVERGE SV8100 telephone system Conversation Record beep, enter 0 for this option.</p>	0 = No (Disabled) 1 = Yes (Enabled)	1
06	<p><b>Message Waiting Lamp</b> (Update MW Lamp)</p> <p>Use this option to enable or disable Message Waiting light at the extension associated with the Subscriber mailbox. For Subscriber Mailboxes, you should leave this option enabled. For Guest Mailboxes, you should leave this option disabled.</p>	0 = No (Disabled) 1 = Yes (Enabled)	1
07	<p><b>Auto Attendant Direct to VoiceMail</b></p> <p>Use this option to enable or disable Auto Attendant Direct to VM. When a subscriber enables Auto Attendant Direct to VM, an Automated Attendant caller routes directly to the mailbox, hears the greeting, and is asked to leave a message. A subscriber can also enable Auto Attendant Direct to VM while recording their mailbox greeting.</p>	0 = No (Disabled) 1 = Yes (Enabled)	0

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
08	<p><b>Forced Unscreened Transfer</b> (Forced UTRF)</p> <p>Use this option to enable or disable Automated Attendant Forced Unscreened Transfer for the Subscriber Mailbox. If enabled, each Screened Transfer (TRF) to the extension is converted to an Unscreened Transfer (UTRF). If disabled, Screened Transfers from the Automated Attendant occur normally.</p>	<p>0 = No (Disabled) 1 = Yes (Enabled)</p>	0
09	<p><b>Auto Time Stamp</b></p> <p>Use this option to enable or disable Auto Time Stamp for the Subscriber Mailbox. If enabled, after the subscriber listens to a message VM8000 InMail announces the time and date the message was left. Auto Time Stamp also announces the message sender (if known).</p> <p>A subscriber can also enable Auto Time Stamp from their mailbox.</p>	<p>0 = No (Disabled) 1 = Yes (Enabled)</p>	0
10	<p><b>System Administrator</b> (System Admin)</p> <p>Use this option to designate the Subscriber Mailbox as a System Administrator. This allows the subscriber to use the options after logging onto their mailbox.</p>	<p>0 = No (Disabled) 1 = Yes (Enabled)</p>	0
11	<p><b>Dialing Option</b></p> <p>Dialing Option provides additional dialing options for Next Call Routing Mailbox calls (see <i>Next Call Routing Mailbox</i> below). If enabled, a caller who accesses the Subscriber Mailbox to leave a message can dial any option in the Next Call Routing Mailbox Dial Action Table. If disabled, the caller can dial only 0 (to use the Next Call Routing Mailbox 0 action).</p>	<p>0 = No (Disabled) 1 = Yes (Enabled)</p>	0
12	<p><b>Next Call Routing Mailbox</b> (Next CR Mbox)</p> <p>Use this option to assign a Next Call Routing Mailbox to the Subscriber Mailbox. This provides callers with additional dialing options while listening to a Subscriber Mailbox recorded or default greeting. The digits the caller can dial depends on the setting of the Next Call Routing Mailbox and Alternate Next Call Routing Mailbox options.</p>	<p>0~32 (0 = Undefined)</p>	<p>1 (Call Routing Mailbox 01) By default, Call Routing Mailbox numbers are 01=16.</p>
13	<p><b>Directory List Number</b></p> <p>Specify the Directory List number to which the Group Mailbox belongs.</p>	<p>0 = None 1~8 = List Number * = All</p>	0

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
14	<b>Voice Prompt Language</b>	Refer to <a href="#">Table 2-10 47-06-14 Default Table</a> .	2 (OT) 3 (AU)
15	<b>Enable Paging</b>	0 = No 1 = Yes	0
16	<b>Paging Option</b>	0 = RNA 1 = Immediate	0
17	<b>Telephone User Interface</b>	0 = Numeric interface 1 = Mnemonic interface 2 = Octel (future)	0
18	<b>Enable Email Notification</b>	0 = No 1 = Yes	0
19	<b>Email Address</b>	Up to 48 characters	No entry
20	<b>Include Msg as Attachment</b>	0 = No 1 = Yes	1
21	<b>All Message Notification Enabled</b>	0 = No 1 = Yes	1
22	<b>All Find-Me Follow-Me Enabled</b>	0 = No 1 = Yes	0
23	<b>Security Code Option</b>	0 = Always 1 = Remote Logon Only	0

## Program 47 : InMail

### 47-07: VM8000 InMail Routing Mailbox Options

**Level:**

**IN**

#### Description

Use **47-07: VM8000 InMail Routing Mailbox Options** to set up the 32 Routing Mailboxes. Routing Mailboxes can be either Announcement or Call Routing Mailboxes.

#### Input Data

Routing Mailbox Number	1~32
------------------------	------

Item No.	Item	Input Data	Default
02	<b>Routing Mailbox Type</b> (Mailbox Type) Use this option to set the Routing Mailbox type.	0 = None 1 = Call Routing 2 = Announcement 3 = Directory 4 = Distribution	Mailboxes 01~08 = 1 (Call Routing) Mailboxes 09~32 = 2 (Announcement)
03	<b>Prompt Language</b>	Refer to <a href="#">Table 2-11 47-07-03 Default Table</a>	2 (OT) 3 (AU)
04	<b>Telephone User Interface</b>	0 = Numeric interface 1 = Mnemonic interface 2 = Octel (future)	0

**Table 2-11 47-07-03 Default Table**

<b>Item</b>	<b>Name</b>	<b>Input Data</b>
47-07-03	Voice Prompt Language	01 = US English
		02 = UK English
		03 = Australian English
		04 = French Canadian
		05 = Dutch
		06 = Mexican Spanish
		07 = Latin American Spanish
		08 = Italian

None

## Program 47 : InMail

### 47-08 : Call Routing Mailbox Options

**Level:**

**IN**

### Description

Use **47-08 : Call Routing Mailbox Options** to set the options for mailboxes assigned as Call Routing Mailboxes in 47-07-02: Routing Mailbox Type.

### Input Data

Routing Mailbox Number	1~32
------------------------	------

Item No.	Item	Input Data	Default
01	<p><b>Dial Action Table</b></p> <p>Use this option to assign the Dial Action Table to the Call Routing Mailbox. The Dial Action Table defines the dialing options for the call Routing Mailbox.</p>	1~16 (Dial Action Table 1~16)	1 (Dial Action Table 1)
02	<p><b>Screened Transfer Timeout</b> (Scrn Trf Timeout)</p> <p>Use this option to set how long a Screened Transfer (TRF) from the Automated Attendant rings an unanswered extension before recalling.</p> <p>This option has a similar function as Customize: Mailbox Options: Call Routing: [Call Handling] Options: Delay Rings Before Redirect Transfer in VM8000 InMail.</p>	0~255 (sec) Entering 0 causes immediate recall.	15
03	<p><b>Time Limit for Dialing Commands</b> (Dialing Timeout)</p> <p>This option determines how long VM8000 InMail waits for an Automated Attendant caller to dial before routing the call to the Timeout destination.</p> <p><i>Be sure your Dial Action Tables have a Timeout action programmed.</i></p> <p>If the caller waits too long to dial:</p> <p><i>When the associated Dial Action Table has a Timeout action programmed, the caller routes to that destination.</i></p> <p><i>When the associated Dial Action Table does not have a Timeout action programmed, the Instruction Menu repeats three times and then VM8000 InMail hangs up.</i></p>	0~99 (sec) Entering 0 causes the Automated Attendant to immediately route callers to the Timeout destination programmed in the active Dial Action Table.	5

Item No.	Item	Input Data	Default
04	<b>Fax Detection</b> Use this option to enable or disable Fax Detection for the Call Routing Mailbox. In enabled, the VM8000 InMail Automated Attendant (when using this Call Routing Mailbox) detects incoming fax CNG tone. The fax call then routes to the company fax machine according to the setting of <i>47-01-06: Fax Extension</i> . If disabled, the Automated Attendant does not detect incoming fax calls.	0 = No (Disabled) 1 = Yes (Enabled)	0
05	<b>Fax Extension</b>	Up to eight digits	No entry

**Conditions**

None

---

**Feature Cross Reference**

None

## Program 47 : InMail

### 47-09 : Announcement Mailbox Options

**Level:**

**IN**

### Description

Use **47-09 : Announcement Mailbox Options** to set the options for mailboxes assigned as Announcement Mailboxes in 47-07-02 : Routing Mailbox Type.

### Input Data

Routing Mailbox Number	1~32
------------------------	------

Item No.	Item	Input Data	Default
01	<p><b>Next Call Routing Mailbox</b> (Next CR Mbox)</p> <p>If you set up an Announcement Mailbox to answer Automated Attendant calls, use this option to provide additional routing options to the Automated Attendant callers. This option interacts with <i>Repeat Count</i> and <i>Hang Up After</i> below.</p> <p>For more detail on this interaction, refer to Direct Announcement Mailbox Routing and Routed Announcement Mailbox Routing in the VM8000 InMail System Guide.</p>	<p>Call Routing Mailbox Number (1~32)</p> <p>Next Call Routing Mailbox 0-32</p> <p>0 = Undefined</p>	0
02	<p><b>Repeat Count</b></p> <p>Enter the number of times you want the Announcement Mailbox message to repeat to callers. After an Announcement Mailbox caller initially listens to the message, it repeats the number of times specified in this option. This option interacts with <i>Next Call Routing Mailbox</i> and <i>Hang Up After</i> when providing routing options.</p> <p>For more detail on this interaction, refer to Direct Announcement Mailbox Routing and Routed Announcement Mailbox Routing in the VM8000 InMail System Guide.</p>	<p>0 (No Repeats)</p> <p>0~10 (Announcement repeats 1~10 times)</p>	0

---

---

Item No.	Item	Input Data	Default
03	<b>Hang Up After</b> (HangUp) Use this option along with <i>Next Call Routing Mailbox</i> and <i>Repeat Count</i> above to provide additional routing options to Automated Attendant callers.  For more detail on this interaction, refer to Direct Announcement Mailbox Routing and Routed Announcement Mailbox Routing in the VM8000 InMail System Guide.	0 = None 1 = Goodbye 2 = Silent	0

## Program 47 : InMail

### 47-10: VM8000 InMail Trunk Options

**Level:**  
**IN**

#### Description

Use **47-10: VM8000 InMail Trunk Options** to assign VM8000 InMail options for each trunk. Currently, only 47-10-01: Answer Table Assignment is available.

#### Input Data

Trunk Port Number	1~200
-------------------	-------

Item No.	Item	Input Data	Default
01	<b>Answer Table Assignment</b> (Answer Table) Use this option to assign an VM8000 InMail Answer Table to each Direct Inward Line (DIL) the Automated Attendant should answer. The Automated Attendant follows the routing specified by the selected Answer Table.	Answer Table (1~8)	1
02	<b>Record PAD Control</b>	1~63 (-15dBm~ +15dBm)	32
03	<b>Voice Prompt Language</b>	Refer to <a href="#">Table 2-12 47-10-03 Default Table</a>	2 (OT) 3 (AU)
04	<b>Telephone User Interface</b>	0 = Numeric interface 1 = Mnemonic interface 2 = Octel (future)	0

**Table 2-12 47-10-03 Default Table**

<b>Item</b>	<b>Name</b>	<b>Input Data</b>
47-10-03	Voice Prompt Language	01 = US English
		02 = UK English
		03 = Australian English
		04 = French Canadian
		05 = Dutch
		06 = Mexican Spanish

## Program 47 : InMail

### 47-11: VM8000 InMail Answer Table Options

Level:

IN

#### Description

Use **47-11: VM8000 InMail Answer Table Options** to set options for the Answer Tables. VM8000 InMail provides eight Answer Tables (1~8). To set up the schedules for each Answer Table, go to **47-12: VM8000 InMail Answer Table Schedule**.

#### Input Data

Answer Table Number	1~8
---------------------	-----

#### Input Data

Item No.	Item	Input Data	Default
01	<p><b>Answer Schedule Override</b> (Schedule Override)</p> <p>Use this option to enable or disable Answer Schedule Override for the selected Answer Table. If enabled (and you make an entry for <i>Override Mailbox</i> below), the active Answer Table routes calls to the Override Mailbox.</p>	<p>0 = No (Disabled) 1 = Yes (Enabled)</p>	0

## Input Data

Item No.	Item	Input Data	Default
02	<p><b>Override Mailbox Category</b> (Override MB Ctg)</p> <p>Use this option to specify the category of the mailbox where Automated Attendant calls should route when you enable Answer Schedule Override. VM8000 InMail mailbox categories are Subscriber Mailbox, Master Mailbox, and Routing Mailbox. VM8000 InMail handles the routing according to the type of mailbox (Subscriber, Call Routing, or Announcement) within the specified category:</p> <ul style="list-style-type: none"> <li>○ <i>If the Override Mailbox is a Subscriber Mailbox, the outside caller hears the mailbox greeting (if recorded) and can leave a message.</i></li> <li>○ <i>If the Override Mailbox is an Announcement Mailbox, the outside caller hears the recorded announcement. Depending on how the Announcement Mailbox is programmed, VM8000 InMail then hangs up, reroutes the call, or provides additional dialing options.</i></li> <li>○ <i>If the Override Mailbox is a Call Routing Mailbox, the outside caller hears the instruction menu and can dial any option allowed by the associated Dial Action Table.</i></li> </ul> <p> <i>If any of the Input Data values are entered, the terminal displays the <b>Override Mailbox Number</b> selection (below).</i></p>	0 (Undefined) 1 (Subscriber Mailbox – STA) 2 (Group Mailbox) 3 (Routing Mailbox)	0
	<p><b>Override Mailbox Number</b> (Override MB Num)</p> <p>Use this option to specify the mailbox where Automated Attendant calls should route when you enable Answer Schedule Override. The mailbox number you select in this option should match the mailbox category specified in <b>47-11-02: Override Mailbox Category</b> above.</p>	Digits (three maximum, using 0~9)	No Setting

## Input Data

Item No.	Item	Input Data	Default
03	<p><b>Default Mailbox Category</b> (Default MB Ctg)</p> <p>Use this option to specify the category of mailbox used as the Default Mailbox. VM8000 InMail mailbox categories are Subscriber Mailbox, Master Mailbox, and Routing Mailbox. VM8000 InMail uses the Default Mailbox when an Answer Schedule is not in effect.</p> <p>VM8000 InMail handles the routing according to the type of mailbox (Subscriber, Call Routing, or Announcement) within the specified category:</p> <ul style="list-style-type: none"> <li>○ <i>If the Default Mailbox is a Subscriber Mailbox, the outside caller hears the mailbox greeting (if recorded) and can leave a message.</i></li> <li>○ <i>If the Default Mailbox is an Announcement Mailbox, the outside caller hears the recorded announcement. Depending on how the Announcement Mailbox is programmed, VM8000 InMail then hangs up, reroutes the call, or provides additional dialing options.</i></li> <li>○ <i>If the Default Mailbox is a Call Routing Mailbox, the outside caller hears the instruction menu and can dial any option allowed by the associated Dial Action Table.</i></li> </ul> <p> <i>If any of the Input Data values are entered, the terminal displays the <b>Override Mailbox Number</b> selection (below).</i></p>	0 (Undefined) 1 (Subscriber Mailbox - STA) 2 (Group Mailbox) 3 (Routing Mailbox)	Answer Table 1 = 3 Answer Table 2~8 = 0
	<p><b>Default Mailbox Number</b> (Default MB Num)</p> <p>Use this option to set the Answer Table Default Mailbox number. VM8000 InMail uses the Default Mailbox when an Answer Schedule is not in effect. By default, this occurs at all times <i>other than</i> Monday through Friday from 8:30 AM to 5:00 PM.</p>	Digits (Three maximum, using 0~9)	Answer Table 1 = 1 Answer Table 2~8 = No Entry
04	<p><b>Next Answer Table</b></p> <p>When 10 Answer Schedules in an Answer Table are not sufficient, use this option to link two Answer Tables together. VM8000 InMail treats the two linked tables as a single 20 entry Answer Table.</p>	Answer Table (1~8) 0 = Undefined	0

**Conditions**

**Feature Cross Reference**

None

# Program 47 : InMail

## 47-12: VM8000 InMail Answer Schedules

**Level:**  
**IN**

### Description

Use **47-12: VM8000 InMail Answer Schedules** to set up the VM8000 InMail Automated Attendant Answer Schedules. There are eight Answer Tables, with up to 10 Answer Schedules in each Answer Table.

### Input Data

Item No.	Item	Input Data	Default
01	<p><b>Schedule Type</b> (Entryxx Schedule Type) Use this option to assign a Schedule Type to the selected Answer Schedule. The Schedule Type determines how the Answer Schedule answers calls. The schedule can be one of the following types:</p> <ul style="list-style-type: none"> <li><input type="radio"/> <b>1. Day of the Week</b> A Type 1 Answer Schedule runs on a specific day of the week. For this type of schedule, you select:                             <ul style="list-style-type: none"> <li>✓ The day of the week the schedule should run:</li> <li>✓ The schedule start time.</li> <li>✓ The schedule end time.</li> <li>✓ The Call Routing or Announcement Mailbox used to answer calls.</li> </ul> </li> <li><input type="radio"/> <b>2. Range of Days</b> A Type 2 Answer Schedule runs for a range of days. For this type of schedule, you select:                             <ul style="list-style-type: none"> <li>✓ The day of the week the schedule should start.</li> <li>✓ The day of the week the schedule should stop.</li> <li>✓ The time on the start day the schedule should start.</li> <li>✓ The time on the stop day the schedule should stop.</li> <li>✓ The Call Routing or Announcement Mailbox used to answer the calls.</li> </ul> </li> </ul> <p><i>(continued on next page)</i></p>	<p>0 = Undefined 1 = Day of the Week 2 = Range of Days 3 = Date</p>	<p>Answer Table 1/ Schedule 1 = 2 All other schedules = 0</p>

**Input Data (Continued)**

Item No.	Item	Input Data	Default
01	<p><i>(continued from previous page)</i></p> <ul style="list-style-type: none"> <li>○ <b>3. Date</b> A type 3 Answer Schedule runs only on a specific day of the year. For this type of schedule, you select: <ul style="list-style-type: none"> <li>✓ The specific date the schedule should run.</li> <li>✓ On the selected date, the time the schedule should start.</li> <li>✓ On the selected date, the time the schedule should stop.</li> <li>✓ The Call Routing or Announcement Mailbox used to answer the calls.</li> </ul> </li> </ul>	0 = Undefined 1 = Day of the Week 2 = Range of Days 3 = Date	Answer Table 1/ Schedule 1 = 2 All Other Schedules = 0
02	<p><b>Answering Mailbox Category</b> (Entryxx MB Ctg)</p> <p>Use this option to specify the category of mailbox to which Automated Attendant calls should route when the schedule is in effect. VM8000 InMail mailbox categories are Subscriber Mailbox, Master Mailbox, or Routing Mailbox.</p> <p>VM8000 InMail handles the routing according to the exact type of Subscriber, Master, or Routing Mailbox specified.</p> <p>If the Answering Mailbox is a Subscriber Mailbox, the outside caller hears the mailbox greeting (if recorded) and can leave a message.</p> <p>If the Answering Mailbox is an Announcement Mailbox, the outside caller hears the recorded announcement. Depending on how the Announcement Mailbox is programmed, VM8000 InMail then hangs up, reroutes the call, or provides additional dialing options.</p> <p>If the Answering Mailbox is a Call Routing Mailbox, the outside caller hears the instruction menu and can dial any option allowed by the associated Dial Action Table.</p>	0 = Undefined 1 = Subscriber Mailbox - STA 2 = Group Mailbox 3 = Routing Mailbox	Answer Table 1/ Schedule 1 = 3 All Other Schedules = 0
	<p><b>Answering Mailbox Number</b> (Entryxx MB Num)</p> <p>Use this option to set the number of the Answering Mailbox the Automated Attendant uses when the selected schedule is in effect. This mailbox is defined in 47-12-02: Answering Mailbox Category.</p>	Digits (three maximum, using 0~9)	Answer Table 1/ Schedule 1 = 1 All Other Answer Schedules = No Entry

**Input Data (Continued)**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
03	<b>Day of the Week</b> (Entryxx Day) For Day of the Week (Type 1) Answer Schedules, use this option to select the day of the week the Answer Schedule should be active.	1 = Sunday 2 = Monday 3 = Tuesday 4 = Wednesday 5 = Thursday 6 = Friday 7 = Saturday	Answer Table 1~8 = 1
04	<b>Start Day</b> (Entryxx Start Day) For Range of Days (Type 2) Answer Schedules, use this option to select the day of the week the Answer Schedule should start.	1 = Sunday 2 = Monday 3 = Tuesday 4 = Wednesday 5 = Thursday 6 = Friday 7 = Saturday	Answer Table 1/ Schedule 1 = 2 All Other Schedules = 1
05	<b>End Day</b> (Entryxx End Day) For Range of Days (Type 2) Answer Schedules, use this option to select the day of the week the Answer Schedule should end.	1 = Sunday 2 = Monday 3 = Tuesday 4 = Wednesday 5 = Thursday 6 = Friday 7 = Saturday	Answer Table 1/ Schedule 1 = 6 All Other Answer Schedules = 1
06	<b>Date</b> (Entryxx Date) For Date (Type 3) Answer Schedules, use this option to select the date the Answer Schedule should be active.	MMDD For example: - 0101 = January 1 - 1231 = December 31 - 0000 = No date set	Answer Table 1~8 = 0000
07	<b>Schedule Start Time</b> (Entryxx Start Time) Use this option to specify the time the Answer Schedule should start. It applies to Day of the Week (Type 1), Range of Days (Type 2), and Date (Type 3) schedules. (To make a schedule run continuously, make the same entry for 47-12-07: Schedule Start Time and 47-12-08: Schedule End Time.)	HHMM (24-hour clock) For example: - 0130 = 1:30AM - 1700 = 5:00PM	Answer Table 1/ Schedule 1 = 0830 (8:30AM) All other schedules are 0000.
08	<b>Schedule End Time</b> (Entryxx End Time) Use this option to specify the time the Answer Schedule should end. It applies to Day of the Week (Type 1), Range of Days (Type 2), and Date (Type 3) schedules. (To make a schedule run continuously, make the same entry for 47-12-07: Schedule Start Time and 47-12-08: Schedule End Time.)	HHMM (24-hour clock) For example: - 0130 = 1:30AM - 1700 = 5:00PM - 0000 = Undefined	Answer Table 1/ Schedule 1 = 1700 (5:00PM) All Other Schedules = 0000

---

---

## Example

### *Type 1 (Day of the Week) Answer Schedule Options*

#### *Type 1 (Day of Week) Example*

In this example, Answer Table 1 routes calls as follows:

- Schedule 1 uses Routing Mailbox 2 and runs Sunday from 8:30AM to 5:00PM.
- Schedule 2 uses Subscriber Mailbox 3 and runs Wednesday from 10:30AM to 5:00PM.
- Schedule 3 uses Routing Mailbox 4 and runs Tuesday from 9:00AM to 10:00AM.
- At all other times, routing is handled by the Default Mailbox specified in 47-11-03: Default Mailbox Category and 47-11-03: Default Mailbox Number.

When setting up Answer Tables with multiple types, build the Answer Schedules in the following order:

- Range of Days
- Day of Week
- Date

<b>Type 1 (Day of Week) Example</b>	
<b>Answer Table 1</b>	
<b>Answer Schedule 1</b> Answer Schedule 1 is a Day of Week schedule that runs Sunday from 8:30AM to 5:00PM.	
	47-12-01: Entry01 Schedule Type = 1
	47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB Num = 2
	47-12-03: Entry01 Day = 1
	47-12-04: Entry01 Start Day = 1 (Entry does not matter)
	47-12-05: Entry01 End Day = 1 (Entry does not matter)
	47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter)
	47-12-07: Entry01 Start Time = 0830 (8:30AM)
	47-12-08: Entry01 End Time = 1700 (5:00PM)
<b>Answer Schedule 2</b> Answer Schedule 2 is a Day of Week schedule that runs Wednesday from 10:30AM to 5:00PM.	
	47-12-01: Entry01 Schedule Type = 1
	47-12-02: Entry01 MB Ctg = 1 47-12-02: Entry01 MB Num = 3
	47-12-03: Entry01 Day = 4
	47-12-04: Entry01 Start Day = 1 (Entry does not matter)
	47-12-05: Entry01 End Day = 1 (Entry does not matter)
	47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter)
	47-12-07: Entry01 Start Time = 1030 (10:30AM)
	47-12-08: Entry01 End Time = 1700 (5:00PM)
<b>Answer Schedule 3</b> Answer Schedule 3 is a Day of Week schedule that runs Tuesday from 9:00AM to 10:00AM.	
	47-12-01: Entry01 Schedule Type = 1
	47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB num = 4
	47-12-03: Entry01 Day = 3
	47-12-04: Entry01 Start Day = 1 (Entry does not matter)
	47-12-05: Entry01 End Day = 1 (Entry does not matter)
	47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter)
	47-12-07: Entry01 Start Time = 0900 (9:00AM)
	47-12-08: Entry01 End Time = 1000 (10:00PM)

**Type 2 (Range of Days) Answer Schedule Options****Type 2 (Range of Days) Example**

- In this example, Answer Table 1 routes calls as follows:
- Schedule 1 uses Routing Mailbox 1 and runs Sunday through Wednesday from 8:30AM to 5:00PM.
- Schedule 2 uses Routing Mailbox 2 and runs Thursday and Friday from 11:00AM to 1:00PM.
- At all other times, routing is handled by the Default Mailbox specified in 47-11-03: Default Mailbox Category and 47-11-03: Default Mailbox Number.

When setting up Answer Tables with multiple types, build the Answer Schedules in the following order:

- Range of Days
- Day of Week
- Date

<b>Type 2 (Range of Days) Example</b>	
<b>Answer Table 1</b>	
	<b>Answer Schedule 1</b> Answer Schedule 1 is a Range of Days schedule that starts schedule that runs Sunday through Wednesday from 8:30AM to 5:00PM.
	47-12-01: Entry01 Schedule Type = 2
	47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB Num = 1
	47-12-03: Entry01 Day = 1 (Entry does not matter)
	47-12-04: Entry01 Start Day = 1 (Sunday)
	47-12-05: Entry01 End Day = 4 (Wednesday)
	47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter)
	47-12-07: Entry01 Start Time = 0830 (8:30AM)
	47-12-08: Entry01 End Time = 1700 (5:00PM)
	<b>Answer Schedule 2</b> Answer Schedule 2 is a Range of Days schedule that runs Thursday and Friday from 11:00AM to 1:00PM.
	47-12-01: Entry01 Schedule Type = 2
	47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB Num = 2
	47-12-03: Entry01 Day = 1 (Entry does not matter)
	47-12-04: Entry01 Start Day = 4 (Wednesday)
	47-12-05: Entry01 End Day = 5 (Thursday)
	47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter)
	47-12-07: Entry01 Start Time = 1100 (11:00AM)
47-12-08: Entry01 End Time = 1300 (1:00PM)	

### Type 3 (Date) Answer Schedule Options

#### Type 3 (Date) Example

In this example, Answer Table 1 routes calls as follows:

- Schedule 1 uses Routing Mailbox 1 and runs every day from 8:30AM to 5:00PM.
- Schedule 2 uses Routing Mailbox 9 and runs only on Christmas day from 8:30AM to 5:00PM.
- At all other times, routing is handled by the Default Mailbox specified in 47-11-03: Default Mailbox Category and 47-11-03: Default Mailbox Number.

When setting up Answer Tables with multiple types, build the Answer Schedules in the following order:

- Range of Days
- Day of Week
- Date

<b>Type 3 (Date) Example</b>	
<b>Answer Table 1</b>	
	<b>Answer Schedule 1</b> Answer Schedule 1 is a Range of Days schedule that starts schedule that runs every day from 8:30AM to 5:00PM.
	47-12-01: Entry01 Schedule Type = 2
	47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB Num = 1
	47-12-03: Entry01 Day = 1 (Entry does not matter)
	47-12-04: Entry01 Start Day = 1 (Sunday)
	47-12-05: Entry01 End Day = 1 (Sunday)
	47-12-06: Entry01 Date (MMDD) = 0000 (Entry does not matter)
	47-12-07: Entry01 Start Time = 0830 (8:30AM)
	47-12-08: Entry01 End Time = 1700 (5:00PM)
	<b>Answer Schedule 2</b> Answer Schedule 2 is a Date schedule that runs only on Christmas day from 8:30AM to 5:00PM.
	47-12-01: Entry01 Schedule Type = 3
	47-12-02: Entry01 MB Ctg = 3 47-12-02: Entry01 MB Num = 9
	47-12-03: Entry01 Day = 1 (Entry does not matter)
	47-12-04: Entry01 Start Day = 1 (Entry does not matter)
	47-12-05: Entry01 End Day = 1 (Entry does not matter)
	47-12-06: Entry01 Date (MMDD) = 1225 (December 25, Christmas day)
	47-12-07: Entry01 Start Time = 0830 (8:30AM)
47-12-08: Entry01 End Time = 1700 (5:00PM)

# Program 47 : InMail

## 47-13: VM8000 InMail Dial Action Tables

**Level:**  
**IN**

### Description

Use **47-13: VM8000 InMail Dial Action Tables** to set up the VM8000 InMail Dial Action Tables. The Dial Action Table defines the options than an Automated Attendant caller can dial. A Dial Action Table is associated with a Call Routing Mailbox, which is in turn associated with an Answer Table. When an Answer Table is active, its associated Call Routing Mailbox selects the Dial Action Table which provides dialing options to callers. The illustration below shows how this works in a default VM8000 InMail system. There are 16 Dial Action Tables.

# InMail

## Default

### Automated Attendant Answering

## Dial Action Table Actions

### ❑ TRF Action - Screened Transfer (1) (TRF)

Use this action to allow an Automated Attendant caller to place a Screened Transfer to an extension. After an Automated Attendant caller dials an extension, VM8000 InMail calls (screens) the destination to see if the transfer can go through.

If the destination is available, the Automated Attendant rings it. If the destination answers, the call goes through.

If the destination does not answer during a preset interval, is busy, or is in Do Not Disturb, the Automated Attendant does not extend the call. It then provides the caller with additional options.

#### Number Option

Normally, the corresponding Number option should be XXX. Note that the key you choose for this action is the first digit of the called extension number.

For example, to allow callers to place Screened Transfers to extensions 301~399, for key 3 enter TRF for the *Action* and XXX for the corresponding *Number*.

To have Screened Transfer call a specific extension, the corresponding Number option should be that extension number. The caller then dials that single digit to reach the extension.

For example, to have callers dial 8 to reach extension 303, for key 8 enter TRF for the *Action* and 303 for the corresponding *Number*.

### ❑ UTRF Action – Unscreened Transfer (2) (UTRF)

Use this action to allow an Automated Attendant caller to place an Unscreened Transfer to an extension. This is similar to telephone system unscreened transfers in which the transferring party immediately extends the call. After an Automated Attendant caller dials an extension, VM8000 InMail transfers the call to the destination and hangs up. Any recalls or additional routing are handled by the telephone system – just as with any other unscreened transfer.

#### Number Option

Normally, the corresponding Number option should be XXX. Note that the key you choose for this action is the first digit of the called extension number.

For example, to allow callers to place Unscreened Transfers to extensions 301~399, for key 3 enter UTRF for the *Action* and XXX for the corresponding *Number*.

---

---

To have Unscreened Transfer call a specific extension, the corresponding Number option should be that extension number. The caller then dials that single digit to reach the extension.

For example, to have callers dial 8 to reach extension 303, for key 8 enter UTRF for the *Action* and 303 for the corresponding *Number*.

❑ **REC1 Action – Quick Message With Greeting (3) (REC1)**

Use this action to allow an Automated Attendant caller to leave a Quick Message at an extension. With this action, the caller hears the extension greeting prior to leaving the message.

Number Options

To have the caller leave a quick Message at a specific extension, the corresponding Number option should be the extension number.

To have the caller leave a Quick Message at any caller-dialed extension, the corresponding Number option should be IXXX.

To have the caller leave a Quick Message at a caller-dialed extension in a specific range, the corresponding Number option should be XXX.

For example, to allow callers to leave a Quick Message extensions 301~399, for key 3 enter REC1 for the *Action* and XXX for the corresponding *Number*.

❑ **REC2 Action – Quick Message Without Greeting (4) (REC2)**

Use this action to allow an Automated Attendant caller to leave a Quick Message at an extension. With this action, the caller *does not* hear the extension greeting prior to leaving the message. Instead, the caller hears the voice prompt *Recording* followed by a beep.

Number Option

To have the caller leave a quick Message at a specific extension, the corresponding Number option should be the extension number.

To have the caller leave a Quick Message at any caller-dialed extension, the corresponding Number option should be IXXX.

To have the caller leave a Quick Message at a caller-dialed extension in a specific range, the corresponding Number option should be XXX.

For example, to allow callers to leave a Quick Message extensions 301~399, for key 3 enter REC2 for the *Action* and XXX for the corresponding *Number*.

---

---

❑ **LOGON Action – Log Onto Voice Mail (5) (LOGON)**

Use this key action to allow an Automated Attendant caller to log onto Voice Mail. Depending on programming (see *Number Option* below), the caller is logged directly into a Subscriber Mailbox or is prompted to enter a Subscriber Mailbox of their own choosing. **You cannot use the LOGON option with Call Routing and Announcement Mailboxes.**

Number Option

To log directly into a specific Subscriber Mailbox, enter the **mailbox number** in the corresponding Number option.

For example, to have key 4 log directly into Subscriber Mailbox 305, for key 4 enter LOGON for the *Action* and 305 for the corresponding *Number*.

To have VM8000 InMail request Automated Attendant callers to select a Subscriber Mailbox to log into, enter **N** in the corresponding Number option. The key you choose must represent the first digit in the Subscriber Mailbox numbers.

For example, to have the Automated Attendant request callers enter the number of the Subscriber Mailbox where they want to log into, for key 3 enter LOGON for the *Action* and N for the corresponding *Number*. When callers dial 3, they hear, *Please enter your mailbox number*.

To have VM8000 InMail require Automated Attendant callers to enter a Subscriber Mailbox to log into (without playing an announcement), enter **XXX** in the corresponding Number option. The key you choose must represent the first digit in the Subscriber Mailbox numbers.

For example, to allow callers to log onto mailboxes 301~399, for key 3 enter LOGON for the *Action* and XXX for the corresponding *Number*.

To log into **any** valid Subscriber Mailbox, enter **IXXX** in the corresponding Number option.

For example, to allow callers to dial 1 plus any Subscriber Mailbox number to log on, for key 1 enter LOGON for the *Action* and IXXX for the corresponding *Number*.

❑ **Hang Up Action (6) (HNGUP)**

When an Automated Attendant caller presses a key assigned to this action, VM8000 InMail says *Goodbye* and immediately hangs up.

Number Option

No entry is required in the corresponding Number Option.

---

---

❑ **GOTO Action – Go to Mailbox (7) (GOTO)**

Use this option to provide Automated Attendant callers with the ability to route to Call Routing and Announcement Mailboxes. For example, a caller can dial a digit for Sales, and then go to the Call Routing or Announcement Mailbox that provides the dialing options and instructions for Sales.

Number Option

To have Automated Attendant callers dial a single digit to go to a Call Routing or Announcement Mailbox, enter the **mailbox number** in the corresponding Number option.

For example, to have key 1 go to Call Routing Mailbox 01, for key 1 enter GOTO for the *Action* and 01 for the corresponding *Number*.

To have VM8000 InMail require Automated Attendant callers to enter a Call Routing or Announcement Mailbox to go to, enter **XXX** in the corresponding Number option. The key you choose must represent the first digit in the mailbox number.

For example, to allow callers to go to mailboxes 000~015, for key 0 enter GOTO for the *Action* and XXX for the corresponding *Number*.

To log into **any** valid Call Routing or Subscriber Mailbox, enter **IXXX** in the corresponding Number option.

For example, to allow callers to dial 1 plus any Call Routing or Announcement Mailbox number to go to, for key 1 enter GOTO for the *Action* and IXXX for the corresponding *Number*.

❑ **UND Action – Undefined Routing (0) (UND)**

Use this key action if you want a key to have no routing (no operation). When an Automated Attendant caller presses an undefined key, they hear, *That is an invalid entry*. The caller can then dial another option.

**Input Data**

Dial Action Table Number	01~16
--------------------------	-------

Key No.	Dial Action Table Action	Additional Data
1	<input type="radio"/> TRF Action - Screened Transfer (1) (TRF)	<p><input type="radio"/> <b>Digits</b>                      Entry : <b>0-9, #, and *</b> (8 digits max.) Use Dial Action Table digits to route an Automated Attendant call to a specific location (such as an extension). For example, to set up a TRF Action to route to extension 305, for 3 enter TRF for the <i>Action</i> and 305 for the corresponding <i>Number</i>.</p> <p><input type="radio"/> <b>Caller Dialed Digits</b>    Entry : <b>X</b> (Entered by pressing LK2) Use the X option to route an Automated Attendant call based on digits the caller dials. Each X entry represents one caller-dialed digit. For example, to set up a TRF Action to route to any caller dialed extension in the 301'399 range, for 3 enter TRF for the <i>Action</i> and XXX for the corresponding <i>Number</i>.</p> <p><input type="radio"/> <b>Ignore Digits</b>                      Entry : <b>I</b> (Entered by pressing LK3) Use the I option to represent any digit dialed by the Automated Attendant caller that VM8000 InMail ignores for routing. An example of this is REC action assigned to the * key in Dial Action Table 1 by default. The <i>Action</i> is REC2 and the <i>Number</i> is IXXX. This means that a caller can dial * + any mailbox number to leave a Quick Message in that mailbox. VM8000 InMail ignores the first digit dialed by the caller (*), and routes according to the next 3 digits dialed.</p> <p><input type="radio"/> <b>No Routing</b>                      Entry : <b>N</b> (Entered by pressing LK1) Use the N option when you want no Automated Attendant routing to automatically occur. This can be used with the LOGON action when you want to prompt the caller to enter a mailbox number. To do this for the # key (for example), for the # key enter LOGON for the <i>Action</i> and N for the corresponding <i>Number</i>. When the caller dials #, they hear, <i>Please enter the mailbox number. Or, to exit, press the pound key.</i>"</p> <p><input type="radio"/> <b>Pause</b>                                      Entry : <b>P</b> (Entered by pressing LK4) Use the P option when you want the Automated Attendant to pause while dialing.</p>
2	<input type="radio"/> UTRF Action - Unscreened Transfer (2) (UTRF)	
3	<input type="radio"/> REC1 Action - Quick Message With Greeting (3) (REC1)	
4	<input type="radio"/> REC2 Action - Quick Message Without Greeting (4) (REC2)	
5	<input type="radio"/> LOGON Action - Log Onto Voice Mail (5) (LOGON)	
6	<input type="radio"/> Hang Up Action (6) (HNGUP)	
7	<input type="radio"/> GOTO Action - Go to Mailbox (7) (GOTO)	
8	<input type="radio"/> UND Action - Undefined Routing (0) (UND)	
9		
0		
*		
#		
TIMEOUT		

**Defaults**

<b>Dial Action Table Default Settings</b>		
<b>Key</b>	<b>Dial Action Table 1</b>	<b>Dial Action Tables 2~16</b>
<b>1</b>	UND (OT) (Undefined)  UTRF to XXX (AU) (Unscreened Transfer to user-dialed extension)	UND (Undefined)
<b>2</b>	UTRF to XXX (OT)  UND (AU)	UND
<b>3</b>	UTRF to XXX	UND
<b>4</b>	UND	UND
<b>5</b>	UND	UND
<b>6</b>	UND	UND
<b>7</b>	UND	UND
<b>8</b>	UND	UND
<b>9</b>	HNGUP (Hangup)	UND
<b>0</b>	UTRF to 200 (OT)  UTRF to 101 (AU)	UND
<b>*</b>	REC1 to IXXX (Quick Message with greeting to user-dialed extension)	UND
<b>#</b>	LOGON to IXXX (Logon to user-dialed mailbox)	UND
<b>TIMEOUT</b>	UTRF to 200 (OT)  UTRF to 101 (AU)	UND

 **TIMEOUT** provides the routing for rotary dial callers.

## Program 47 : InMail

### 47-15 : Routing Directory Mailbox Options

**Level:**  
**IN**

#### Description

Use **47-15 : Routing Directory Mailbox Options** to define the Routing Directory Mailbox Options. This data is referred if Program 47-07-02 (Routing Master Mailbox Type) was set to Type 4 (Directory).

#### Input Data

Master Mailbox Number	1~32
-----------------------	------

Item No.	Item	Input Data	Default
01	Minimum Number of Letters Required	1~3	1
02	Directory List Number to Use	1~8	1
03	Name Match	0 = First 1 = Last	0
04	Transfer Option	0 = TRF 1 = UTRF	0
05	Screened Transfer Timeout	0~255	15
06	Time Limit for Dialing Commands	0~99	5
07	Fax Detection	0 = Disable 1 = Enable	0
08	Next Call Routing Mailbox	0~32	0
09	Fax Extension	Up to eight digits	No entry

#### Conditions

None

#### Feature Cross Reference

## 47-16 : InMail Language License

**Level:**  
**IN**

### Description

Use **47-16 : InMail Language License** to define the language order InMail uses. Depending on the language license number, InMail uses the languages defined starting from Language 1. For example, if the system has a two language license InMail uses the language defined as Language 1 and 2 in the provided default table.

### Input Data

Language	1~20
----------	------

Item No.	Item	Input Data	Default
01	Language License	01 = US English	Refer to <a href="#">Table 2-13 47-16-01 Default Table</a>
		02 = UK English	
		03 = Australian English	
		04 = French Canadian	
		05 = Dutch	
		06 = Mexican Spanish	
		07 = Latin American Spanish	
		08 = Italian	
		09 = German	
		10 = Madrid Spanish	
		11 = Norwegian	
		12 = Parisian French	
		13 = Brazilian Portuguese	
		14 = Japanese	
		15 = Mandarin Chinese	
		16 = Korean	
		17 = Iberian Portuguese	
		18 = Greek	
		19 = Danish	
		20 = Swedish

## Program 47 : InMail

### 47-23: Group Mailbox Find-Me Follow-Me Options

**Level:**

**IN**

#### Description

Use **47-23: Group Mailbox Find-Me Follow-Me Options** to set the InMail Group Mailbox Message Find-Me Follow-Me parameters.

#### Input Data

Group Mailbox Number	1~32
----------------------	------

#### Input Data

Index Number	1~3
--------------	-----

Item No.	Item	Input Data	Default
01	Find-Me Follow-Me	0 = Off 1 = On	0
02	Find-Me Follow-Me Begin Hour	00~23 (00 = 12:00 AM, 23 = 11:00 PM)	00
03	Find-Me Follow-Me End Hour	00~23 (00 = 12:00 AM, 23 = 11:00 PM)	00
04	Find-Me Follow-Me Number	Up to 16 digits	No Setting

# Program 50 : Common Channel Interoffice Signaling Service

## 50-01: CCIS System Setting

Level:  
IN

Program

50

### Description

Use **Program 50-01: CCIS System Setting** to set the availability of CCIS in the UNIVERGE SV8100. No other CCIS settings function if this program is disabled.

### Input Data

Item No.	Item	Input Data	Default
01	CCIS Availability	0 = Disable 1 = Enable	0

### Conditions

None

### Feature Cross Reference

None

## Program 50 : Common Channel Interoffice Signaling Service

### 50-02: Connecting System Settings

Level:  
IN

#### Description

Use **Program 50-02: Connecting System Settings** to define the settings for each CCIS Route ID.

#### Input Data

CCIS Route ID	Route ID 1~8: CCIS via DTI Route ID 9: CCIS via IAD/CD-PVAA (IP-CCIS)
---------------	--

Item No.	Item	Description	Input Data	Default
01	<b>Port Number of Common Signaling Channel (T1)</b>	Specify the Trunk port to send D-channel information. This program is available for using DTI package.	0~200	0
02	<b>Common Signaling Channel Data Speed Assignment (T1)</b>	Assign the baud rate of Common Signaling Channel on DTI package.	0 = 64Kbps 1 = 56Kbps 2 = 48Kbps(1) 3 = 48Kbps(2)	1
03	<b>Originating Point Code</b>	Assign the Point Code of own side.	0~16367	0
04	<b>Destination Point Code (T1)</b>	Assign the Point Code of destination side on the DTI link.	0~16367	0
05	<b>Calling Name Indication (T1)</b>	Calling name indication is not sent to destination party if switch is set to Disable.	0 = Disable 1 = Enable	1
06	<b>Channel Number on the CCH package Assignment</b>	0: No setting 1: Channel number on the CCH Package	0-4	0

**Conditions**

- If 56K K-CCIS is used, 24 Multi-Frame (ESF) must be assigned in Program 10-03-02.
- DPC must be what the OPC is on the opposite side of the link.

### 50-03: CCIS Destination System Settings

**Level:**  
**IN**

#### Description

Use **Program 50-03: CCIS Destination System Settings** to assign information of remote systems in a CCIS Network.

#### Input Data

CCIS System ID	1~255
----------------	-------

Item No.	Item	Description	Input Data	Default
01	<b>Destination Point Code</b>	Define the Point Code at the Destination Party.	0~16367	0
02	<b>CCIS Route ID (T1 only)</b>	Select the CCIS Route ID defined in Program 14-13 when the user tries to access the system in a CCIS network.	0~8 (CCIS Route IDs 5~8 are for future use and should not be used.)	0
03	<b>IP Address (IP only)</b>	Assign the IP Address to a CCIS System ID.	xxx.xxx.xxx.xxx (xxx = 0~255)	0.0.0.0
04	<b>Point Code Availability</b>	Define if the system associated with Destination Code can be Reached (1) or Not Reached (0). If set to 0 (Disable), when using the IP-CCIS, that system cannot be called until it is set to 1 (Enable).	0 = Disable 1 = Enable	1

### 50-09: CCIS Centralized BLF Sending Extension Number Assignment

**Level:**  
**IN**

#### Description

Use **Program 50-09: CCIS Centralized BLF Sending Extension Number Assignment** to define the extension number for sending BLF messages. One extension number can have a sending switch for each sending group, which is defined in Program 50-08.

#### Input Data

Entry	1~120
-------	-------

Item No.	Item	Input Data	Default	Description
01	<b>Extension Number</b>	xxxxxxx (up to eight digits)	No Setting	Extension number. BLF message is indicated when the status of the specified extension number is changed.
02	<b>Send to Sending Group 1</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 1 assigned in PRG 50-08-XX.
03	<b>Send to Sending Group 2</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 2 assigned in PRG 50-08-XX.
04	<b>Send to Sending Group 3</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 3 assigned in PRG 50-08-XX.
05	<b>Send to Sending Group 4</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 4 assigned in PRG 50-08-XX.
06	<b>Send to Sending Group 5</b>	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 5 assigned in PRG 50-08-XX.

---

---

Item No.	Item	Input Data	Default	Description
07	Send to Sending Group 6	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 6 assigned in PRG 50-08-XX.
08	Send to Sending Group 7	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 7 assigned in PRG 50-08-XX.
09	Send to Sending Group 8	0 = Disable 1 = Enable	0	Enable (0) or Disable (1) the ability to send the BLF to Send Group 8 assigned in PRG 50-08-XX.

# Program 51 : NetLink Service

## 51-01 : NetLink System Property Setting

**Level:**  
**IN**

Program

10

### Description

Use **Program 51-01 : NetLink System Property Setting** to define the parameters of the NetLink feature.

-  Each system must be set with its own information.
-  When the NetLink System ID is changed (Item 01), the system must be reset.

### Input Data

Item No.	Item	Input Data	Default
01	<b>NetLink System ID</b> This is the ID of each NetLink system. Setting should insure that no overlap occurs between nodes.	0~50 (0 = No operation)	0
02	<b>Primary Candidate Order</b> When the Primary system is turned off or disconnect from network, this value is used to select a new Primary system. Smaller number is higher priority.  If this value is the same number, the System ID (PRG 51-01-01) is referred, and the system which has the smaller number is selected as Primary system.	1~50	30
03	<b>Secondary System Flag</b> 0: NetLink is dynamically established based on Node List in PRG 51-03-01. Primary System will be selected in the order which the system wakes up. 1: The system connects with Top Priority Primary System.  If Top Priority Primary System was not found, the system searches Primary System like this setting is 0.	0 = Disable 1 = Enable	0

**Conditions**

None

---

**Feature Cross Reference**

None

## Program 51 : NetLink Service

### 51-02 : NetLink System Individual Setting

**Level:**  
**IN**

#### Description

Use **Program 51-02: NetLink System Individual Setting** to set system data for each NetLink system.

#### Input Data

System ID	1~50
-----------	------

Item No.	Item	Input Data	Default
01	<b>System Name</b> This is the name given to each system.	Up to 20 characters.	blank
02	<b>Time Zone (Hour)</b> Determines the time offset from the Primary system. (0 = -12, 1 = -11, 2 = -10.... 12 = 0 13 = +1, 14 = +2, 24 = +12) This setting affects Time Display on MLT (see 51-13-02).	0~24 (-12 ~ +12 hours)	12
03	<b>Time Zone (Minute)</b> Determines the time offset from the Primary system. (0 = -60, 1 = -59, 2 = -58.... 120 = +60) This setting affects Time Display on MLT (see 51-13-02).	0~120 (-60 ~ +60)	60
04	<b>Authenticate System MAC Address</b> To use this function, set PRG 51-13-03 to 1 (enable), NetLink systems will reject the connection from unauthenticated system access.	00-00-00-00-00-00~ FF-FF-FF-FF-FF-FF	00-00-00-00-00-00

**Conditions**

None

---

**Feature Cross Reference**

None

## Program 51 : NetLink Service

### 51-03 : NetLink Internet Protocol Address List Setting

**Level:**  
**IN**

#### Description

Use **Program 51-03 : NetLink Internet Protocol Address List Setting** to set the IP address of the NetLink system.

#### Input Data

List ID	1~50
---------	------

Item No.	Item	Input Data	Default
01	<p><b>Internet Protocol Address List</b></p> <p>The system seeks the Primary system based on this list.</p> <p>When there is no Primary system yet, or Fail Over occurs, Node List is referred to establish new link. This setting is necessary when PRG 51-01-03 is 0, or PRG 51-05-02 is other than 0.</p> <p>Once the system connects to the Primary System, this setting is updated by the Primary system when PRG 51-13-01 is On. So, enter IP address of the systems which may become Primary at least.</p>	<p>0.0.0.0 ~ 126.255.255.254</p> <p>128.0.0.1 ~ 191.255.255.254</p> <p>192.0.0.1 ~ 223.255.255.254</p>	0.0.0.0

#### Conditions

- The system seeks Primary system based on this list.
- When there is no Primary System yet, or Fail Over occurs, Node List is referred to establish new link.
- This setting is necessary when PRG 51-01-03 is 0, or PRG 51-05-02 is other than 0. Once the system connects to the Primary System, this setting is updated by the Primary system when PRG 51-13-01 is on. So, enter IP address of the systems which may become Primary at least.

**Feature Cross Reference**

None

### 51-05 : NetLink Timer Settings

**Level:**  
**IN**

#### Description

Use **Program 51-05: NetLink Timer Settings** to set the various timers within the NetLink system.

Item No.	Item	Input Data	Default
01	<b>Keep Alive Sending Interval</b> This is the Keep Alive timer sending time from the Secondary system to confirm communication with the Primary system.	1~3600	5
02	<b>Keep Alive Response Waiting Time</b> This is the time interval the Secondary system waits for a response from the Primary system before cutting off communication.	0, 5~10800 (0 = infinity)	0
03	<b>Primary Search Packet Sending Interval</b> While searching the Primary system, the system sends a packet at this interval.	1~3600	5
04	<b>Primary Search Time Maximum Value</b> Total time of Primary system seek time.	5~10800	20
05	<b>Top Priority Primary Detection Packet Sending Interval</b> When current Primary system is not Top Priority Primary System, the system sends packet to check if Top Priority System exists.	1~3600	10
06	<b>Primary Compulsion Specification Trial Maximum Time</b> When the forced change Primary command is executed, the system will search the new Primary system for this amount of time.	1~10800	30
07	<b>Socket Refresh Time</b> For some reason, the IP connection may become unstable. Then keep-alive function does not work. To avoid this, if there is no data traffic for this time, the socket is refreshed.	20~3600	40

### 51-09 : NetLink Communication Port Settings

**Level:**  
**IN**

#### Description

Use **Program 51-09 : NetLink Communication Port Settings** to set the various communication ports used on the system.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Primary Waiting Port</b> Sets the communication port that the Primary system uses to communicate with the Secondary system.	0~65535	58000
02	<b>Communication Waiting Port</b> Port used to communicate between nodes. It is always opened by all nodes.	0~65535	58001
03	<b>Secondary Communication Port</b> Secondary system communicates with Primary system at this port number. If 0 is specified, temporary port is selected by dynamic.	0~65535	0
04	<b>Primary Search Port</b> When Fail-Over occurred, each system communicates with other system at this port number. If 0 is set, temporary port is selected by dynamic. If 0 is not specified, the number and continuous maximum 50 number is used. (Ex. 5000 is specified 5001, 5002...5049 will be used).	0~65535	0
05	<b>Primary Detection Port</b> Enter port number to seek the Top Priority Primary system. If 0 is specified, temporary port is selected by dynamic.	0~65535	0
06	<b>Database Replication Communication Listening Port</b> This port is used to replicate database.	0~65535	58002
07	<b>Database Replication Primary Detection Port</b> This port is used to replicate database. If 0 is specified, temporary port is selected by dynamic.	0~65535	0

### 51-13: NetLink Options

**Level:**

**IN**

#### Description

Use **Program 51-13: NetLink Options** to enable automatic IP address List Operation updates, time zone information, and MAC address authorization.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Automatic IP Address List Operation Update</b> When set to 1 (On), the list in PRG 51-03-01 is automatically updated.	0 = Disable (Off) 1 = Enable (On)	1
02	<b>Time Zone Option</b> When set to 0, the following features are affected: Clock Display, Incoming/Outgoing History List. When set to 1, the following features are affected: VRS Time Announce, Date and Time Setting Service Code, Alarm Clock setting, and Hotel mode wake-up call.	0 = Disable (Off) 1 = Enable (On)	0
03	<b>MAC Address Authorization Enable</b> Refers to PRG 51-02-04 for setting MAC address.	0 = Disable (Off) 1 = Enable (On)	0

#### Conditions

# Program 51 : NetLink Service

## 51-14: NetLink System Control

**Level:**  
**IN**

### Description

Use **Program 51-14: NetLink System Control** to delete system and slot information.

(This program is available only via telephone programming and not through PC Programming).

### Input Data

System ID	1~50
-----------	------

Menu Number	1 = System information deletion
-------------	---------------------------------

Item No.	Item	Input Data	Default
01	<b>Delete System Information</b> This command is used to delete system information and the slot information. The system must be disconnected.	1~50	1

### Conditions

None

### Feature Cross Reference

## Program 51 : NetLink Service

### *51-15: Demonstration Setting*

**Level:**  
**IN**

---

#### **Description**

Use **Program 51-15: Demonstration Setting** to automatically set the minimum setting values in NetLink. A system reset occurs after this command is executed.

(This program is available only via telephone programming and not through PC Programming).

#### **Input Data**

Menu Number	
	1 = Primary automatic setting
	2 = Secondary 1 - automatic operation setting
	3 = Secondary 2 - automatic operation setting
	4 = Secondary 3 - automatic operation setting

#### **Conditions**

None

## Program 51 : NetLink Service

### 51-16: NetLink System Data Replication Mode Setting

**Level:**  
**IN**

#### Description

Use **Program 51-16: NetLink System Data Replication Mode Setting** to set the system data replication between the Primary and Secondary systems.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>System Data Replication Mode</b> Sets the synchronous mode of the system data. When set to 1 (Setting Time Mode), the systems are synchronized at the time set in Item 02 below.  When set to 2 (Interval Mode), the systems are synchronized at regular time intervals set in Item 03 below.	0 = Disable 1 = Setting Time Mode 2 = Interval Mode	0
02	<b>System Data Replication Time Setting</b> Sets the time of day that both systems synchronize database (when Item 01 is set to 1.)	0000~2359	0200
03	<b>System Data Replication Interval Setting</b> Sets the time interval that both systems synchronize database (when Item 01 is set to 2).	15~1440 (minutes)	30 (min.)
04	<b>Replication Time Stamp</b> Show next replication time. (Read-Only)	Month: 0~12	–
		Day: 0~31	–
		Hour: 00~23	–
		Minute: 00~59	–
05	<b>System Data Replication Wait Time</b> This sets the wait time until replication starts when NetLink is created.	1~86400 (seconds) (86400sec, 1day)	180 sec (3min)
06	<b>System Data Replication Interval</b> This program sets an interval time to start replication to the next node after replication to one node is completed.	0~86400 (seconds) (86400sec, 1day)	1 sec

## Program 51 : NetLink Service

### 51-17:NetLink DT700 Server Individual Information Setting

**Level:**  
**IN**

#### Description

Use **Program 51-17: NetLink DT700 Server individual Information Setting** to set the information of DT700 Server on each system in NetLink.

#### Input Data

System ID	1 -50
-----------	-------

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Register Port</b>	0~65535	5080
02	<b>Subscribe Session Port</b>	0~65535	5081

#### Conditions

- Make sure TCP/UDP port doesn't interfere with other IP Terminal. Exception with 10-46-06, 10-46-13.
- If 10-46-14 is ON make sure it wont have a same IP Address in the same Network.
- When the 51-01-01 is 0 this program will be ignored. Instead it will use 10-46-13.

#### Feature Cross Reference

None

## Program 51 : NetLink Service

### 51-18: NetLink Configuration Options

**Level:**  
**IN**

#### Description

Use **Program 51-18: NetLink Configuration Options** to set the NetLink Fail-Over limits.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>NetLink Fail-Over Limit</b> When tear-down of network was repeated more than the specified times, NetLink is operated stand-alone.	0, 2~10 (0 = Infinity)	0

#### Conditions

None

#### Feature Cross Reference

None

## Program 51 : NetLink Service

### 51-19: NetLink IP Trunk (SIP) Calling Party Number Setup for Extension

**Level:**

**IN**

#### Description

Use **Program 51-19: NetLink IP Trunk (SIP) Calling Party Number Setup for Extension** to set CPN transmission for each secondary system.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>NetLink CPN Transmission</b> This program assigns transmission of Calling Party Number (CPN) from PRG 21-19 for each secondary system. The transmission applies for every extension.	0 = Disable 1 = Enable	1

# Program 80 : Basic Hardware Setup for System

## 80-01 : Service Tone Setup

Level:  
IN

### Description

Use **Program 80-01: Service Tone Setup** to define up to 64 Service Tones. Each service tone is defined by the combination of 32 Basic Tones.

### Input Data

Service Tone Number	01~64
---------------------	-------

Item No.	Item	Input Data
01	Repeat Count	0~255 (0 = until On-Hook)

Unit Number	1~8
-------------	-----

Item No.	Item	Input Data
02	Basic Tone Number	0~33 (0 = No Tone) (33 = Default Time Slot)
03	Duration Count	0~255 (0,100~25500ms)
04	Gain Level (dB)	0~63 (-15.5 ~ +15.5)

Program

80

Table 2-14 Basic Tones

Basic Tone No.	Frequency (Hz)	Level (dB)	Basic Tone No.	Frequency (Hz)	Level (dB)
01	420	-13	17	520 / 650	-13 / -19
02	520	-13	18	650 / 780	-13 / -19
03	580	-13	19	780 / 1040	-13 / -19
04	660	-13	20	1040	-13
05	700	-13	21	450	-13
06	800	-13	22	950	-13
07	880	-13	23	1800	-13
08	1050	-13	24	400/450	-13/-13
09	430	-13	25	400	-13
10	440 / 480	-13 / -13	26	350 / 440	-13/-13
11	480 / 620	-13 / -13	27	420 (Amplitude Modulated)	-13
12	440	-16	28	-- Reserve --	-
13	-- Reserve --	-	29	-- Reserve --	-
14	520 / 650	-19 / -13	30	-- Reserve --	-
15	650 / 780	-19 / -13	31	-- Reserve --	-
16	780 / 1040	-19 / -13	32	-- Reserve --	-

### Conditions

- The system must be reset for any changes to these items to take affect.

## Feature Cross Reference

- Selectable Ring Tones

## Program 80 : Basic Hardware Setup for System

### 80-02 : DTMF Tone Setup

Level:	Level:
MF (OT)	IN (AU)

#### Description

Use **Program 80-02: DTMF Tone Setup** to define the duration (On time) and pause (Off time) for DTMF dialing. This option affects all trunk line calls system wide. Make separate entries for duration and pause. It is also possible to adjust the level of both high and low frequency tone.

#### Input Data

Item No.	Item	Input Data	Default
01	Duration	1~255	5 (100ms)
02	Pause	1~255	5 (100ms)
03	Tone Level (Low) (dB)	1~97 (-45:0...+3)	73 (-9dB)
04	Tone Level (High)	1~97 (-45:0...+3)	77 (-7dB)

# Program 80 : Basic Hardware Setup for System

## 80-04 : Call Progress Tone Detector Setup

**Level:**  
**IN**

### Description

Use **Program 80-04 : Call Progress Tone Detector Setup** to define the various levels and timers for the Call Progress Tone Detector.

Tone Detector Type:

- 1 = Dial Tone for Trunk
- 2 = Busy Tone for Trunk
- 3 = Ring Back Tone for Trunk
- 4, 5 = Reserved

### Input Data

Tone Detector Type Number	1 = Dial Tone for Trunk 2 = Busy Tone for Trunk 3 = Ring Back Tone for Trunk 4 = --- Reserved --- 5 = --- Reserved ---
---------------------------	--

Item No	Item	Input Data
01	<b>Detection Level</b>	0 = 0dBm ~ -25dBm 1 = -5dBm ~ -30dBm 2 = -10dBm ~ -35dBm 3 = -15dBm ~ -40dBm 4 = -20dBm ~ -45dBm 5 = -25dBm ~ -50dBm 6 = -30dBm ~ -55dBm
02	<b>Min. Detection Level</b>	0~15 0 = -10dBm(0) to -25dBm(15) 1 = -15dBm(0) to -30dBm(15) 2 = -20dBm(0) to -35dBm(15) 3 = -25dBm(0) to -40dBm(15) 4 = -30dBm(0) to -45dBm(15) 5 = -35dBm(0) to -50dBm(15) 6 = -40dBm(0) to -55dBm(15)
03	<b>S/N Ratio</b>	0~4 (0dB ~ -20dB)

Item No	Item	Input Data
04	<b>No Tone Time</b>	0~255 (30+30~7680ms) (0 = not detect) 1~255 = 60~7680ms. The formula is 30+30N. When set to N=1, it means 30+30*1=60 When set to N=255, it means 30+30*255=7680
05	<b>Pulse Count</b>	1~255
06	<b>ON Minimum Time</b>	1~255 (30+30~7680ms)
07	<b>ON Maximum Time</b>	0~255 (30+30~7680ms)
08	<b>OFF Minimum Time</b>	1~255 (30+30~7680ms)
09	<b>OFF Maximum Time</b>	0~255 (30+30~7680ms)
12	<b>Frequency No. 1</b>	1~8 (Frequency Table No. set by 80-07)
13	<b>Frequency No. 2 (OT)</b>	1~8 (Frequency Table No. set by 80-07)
14	<b>Twist Level (OT)</b>	0-10 (1dB - 10dB)

### Default

Item	Name	Type 1 (DT)	Type 2 (BT)	Type 3 (RBT)	Type 4	Type 5
1	Detect Level	0 (-25dBm)	0 (-25dBm)	0 (-25dBm)	0	0
2	Min. detect level	15 (-25dBm)	15 (-25dBm)	15 (-25dBm)	0	0
3	S/N ratio	4 (-20dB)	4 (-20dB)	4 (-20dB)	0	0
4	No tone time	132 (3990ms)	132 (3990ms) (OT) 13 (420ms) (AU)	132 (3990ms)	0	0
5	Pulse Count	1	1 (OT) 2 (AU)	1	0	0
6	ON min. time	63 (1920ms) (OT) 9 (300ms) (AU)	12(390ms) (OT) 10(330ms) (AU)	25 (780ms)	0	0
7	ON max. time	0	20(630ms) (OT) 14(450ms) (AU)	40 (1230ms)	0	0
8	OFF min. time	1 (60ms)	12(390ms) (OT) 10(330ms) (AU)	52 (1590ms) (OT) 83(2520ms) (AU)	0	0
9	OFF max. time	1 (60ms)	20(630ms) (OT) 14(450ms) (AU)	80 (2430ms) (OT) 115(3480ms) (AU)	0	0

# Program 81 : Basic Hardware Setup for Trunk

## 81-02 : DIOPU Initial Data Setup

**Level:**  
**IN**

### Description

Use **Program 81-02 : DIOPU Initial Data Setup** to define the various basic timers for the DID Unit.

### Input Data

Item	Name	Input Data	Default
01	PCM Method Type	0 = u-law 1 = A-law	1 (A-law)
02	Answer Signal Time	1~255 (10~2550ms)	6 (60ms)
03	Clear Signal (Open Loop) Detection Time	1~255 (100~25500ms)	7 (700ms)
04	Ringing Signal Detection Minimum Time	1~255 (10~2550ms)	10 (100ms)
05	Hook Flash Time	1~255 (8~2040ms)	25 (200ms)
06	Pause Time	1~255 (32~8160ms)	94 (3008ms)
07	WINK/DELAY Duration Time	1~255 (10~2550ms)	20 (200ms)
08	Incoming-WINK/DELAY Send Time	1~255 (100~25500ms)	3 (300ms)
09	Seizure-WINK/DELAY Receive Max. Time	1~255 (100~25500ms)	48 (4800ms)
10	Receive WINK/DELAY Duration Min. Time	1~255 (10~2550ms)	13 (130ms)
11	Receive WINK/DELAY Duration Max. Time	1~255 (10~2550ms)	31 (310ms)
12	Receive DP Make Minimum Time	1~255 (2~510ms)	5 (10ms)
13	Receive DP Make Maximum Time	1~255 (2~510ms)	50 (100ms)

**Input Data**

Item	Name	Input Data	Default
14	Receive DP Break Minimum Time	1~255 (2~510ms)	5 (10ms)
15	Receive DP Break Maximum Time	1~255 (2~510ms)	50 (100ms)
16	Receive DP Inter-Digit Time	1~255 (32~8160ms)	6 (192ms)
17	Loop Off Guard Time	0~255 (0,100~25500ms)	20 (2000ms)
18	DP Break Time (10pps)	1~255 (4~1020ms)	16 (64ms)
19	DP Make Time (10pps)	1~255 (4~1020ms)	8 (32ms)
20	DP Inter-Digit Time (10pps)	1~255 (16~4080ms)	38 (608ms)
21	DP Break Time (20pps)	1~255 (4~1020ms)	8 (32ms)
22	DP Make Time (20pps)	1~255 (4~1020ms)	4 (16ms)
23	DP Inter-Digit Time (20pps)	1~255 (16~4080ms)	29 (464ms)

# Program 81 : Basic Hardware Setup for Trunk

## 81-03: ODT Initial Data Setup

**Level:**  
**IN**

### Description

Use **Program 81-03: ODT Initial Data Setup** to define the various basic timers for the E&M Tie Line Unit.

### Input Data

Item	Name	Input Data	Default
01	PCM Method Type	0 = u-law 1 = A-law	1 (A-law)
02	Answer Signal Time	1~255 (10~2550ms)	6 (60ms)
03	Clear Signal (Open Loop) Detection Time	1~255 (100~25500ms)	7 (700ms)
04	Ringing Signal Detection Minimum Time	1~255 (10~2550ms)	10 (100ms)
05	Ringing Signal Stop Detection Time	1~255 (100~25500ms)	7 (700ms)
06	Hook Flash Time	1~255 (10~2550ms)	20 (200ms)
07	Pause Time	1~255 (60~15300ms)	50 (3000ms)
08	WINK/DELAY Duration Time	1~255 (10~2550ms)	20 (200ms)
09	Incoming-WINK/DELAY Send Time	1~255 (100~25500ms)	3 (300ms)
10	Seizure-WINK/DELAY Receive Max. Time	1~255 (100~25500ms)	48 (4800ms)
11	Receive WINK/DELAY Duration Min. Time	1~255 (10~2550ms)	13 (130ms)
12	Receive WINK/DELAY Duration Max. Time	1~255 (10~2550ms)	31 (310ms)
13	Receive DP Make Minimum Time	1~255 (2~510ms)	5 (10ms)

**Input Data**

Item	Name	Input Data	Default
14	Receive DP Make Maximum Time	1~255 (2~510ms)	50 (100ms)
15	Receive DP Break Minimum Time	1~255 (2~510ms)	5 (10ms)
16	Receive DP Break Maximum Time	1~255 (2~510ms)	50 (100ms)
17	Pause Time after WINK/DELAY Receive	1~255 (8~2040ms)	13 (104ms)
18	Loop Off Guard Time	0~255 (0,100~25500ms)	20 (2000ms)
19	DP Break Time (10pps)	1~255 (2~512ms)	32 (64ms)
20	DP Make Time (10pps)	1~255 (2~512ms)	16 (32ms)
21	DP Inter-digit Time (10pps)	1~255 (32~8160ms)	19 (608ms)
22	DP Break Time (20pps)	1~255 (2~510ms)	16 (32ms)
23	DP Make Time (20pps)	1~255 (2~510ms)	8 (16ms)
24	DP Inter-digit Time (20pps)	1~255 (32~8160ms)	16 (512ms)

# Program 81 : Basic Hardware Setup for Trunk

## 81-05 : ISDN BRI & PRI Layer 2 (T-Point) Initial Data Setup

Level:

MF

### Description

Use **Program 81-05: ISDN BRI & PRI Layer 2 (T-Point) Initial Data Setup** to define the various basic data for layer 2 of ISDN BRI and PRI.

### Input Data

Item No.	Item	Description	Input Data	Default
01	<b>Timer T200</b>	Specify the timer value in 1/100ths of a second at the end of which transmission of a frame may be initiated.	1~255 (100~25500ms)	10 (1sec)
02	<b>Timer T201</b>	Specify the minimum time in 1/100ths of a second between retransmissions of the TEI Identity check messages.	1~255 (100~25500ms)	10 (1sec)
03	<b>Timer T202</b>	Specify the minimum time in 1/100ths of a second between retransmissions of the TEI Identity check messages.	1~255 (100~25500ms)	20 (2sec)
04	<b>Timer T203</b>	Specify the maximum time in 1/100ths of a second allowed without exchanging frames.	1~255 (100~25500ms)	250 (25sec)
05	<b>N200</b>	Specify the retransmission count.	1~255	3
06	<b>N201</b>	Specify the frame lengths in ocelots.	1~65535 (Byte)	260
07	<b>N202</b>	Specify the maximum number of transmissions from a TEI identity request message when the user requests a TEI.	1~255	3

# Program 81 : Basic Hardware Setup for Trunk

## 81-06 : ISDN BRI & PRI Layer 3 (T-Point) Timer Setup

Level:

IN

### Description

Use **Program 81-06 : ISDN BRI & PRI Layer 3 (T-Point) Timer Setup** to define the various basic timers for layer 3 of ISDN BRI/PRI (defined in Program 10-03-04).

### Input Data

Layer 3 Timer Type Number	1~5
---------------------------	-----

Item No.	Item	Description	Input Data	Default
01	<b>T301</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when the ALERT message is received.	0,180~254 (sec)	180 (sec)
02	<b>T302</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when the SETUP ACK is sent. Timer is also restarted when INFO is received.	1~254 (sec)	15 (sec)
03	<b>T303</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when SETUP is sent.	1~254 (sec)	4 (sec)
04	<b>T304</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when the SETUP ACK is received. Timer is also restarted when INFO is received.	0~254 (sec).	30 (sec)
05	<b>T305</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when DISC without progress No. 8 is sent.	1~254 (sec)	30 (sec)
06	<b>T306</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when DISC with progress indicator No. 8 is sent. This timer is valid for Network side use only.	0~254 (sec)	30 (sec)
07	<b>T307</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when SUSPEND ACK is sent. This timer is valid only for Network side use only.	1~254 (sec)	180 (sec)

Item No.	Item	Description	Input Data	Default
08	<b>T308</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when REL is sent.	1~254 (sec)	4 (sec)
09	<b>T309</b>	Specifies the timer value in 1/100ths of a second upon data link disconnection.	1-254 (sec)	90 (sec)
10	<b>T310</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when CALL PROC is sent.	0~180 (sec)	180 (sec)
11	<b>T312</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when SETUP is sent or re-sent on broadcast data link. This timer is only valid for Network side use only.	1~254 (sec)	6 (sec)
12	<b>T313</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when connection request is sent. Valid range 1 ~ 4 seconds in 1 second increments. Value of 0 indicates timer not used.	1~254 (sec)	4 (sec)
13	<b>T314</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when message segment is received.	1~254 (sec)	4 (sec)
14	<b>T316</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when RESTART is sent.	(T317+1)~254 (sec)	120 (sec)
15	<b>T317</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when RESTART is received.	1~(T316-1)	60 (sec)
16	<b>T318</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when RES is sent. This timer is valid for user side use only.	1~254 (sec)	4 (sec)
17	<b>T319</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when SUSPEND is sent. This timer is valid for user side use only.	1~254 (sec)	4 (sec)
18	<b>T320</b>	Specifies the timer value in 1/100ths of a second when B-channel access: connection is received, or D-channel access: DL-ESTABLISH confirmation or indication is received.	1~254 (sec)	30 (sec)
19	<b>T321</b>	Specifies the timer value in 1/100ths of a second of the timer to be started when STATUS ENQ is received.	1~254 (sec)	30 (sec)
20	<b>T322</b>	Specifies the timer value in 1/100ths of a second upon D-channel failure.	1~254 (sec)	4 (sec)

# Program 81 : Basic Hardware Setup for Trunk

## 81-08: T1 Trunk Timer Setup

**Level:**  
**IN**

### Description

Use **Program 81-08: T1 Trunk Timer Setup** to define the basic timer setting of each T1 Trunk type.

Item	Name	Input Data	Default
01	Answer Signal Detection Time (Loop)	1~250 (4ms ~ 1000ms)	15 60ms
02	Answer Signal Detection Time (Ground)	1~250 (4ms ~ 1000ms)	15 60ms
03	Answer Signal Detection Time (DID)	1~250 (4ms ~ 1000ms)	15 60ms
04	Answer Signal Detection Time (E&M)	1~250 (4ms ~ 1000ms)	15 60ms
05	Answer Signal Detection Time (OPX)	1~250 (4ms ~ 1000ms)	15 60ms
06	Clear Signal Detection Time (Loop)	1~255 (100ms ~ 25500ms)	6 600ms
07	Clear Signal Detection Time (Ground)	1~255 (100ms ~ 25500ms)	6 600ms
08	Clear Signal Detection Time (DID)	1~255 (100ms ~ 25500ms)	6 600ms
09	Clear Signal Detection Time (E&M)	1~255 (100ms ~ 25500ms)	6 600ms
10	Clear Signal Detection Time (OPX)	1~255 (100ms ~ 25500ms)	6 600ms
11	Ringling Signal Detection Time (Loop)	1~250 (8ms ~ 2000ms)	10 80ms
12	Ringling Signal Detection Time (Ground)	1~250 (8ms ~ 2000ms)	10 80ms
13	Ringling Signal Detection Time (DID)	1~250 (8ms ~ 2000ms)	10 80ms

Item	Name	Input Data	Default
14	<b>Ringing Signal Detection Time (E&amp;M)</b>	1~250 (8ms ~ 2000ms)	10 80ms
15	<b>Ringing Signal Detection Time (OPX)</b>	1~250 (8ms ~ 2000ms)	10 80ms
16	<b>Ringing Signal Stop Detection Time (Loop)</b>	1~255 (100ms ~ 25500ms)	50 5000ms
17	<b>Ringing Signal Stop Detection Time (Ground)</b>	1~255 (100ms ~ 25500ms)	50 5000ms
18	<b>Ringing Signal Stop Detection Time (DID)</b>	1~255 (100ms ~ 25500ms)	50 5000ms
19	<b>Ringing Signal Stop Detection Time (E&amp;M)</b>	1~255 (100ms ~ 25500ms)	50 5000ms
20	<b>Ringing Signal Stop Detection Time (OPX)</b>	1~255 (100ms ~ 25500ms)	50 5000ms
21	<b>Loop Current Detection Time (Loop)</b>	1~250 (4ms ~ 1000ms)	40 160ms
22	<b>Loop Current Detection Time (Ground)</b>	1~250 (4ms ~ 1000ms)	40 160ms
23	<b>Loop Current Detection Time (DID)</b>	1~250 (4ms ~ 1000ms)	40 160ms
24	<b>Loop Current Detection Time (E&amp;M)</b>	1~250 (4ms ~ 1000ms)	40 160ms
25	<b>Loop Current Detection Time (OPX)</b>	1~250 (4ms ~ 1000ms)	40 160ms
26	<b>DP Break Send Time (ALL)</b>	1~250 (4ms ~ 1000ms)	15 60ms
27	<b>DP Make Send Time (ALL)</b>	1~250 (4ms ~ 1000ms)	10 40ms
28	<b>DP Inter Digit Send Time (ALL)</b>	1~255 (100ms ~ 25500ms)	7 700ms
29	<b>Hook Flash Send Time (Loop)</b>	1~255 (100ms ~ 25500ms)	5 500ms
30	<b>Hook Flash Send Time (Ground)</b>	1~255 (100ms ~ 25500ms)	5 500ms
31	<b>Hook Flash Send Time (DID)</b>	1~255 (100ms ~ 25500ms)	5 500ms
32	<b>Hook Flash Send Time (E&amp;M)</b>	1~255 (100ms ~ 25500ms)	5 500ms

Item	Name	Input Data	Default
33	Hook Flash Send Time (OPX)	1~255 (100ms ~ 25500ms)	5 500ms
34	Pause Send Time (ALL)	1~255 (1sec ~ 255sec)	3 3sec
35	Wink Send Duration Time (DID)	1~250 (8ms ~ 2000ms)	25 200ms
36	Delay Send Duration Time (DID)	1~250 (8ms ~ 2000ms)	25 200ms
37	Incoming-Wink Send Time (DID)	1~255 (100ms ~ 25500ms)	3 300ms
38	Wink Send Duration Time (E&M)	1~250 (8ms ~ 2000ms)	25 200ms
39	Delay Send Duration Time (E&M)	1~250 (8ms ~ 2000ms)	25 200ms
40	Incoming-Wink Send Time (E&M)	1~255 (100ms ~ 25500ms)	3 300ms
41	Seizure-WINK/DELAY Receive Max. Time (DID)	1~255 (100ms ~ 25500ms)	48 4800ms
42	Receive Wink Duration Min. Time (DID)	1~250 (8ms ~ 2000ms)	12 96ms
43	Receive Wink Duration Max. Time (DID)	1~250 (8ms ~ 2000ms)	45 360ms
44	Seizure-WINK/DELAY Receive Max. Time (E&M)	1~255 (100ms ~ 25500ms)	48 4800ms
45	Receive Wink Duration Min. Time (E&M)	1~250 (8ms ~ 2000ms)	12 96ms
46	Receive Wink Duration Max. Time (E&M)	1~250 (8ms ~ 2000ms)	45 360ms
47	Receive DP Make Min. Time (ALL)	1~250 (4ms ~ 1000ms)	3 12ms
48	Receive DP Make Max. Time (ALL)	1~250 (4ms ~ 1000ms)	19 76ms
49	Receive DP Break Min. Time (ALL)	1~250 (4ms ~ 1000ms)	3 12ms
50	Receive DP Break Max. Time (ALL)	1~250 (4ms ~ 1000ms)	25 100ms
51	Receive DP Inter Digit Min. Time (ALL)	1~250 (4ms ~ 1000ms)	125 500ms

Item	Name	Input Data	Default
52	Receive Hook Flash Duration Min. Time (E&M)	1~255 (100ms ~ 25500ms)	3 300ms
53	Receive Hook Flash Duration Max. Time (E&M)	1~255 (100ms ~ 25500ms)	6 600ms
54	Receive Hook Flash Duration Min. Time (OPX)	1~255 (100ms ~ 25500ms)	3 300ms
55	Receive Hook Flash Duration Max. Time (OPX)	1~255 (100ms ~ 25500ms)	6 600ms
56	Loop Off Guard Time (Loop)	1~255 (100ms ~ 25500ms)	20 2000ms
57	Loop Off Guard Time (Ground)	1~255 (100ms ~ 25500ms)	20 2000ms
58	Loop Off Guard Time (DID)	1~255 (100ms ~ 25500ms)	20 2000ms
59	Loop Off Guard Time (E&M)	1~255 (100ms ~ 25500ms)	20 2000ms
60	Loop Off Guard Time (OPX)	1~255 (100ms ~ 25500ms)	20 2000ms
61	Double Ringing Send Time 1 (OPX)	1~255 (100ms ~ 25500ms)	5 500ms
62	Double Between Ringing Send Time 1 (OPX)	1~255 (100ms ~ 25500ms)	5 500ms
63	Double Ringing Send Time 2 (OPX)	1~255 (100ms ~ 25500ms)	25 2500ms
64	Double Between Ringing Send Time 2 (OPX)	1~255 (100ms ~ 25500ms)	30 3000ms
65	Single Ringing Send Time (OPX)	1~255 (100ms ~ 25500ms)	10 1000ms
66	Receive DP Make Max. Time (ALL)	1~255 (100ms ~ 25500ms)	9 900ms
67	Receive DP Break Min. Time (ALL)	1~255 (100ms ~ 25500ms)	9 900ms
68	Receive DP Break Max. Time ALL)	1~255 (100ms ~ 25500ms)	9 900ms
69	Single Between Ringing Send Time (OPX)	1~255 (100ms ~ 25500ms)	9 900ms
70	Guard Time 1 (Loop)	1~255 (100ms ~ 25500ms)	9 900ms

Item	Name	Input Data	Default

# Program 81 : Basic Hardware Setup for Trunk

## 81-10: COT Initial Data Setup

**Level:**  
**IN**

### Description

Use **Program 81-10: COT Initial Data Setup** to define the various basic timers for each COT trunk port.

### Input Data

Trunk No.	1~ 200
-----------	--------

Item No.	Item	Input Data	Default
01	<b>DP Interdigit Time Selection</b> The DP Interdigit Time is the minimum pause time between dial pulses. Select either Pattern A or pattern B.	0 = Pattern A (Pattern A: 10pps – 650ms, 20pps – 50ms) 1 = Pattern B (Pattern B: 10pps – 800ms, 20pps – 80ms)	1 (Pattern B)
02	<b>Prepause Time Selection</b> Specify the loop open time for a hookflash signal sent to the CO or PBX when the Recall key on a multiline terminal is pressed. A single line telephone (SLT) generates a hookflash to the CO or PBX line when a SLT hookflash is assigned.	1~13 (1~13 seconds) (0 = No Setting)	1 (1sec)
03	<b>Incoming Signal Detect Time Selection</b> Specify the time after the incoming signal from another system is detected before the acknowledge signal is sent out.	0~15 (50~800ms)	3 (200ms)
04	<b>Disconnect Recognition Time Selection</b> Specify the minimum time before a disconnected circuit can be accessed again.	1~15 (100ms~1.5 seconds) (0 = No Setting)	3 (300ms)
05	<b>Auto Release Signal Detection Time</b> Specify the signal detection time for release of a CO/PBX line after a disconnect signal is received from the distant CO or PBX.	1~14 (50~700ms) 15 = ∞ (No limit) (0 = No Setting)	7 (350ms)
06	<b>Pause Time Selection</b>	1~15 (500~7500ms)	6 (3000ms)

Item No.	Item	Input Data	Default
07	<b>Hookflash Time Selection 1</b> Normal Hook Flash	0 = 20ms 1 = 40ms 2 = 60ms 3 = 80ms 4 = 100ms 5 = 140ms 6 = 160ms 7 = 200ms 8 = 400ms 9 = 600ms 10 = 800ms 11 = 1.0 second 12 = 1.5 seconds 13 = 2.0 seconds 14 = 3.0 seconds 15 = 5.0 seconds	9 (OT) 4 (AU)
08	<b>Hookflash Time Selection 2</b> Long Hook Flash	0 = 20ms 1 = 40ms 2 = 60ms 3 = 80ms 4 = 100ms 5 = 140ms 6 = 160ms 7 = 200ms 8 = 400ms 9 = 600ms 10 = 800ms 11 = 1.0 second 12 = 1.5 seconds 13 = 2.0 seconds 14 = 3.0 seconds 15 = 5.0 seconds	14

# Program 81 : Basic Hardware Setup for Trunk

## 81-11: Tie Line Initial Setup

**Level:**  
**IN**

### Description

Use **Program 81-11: Tie Line Initial Setup** to define the various initial data for DID/ TLI/DTI packages.

### Input Data

Trunk No.	1~ 200
-----------	--------

Item No.	Item	Input Data	Default
01	<b>DP Interdigit Time Selection</b> The DP Interdigit Time is the minimum pause time between dial pulses. Select either Pattern A or pattern B.	0 = Pattern A (Pattern A: 10pps – 650ms, 20pps – 500ms) 1 = Pattern B (Pattern B: 10pps – 800ms, 20pps – 800ms)	1
02	<b>Prepause Time Selection</b> Specify the loop open time for a hookflash signal sent to the Tie Line when the Recall key on a multiline terminal is pressed. A Single Line Telephone (SLT) generates a hookflash to the Tie Line when a SLT hookflash is assigned.	1~4 (1~4 = 0.5~2.0 seconds) (5~15 = 3.0~13 seconds) (0 = No Setting)	0 (No Setting)
03	<b>Tie Line Answer Detect Time Selection</b> Specify the time before a UNIVERGE SV8100 system answer (Off-Hook) is recognized as an answer.	0~15 (130ms~1950ms) (0 = No Setting)	4 (520ms)
04	<b>Tie Line Release Detect Time Selection</b> Specify the circuit disconnect detected on the Tie Line on the distant system side is recognized as Tie Line.	0~15 (130ms~1950ms) (0 = No Setting)	4 (520ms)

Item No.	Item	Input Data	Default
05	<b>Incoming Signal Detect Time Selection</b> Specify the time after the incoming signal from another system is detected before the acknowledge signal is sent out.	Wink Start 1~15 (130ms~1950ms) (0 = No Setting)  Delay 1~15 (30ms~450ms) (0 = No Setting)	Wink Start 3 (390)  Delay 3 (90)
06	<b>Loop Off-Guard Time Selection</b> Assign loop off-guard time to prevent noise that could cause the system to be unable to answer an incoming Tie line.	1~4 (0.5sec~2.0sec) 5~15 (3sec~13sec) (0 = No Setting)	4 (2.0)
07	<b>Length of Wink Signal Selection</b> Specify the time a wink pulse is sent to another system.	0~15 (30ms~480ms)	5 (180)
08	<b>Length of Delay Signal Selection</b> Specify the time a delay pulse is sent to another system.	1~15 (300ms~4.5sec) (0 = No Setting)	1 (300ms)
09	<b>Incoming Interdigit Timeout Selection</b> Specify the time that an address signal is missing during the incoming call detection process before an error tone is returned to the other system.	0 = 8 1~15 (1~15 seconds)	6
10	<b>Wink/Delay Signal Detect Timeout Selection</b> To specify a maximum time, in seconds, for receiving an acknowledgment signal from a distant system before sending a busy tone.	0 = 8 1~15 (1~15 seconds)	7
11	<b>Disconnect Recognition Time Selection</b> Specify the minimum time before a disconnected circuit can be accessed again.	1~15 (0.1~1.5 seconds) (0 = No Setting)	3 (0.3)
12	<b>Automatic Release Signal Detection Selection</b> Specify the signal detection time for release of a Tie Line after a disconnect signal is received from the distant CO or PBX.	1~14 (50~700ms) 15 = ∞ (No limit) (0 = No Setting)	7 (350)
13	<b>Pause Time Selection</b>	1~15 (500~7500ms)	6 (3000ms)

Item No.	Item	Input Data	Default
14	<b>Hookflash Time Selection 1</b>	0 = 20ms 1 = 40ms 2 = 60ms 3 = 80ms 4 = 100ms 5 = 140ms 6 = 160ms 7 = 200ms 8 = 400ms 9 = 600ms 10 = 800ms 11 = 1.0 second 12 = 1.5 seconds 13 = 2.0 seconds 14 = 3.0 seconds 15 = 5.0 seconds	9 (600ms)
15	<b>Hookflash Time Selection 2</b>	0 = 20ms 1 = 40ms 2 = 60ms 3 = 80ms 4 = 100ms 5 = 140ms 6 = 160ms 7 = 200ms 8 = 400ms 9 = 600ms 10 = 800ms 11 = 1.0 second 12 = 1.5 seconds 13 = 2.0 seconds 14 = 3.0 seconds 15 = 5.0 seconds	14 (3.0sec)

# Program 81 : Basic Hardware Setup for Trunk

## 81-13: E1 Trunk Timer Setup (OT)

**Level:**  
**IN**

### Description

Use **Program 81-13: E1 Trunk Timer Setup** to define the basic timer setting of E1 Trunk.

Trunk Port Number	1~200
-------------------	-------

Item	Name	Input Data	Default
01	Loop Current Detection Time (Loop)	1~255 (16ms ~ 4080ms)	3 48ms
02	Clear Signal (Open Loop) Detection Time	1~255 (16ms ~ 4080ms)	50 800ms
03	Transmit Clear Signal Time for Forced Release	1~255 (16ms ~ 4080ms)	50 800ms
04	Receive DP Inter-digit min. Time	1~255 (4ms ~ 1020ms)	125 500sec
16	Pause Time	1~255 (64ms ~ 16320ms)	47 3008ms
17	Pulse Dial Break Time	1~255 (4ms ~ 1020ms)	15 60ms
18	Pulse Dial Make Time	1~255 (4ms ~ 1020ms)	10 5000ms
19	Pulse Dial Inter-digit Time	1~255 (16ms ~ 4080ms)	50 800ms
20	Receive DP Make min. Time	1~255 (4ms ~ 1020ms)	3 12ms
21	Receive DP Make max Time	1~255 (4ms ~ 1020ms)	19 76ms
22	Receive DP Break min. Time	1~255 (4ms ~ 1020ms)	5 20ms
23	Receive DP Break max Time	1~255 (4ms ~ 1020ms)	26 104ms

Item	Name	Input Data	Default
24	Transmit Answer duration Time	1~255 (8ms ~ 2040ms)	38 304ms
25	Transmit Double Answer duration Time	1~255 (64ms ~ 16320ms)	32 2048ms
26	Receive Answer min. Time	1~255 (8ms ~ 2040ms)	25 200ms
27	Receive Answer max Time	1~255 (8ms ~ 2040ms)	50 40ms
28	Receive Double Answer min. Time	1~255 (64ms ~ 16320ms)	24 1536ms
29	Receive Double Answer max Time	1~255 (64ms ~ 16320ms)	47 3008ms
30	Transmit Seizure Acknowledge duration Time	1~255 (4ms ~ 1020ms)	25 100ms
31	Receive Seizure Acknowledge min. Time	1~255 (4ms ~ 1020ms)	25 100ms
32	Receive Seizure Acknowledge max Time	1~255 (4ms ~ 1020ms)	75 300ms
33	Transmit Digit Acknowledge duration Time	1~255 (4ms ~ 1020ms)	25 100ms
34	Receive Digit Acknowledge min. Time	1~255 (4ms ~ 1020ms)	25 100ms
35	Receive Digit Acknowledge max Time	1~255 (4ms ~ 1020ms)	75 300ms
36	Receive Meter Pulse min. Time	1~255 (4ms ~ 1020ms)	25 100ms
37	Receive Meter Pulse max Time	1~255 (4ms ~ 1020ms)	75 300ms
38	Receive Line Block min. Time	1~255 (64ms ~ 16320ms)	32 2048ms
39	Receive Line Block recover min. Time	1~255 (64ms ~ 16320ms)	32 2048ms
40	Transmit Remove Ring Time	1~255 (4ms ~ 1020ms)	0 0ms
41	Transmit Clear Signal Send Time	1~255 (16ms ~ 4080ms)	63 1008ms
42	Transmit Seizure Signal Time	1~255 (8ms ~ 2040ms)	100 800ms

Item	Name	Input Data	Default
43	Group A Response Time	1~32 (1sec ~ 32sec)	12 12sec
44	Group A Tone Complete Time	1~32 (1sec ~ 32sec)	12 12sec
45	Group B Response Time	1~32 (1sec ~ 32sec)	12 12sec
46	Group B Tone Complete Time	1~32 (1sec ~ 32sec)	12 12sec
47	Group C Response Time	1~32 (1sec ~ 32sec)	12 12sec
48	Group C Tone Complete Time	1~32 (1sec ~ 32sec)	12 12sec
49	Group I Signal Time	1~32 (1sec ~ 32sec)	12 12sec
50	Group I Tone Complete Time	1~32 (1sec ~ 32sec)	12 12sec
51	Group II Signal Time	1~32 (1sec ~ 32sec)	12 12sec

#### Conditions

- After set from PRG81-13-01 to 42, the E1 card needs resets.

## Feature Cross Reference

None

# Program 82 : Basic Hardware Setup for Extension

## 82-01 : Incoming Ring Tone

Level: Level:  
IN (OT) MF (AU)

Program

82

### Description

Use **Program 82-01: Incoming Ring Tone** to set the incoming ring tones, which are the tones a user hears when a call rings an extension. These tones are grouped into four ring tone *Ranges* (1~4), also called patterns, that consist of a combination of frequencies. (You assign a specific *Range* to trunks in Program 22-03 and to extensions in Program 15-02.) Within each *Range* there are three frequency *Types*: High, Middle and Low. (Service Code 820 (OT) / 720 (AU) allows users to choose the *Type* for their incoming calls.) Each *Type* in turn consists of two frequencies and the modulation played simultaneously to make up the tone. These frequencies are determined by their Frequency Number selected in Items 1 and 2 (see below). In this program, you assign the two *Frequency Numbers* and *Modulation* for each *Type*, for each of the four *Ranges*. The chart below shows the default *Frequency Numbers* for each *Type* in each *Range*.

### Input Data

Incoming Ringing Tone Number	1 = Pattern 1 (Trunk Incoming) 2 = Pattern 2 (Trunk Incoming) 3 = Pattern 3 (Trunk Incoming) 4 = Pattern 4 (Trunk Incoming) 5 = Intercom Incoming Pattern 6 = Alarm Sensor Tone Pattern
------------------------------	--

Ringling Tone Type Number	1 = High 2 = Mid 3 = Low
---------------------------	--------------------------------

Item No.	Item	Input Data
01	Frequency 1	1 = 520Hz
02	Frequency 2	2 = 540Hz
		3 = 660Hz
		4 = 760Hz
		5 = 1100Hz
		6 = 1400Hz
		7 = 2000Hz

Item No.	Item	Input Data
03	Modulation	0 = No Modulation 1 = 8Hz Modulation 2 = 16Hz Modulation 3 = Envelope

**Default**

Incoming Ringing Tone Number	Tone Type	Frequency 1 (Hz)	Frequency 2 (Hz)	Modulation
Pattern 1 (Trunk Incoming)	High Mid Low	1100 660 520	1400 760 660	16Hz Modulation 16Hz Modulation 16Hz Modulation
Pattern 2 (Trunk Incoming)	High Mid Low	1100 660 520	1400 760 660	8Hz Modulation 8Hz Modulation 8Hz Modulation
Pattern 3 (Trunk Incoming)	High Mid Low	2000 1400 1100	760 660 540	16Hz Modulation 16Hz Modulation 16Hz Modulation
Pattern 4 (Trunk Incoming)	High Mid Low	2000 1400 1100	760 660 540	8Hz Modulation 8Hz Modulation 8Hz Modulation
Pattern 5 Intercom Incoming Pattern	High Mid Low	1100 660 520	1400 760 660	8Hz Modulation 8Hz Modulation 8Hz Modulation
Pattern 6 Alarm Sensor Pattern	High Mid Low	760 760 760	760 760 760	No Modulation No Modulation No Modulation

**Conditions**

# Program 84 : Hardware Setup for VoIP

## 84-01 : H.323 Trunk Basic Information Setup

Level:  
IN

### Description

Use **Program 84-01 : H.323 Trunk Basic Information Setup** to set the basic information of the H.323 Trunk.

### Input Data

Item No.	Item	Input Data	Default
02	Number of G.711 audio frames	1~4	3
03	G.711 VAD mode	0 = Disable 1 = Enable	0
04	G.711 Type	0 = A-law 1 = u-law	0
05	Number of G.729 audio frames	1~6 1 = 10ms 2 = 20ms 3 = 30ms 4 = 40ms 5 = 50ms 6 = 60ms	3
06	G.729 VAD mode	0 = Disable 1 = Enable	0
07	G.729 Jitter Buffer( min)	0~270ms	30
08	G.729 Jitter Buffer (average)	0~270ms	60
09	G.729 Jitter Buffer (max)	0~270ms	120
11	Number of G.723 audio frames	1~2	1
12	G.723 VAD mode	0 = Disable 1 = Enable	0
15	Jitter Buffer Mode	1 = Fixed 2 = Self adjusting (silence period) 3 = Self adjusting	3

Program

84

## Input Data

Item No.	Item	Input Data	Default
16	<b>G.711 Jitter Buffer( min)</b>	0~160ms	30
17	<b>G.711 Jitter Buffer (average)</b>	0~160ms	60
18	<b>G.711 Jitter Buffer (max)</b>	0~160ms	120
19	<b>G.723 Jitter Buffer( min)</b>	0~270m	30
20	<b>G.723 Jitter Buffer (average)</b>	0~270ms	60
21	<b>G.723 Jitter Buffer (max)</b>	0~270ms	120
22	<b>VAD Threshold</b>	0~30 (-19db~ +10db and self adjustment) 0 = Self adjustment 1 = -19db (-49dbm) : 20 = 0db (-30dbm) : 29 = 9db (-21dbm) 30 = 10db (-20dbm)	20
23	<b>Idle Noise Level</b>	5000-7000 (-5000dbm ~ -7000dbm)	7000
24	<b>Echo Canceller Mode</b>	0 = Disable 1 = Enable	1
25	<b>Signal Limiter</b>	1 = Mode 0 2 = Mode 1 3 = Mode 2 4 = Mode 3 5 = Mode 4 6 = Mode 5	6
26	<b>Echo Canceller NLP Mode</b>	0 = 2 wire and 4 wire 1 = 2 wire only	1
28	<b>Echo Canceller NLP Noise Setting</b>	0 = Automatic level adjustment 1 = Fixed level	0
30	<b>TX Gain</b>	0~40 (-20dbm~ +20dbm)	20
31	<b>RX Gain</b>	0~40 (-20dbm~ +20dbm)	20
33	<b>Priority CODEC setting</b> Priority of voice encoding method.	0~3 0 = G.711 1 = G.723 2 = G.729 3 = G.722	0

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
36	<b>The Maximum FAX Transmission Rate</b>	0 = V.27ter, 2400bps 1 = V.27ter, 4800bps 2 = V.29, 7200bps 3 = V.29, 9600bps 4 = V.17, 12000bps 5 = V.17, 14400bps	5
39	<b>FAX Modem Transmission Level</b>	0~13 (0dBm ~ -13dBm)	9
40	<b>FAX Modem Carrier Signal Detection Threshold</b>	0 = -26dBm 1 = -33dBm 2 = -43dBm	1
41	<b>FAX Communication no Communication Time-Out</b>	10~32000 seconds	30
43	<b>High-speed Signal Data (fax picture signal) Packet Length</b>	1 = 10ms 2 = 20ms 3 = 30ms 4 = 40ms	4
44	<b>Low-speed Signal Data (FAX Procedure Signal)</b>	0~5	0
45	<b>High-speed Signal Data (FAX Procedure Signal)</b>	0~2	0
46	<b>TCF Operation Setting</b>	1 = Training signal (TCF) of the fax is locally generated and checked. 2 = Training signal (TCF) of the fax is sent over the network.	1
47	<b>The Maximum, Low-speed Signal Data (Size of Packet)</b>	1~65535 bytes	1
48	<b>Network Transmission Time-out</b>	10~32000 seconds	150
49	<b>Eflag Beginning Timer</b>	0~65535	2600
50	<b>Eflag Stop Timer</b>	0~65535	2300
51	<b>The Former Line Substitution of Scanning Line</b> (FAX Relay item)	0 = Disable 1 = Enable	1

## Input Data

Item No.	Item	Input Data	Default
52	<b>Eflag Setting at Head DIS</b> (FAX Relay item)	0 = Disable 1 = Enable	1
53	<b>TFOP Protocol</b> (FAX Relay item)		1
54	<b>NSF Superscription</b> (FAX Relay item)		0
55	<b>ECM (Error Correction Mode)</b>		1
56	<b>Enable Modified Read Code</b>		1
57	<b>NSF Country Code Setting</b>	0~65535	0
58	<b>NSF Vendor Code Setting</b>		0
59	<b>FAX Relay Function</b>	0 = Disable 1 = Enable 2 = Each port mode	0
61	<b>Auto Gain Control</b>	0~5	0
62	<b>DTMF Relay Mode</b> Set up information of VoIP is set by PRG 84-06-10.	0 = VoIP 1 = RFC2833 2 = H.245 3 = Disable	0
63	<b>Number of G.722 audio frames</b>	1~4 1 = 10ms 2 = 20ms 3 = 30ms 4 = 40ms	3
64	<b>G.722 Voice Activity Detection Mode</b>	0 = Disable 1 = Enable	0
65	<b>G.722 Jitter Buffer (min)</b>	0~160ms	30
66	<b>G.722 Jitter Buffer (average)</b>	0~160ms	60
67	<b>G.722 Jitter Buffer (max)</b>	0~160ms	120
68	<b>RTP Filter</b> To avoid incorrect voice pass connection, this Program checks the sending side address from received RTP packet at VoIPDB.	0 = Disable 1 = Enable	1

## 84-03 : IP Phone Information Basic Setup

**Level:**  
**IN**

### Description

Use **Program 84-03: IP Phone Information Basic Setup** to define the details of Dterm IP.

### Input Data

Item No.	Item	Input Data	Default
01	<b>NGT Signal Receive Port Number</b> Define the receiving port for IP control protocol	0-65535	3458
02	<b>DRS Port Number</b> Define the port number for the Device Registration Server.	0-65535	3456
06	<b>Area Number</b>	0 = Japan 1 = USA 2 = Australia 3 = EU 4 = Asia 5 = Other Country 6 = Germany 7 = Italy 8 = Netherlands 9 = Austria 10 = Belgium 11 = Spain 12 = Sweden 13 = UK 14 = Denmark 15 = Greece 16 = Switzerland 17 = RSA 18 = New Zealand	3 (OT) 2 (AU)
07	<b>Type of Service Mode</b> Set the type of service (ToS) mode.	1: Invalid 2: IP Precedence 3: Diffserve	1

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
08	<b>Type of service</b> This data will be sent to NGT Terminal when NGT Terminal is registered.	0x00-0xff (use line keys 1-6 for letters A-F)	C0
09	<b>Start Port</b> This entry indicates the starting port number for IP terminals.	1-512	1
12	<b>Protocol Mode (AU)</b>	0:NGT 1:MEGACO	0

# Program 84 : Hardware Setup for VoIP

## 84-10 : ToS Setup

**Level:**  
**IN**

### Description

Use **Program 84-10 : ToS Setup** to set up the Type of Service data.

### Input Data

Protocol Type	1 = DRS 2 = Protims 3 = Voice Control 4 = H.323 5 = RTP/RTCP 6 = SIP 7 = CCISoIP 8 = DT700 MLT 9 = SIP Trunk 10 = NetLink
---------------	--

Item No.	Item	Input Data	Default	Description
01	ToS Mode	0 = Disable (Invalid) 1 = IP Precedence 2 = Diffserv	0	When Input Data is set to 1, Item No. 07 is invalid. When Data is set to 2, Item No. 02 ~ 06 are invalid.
02	Priority, IP Precedence	0~7 0 = Low 7 = High	0	1 = Router queuing priority
03	Low Delay	0~1 0 = Normal Delay, Low Delay	0	1 = Optimize for low delay routing
04	Wideband (Throughout)	0~1 0 = Normal Throughput 1 = High Throughput	0	1 = Optimize for high bandwidth routing
05	High Reliability	0~1 0 = Normal Reliability 1 = Low Reliability	0	1 = Optimize for reliability routing
07	Priority (D.S.C.P. - Differentiated Services Code Point)	0~63	0	DSCP (Differentiated Services Code Point)

**Conditions**

- The system must be reset for these program options to take affect.

## Program 84 : Hardware Setup for VoIP

### 84-12: Networking CODEC Information Basic Setup (OT)

Level:

IN

#### Description

Use **Program 84-12: Networking CODEC Information Basic Setup** to define the CODEC Information for Networking.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Number of G.711 Audio Frame</b> Maximum number of G711 Audio Frames. When the voice is encoded using the PCM (Pulse Code Modulation) method, a unit is a frame of 10ms.	1 = 10 ms 2 = 20 ms 3 = 30 ms 4 = 40 ms	3
02	<b>G.711 Silence Detection (VAD) Mode</b> Select whether to compress silence with G.711. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
03	<b>G.711 Type</b> Set the type of G.711.	0 = A-law 1 = $\mu$ -law	0
04	<b>G.711 Jitter Buffer - Minimum</b> Set the minimum value of the G.711 Jitter Buffer.	0~160 ms	30
05	<b>G.711 Jitter Buffer - Standard</b> Set the average value of the G.711 Jitter Buffer.	0~160 ms	60
06	<b>G.711 Jitter Buffer - Maximum</b> Set the maximum value of the G.711 Jitter Buffer.	0~160 ms	120
07	<b>G.729 Audio Frame</b> Maximum number of G729 Audio Frames. G.729 assumes the audio signal made by a specimen by 8kHz and the frame of 10ms is assumed to be a unit to 8kbps by the encoding compressed method.	1-6 (1 = 10ms, 2 = 20ms, etc.)	3

## Input Data

Item No.	Item	Input Data	Default
08	<b>G.729 Silence Compression (VAD) Mode</b> Select whether to compress silence with G.729. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
09	<b>G.729 Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of G.729 is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-270 ms	30
10	<b>G.729 Jitter Buffer - Standard</b> Set the average G.729 Jitter Buffer.	0-270 ms	60
11	<b>G.729 Jitter Buffer - Maximum</b> Set the maximum G.729 Jitter Buffer.	0-270 ms	120
12	<b>Number of G.723 Audio Frame</b> Maximum number of the G.723 Audio Frame.	1 = 30 msec 2 = 60 msec	1
13	<b>G.723 Silence Compression (VAD) Mode</b> If enabled, RTP packets are not sent for the compressed silence.	0 = Disable 1 = Enable	0
14	<b>G.723 Jitter Buffer - Minimum</b> Set the minimum value of the G.723 Jitter Buffer.	0~270 ms	30
15	<b>G.723 Jitter Buffer - Standard</b> Set the average value of the G.723 Jitter Buffer.	0~270 ms	60
16	<b>G.723 Jitter Buffer - Maximum</b> Set the maximum value of the G.723 Jitter Buffer.	0~270 ms	120
17	<b>Jitter Buffer Mode</b> Set the mode of the Jitter Buffer. 1 = Size set to the fixed amount for the codec. 2 = The minimum/maximum range for the codec is used. 3 = The minimum/maximum range for the codec is used and adjusts at any time, regardless of silence.	1 = static 2 = adaptive during silence 3 = adaptive immediately	3

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
18	<p><b>Silence Compression (VAD) Threshold</b></p> <p>Set the voice level judged to be silence. Change value based.30 This entry is ignored if silence compression is disabled in 84-01-03 with G.711, or 84-01-06 with G.729.</p>	<p>0-30 (self-adjustment and -19db ~ +10db) 0 = self-adjustment 1:-19db (-49dbm) : 20 = 0db (-30dbm) : 29 = 9dbm (-21dbm) 30:10dbm (-20dbm)</p>	20
19	<p><b>Idle Noise Level</b></p> <p>Set the noise level which is generated when silent.</p>	<p>5000-7000 (-5000 ~ -7000dbm) 5000 = -5000dbm : 7000 = -7000dbm</p>	7000
20	<p><b>Echo Canceller Mode</b></p> <p>Determine whether or not to use Echo canceller.</p>	<p>0 = Disable 1 = Enable</p>	1
21	<p><b>Signal limiter</b></p> <p>Set the Signal Limiter Mode.</p>	<p>1 = Mode 0 2 = Mode 1 3 = Mode 2 4 = Mode 3 5 = Mode 4 6 = Mode 5  1. There is no limitation. 2. The limitation is the maximum. 3. Limitation size 4. It is limiting it. 5. Limitation smallness 6. The limitation is minimum.</p>	6
22	<p><b>Echo Canceller NLP Mode</b></p> <p>Non-linear processing mode. Enable this option to decrease the low level echo. When NLP is enabled, the voice with low level is replaced with NLP noise. As a result, a low echo of the level is usually removed compared with the conversation level.</p>	<p>0 = 2 wire &amp; 4 wire 1 = 2 wire only</p>	1

## Input Data

Item No.	Item	Input Data	Default
24	<b>Echo Canceller NLP Noise Setting</b> Becomes invalid item if 84-12-22 is set to Disabled. Set the noise level adjusting method added with NLP. When "0" is set, the level is self-adjusted - when "1" is set, Program 84-13-23 is used.	0 = adaptive 1 = fixed	0
26	<b>TX (Transmit) Gain</b> Define the setting to amplify and to attenuate the size of the transmission voice. The gain given when the voice packet is sent from the VOIPDB is set.	0-40 (-20 ~ +20) 0 = -20 dbm 1 = -19 dbm : 20 = 0 dbm : 39 = 19 dbm 40 = 20 dbm	20 (0 dbm)
27	<b>RX (Receive) Gain</b> Define the setting to amplify and to attenuate the size of the received voice. The gain given when the voice packet is received from the VOIPDB is set.	0-40 (-20~+20) 0 = -20 dbm 1 = -19 dbm : 20 = 0 dbm : 39 = 19 dbm 40 = 20 dbm	20 (0 dbm)
28	<b>Priority Codec Setting</b> The option selected here determines what other codec options are applied by priority.	0 = G711 PT 1 = G723 PT 2 = G729 PT 3 = G.722 PT	0
30	<b>EchoAuto Gain Control</b> Define the Auto Gain Control.	0 - 5	0
31	<b>DTMF Relay Mode</b> If VoIPU, the systems refers to PRG 84-06-10 setting.	0 = Disable 1 = RFC2833 2 = VoIPU	2
32	<b>FAX Relay Mode</b> Select "2" for FAX Relay to SLT (Program 15-03-03:special), Trunk and NetLink. Refer to Program 84-01-36 through 84-01-58 for FAX Relay options.	0 = Disable 1 = Enable 2 = Each Port Mode	0
33~37	--- Not Used ---		

**Input Data**

Item No.	Item	Input Data	Default
38	<b>RTP Filter</b> To avoid incorrect voice pass connection, this Program checks the sending side address from received RTP packet at VoIPDB.	0 = Disable 1 = Enable	1

## Program 84 : Hardware Setup for VoIP

### 84-13 : SIP Trunk CODEC Information Basic Setup

**Level:**  
**IN**

#### Description

Use **Program 84-13: SIP Trunk CODEC Information Basic Setup** to set up the basic CODEC options for SIP trunks.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Number of G.711 Audio Frame</b> Maximum number of G.711 Audio Frames. When the voice is encoded using the PCM (Pulse Code Modulation) method, a unit is a frame of 10ms.	1 = 10 ms 2 = 20 ms 3 = 30 ms 4 = 40 ms	2
02	<b>G.711 Silence Detection (VAD) Mode</b> Select whether to compress silence with G.711. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
03	<b>G.711 Type</b> Set the type of G.711.	0 = A-law 1 = $\mu$ -law	0
04	<b>G.711 Jitter Buffer - Minimum</b> Set the minimum value of the G.711 Jitter Buffer.	0~160 ms	20
05	<b>G.711 Jitter Buffer - Standard</b> Set the average value of the G.711 Jitter Buffer.	0~160 ms	40
06	<b>G.711 Jitter Buffer - Maximum</b> Set the maximum value of the G.711 Jitter Buffer.	0~160 ms	80
07	<b>G.729 Audio Frame</b> Maximum number of G.729 Audio Frames. G.729 assumes the audio signal made by a specimen by 8kHz and the frame of 10ms is assumed to be a unit to 8kbps by the encoding compressed method.	1-6 (1 = 10ms, 2 = 20ms, etc.)	2

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
08	<b>G.729 Silence Compression (VAD) Mode</b> Select whether to compress silence with G.729. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
09	<b>G.729 Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of G.729 is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-270 ms	20
10	<b>G.729 Jitter Buffer - Standard</b> Set the average G.729 Jitter Buffer.	0-270 ms	40
11	<b>G.729 Jitter Buffer - Maximum</b> Set the maximum G.729 Jitter Buffer.	0-270 ms	80
12	<b>Number of G.723 Audio Frame</b> Maximum number of the G.723 Audio Frame.	1 = 30 msec 2 = 60 msec	1
13	<b>G.723 Silence Compression (VAD) Mode</b> If enabled, RTP packets are not sent for the compressed silence.	0 = Disable 1 = Enable	0
14	<b>G.723 Jitter Buffer - Minimum</b> Set the minimum value of the G.723 Jitter Buffer.	0~270 ms	30
15	<b>G.723 Jitter Buffer - Standard</b> Set the average value of the G.723 Jitter Buffer.	0~270 ms	60
16	<b>G.723 Jitter Buffer - Maximum</b> Set the maximum value of the G.723 Jitter Buffer.	0~270 ms	120
17	<b>Jitter Buffer Mode</b> Set the mode of the Jitter Buffer. 1 = Size set to the fixed amount for the codec. 2 = The minimum/maximum range for the codec is used. 3 = The minimum/maximum range for the codec is used and adjusts at any time, regardless of silence.	1 = static 2 = adaptive during silence 3 = adaptive immediately	3

## Input Data

Item No.	Item	Input Data	Default
18	<p><b>Silence Compression (VAD) Threshold</b></p> <p>Set the voice level judged to be silence. Change value based.30 This entry is ignored if silence compression is disabled in 84-01-03 with G.711, or 84-01-06 with G.729.</p>	<p>0-30 (self-adjustment and -19db ~ +10db) 0 = self-adjustment 1:-19db (-49dbm) : 20 = 0db (-30dbm) : 29 = 9dbm (-21dbm) 30:10dbm (-20dbm)</p>	20
19	<p><b>Idle Noise Level</b></p> <p>Set the noise level which is generated when silent.</p>	<p>5000-7000 (-5000 ~ -7000dbm) 5000 = -5000dbm : 7000 = -7000dbm</p>	7000
20	<p><b>Echo Canceller Mode</b></p> <p>Determine whether or not to use Echo canceller.</p>	<p>0 = Disable 1 = Enable</p>	1

22	<p><b>Echo Canceller NLP Mode</b></p> <p>Non-linear processing mode. Enable this option to decrease the low level echo. When NLP is enabled, the voice with low level is replaced with NLP noise. As a result, a low echo of the level is usually removed compared with the conversation level.</p>	<p>0 = 2 wire &amp; 4 wire 1 = 2 wire only</p>	1
24	<p><b>Echo Canceller NLP Noise Setting</b></p> <p>Becomes invalid item if 84-12-22 is set to Disabled. Set the noise level adjusting method added with NLP. When "0" is set, the level is self-adjusted - when "1" is set, Program 84-13-23 is used.</p>	<p>0 = adaptive 1 = fixed</p>	0

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
26	<b>TX (Transmit) Gain</b> Define the setting to amplify and to attenuate the size of the transmission voice. The gain given when the voice packet is sent from the VOIPDB is set.	0-40 (-20 ~ +20) 0 = -20 dbm 1 = -19 dbm : 20 = 0 dbm : 39 = 19 dbm 40 = 20 dbm	20 (0 dbm)
27	<b>RX (Receive) Gain</b> Define the setting to amplify and to attenuate the size of the received voice. The gain given when the voice packet is received from the VOIPDB is set.	0-40 (-20~+20) 0 = -20 dbm 1 = -19 dbm : 20 = 0 dbm : 39 = 19 dbm 40 = 20 dbm	20 (0 dbm)
28	<b>Priority Codec Setting</b> The option selected here determines what other codec options are applied by priority.	0 = G711 PT 1 = G723 PT 2 = G729 PT 3 = G.722 PT 4 = G.726 PT 5 = iLBC PT	0
30	<b>EchoAuto Gain Control</b> Define the Auto Gain Control.	0 - 5	0
31	<b>DTMF Payload Number</b> Define the DTMF Payload Number.	96-127	110
32	<b>DTMF Relay Mode</b> Determine the DTMF setup.	0 = Disable 1 = RFC2833	0
33	<b>G.722 Audio Frame</b> Maximum number of G.722 Audio Frames. G.722 assumes the audio signal made by a specimen by 16kHz and the frame of 10ms is assumed to be a unit to 64kbps by the encoding compressed method.	1 = 10 ms 2 = 20 ms 3 = 30 ms 4 = 40 ms	3
34	<b>G.722 Silence Compression Mode</b> Select whether to compress silence with G.722. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0

## Input Data

Item No.	Item	Input Data	Default
35	<b>G.722 Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of G.722 is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-160 ms	30
36	<b>G.722 Jitter Buffer - Standard</b> Set the average G.722 Jitter Buffer.	0-160 ms	60
37	<b>G.722 Jitter Buffer - Maximum</b> Set the maximum G.722 Jitter Buffer.	0-160 ms	20
38	<b>G.726 Audio Frame</b> Maximum number of G.726 Audio Frames. G.726 assumes the audio signal made by a specimen by 16kHz and the frame of 10ms is assumed to be a unit to 32kbps by the encoding compressed method.	1 = 10 ms 2 = 20 ms 3 = 30 ms 4 = 40 ms	3
39	<b>G.726 Silence Compression Mode</b> Select whether to compress silence with G.726. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
40	<b>G.726 Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of G.726 is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-160 ms	30
41	<b>G.726 Jitter Buffer - Standard</b> Set the average G.726 Jitter Buffer.	0-160 ms	60
42	<b>G.726 Jitter Buffer - Maximum</b> Set the maximum G.726 Jitter Buffer.	0-160 ms	120
43	<b>iLBC Audio Frame</b> Maximum number of iLBC Audio Frames. iLBC assumes the frame of 10ms is a unit.	2 = 20 ms 3 = 30 ms 4 = 40 ms	3
44	<b>iLBC Silence Compression Mode</b> Select whether to compress silence with iLBC. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
45	<b>iLBC Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of iLBC is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-160 ms	30
46	<b>iLBC Jitter Buffer - Standard</b> Set the average iLBC Jitter Buffer.	0-160 ms	60
47	<b>iLBC Jitter Buffer - Maximum</b> Set the maximum iLBC Jitter Buffer.	0-160 ms	120
48	<b>iLBC Payload Number</b> The payload number of iLBC is set. However, the same number as Item 31 cannot be set.	96-127	98
49	<b>RTP Filter</b> To avoid incorrect voice pass connection, this Program checks the sending side address from received RTP packet at VoIPDB.	0 = Disable 1 = Enable	1
50	<b>FAX Relay Mode</b>	0 = Disable 1 = Enable	0
51	<b>T.38 Protocol Mode</b>	0 = RTP 1 = UDPTL	1
52	<b>FAX Maximum Rate</b>	0 = V.27ter, 2400bps 1 = V.27ter, 4800bps 2 = V.29, 7200bps 3 = V.29, 9600bps 4 = V.17, 12000bps 5 = V.17, 14400bps	5
55	<b>High Speed Data Packet Length</b>	1 = 10ms 2 = 20ms 3 = 30ms 4 = 40ms	4
56	<b>Low Speed Redundancy</b>	0~5	0
57	<b>High Speed Data Packet Redundancy</b>	0~2	0
58	<b>TCF Handling Method</b>	0 = Receive TCF signal by VoIPDB 1 = Through TCF signal to external FAX	1

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
59	<b>Maximum Low Speed Data Packetization</b>	1~65535 bytes	1
60	<b>Transmit Network Timeout</b>	10~32000sec	150
61	<b>T.38 RTP Format Payload Number</b>	96~127	100

# Program 84 : Hardware Setup for VoIP

## 84-14 : SIP Trunk Basic Information Setup

Level:

IN

### Description

Use **Program 84-14: SIP Trunk Basic Information Setup** to define the basic setup for SIP trunks.

### Input Data

Item No.	Item	Input Data	Default
01	<b>INVITE ReTx Count</b> Specifies the number of times the INVITE message is sent.	0~255	7
02	<b>Request ReTx Count</b> Specifies the number of times Request message except INVITE are sent.		11
03	<b>Response ReTx Count</b> Specifies the number of times the Response message is sent.		7
04	<b>Request ReTx Start Time</b>	0~65535 (0ms~6553.5sec.)	5(500ms)
05	<b>Request Maximum ReTx Interval</b>		40(4000ms)
06	<b>SIP Trunk Port Number</b>	1~65535	5060
07	<b>Session Timer Value</b>	0~65535	0
08	<b>Minimum Session Timer Value</b>	0~65535	1800
09	<b>Called Party Information</b>	0 = Request URI 1 = To Header	0
10	<b>URL Type</b>	0 = SIP-URL 1 = TEL-URL	0

# Program 84 : Hardware Setup for VoIP

## 84-15 : H.323/SIP Phone Keep Alive Setup

**Level:**  
**IN**

### Description

Use **Program 84-15: H.323/SIP Phone Keep Alive Setup** to set the Keep Alive Configuration of the H.323/SIP phone.

### Input Data

Item No.	Item	Input Data	Default
01	<b>Registration Information Automatic Deletion</b> When set to 1 (Enable), the registration information is automatically deleted (for H.323).	0 = Disable 1 = Enable	0
02	<b>Keep Alive Message Interval</b> Time interval that system sends a Ping to the terminal.	1~10 minutes	1
03	<b>Keep Alive Message Timeout</b> Time that system waits for a Ping response from the terminal.	1~10 seconds	5
04	<b>Keep Alive Timeout</b> How many times the system waits for a non response before determining the terminal is down.	1~5 times	3

### Conditions

None

# Program 84 : Hardware Setup for VoIP

## 84-16 : VoIP Limiter Control Gain Setup

**Level:**  
**IN**

### Description

Use **Program 84-16 : VoIP Limiter Control Gain** to set the Limiter Control Gain configuration of VoIP.

### Input Data

Item No.	Item	Input Data	Default
01	<b>RX Limiter Control Gain</b> Gain setting to control limiter in the direction of IP → PCM. This option adds gain to the voice input from the LAN and removes it from the voice output to highway.	0~30 (-15dbm ~ +15dbm) 0 = -15dbm 1 = -14dbm : 15 = 0dbm :	15 (0dbm)
02	<b>TX Limiter Control Gain</b> Gain setting to control limiter in the direction of PCM → IP. This option adds the gain to the voice input from highway and removes it from the voice output to the LAN.	29 = 14dbm 30 = 15dbm	15 (0dbm)
03	<b>RX Limiter Control Gain (CD-4COT)</b> This option controls the limiter gain for a COIU call in the IP to PCM direction.		15 (0dbm)
04	<b>TX Limiter Control Gain (CD-4COT)</b> This option controls the limiter gain for a COIU call in the PCM to IP direction.		15 (0dbm)

### Conditions

None

### Feature Cross Reference

## Program 84 : Hardware Setup for VoIP

### 84-19 : SIP Extension CODEC Information Basic Setup

**Level:**  
**IN**

#### Description

Use **Program 84-19 : SIP Extension CODEC Information Basic Setup** to define the CODEC information for the SIP extensions.

#### Input Data

Item No.	Item	Input Data	Default
01	<b>Number of G.711 Audio Frame</b> Maximum number of G711 Audio Frames. When the voice is encoded using the PCM (Pulse Code Modulation) method, a unit is a frame of 10ms.	1 = 10 ms 2 = 20 ms 3 = 30 ms 4 = 40 ms	2
02	<b>G.711 Silence Detection (VAD) Mode</b> Select whether to compress silence with G.711. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
03	<b>G.711 Type</b> Set the type of G.711.	0 = A-law 1 = $\mu$ -law	0
04	<b>G.711 Jitter Buffer - Minimum</b> Set the minimum value of the G.711 Jitter Buffer.	0~160 ms	20
05	<b>G.711 Jitter Buffer - Standard</b> Set the average value of the G.711 Jitter Buffer.	0~160 ms	40
06	<b>G.711 Jitter Buffer - Maximum</b> Set the maximum value of the G.711 Jitter Buffer.	0~160 ms	80
07	<b>G.729 Audio Frame</b> Maximum number of G729 Audio Frames. G.729 assumes the audio signal made by a specimen by 8kHz and the frame of 10ms is assumed to be a unit to 8kbps by the encoding compressed method.	1-6 (1 = 10ms, 2 = 20ms, etc.)	2

## Input Data

Item No.	Item	Input Data	Default
08	<b>G.729 Silence Compression (VAD) Mode</b> Select whether to compress silence with G.729. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
09	<b>G.729 Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of G.729 is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-270 ms	20
10	<b>G.729 Jitter Buffer - Standard</b> Set the average G.729 Jitter Buffer.	0-270 ms	40
11	<b>G.729 Jitter Buffer - Maximum</b> Set the maximum G.729 Jitter Buffer.	0-270 ms	80
12	<b>Number of G.723 Audio Frame</b> Maximum number of the G.723 Audio Frame.	1 = 30 msec 2 = 60 msec	1
13	<b>G.723 Silence Compression (VAD) Mode</b> If enabled, RTP packets are not sent for the compressed silence.	0 = Disable 1 = Enable	0
14	<b>G.723 Jitter Buffer - Minimum</b> Set the minimum value of the G.723 Jitter Buffer.	0~270 ms	30
15	<b>G.723 Jitter Buffer - Standard</b> Set the average value of the G.723 Jitter Buffer.	0~270 ms	60
16	<b>G.723 Jitter Buffer - Maximum</b> Set the maximum value of the G.723 Jitter Buffer.	0~270 ms	120
17	<b>Jitter Buffer Mode</b> Set the mode of the Jitter Buffer. 1 = Size set to the fixed amount for the codec. 2 = The minimum/maximum range for the codec is used. 3 = The minimum/maximum range for the codec is used and adjust at any time, regardless of silence.	1 = static 2 = adaptive during silence 3 = adaptive immediately	3

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
18	<b>Silence Compression (VAD) Threshold</b> Set the voice level judged to be silence. Change value based.30 This entry is ignored if silence compression is disabled in 84-01-03 with G.711, or 84-01-06 with G.729.	0-30 (self-adjustment and -19db ~ +10db) 0 = self-adjustment 1:-19db (-49dbm) : 20 = 0db (-30dbm) : 29 = 9dbm (-21dbm) 30:10dbm (-20dbm)	20
19	<b>Idle Noise Level</b> Set the noise level which is generated when silent.	5000-7000 (-5000 ~ -7000dbm) 5000 = -5000dbm : 7000 = -7000dbm	7000
20	<b>Echo Canceller Mode</b> Determine whether or not to use Echo canceller.	0 = Disable 1 = Enable	1
21	<b>Signal Limiter</b> Set the Signal Limiter Mode.	1 = Mode0 2 = Mode1 3 = Mode2 4 = Mode3 5 = Mode4 6 = Mode5	6
22	<b>Echo Canceller NLP Mode</b> Non-linear processing mode. Enable this option to decrease the low level echo. When NLP is enabled, the voice with low level is replaced with NLP noise. As a result, a low echo of the level is usually removed compared with the conversation level.	0 = 2 wire & 4 wire 1 = 2 wire only	1
24	<b>Echo Canceller NLP Noise Setting</b> Becomes invalid item if 84-12-22 is set to Disabled. Set the noise level adjusting method added with NLP. When "0" is set, the level is self-adjusted - when "1" is set, Program 84-19-23 is used.	0 = adaptive 1 = fixed	0

## Input Data

Item No.	Item	Input Data	Default
26	<b>TX (Transmit) Gain</b> Define the setting to amplify and to attenuate the size of the transmission voice. The gain given when the voice packet is sent from the VOIPDB is set.	0-40 (-20 ~ +20) 0 = -20 dbm 1 = -19 dbm : 20 = 0 dbm : 39 = 19 dbm 40 = 20 dbm	20 (0dbm)
27	<b>RX (Receive) Gain</b> Define the setting to amplify and to attenuate the size of the received voice. The gain given when the voice packet is received from the VOIPDB is set.	0-40 (-20~+20) 0 = -20 dbm 1 = -19 dbm : 20 = 0 dbm : 39 = 19 dbm 40 = 20 dbm	20 (0dbm)
28	<b>Priority Codec Setting</b> The option selected here determines what other codec options are applied by priority.	0 = G711 PT 1 = G723 PT 2 = G729 PT 3 = G.722 4 = G.726 5 = iLBC	0
30	<b>EchoAuto Gain Control</b> Define the Auto Gain Control.	0 - 5	0
31	<b>DTMF Payload Number</b> Define the DTMF Payload Number.	96-127	96
32	<b>DTMF Relay Mode</b> Determine the DTMF setup used between the SIP extensions. It is effective when a terminal call is made through the VOIPDB.	0 = Disable 1 = RFC2833	0
33	<b>G.722 Audio Frame</b> Maximum number of G.722 Audio Frames. G.722 assumes the audio signal made by a specimen by 16kHz and the frame of 10ms is assumed to be a unit to 64kbps by the encoding compressed method.	1 = 10ms 2 = 20ms 3 = 30ms 4 = 40ms	3
34	<b>G.722 Silence Compression Mode</b> Select whether to compress silence with G.722. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
35	<b>G.722 Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of G.722 is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-160 ms	30
36	<b>G.722 Jitter Buffer - Standard</b> Set the average G.722 Jitter Buffer.	0-160 ms	60
37	<b>G.722 Jitter Buffer - Maximum</b> Set the maximum G.722 Jitter Buffer.	0-160 ms	120
38	<b>G.726 Audio Frame</b> Maximum number of G.726 Audio Frames. G.726 assumes the audio signal made by a specimen by 16kHz and the frame of 10ms is assumed to be a unit to 32kbps by the encoding compressed method.	1 = 10 ms 2 = 20 ms 3 = 30 ms 4 = 40 ms	3
39	<b>G.726 Silence Compression (VAD) Mode</b> Select whether to compress silence with G.726. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
40	<b>G.726 Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of G.726 is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-160 ms	30
41	<b>G.726 Jitter Buffer - Standard</b> Set the average G.726 Jitter Buffer.	0-160 ms	60
42	<b>G.726 Jitter Buffer - Maximum</b> Set the maximum G.726 Jitter Buffer.	0-160 ms	120
43	<b>iLBC Audio Frame</b> Maximum number of iLBC Audio Frames. iLBC assumes the frame of 10ms is a unit.	2 = 20 ms 3 = 30 ms 4 = 40 ms	3
44	<b>iLBC Silence Compression Mode</b> Select whether to compress silence with iLBC. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
45	<b>iLBC Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of iLBC is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-160 ms	30

## Input Data

Item No.	Item	Input Data	Default
46	<b>iLBC Jitter Buffer - Standard</b> Set the average iLBC Jitter Buffer.	0-160 ms	60
47	<b>iLBC Jitter Buffer - Maximum</b> Set the maximum iLBC Jitter Buffer.	0-160 ms	120
48	<b>iLBC payload number</b> The payload number of iLBC is set. However, the same number as Item31 cannot be set.	96-127	98
49	<b>RTP Filter</b> To avoid incorrect voice pass connection, this Program checks the sending side address from received RTP packet at VoIPDB.	0 = Disable 1 = Enable	1
50	<b>FAX Relay Mode</b>	0 = Disable 1 = Enable	0
51	<b>T.38 Protocol Mode</b>	0 = RTP 1 = UDPTL	1
52	<b>FAX Maximum Rate</b>	0 = V.27ter, 2400bps 1 = V.27ter, 4800bps 2 = V.29, 7200bps 3 = V.29, 9600bps 4 = V.17, 12000bps 5 = V.17, 14400bps	5
55	<b>High Speed Data Packet Length</b>	1 = 10ms 2 = 20ms 3 = 30ms 4 = 40ms	4
56	<b>Low Speed Redundancy</b>	0~5	0
57	<b>High Speed Data Packet Redundancy</b>	0~2	0
58	<b>TCF Handling Method</b>	0 = Receive TCF signal by VoIPDB 1 = Through TCF signal to external FAX	1
59	<b>Maximum Low Speed Data Packetization</b>	1~65535 bytes	1
60	<b>Transmit Network Timeout</b>	10~32000sec	150
61	<b>T.38 RTP Format Payload Number</b>	96~127	100

### 84-21 : CCIS over IP CODEC Information Basic Setup

**Level:**  
**IN**

#### Description

Use **Program 84-21 : CCIS over IP CODEC Information Basic Setup** to set the codec parameters of the PZ-32IPLA, PZ-64IPLA, and PZ-128IPLA.

#### Input Data

Item No.	Item	Input Data	Default
01	Number of G.711 Audio Frames	1~4 1 = 10ms 2 = 20ms 3 = 30ms 4 = 40ms	3
02	G.711 Type	0 = A-law 1 = u-law	0
03	G.711 Voice Activity Detection Mode	0 = Disable 1 = Enable	0
04	G.711 Jitter Buffer Min	0~160ms	30
05	G.711 Jitter Buffer Average	0~160ms	60
06	G.711 Jitter Buffer Max	0~160ms	120
07	G.729 Audio Frame Number	1~6 1 = 10ms 2 = 20ms 3 = 30ms 4 = 40ms 5 = 50ms 6 = 60ms	3
08	G.729 Voice Activity Detection Mode	0 = Disable 1 = Enable	0
09	G.729 Jitter Buffer Min	0~270ms	30
10	G.729 Jitter Buffer Average	0~270ms	60
11	G.729 Jitter Buffer Max	0~270ms	120

## Input Data

Item No.	Item	Input Data	Default
12	<b>G.723 Audio Frame Number</b>	1 = 30ms 2 = 60ms	1
13	<b>G.723 Voice Activity Detection Mode</b>	0 = Disable 1 = Enable	0
14	<b>G723 Jitter Buffer Min</b>	0~270ms	30
15	<b>G723 Jitter Buffer Average</b>	0~270ms	60
16	<b>G.723 Jitter Buffer Max</b>	0~270ms	120
17	<b>TX Gain</b>	0~40 (-20dbm ~ +20dbm) 0 = -20 dbm 1 = -19 dbm : 20 = 0 dbm : 39 = +19 dbm 40 = +20 dbm	20
18	<b>RX Gain</b>	0~40 (-20dbm ~ +20dbm) 0 = -20 dbm 1 = -19 dbm : 20 = 0 dbm : 39 = +19 dbm 40 = +20 dbm	20
19	<b>1st Priority of Audio Capability</b>	0 = G.711 PT 1 = G.723 PT 2 = G.729 PT 3 = G.722 4 = G.726 5 = Not Used	0
20	<b>2nd Priority of Audio Capability</b>	0 = G.711 PT 1 = G.723 PT 2 = G.729 PT 3 = G.722 PT 4 = G.726 PT 5 = Not Used	1
21	<b>DTMF Relay Mode</b>	0 = Disable 1 = Inbound (RFC2833) 2 = Outbound (H.245)	0
22	<b>Jitter Buffer Mode</b>	1 = Static 2 = Silence 3 = Immediate	3

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
23	<b>Voice Activity Detection Threshold</b>	0 = Self adjustment 1 = -19dbm (-49dbm) : 20 = 0dbm (-30dbm) : 29 = +9dbm (-21dbm) 30 = +10dbm (-20dbm)	20
24	<b>Echo Canceller Mode</b>	0 = Disable 1 = Enable	1
25	<b>NLP Echo Canceller Mode</b>	0 = Disable 1 = Enable	1
26	<b>UDP Checksum Mode</b>	0 = Disable 1 = Enable	1
27	<b>G.722 Audio Frame Number</b>	1~4 1 = 10ms 2 = 20ms 3 = 30ms 4 = 40ms	3
28	<b>G.722 Voice Activity Detection Mode</b>	0 = Disabled 1 = Enabled	0
29	<b>G.722 Jitter Buffer (min)</b>	0~160ms	30
30	<b>G.722 Jitter Buffer (Average)</b>	0~160ms	60
31	<b>G.722 Jitter Buffer (max)</b>	0~160ms	120
32	<b>G.726 Audio Frame Number</b>	1~4 1 = 10ms 2 = 20ms 3 = 30ms 4 = 40ms	3
33	<b>G.726 Voice Activity Detection Mode</b>	0 = Disabled 1 = Enabled	0
34	<b>G.726 Jitter Buffer (min)</b>	0~160ms	30
35	<b>G.726 Jitter Buffer (Average)</b>	0~160ms	60
36	<b>G.726 Jitter Buffer (max)</b>	0~160ms	120
37	<b>iLBC Audio Frame</b> Maximum number of iLBC Audio Frames. iLBC assumes the frame of 10ms is a unit.	2 = 20 ms 3 = 30 ms 4 = 40 ms	3

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
38	<b>iLBC Silence Compression Mode</b> Select whether to compress silence with iLBC. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
39	<b>iLBC Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of iLBC is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-160 ms	30
40	<b>iLBC Jitter Buffer - Standard</b> Set the average iLBC Jitter Buffer.	0-160 ms	60
41	<b>iLBC Jitter Buffer - Maximum</b> Set the maximum iLBC Jitter Buffer.	0-160 ms	120
42	<b>FAX Relay Mode</b>	0 = Disable 1 = Enable 2 = Each Port Mode (each extension)	0
43	<b>RTP Filter</b> To avoid incorrect voice pass connection, this Program checks the sending side address from received RTP packet at VoIPDB.	0 = Disable 1 = Enable	1
47	<b>FAX over IP Type</b> Type 1: SV8100 original mode. Type 2: PBX compatible mode.	0 = Type 1 1 = Type 2	0

## 84-23 : DT700 Multiline Basic Information Setup

**Level:**  
**IN**

### Description

Use **Program 84-23 : DT700 Multiline Basic Information Setup** to set the basic information for the DT700 Multiline Terminal.

### Input Data

Item No.	Item	Input Data	Default
01	<b>Registration Expire Timer</b> The Expires value of the REGISTER message which received from DT700 terminal is out of range or when the Expire value is not set up, in case it assigns the effective time to the DT700 terminal. The timer for supervising whether DT700 terminal is connected or not.	60~65535 (sec)	180
02	<b>Subscribe Expire Timer</b> The subscribe Expire timer to transmit and receive the terminal operation instructions between the Main Device and DT700 terminal.	60~65535 (sec)	3600
03	<b>Session Expire Timer</b> Set effective time for supervising the Voice Path.	0~65535 (sec)	180
04	<b>Minimum Session Expire Timer</b> Set minimum value of effective time for supervising the Voice Path.	0~65535 (sec)	180
05	<b>Invite Expire Timer</b> Set effective time for Incoming/Outgoing call when the Expire value is not set in the INVITE message received from DT700 terminal.	0~65535 (sec)	180
06	<b>Signal Type of Service</b> Set Type of Service value which applied to send SIP Message Packet from DT700 terminal to Main Device.	0x00~0xFF (0~9, A~F)	00
07	<b>Error Display Timer</b>	0~65535 (sec)	0

**Input Data**

Item No.	Item	Input Data	Default
08	<b>Digest Authorization Registration Expire Timer</b>	0~4294967295 (sec)	0
10	<b>Number of Password Retries</b> Input the number of times an incorrect password can be entered when the security key is pressed.	0~255 (0 = No Limit)	0
11	<b>Password Lock Time</b>	0~120 (0 = No Limit)	0
12	<b>Reference Number</b>	Up to 32 digits (0~9, *, #, P, R, @)	No Setting
13	<b>Media Type of Service</b>	0x00~0xFF (0~9, A~F)	00
14	<b>Refer Expire Timer</b>	0~65535 (sec)	60

Type	1 = Type 1 2 = Type 2 3 = Type 3 4 = Type 4 5 = Type 5
------	--

Item No.	Item	Input Data	Default
01	<b>Number of G.711 Audio Frame</b> Maximum number of G711 Audio Frames. When the voice is encoded using the PCM (Pulse Code Modulation) method, a unit is a frame of 10ms.	1 = 10 ms 2 = 20 ms 3 = 30 ms 4 = 40 ms	2
02	<b>G.711 Silence Detection (VAD) Mode</b> Select whether to compress silence with G.711. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
03	<b>G.711 Type</b> Set the type of G.711.	0 = A-law 1 = $\mu$ -law	0
04	<b>G.711 Jitter Buffer - Minimum</b> Set the minimum value of the G.711 Jitter Buffer.	0~160 ms	20
05	<b>G.711 Jitter Buffer - Standard</b> Set the average value of the G.711 Jitter Buffer.	0~160 ms	40
06	<b>G.711 Jitter Buffer - Maximum</b> Set the maximum value of the G.711 Jitter Buffer.	0~160 ms	80

Item No.	Item	Input Data	Default
07	<b>G.729 Audio Frame</b> Maximum number of G.729 Audio Frames. G.729 assumes the audio signal made by a specimen by 8kHz and the frame of 10ms is assumed to be a unit to 8kbps by the encoding compressed method.	1-4 (1 = 10ms, 2 = 20ms, etc.)	2
08	<b>G.729 Silence Compression (VAD) Mode</b> Select whether to compress silence with G.729. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
09	<b>G.729 Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of G.729 is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-270 ms	20
10	<b>G.729 Jitter Buffer - Standard</b> Set the average G.729 Jitter Buffer.	0-270 ms	40
11	<b>G.729 Jitter Buffer - Maximum</b> Set the maximum G.729 Jitter Buffer.	0-270 ms	80
17	<b>Jitter Buffer Mode</b> <b>Set the mode of the Jitter Buffer.</b> 1 = Size set to the fixed amount for the codec. 2 = The minimum/maximum range for the codec is used. 3 = The minimum/maximum range for the codec is used and adjust at any time, regardless of silence.	1 = static 2 = adaptive during silence 3 = adaptive immediately	3
18	<b>Silence Compression (VAD) Threshold</b> Set the voice level judged to be silence. Change value based.30 This entry is ignored if silence compression is disabled in 84-01-03 with G.711, or 84-01-06 with G.729.	0-30 (self-adjustment and -19db ~ +10db) 0 = self-adjustment 1:-19db (-49dbm) : 20 = 0db (-30dbm) : 29 = 9dbm (-21dbm) 30:10dbm (-20dbm)	20
19	<b>Idle Noise Level</b> Set the noise level which is generated when silent.	5000-7000 (-5000 ~ -7000dbm) 5000 = -5000dbm : 7000 = -7000dbm	7000

Item No.	Item	Input Data	Default
20	<b>Echo Canceller Mode</b> Determine whether or not to use Echo canceller.	0 = Disable 1 = Enable	1
21	<b>Signal Limiter</b> Set the Signal Limiter Mode.	1 = Mode0 2 = Mode1 3 = Mode2 4 = Mode3 5 = Mode4 6 = Mode5	6
22	<b>Echo Canceller NLP Mode</b> Non-linear processing mode. Enable this option to decrease the low level echo. When NLP is enabled, the voice with low level is replaced with NLP noise. As a result, a low echo of the level is usually removed compared with the conversation level.	0 = 2 wire & 4 wire 1 = 2 wire only	1
24	<b>Echo Canceller NLP Noise Setting</b> Becomes invalid item if 84-24-22 is set to Disabled. Set the noise level adjusting method added with NLP. When "0" is set, the level is self-adjusted - when "1" is set, Program 84-24-22 is used.	0 = adaptive 1 = fixed	0
26	<b>TX (Transmit) Gain</b> Define the setting to amplify and to attenuate the size of the transmission voice. The gain given when the voice packet is sent from the VOIPDB is set.	0-40 (-20 ~ +20) 0 = -20 dbm 1 = -19 dbm : 20 = 0 dbm : 39 = 19 dbm 40 = 20 dbm	20 (0dbm)
27	<b>RX (Receive) Gain</b> Define the setting to amplify and to attenuate the size of the received voice. The gain given when the voice packet is received from the VOIPDB is set.	0-40 (-20 ~ +20) 0 = -20 dbm 1 = -19 dbm : 20 = 0 dbm : 39 = 19 dbm 40 = 20 dbm	20 (0dbm)
28	<b>Priority Codec Setting</b> The option selected here determines what other codec options are applied by priority.	0 = G711 PT 1 = Not Used 2 = G729 PT 3 = G.722 PT	0

Item No.	Item	Input Data	Default
30	EchoAuto Gain Control Define the Auto Gain Control.	0 - 5	0
31	<b>DTMF Payload Number</b>	96~127	96
32	<b>G.722 Audio Frame</b> Maximum number of G.722 Audio Frames. G.722 assumes the audio signal made by a specimen by 16kHz and the frame of 10ms is assumed to be a unit to 64kbps by the encoding compressed method.	1 = 10 ms 2 = 20 ms 3 = 30 ms 4 = 40 ms	3
33	<b>G.722 Silence Compression Mode</b> Select whether to compress silence with G.722. When there is silence, the RTP packet is not sent.	0 = Disable 1 = Enable	0
34	<b>G.722 Jitter Buffer - Minimum</b> Set the minimum value of the Jitter Buffer of G.722 is set. Jitter is the variation in the time between packets arriving and the buffer allows this variation to be absorbed.	0-160 ms	30
35	<b>G.722 Jitter Buffer - Standard</b> Set the average G.722 Jitter Buffer.	0-160 ms	60
36	<b>G.722 Jitter Buffer - Maximum</b> Set the maximum G.722 Jitter Buffer.	0-160 ms	120
37	<b>RTP Filter</b> To avoid incorrect voice pass connection, this Program checks the sending side address from received RTP packet at VoIPDB.	0 = Disable 1 = Enable	1

# Program 85 : Hardware Setup for ETIA Switch

## 85-01: ETIA LAN Setup (AU)

Level:  
IN

### Description

Use **Program 85-01: ETIA LAN Setup** to define the LAN setup for each slot.

### Input Data

Hub Slot	1~24
Hub Port	0~8

Item No.	Item	Input Data	Default	Description
01	<b>Auto Negotiation</b>	0 = Enable 1 = Disable	0	When enabled, Link Speed, Duplex and MDI/MDIX setting are negotiated with the other connected device.
02	<b>Link Speed</b>	0 = 10Mbps 1 = 100Mbps	1	85-01-01 – Disable
03	<b>Half Duplex/Full Duplex</b>	0 = Half 1 = Full	1	85-01-01 – Disable
04	<b>Auto MDI/MDIX</b>	0 = MDIX 1 = MDI 2 = Auto	2	When 85-01-01 is enabled, Auto MDI/MDIX will function. Auto MDI/MDIX (Media Dependent Interface / Media Dependent Interface Cross-over) enables a switch port to sense the appropriate transmit/receive pairs of an Ethernet cable.

Program

85

Item No.	Item	Input Data	Default	Description
05	<b>Back Pressure, Half-Duplex</b>	0 = Disable 1 = Enable	0	85-01-01 – Disable, 85-01-03 – Half-Duplex When enabled, a switch applies back pressure to a half-duplex ingress port while an output queue is congested.
06	<b>Flow Control, Full-Duplex</b>	0 = Disable 1 = Enable	0	Full Duplex – 802.3x 85-01-01 – Disable 85-01-03 – Full-Duplex When enabled, a switch applies flow control to a full-duplex ingress port while an output queue is congested.

# Program 85 : Hardware Setup for ETIA Switch

## 85-02: ETIA VLAN Setup (AU)

**Level:**  
**IN**

### Description

Use **Program 85-02: ETIA VLAN Setup** to define the VLAN setup for each ETIA blade. The CHS2U can support up to 16, 802.1q VLANs (numbered 1 ~ 16). Program Block 85-02 assigns supported VLAN IDs, with a range of 1 ~ 4095.

At default, 802.1q support is disabled. If Program Block 85-02-01 is set to ENABLE, 802.1q VLAN tagging is supported.

85-02-02 through 85-02-09 establish the default VLAN for ports 1 ~ 8 of the ETIA.

### Input Data

Hub Slot	1~24
----------	------

Item No.	Item	Input Data	Default
01	VLAN Mode	0 = Disable 1 = Enable	0
02	Port 1 VLAN ID	1~4095	1
03	Port 2 VLAN ID	1~4095	1
04	Port 3 VLAN ID	1~4095	1
05	Port 4 VLAN ID	1~4095	1
06	Port 5 VLAN ID	1~4095	1
07	Port 6 VLAN ID	1~4095	1
08	Port 7 VLAN ID	1~4095	1
09	Port 8 VLAN ID	1~4095	1

**Conditions**

None

---

**Feature Cross Reference**

## Program 85 : Hardware Setup for ETIA Switch

### 85-03: Priority Setup (AU)

**Level:**  
**IN**

#### Description

Use **Program 85-03: Priority Setup** to establish the queuing prioritization rules for the low and high priority queues. Each port has a low and a high priority queue for both ingress and an egress. These queues serve to buffer packets during times of heavy network traffic. The ETIA supports 802.1q/p layer 2 Quality of Service.

#### Input Data

Hub Slot	1~24
Hub Port	0~8

Item No.	Item	Input Data	Default	Description
01	<b>Default Priority</b>	0 = Disable 2 = Low 3 = High	0	Assigns untagged frames to either the Low or the High queue, and tags them with a priority assigned in Program 85-03-03 (High) or Program 85-03-04 (Low).
02	<b>RX High</b>	0~7	1	RX High establishes the minimum threshold for frames designated for the high priority queues.
03	<b>TX High</b>	0~7	7	When Program 85-03-01 is set to <b>High</b> , untagged frames are marked with this priority setting. Previously tagged frames are unchanged.
04	<b>TX Low</b>	0~7	0	When Program 85-03-01 is set to <b>Low</b> , untagged frames are marked with this priority setting. Previously tagged frames are unchanged.

**Conditions**

None

---

**Feature Cross Reference**

# Program 85 : Hardware Setup for ETIA Switch

## 85-04: Port Mirroring Setup (AU)

**Level:**  
**IN**

### Description

Use **Program 85-04: Port Mirroring Setup** to define the port mirroring for each ETIA blade. This permits traffic from one port to be simultaneously transmitted to a second port. Port mirroring is typically used for debugging with a protocol analyzer.

### Input Data

Hub Slot	1~24
----------	------

Item No.	Item	Input Data	Default	Description
01	<b>Port Mirroring</b>	0 = Disable 1 = Enable	0	
02	<b>Source Port</b>	1~8	1	Set to the port to be monitored.
03	<b>Target Port</b>	1~8	1	Set to the port where the protocol analyzer is connected.

### Conditions

- Set to the port where the protocol analyzer is connected.

### Feature Cross Reference

- Voice Over Internet Protocol (VoIP)

## Program 85 : Hardware Setup for ETIA Switch

### 85-05: ETIA VLAN Group Settings (AU)

**Level:**  
**IN**

#### Description

Use **Program 85-05: ETIA VLAN Group Settings** to define the VLAN group setup for each ETIA blade.

#### Input Data

Slot	1~24
VLAN Group	00~15

Item No.	Item	Input Data	Default	Description
01	<b>VLAN ID</b>	0~4095	0	802.1q VLAN ID
02	<b>Port</b>	00000000~11111111	00000000	Represents the eight physical ports of the ETIA, numbered from left to right as 8 to 1. Setting a port to 1 enables the port to allow traffic from the VLAN ID specified in Program 85-05-01.
03	<b>Tag Egress Retention</b>	00000000~11111111	00000000	Represents the eight physical ports of the ETIA, numbered from left to right as 8 to 1. At the point of egress, should VLAN tags be retained or removed? (Many Ethernet devices do not process VLAN tagged packets.) Setting a port to 1 permits VLAN tags to be retained.

# Program 90 : Maintenance Program

## 90-02: Programming Password Setup

**Level:**  
**IN**

### Description

Use **Program 90-02: Programming Password Setup** to set the system passwords. For password entry, the system allows eight users to be defined. Each user can have a:

- Unique alphanumeric name (up to 10 alphanumeric characters)
- Password entry of up to eight digits (using 0~9, # and \*)
- Password level

The IN level password is used by the System Installer for system programming. The SA or SB level password cannot access the IN level programs. The reverse type (white on black) just beneath the Description heading is the program access level. You can only use the program if your access level meets or exceeds the level the program requires. (SA level password can access to SA or SB programs, and SB level password can access to SB programs only.)

**CAUTION**

*Before changing your numbering plan, use the PC Programming or WebPro Programming to make a backup copy of your system data.*

### Input Data

Item No.	Item	Input Data
01	<b>User Name</b>	Maximum 10 characters
02	<b>Password</b>	Up to eight digits
03	<b>User Level</b>	0 = Prohibited User 1 = MF (Manufacture Level) 2 = IN (Installer Level) 3 = SA (System Administrator Level 1) 4 = SB (System Administrator Level 2) 5 = UA (User Programming Level 1)

**Default**

<b>User No.</b>	<b>User Name</b>	<b>Password</b>	<b>Level</b>	<b>Level Description</b>
1	nec-i	*****	1 (MF)	Manufacture Level - Access to all system program
2	tech	12345678	2 (IN)	Installer Level – Access to all IN level programs.
3	ADMIN1	0000	3 (SA)	System Administrator Level 1 – Restricted Access
4	ADMIN2	9999	4 (SB)	System Administrator Level 2 – More Restricted Access
5	USER1	1111	5 (UA)	User Programming Level 1

**Conditions**

- More than one extension can be in the programming mode.

---

## **Feature Cross Reference**

None

# Program 90 : Maintenance Program

## 90-03: Save Data

Level:  
SA

---

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-03: Save Data** to save the programmed data on the USB Flash Drive. This program should be used after changing the programmed data.

### Input Data

Item No.	Item	Input Data
01	Save Data	Dial 1 + press <b>Transfer</b> (Press <b>Transfer</b> to cancel.)

### Conditions

- When reloading a customer database, the system must be reset (either using Program 90-08 or power down/power up) before all uploaded programming takes affect.

---

### Feature Cross Reference

None

# Program 90 : Maintenance Program

## 90-04: Load Data

**Level:**  
**SA**

---

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-04: Load Data** to load the system data from the inserted USB Flash Drive to the SRAM and Flash ROM in the system.

### Input Data

Item No.	Item	Input Data
01	Load Data	Dial 1+ press <b>Transfer</b> (Press <b>Transfer</b> to cancel.)

### Conditions

- After uploading the programming, reset the system and wait a few minutes for the system to reset completely before accessing any line or special system feature. Otherwise, some unusual LED indications may be experienced.

---

### Feature Cross Reference

None

# Program 90 : Maintenance Program

## 90-05: Slot Control

**Level:**  
**IN**

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-05: Slot Control** to reset or delete (uninstall) blades (slots 1~24).

Delete allows you to completely uninstall the blade. You should do this if you want to remove a blade and plug it into a different slot and still retain the port assignments. If a different type of interface blade is being installed in a slot previously used (e.g., changing from a LCA to an DLCA blade), the slot should be deleted (option 1) first before installing the new interface blade.

Reset allows you to send a reset code.

#### Input Data

System ID	00 - 50
-----------	---------

#### Input Data

Menu Number	1 = Delete 2 = Reset 3 = Set Busy Out 4 = Reset Busy Out
-------------	---

Item No.	Item	Input Data
01	<b>Slot Control</b>	Slot Number (0~24 0 = No Setting)

#### Conditions

- When you delete or reset a blade, you must first remove it from its slot then run Program 90-05. When reusing the slot for another blade, you must plug the blade in or reset the system before the system can use the slot again.
- When you delete or reset a blade, all related programming in Program 10-03-01 is set back to default.

  
**Feature Cross Reference**

None

# Program 90 : Maintenance Program

## 90-06: Trunk Control

**Level:**  
**SA**

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-06: Trunk Control** for trunk maintenance. Busy Out lets you block a blade from placing outgoing calls (just like placing the blade switch down). Once busied out, none of the ports on the blade can be used for new calls. Existing calls, however, are not torn down.

### Input Data

Menu Number	0 = Set Busy Out 1 = Reset Busy Out (idle)
-------------	---

Item No.	Item	Input Data	Default
01	Trunk Control	Trunk Port Number: 001~200	1

# Program 90 : Maintenance Program

## 90-08: System Reset

**Level:**  
**IN**

---

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-08: System Reset** to perform a system reset.

### Input Data

Item No.	Item	Input Data
01	System Reset	Dial 1 + press <b>Transfer</b> (Press <b>Transfer</b> key to cancel)

### Conditions

- After restoring a customer database, the system must be reset using Program 90-08 or by powering down/powering up before all the restored programming takes affect.

---

### Feature Cross Reference

None

## 90-09: Automatic System Reset Time Setup

**Level:**

**IN**

### Description

Use **Program 90-09: Automatic System Reset Time Setup** to define the time for the system to automatically reset.

### Input Data

Item No.	Item	Input Data	Default
01	Month	00~12 <i>(Note 1)</i>	00
02	Day	00~31 <i>(Note 2)</i>	00
03	Hour	00~23	00
04	Minute	00~59	00

*Note 1* If the Month is set to 00 and Day is set, the system is automatically reset every month on the predefined day.

*Note 2* If the Day is set to 00 and the Time (Hour and Minute) is set, the system automatically resets every day at the predefined time.

### Conditions

None

### Feature Cross Reference

## 90-10: System Alarm Setup

**Level:**  
**IN**

### Description

Use **Program 90-10: System Alarm Setup** to assign a status to system alarms. You can designate an alarm as Major or Minor. This program also assigns whether or not the alarm information is reported to the pre-defined destination.

### Input Data

Alarm Number	001~100
--------------	---------

Item No.	Item	Input Data
01	<b>Alarm Type</b>	0 = Not Set 1 = Major Alarm 2 = Minor Alarm
02	<b>Report</b>	0 = Not Report (No autodial) 1 = Report (autodial)

**Table 2-19 Description of Alarm**

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status
1	2	0	PKG Initialize Error.	1. The PKG failed to initialize. 2. The PKG did not start normally.	1. PKG not inserted firmly. 2. PKG was removed, but not reinserted firmly. 3. Old PKG data still reported due to no initialization.	1. Insert PKG firmly. 2. Insert PKG firmly. 3. Delete slot information in PRG 90-05 and insert the PKG again.	During initialization, the PKG is recognized.	ERR REC
2	2	0	PKG Mounting Error	The unit did not step on a regular procedure and it was pulled out. Or, it is not normally inserted.	1. The package is not completely inserted. 2. The package is out of order.	1. Please insert the package firmly. 2. Please try again after initializing the system data once when LED doesn't blink normally. 3. Exchange packages.	When unit is reconfirmed, the error is recovered.	ERR REC

Table 2-19 Description of Alarm (Continued)

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status
3	2	0	Connection fault between CD-CP00 and other PKGs.	The error occurred when communicating with the package. When the package is broken, it recognizes it as a communication fault.	<ol style="list-style-type: none"> <li>1.The unit is not completely inserted.</li> <li>2.The power-supply voltage of the system is outside ratings.</li> <li>3.The equipment that generates the noise in the same power supply system as the power supply origin of the system is connected, and it malfunctions because of the power supply noise.</li> <li>4.The equipment to which it is adjacent to of a main device, and has put out the radiation noise exists, and it malfunctions because of the radiation noise.</li> <li>5.The chassis is not properly grounded.</li> </ol>	<ol style="list-style-type: none"> <li>1.Please insert the unit firmly.</li> <li>2.The power-supply voltage must use another power supply when is in the range of ratings or measuring with the voltmeter, and deviating from the rated range.</li> <li>3.Please use the power supply besides the equipment with the possibility of the noise source.</li> <li>4.Please separate as much as possible and use a main device from the equipment by which you seem may generate the radiation noise.</li> <li>5.Please ground the chassis correctly.</li> </ol>	When unit is confirmed, the error is recovered.	ERR REC
4	2	0	PKG S/W Download Error	The unit program could not be downloaded normally. The unit could not able to be started normally.	<ol style="list-style-type: none"> <li>1.The package software is not stored in the downloaded USB memory.</li> <li>2.The stored package software is illegal. Package information that was installed before remains.</li> </ol>	<ol style="list-style-type: none"> <li>1.Delete slot information that corresponds by PRG90-05-01 to delete package information that was installed before.</li> <li>2.There is a possibility that the unit program is broken though an external factor of the noise etc. is thought.</li> <li>3.Please load into the USB memory and try again when you back up the unit program.</li> <li>4.Please Check with maker on uncertain points.</li> </ol>	Please exchange units, though it is likely to restore by mounting the unit again. When the unit program is normally downloaded, the error is recovered.	ERR REC
5	1	0	Cooling fan error	The cooling fan does not work normally.	<ol style="list-style-type: none"> <li>1.The cooling fan has stopped working.</li> <li>2.The cooling fan has come off.</li> </ol>	<ol style="list-style-type: none"> <li>1.Confirm the cooling fan is turning.</li> <li>2.Verify the cooling fan mounting.</li> </ol>	Replace the cooling fan if it is defective.	

Table 2-19 Description of Alarm (Continued)

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status
6	0	0	Blocking	The link of terminals connected with the ESI package came off.	<ol style="list-style-type: none"> <li>1.Terminal Breakdown.</li> <li>2. Faulty wiring and wiring termination.</li> <li>3.External noise.</li> <li>4.ESI package Breakdown.</li> </ol>	<p>Confirm the terminal connected with same ESI. If they work normally, confirm the breakdown or the wiring for the terminal. Exchange the terminal that doesn't work and the working terminal, and confirm it's working. An external factor of the noise etc. is thought. Please reconfirm wiring and the installation, etc. Please inquire of the manufacturer when the problem occurs after it confirms it.</p>	The error is recovered when connecting or exchanging it.	ERR REC
7	1	0	Power failure	The supply of the commercial power stopped.	<ol style="list-style-type: none"> <li>1. The power cable came off.</li> <li>2. Power failure</li> <li>3. The power supply broke down.</li> </ol>	<ol style="list-style-type: none"> <li>1.Confirm the power supply outlet when the commercial power has not stopped.</li> <li>2.Please confirm with manufacturer if the problem occurs again.</li> </ol>	When the commercial power is restored, the error is recovered.	ERR REC
8	1	0	RAM Backup Battery Error	RAM backup battery on the CD-CP00 blade is unplugged or defective.		Check the battery connector. If it is connected correctly, replace the battery.	The error is recovered once the battery is replaced.	ERR REC
10	0	0	ISDN Link Error	Layer1 link of ISDN lines came off.	<ol style="list-style-type: none"> <li>1. Check Connection between main device and ISDN line</li> <li>2. DSU Breakdown.</li> <li>3. The setting of PRG10-03 does not correspond to an actual line.</li> </ol>	<ol style="list-style-type: none"> <li>1.Confirm the data of PRG10-03.</li> <li>2.Confirm wiring and the installation of DSU.</li> <li>3.Check with the manufacturer if the problem occurs again.</li> </ol>	When the connection returns normally, the error is recovered.	ERR REC
11	0	0	CTI Link Error	The link with the CTI server came off.	<ol style="list-style-type: none"> <li>1. LAN cable defective.</li> <li>2. Connected HUB broken.</li> <li>3. The CTI server doesn't start normally.</li> </ol>	<ol style="list-style-type: none"> <li>1. Confirm the CTI server, wiring, and the connection.</li> <li>2.Check the manufacturer if the problem occurs again.</li> </ol>	When the connection returns normally, the error is recovered.	ERR REC
12	0	0	ACD MIS Link Error	The link with ACD MIS client PC came off.	<ol style="list-style-type: none"> <li>1. LAN cable defective.</li> <li>2. Connected HUB broken.</li> <li>3. The CTI server doesn't start normally.</li> </ol>	<ol style="list-style-type: none"> <li>1.Confirm ACD MIS client PC and connected part.</li> <li>2. Check with manufacturer if the problem occurs again.</li> </ol>	When the connection returns normally, the error is recovered.	ERR REC

Table 2-19 Description of Alarm (Continued)

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status
13	0	0	Charge Management Link Error	The link with the charge management device came off.	1. Wiring problem in connecting main device with charge management device. 2. PC Problem.	1. Confirmed that there is no problem in wiring to connect a main device with the charge management device. (Whether ping passes for LAN connection is confirmed.) 2. Restart the charge management software. 3. Reboot PC, and start charge management software.	When the connection returns normally, the error is recovered.	ERR REC
14	0	0	LAN Link Error	The link with LAN on CD-CP00 came off.	1. LAN cable defective. 2. Connected HUB broken. 3. Defective CD-CP00	Confirm the operation of LAN connector, LAN cable, and HUB again.	When the connection returns normally, the error is recovered.	ERR REC
15	0	0	Network Keep Alive Error	1. The network connection has been cut. 2. Network Keep Alive restoration. 3. Response notification on network Keep Alive.	1. LAN cable is defective. 2. Net side trouble. 3. Packet block by firewall. 4. Repetition of IP address.	1. Confirm that the defect is on the Network side. 2. Confirm the settings of HUB and the router, etc.	When the connection returns normally, the error is recovered.	ERR REC WAR
17	1	0	Denial of service	The system received illegal packet.	Service outage (Dos attack)	Confirm whether to find abnormality on the net side.		WAR
29	0	0	Charge Management Buffer full	The temporary buffer for the charge management in main device overflowed, and a part of unoutput charge data disappeared because it could not output the charge management data.	1. The charge data is printed and not deleted at the simple charge management. 2. The charge data is not output to PC for the charge management software.	1. Please print and delete the charge data at the simple charge management. 2. Please connect the charge management software for the charge management software and output the charge data.	When the output is restarted, the error is recovered. However, the charge management data after the error occurs is not recorded.	ERR REC
30	2	0	SMDR Buffer full	The temporary buffer for SMDR in main device overflowed, and a part of unoutput SMDR data disappeared because it could not output SMDR data.	1. Problem of wiring to connect main device with PC. 2. PC Problem.	1. Confirm whether there is problem in wiring to connect a main device with PC. 2. Execute the reactivation of PC.	When the output is restarted, the error is recovered. However, the SMDR data after the error occurs is not recorded.	ERR REC
35	0	0	CS Blocking	The link of the CSIU and CS came off.	1. Outgoing noise. 2. Method of setting up CS. 3. Wiring to connect CSIU unit with CS. 4. Hard defect of CS. 5. Hard defect of CSIU.	Confirm the following when it happens frequently during operation. 1. Please confirm CS is normally connected. 2. Please confirm the wiring between CSIU-CS is normal. 3. Please exchange CS. 4. Please exchange CSIU.	The error is recovered when reconnecting or exchanging it.	ERR REC

Table 2-19 Description of Alarm (Continued)

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status	
36	0	0	CS error notification 1	CS detected the problem occurring in the air synchronous signal between CS-CSIU, BBIC reset was executed, and it was restored automatically.	1. Outgoing noise. 2. Method of setting up CS. 3. Wiring to connect CSIU unit with CS. 4. Hard defect of CS. 5. Hard defect of CSIU.	Confirm the following when it happens frequently during operation. 1. Please confirm CS is normally connected. 2. Please confirm the wiring between CSIU-CS is normal. 3. Please exchange CS. 4. Please exchange CSIU.	This error has been recovered when it is notified.	ERR REC	
37	0	0	CS transmission error.	Because CS had not returned the response to the control signal from a main device longer than the fixed time, it was restored automatically specifying reset to concerned CS with a main device.	1. Outgoing noise. 2. Method of setting up CS. 3. Wiring to connect CSIU unit with CS. 4. Hard defect of CS. 5. Hard defect of CSIU.	Confirm the following when it happens frequently during operation. 1. Please confirm CS is normally connected. 2. Please confirm the wiring between CSIU-CS is normal. 3. Please exchange CS. 4. Please exchange CSIU.	This error has been recovered when it is notified.	ERR REC	
38	0	0	CSIU Dch Error*	It was restored automatically specifying reset to concerned CS with a main device because a main device had detected the control signal from a main device not normally reaching CS.	1. Outgoing noise. 2. Method of setting up CS. 3. Wiring to connect CSIU unit with CS. 4. Hard defect of CS. 5. Hard defect of CSIU.	Confirm the following when it happens frequently during operation. 1. Please confirm CS is normally connected. 2. Please confirm the wiring between CSIU-CS is normal. 3. Please exchange CS. 4. Please exchange CSIU.	This error has been recovered when it is notified.	ERR REC	
39	0	0	CSIU transmission error.	This alarm is integrated into Communication fault between the CD-CP00 and other PKG, and it is not used in SV8100.					
40	0	0	CS error notification 2.	CS detected the factor that the noise is generated between CS-PS, BBIC reset was executed, and it was restored automatically.	1. Outgoing noise. 2. Method of setting up CS. 3. Wiring to connect CSIU unit with CS. 4. Hard defect of CS. 5. Hard defect of CSIU.	Please confirm the following matter when happening frequently when operating it. 1. Please confirm CS is normally connected. 2. Please confirm the wiring between CSIU-CS is normal. 3. Please exchange CS. 4. Please exchange CSIU.	This error has been recovered when it is notified.	ERR REC	
50	1	0	System Start Notification	The system started.	The system was started.	No action needed.			
51	0	0	System Data change	CD-CP00 Upgrade is performed or Programming change is made.		No action needed.			
52	0	0	--- Not Used ---						

Table 2-19 Description of Alarm (Continued)

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status
54	2	0	License Management Table Full	A new TCP/IP terminal and the DSP board were not able to be added to the application license management table. • The license management table is registering full.	Maximum 512 license information on the TCP/IP terminal is registered, and a new terminal cannot be registered.	Please delete license information on an unnecessary TCP/IP terminal with PRG 90-44.		WAR
55	2	0	Regular maintenance exchange notification.	The regular maintenance exchange day has passed.	• The regular maintenance exchange day that had been set with PRG 90-51 exceeded it.	Please do the maintenance exchanges of pertinent parts, and set the next regular maintenance exchange day with PRG 90-51.	The excess on the regular maintenance exchange day is canceled by changing PRG 90-51 or when the function is invalidated, the error is recovered.	ERR REC
57	2	0	IP Collision Error	Collision(01) indicates the address programmed in 10-12-01 has been duplicated. Collision (02) indicates the address programmed in 10-12-09 has been duplicated. Collision(03) ~ Collision(10) indicates the addresses programmed in 84-26-01 have been duplicated. (03) is GW1 ~ (10) is GW8.	An IP address programmed in either 10-12-01, 10-12-09 or 84-26 is duplicated somewhere on the same segment of the network. The system will check every 5 minutes and is not a programmable increment.	Confirm that the addresses assigned in 10-12-01, 10-12-09, and 86-26 are not duplicated anywhere else on the network.		
60	2	0	SIP Registration Error Notification.	1.The registration of the SIP trunk to the SIP server failed. 2.The registration of the SIP trunk to the SIP server failed in the authentication. 3.There is no response from the SIP server to the SIP registration request.	1. The setting of the system data is wrong. 2. The setting of the router is wrong. 3.It is an error to the link of LAN. 4. Net side trouble.	1.Confirm the following system data setting -- PRG 10-12, 10-28, 10-29, 10-30, and 10-36. 2.Confirm the setting of routers. 3.Confirm whether abnormality occurs on the net side. 4.Confirm the authentication system data setting. 5.Confirm wiring and the system data setting. Please inquire on uncertain points of the maker.	The error is recovered when normally connecting it.	ERR REC
61	0	0	SIP extension trouble information.	1. Failed registration of the SIP extension terminal. 2. The SIP extension terminal was not acquired: • At Regist of the SIP extension terminal to SV8100. • When you cannot acquire the DSP resource when it sent.	1. The registered port is used by other extension. 2. The license is insufficient. 3. DSP of VoIPDB not acquired.	1. Confirm wiring and the system data setting. 2. Confirm whether each equipment such as access points works normally.		ERR REC

Table 2-19 Description of Alarm (Continued)

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status
62	0	0	DtermIP trouble information.	The error occurred by the DtermIP relation. • When the error occurs while communicating with VoIPU or DtermIP. • When it becomes impossible to do the communication between SV8100 and DtermIP • When failing in the acquisition of DSP.	1. The packet loss occurred on the network or the wiring cutting occurred.  2. DSP of VoIP not acquired.	Confirm whether each equipment such as wirings and HUB is normal.		ERR REC
63	0	0	SIP-MLT trouble information.	1.The trouble occurred by the SIP-MLT relation.  2. The DSP resource could not be acquired at incoming/outgoing.  3. The negotiation with VoIPDB failed.	1. The packet loss occurred on the network or the wiring cutting occurred.  2. DSP of VoIP not acquired.	Confirm whether each equipment such as wirings and HUB is normal.		WAR
64	1	0	VoIPDB LAN Link Error.	The link of LAN of VoIPDB came off.	1. LAN cable is defective.  2. Connected HUB broken.  3. Defect CD-CP00.	1. Confirm LAN connector and wiring.  2. Check with maker on uncertain points.	When the connection returns normally, the error is recovered.	ERR REC
65	0	0	VoIPDB trouble information.	When DSP of VoIPDB notifies Error.	PZ-32IPLA defective.	1. Possibility of defective hardware.  2. Check with maker on uncertain points.		WAR
66	2	0	SIP extension License Error.	More than the number of licenses to which the SIP extension terminal was turned on at REGISTER.	• Wrong number of licenses.	1. Confirm the number of licenses for SIP extension terminals.  2. Check with maker on uncertain points.	When the number of registration of SIP extension terminals falls below the number of licenses.	WAR
67	0	0	SIP illegal Packet received	The system received illegal packet.	A client or network was illegal state.	Check with maker on uncertain point, when happening frequently when operating it.		INF
68	2	0	VoIP DSP All Busy Alarm	1. Provides alert when all DSP resources are being used. 2. Used to troubleshoot or alerting when upgrade is needed.	Not enough DSP resources in system.	Install PZ-VMDB with more DSP resources.		
80	1	0	NetLink start error.	The error occurred when NetLink started.	•Defect on CD-CP00.	There is a defective possibility of hardware. Please inquire of the maker.		ERR
81	2	0	NetLink call trouble information.	1. The trouble occurred by the NetLink relation.  2. The DSP resource was not acquired at incoming/ outgoing.	PZ-32IPLA DSP not acquired.	1. Confirm wiring and the system data setting.  2. Check with maker on uncertain points.		WAR

Table 2-19 Description of Alarm (Continued)

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status
82	2	0	NetLink Virtual Slot accommod. error.	The trouble occurred with virtual Slot relation. • It exceeded the upper slot accommodation. • It failed to make a virtual slot.	Exceeds slot accommodation in the NetLink system.	1. Confirm upper slot number. 2. Check with maker on uncertain points.		WAR
83	2	0	NetLink Communication Error.	1. Communication error occurred on NetLink. 2. Checksum error occurred. 3. Index error occurred.	1. The Router setting is wrong. 2. LAN Link error. • Net side error.	1. Confirm LAN connector and wiring. 2. Check with maker on uncertain points.		WAR
84	2	0	NetLink License Error	1. License error occurred on NetLink. 2. Expiration date of the license approaches. 3. License nullified.	1. Approaching expiration date of a temporary license. 2. A temporary license was nullified.	1. Confirm license information. 2. Check with maker on uncertain points.		WAR
85	2	0	NetLink node connection refusal.	The connection of Secondary was refused in NetLink. • SystemID overlaps. • SystemID is illegal. • The license is insufficient. • Memory shortage.	1. SystemID Repeated. 2. SystemID is illegal. 3. The number of licenses is wrong. • Insufficient system memory.	1. Confirm the setting and license information on SystemID. 2. Check with maker on uncertain points.		WAR
86	2	0	Data base replication fail.	Because the versions of DB is different, replication cannot be executed between Primary and Secondary.	The versions of data bases between Primary and Secondary is different.	1. Confirm the version of data bases of Primary and Secondary using PC PRO. 2. Check with maker on uncertain points.		WAR
87	2	0	Data base replication fail.	Because the error occurred in the communication between Primary and Secondary, replication cannot be executed.	LAN link between Primary and Secondary was disconnected.	Confirm LAN link between Primary and Secondary.		WAR
88	2	0	NetLink phase shift.	Operation began as Primary.	Operation began as Primary.	No action is necessary.		INF
89	2	0	NetLink phase shift.	Operation began as Secondary.	Operation began as Secondary.	No action is necessary.		INF
90	2	0	NetLink phase shift.	It shifted to the node search mode.	Shifted to the node search mode.	No action is necessary.		INF
91	2	0	Primary auto-integration.	Primary auto-integration function operated.	Primary auto-integration function operated.	No action is necessary.		INF
92	2	0	Primary compulsion specification.	The Primary compulsion specification function was executed.	Primary compulsion specification function was executed.	No action is necessary.		INF
93	2	0	NetLink node connection detection.	Node connection with NetLink Primary was detected.	Node connection with NetLink Primary was detected.	No action is necessary.		INF

**Table 2-19 Description of Alarm (Continued)**

Alarm No.	Type	Report	Name	Content of Alarm	Cause	Action	Recovery	Alarm Status
94	2	0	NetLink node secession detection.	Secession of the node detected with NetKink Primary.	Secession of the node detected with NetKink Primary.	No action is necessary.		INF
95	2	0	Data Base replication failure.	Because Secondary is in programming mode, the replication of DB cannot be executed.	Logging in with Secondary in the Web Pro or the PC Pro is possibility the cause.	Log out from secondary programming mode.		WAR
96	1	0	Data base recovery fail.	Error happened when DataBase recovery operation.  Backup/Restore	Lack of resource Memory, protected area, recovery data file corruption are possible reason for this.	Delete unnecessary file and restore open area, then try operation again.		WAR
97	2	0	DB recovery operation start.	Start Data base recovery operation.  Backup/Restore/Delete	Start Data base recovery operation.	No action is necessary.		INF
98	2	0	DB recovery operation finish.	Finish DataBase recovery operation. Backup/Restore/Delete	Finish Data base recovery operation.	No action is necessary.		INF
99	1	0	NetLink Configuration Error	This alarm occurs when the system tries to start as NetLink without MEMDB	PRG51-01-01 is set without PZ-ME50.	Install PZ-ME50 when NetLink is enable.		WAR
100	1	0	NetLink link error.	This alarm occurs when the primary system cannot communicate with secondary system	Primary system cannot communicate with Secondary system because of Network error	Primary system cannot communicate with Secondary system because of Network error		WAR

**Conditions**

- The entire terminal that has an Alarm Display setting can be set at PRG90-50-01.
- System Alarm Type is shown despite the setting done at 90-10-01. If multiple Alarm Display Setting is set, only one highest priority alarm will be shown on a LCD Display.
- The priority level (highest -> lowest): Alarm 55 > Alarm 7 > Alarm 5 > Alarm 30 > Alarm 8 > Alarm 52 > Alarm 29 > Free Demo License Period.

### 90-11: System Alarm Report

**Level:**  
**IN**

#### Description

Use **Program 90-11: System Alarm Report** to define the details of the system alarm report.

#### Input Data

Item No.	Item	Input Data	Default
02	<b>Report Method</b> When alarm reports are e-mailed, set this option to 1. E-mail address set in 90-11-08.	0 = No Report 1 = E-mail Address	0
04	--- Not Used ---		
06	<b>SMTP Host Name</b> When alarm reports are e-mailed, set the SMTP name (ex: smtp.yourisp.com). Contact your ISP (internet service provider) for the correct entry if needed.	Up to 255 Characters	No Setting
07	<b>SMTP Host Port Number</b> When alarm reports are e-mailed, set the SMTP host port number. Contact your ISP (internet service provider) for the correct entry if needed.	0~65535	25
08	<b>To E-mail Address</b> When alarm reports are e-mailed, set this e-mail address to which the report should be sent.	Up to 255 Characters	No Setting
09	<b>Reply Address</b> When alarm reports are e-mailed, set the e-mail address where replies should be e-mailed.	Up to 255 Characters	No Setting
10	<b>From Address</b> When alarm reports are e-mailed, set this e-mail address for the station sending the report.	Up to 255 Characters	No Setting
11	<b>DNS Primary Address</b> When alarm reports are e-mailed, set the DNS primary address.	0.0.0.0~255.255.255.255	0.0.0.0
12	<b>DNS Secondary Address</b> When alarm reports are e-mailed, set the DNS secondary address.	0.0.0.0~255.255.255.255	0.0.0.0

**Input Data**

<b>Item No.</b>	<b>Item</b>	<b>Input Data</b>	<b>Default</b>
13	<b>Customer Name</b> When alarm reports are e-mailed, enter a name to identify the particular system.	Up to 255 Characters	No Setting

### 90-36: Firmware Update Time Setting

**Level:**  
**IN**

#### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 90-36: Firmware Update Time Setting** to define the data for the firmware update feature. This data is available to set for the WebPro/PC Programming FW update feature. A compact flash card must be inserted in the CD-CP00 for this feature.

The following firmware is available to update with this feature:

- main.bin
- Dspdbu.bin
- dsp.bin

Item No.	Item	Input Data	Default	Description
01	<b>Firmware Update Schedule Time</b>	Year: 0~99	0	Set the time to update the firmware using a compact flash card. Time registration fails if an expired time is registered.
		Month: 0~12	0	
		Day: 00~31	0	
		Hour: 00~23	0	
		Minute: 00~59	0	
02	<b>Update mode</b>	0 = Non Active 1 = Activated	0	Activate the Firmware Update feature. If this setting is 1, new firmware on the compact flash card updates according to the setting at 90-36-01.
03	<b>Update Report</b>	256 characters max.	-	Output a report when the update is executed and saves one copy on the system. If a new update occurs, the new report overwrites the old report. Refer to the <a href="#">Sample Report</a> shown.

**Sample Report**

<b>Result</b>	<b>Report Display</b>
Update Success	Update is success. Update Time.
Update Fail	Update is fail. Since 'A' drive is not available.
Update Fail	Update is fail. Since main up is not exist on A drive.
Update Fail	Update is fail. Since Time is expired.

# Program 92 : Copy Program

## 92-01 : Copy Program

Level:  
IN

Program

92

### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 92-01 : Copy Program** to copy the data for one program to another multiline terminal, port, group, or other number. Refer to the following charts to see which programs can be copied.

### Input Data

Program Number	XX-XX
----------------	-------

Item No.	Item	Input Data
01	<b>Source Number</b> Enter the extension, trunk, group or other number from which the data is to be copied.	<input type="radio"/> For Trunk Base: Trunk Port Number 1~200  <input type="radio"/> For Trunk Group Base: Trunk Group Number 1~100  <input type="radio"/> For Extension Base: Extension Number (up to eight digits)  <input type="radio"/> For Department Group Base: Department Group Number 1~64  <input type="radio"/> For DSS: DSS Console Number 1~32
	<b>Destination Number (From)</b> Enter the first extension, trunk, group or other number to which the information is to be copied.	
	<b>Destination Number (To)</b> Enter the last extension, trunk, group or other number to which the information is to be copied. If the information is being copied only to one extension, trunk, group or other number, enter the information entered in the Destination Number (From) entry.	

The Copy Program is applicable only for the following programs:

#### Trunk Port Base

Program No.	Program Name	Note
14-01	Trunk Basic Data Setup	Copy all data except Trunk Name (Item 01).
14-02	Analog Trunk Data Setup	
14-04	Behind PBX Setup	
14-08	Music on Hold Source for Trunks	
14-09	Conversation Recording Destination for Trunk	
20-30	Timer Class for Trunk	
21-03	Trunk Group Routing for Trunks	
21-12	ISDN Calling Party Number Setup for Trunk	
21-21	Toll Restriction for Trunks	
21-22	CO Message Waiting Indication	
22-02	Incoming Service Type Setup	
22-03	Trunk Ring Tone Setup	
22-05	IRG Assignment for Normal Ring Trunk	
22-08	Second IRG Setup for Unanswered DIL / IRG	
31-05	Incoming Ring Tone Audible on External Speaker	

#### Trunk Group Base

Program No.	Program Name	Note
35-03	SMDR Port Assignment for Trunk Group	

#### Extension Base

Program No.	Program Name	Note
15-01	Extension Basic Data Setup (include Virtual Extension)	Copy all data except extension name (item 01).
15-02	Multiline Telephone Basic Data Setup	

<b>Program No.</b>	<b>Program Name</b>	<b>Note</b>
15-03	Single Line Telephone Basic Data Setup	
15-06	Trunk Access Map for Extension	
15-07	Programmable Function Key	
15-08	Incoming Virtual Extension Ring Tone Setup	
15-09	Virtual Extension Ring Assignment	
15-10	Incoming Virtual Extension Ring Tone Order Setup	
15-11	Virtual Extension Delayed Ring Assignment	
15-12	Conversation Recording Destination for Extension	
15-17	CO Message Waiting Indication	
15-18	Virtual Extension Key Enhancement Options	
15-20	LCD Line Key Name Assignment	
15-25	DESI-less Page Setup	
20-06	Class of Service for Extension	
20-29	Timer Class for Extension	
21-02	Trunk Group Routing for Extensions	
21-04	Toll Restriction Class for Extensions	
21-11	Hotline Assignment	
23-02	Call Pickup Groups	
23-03	Ringing Line Preference	
23-04	Ringing Line Preference for Virtual Extensions	
24-03	Park Group Assignment	
31-02	Internal Paging Group Assignment	
82-14	Handset/Headset Gain Setup for Multi-Line Telephone	

#### Department Group Base

<b>Program No.</b>	<b>Program Name</b>	<b>Note</b>
16-01	Department (Extension) Group Basic Data Setup	Copy all data except Group Name (Item 01).

35-04	<b>SMDR Port Assignment for Department Group</b>	
-------	--	--

### DSS Console Base

Program No.	Program Name	Note
30-01	<b>DSS Console Operation Mode</b>	
30-03	<b>DSS Key Assignment</b>	

### Door Box Base

Program No.	Program Name	Note
32-02	<b>Door Box Ring Assignment</b>	

### Conditions

- Using this program to copy a multiline terminal Programmable Function Keys, copies all keys whether or not they exist on the terminal to which the programming is being copied. This may cause confusion when trying to define a key which is already defined but which does not exist on the terminal (displays as DUPLICATE DATA). It is recommend to either clear these non-existent keys or copy only from an extension which has the same or fewer number of keys than the extension to which the programming is being copied.

### 92-04 : Extension Data Swap

**Level:**  
**IN**

#### Description

(This program is available only via telephone programming and not through PC Programming).

Use **Program 92-04 : Extension Data Swap** to swap data between two extensions.

#### Input Data

Item No.	Item	Input Data
01	1st Extension Number	Up to eight characters.
02	2nd Extension Number	

The following table lists Programs that use the Extension Data Swap function.

Program Number	Program Name
11-02	Extension Numbering
12-05	Night Mode Group Assignment for Extensions
13-03	Abbreviated Dial Group Assignment for Extensions
13-06	Station Abbreviated Dial Number and Name
15-01	Extension Basic Data Setup
15-02	Multi-Line Telephone Basic Data Setup
15-03	Single Line Telephone Basic Data Setup
15-06	Trunk Access Map for Extension
15-07	Programmable Function Key
15-08	Incoming Virtual Extension Ring Tone Setup
15-09	Virtual Extension Ring Assignment
15-10	Incoming Virtual Extension Ring Tone Order Setup
15-11	Virtual Extension Delayed Ring Assignment

<b>Program Number</b>	<b>Program Name</b>
15-12	Conversation Recording Destination for Extension
15-13	Loop Key Data
15-14	Programming One-Touch Keys
15-17	CO-Message Waiting Indication
15-18	Virtual Extension Key Enhance Options
15-19	System Telephone book Setup for Extension
15-20	LCD Line Key Name Assignment
15-25	DESI-less Page Setup
16-02	Department Group Assignment for Extensions
20-06	Class of Service for Extension
20-29	Timer Class for Extensions
21-02	Trunk Group Routing for Extension
21-04	Toll Restriction Class for Extension
21-07	Toll Restriction Override Password Setup
21-10	Dial Block Restriction Class per Extensions
21-11	Hotline Assignment
21-13	ISDN Calling Party Number Setup for Extension
21-15	Individual Trunk Group Routing for Extensions
21-18	IP Trunk (H.323) Calling Party Number Setup for Extension
21-19	IP Trunk (SIP) Calling Party Number Setup for Extension
21-20	SIP Trunk Call Discernment Setup for Extension
21-23	Out Going Key Sized Virtual Extension Priority Setup
22-04	Incoming Ring Group Setup
22-06	Normal Incoming Ring Mode
23-02	Call Pickup Group
23-03	Ringling Line Preference
23-04	Ringling Line Preference of Virtual Extension
24-03	Park Hold Group Assignment
24-06	Fixed Call Forward
24-07	Fixed Call Forward Off-Premise
24-08	Call Forward for Centrex

---

---

<b>Program Number</b>	<b>Program Name</b>
24-09	Call Forward Split Settings
26-04	ARS Class of Service
26-07	LCR Cost Center Code Table
